Connecting Your Telephone
1. Press the tone key to use tone dialing.
2. Press the pulse key to use pulse dialing.
3. Press the CID review key to display caller information.
4. Press the CID delete key to delete caller information.
5. Press the CID enter key to enter caller information.
6. Press the CID flash key to flash a call.

CAUTION: Disconnect the phone cord from the wall outlet when the telephone is not in use.

NOTICE: Use caution when installing or modifying telephone lines.

Troubleshooting Tips
1. If you experience difficulty using the telephone or if it is not functioning properly, check the
   following:
2. Ensure that the telephone is plugged into a wall jack.
3. Ensure that the telephone is not too far from the wall jack.
4. Ensure that the telephone is not connected to an extension phone.
5. Ensure that the telephone is not connected to a telephone company long distance provider.
6. Ensure that the telephone is not connected to an answering machine.
7. Ensure that the telephone is not connected to a telecommunication device.
8. Ensure that the telephone is not connected to a computer.
9. Ensure that the telephone is not connected to an office.
10. Ensure that the telephone is not connected to a home.

Industry Canada (I.C.) Notice
The Industry Canada label signifies that the device meets certain technical standards that are essential for the protection of the public safety and the prevention of interference to licensed radio communications services.

FCC RF Radiation Exposure Statement
This product is a high performance 2.4 GHz radio transmitter and receiver device that complies with FCC Part 15, Subpart B, Radiation Exposition Subpart B, and Subpart C. The device is intended to provide wireless communication between a telephone and a telephone system. The device is designed to operate within the parameters set forth in the FCC Part 15, Subpart B, Radiation Exposition Subpart B, and Subpart C.
