Call Waiting Features 38
Welcome

Congratulations on your purchase of the 24-148 cordless telephone. This phone is designed for reliability, long life and outstanding performance utilizing the latest in 2.4 GHz Spread Spectrum technology.

Note: Some illustrations in this manual may differ from the actual unit for explanation purposes.

Features

- 2.4 GHz Spread Spectrum Technology
- Secure Digital Transmission
- Integrated Answering Device
- Caller ID and Call Waiting Caller ID
- Advanced Caller ID with Call Waiting Options
- 50 Number Caller ID Memory
- 20 Number Memory
- 3 Line, 16 Character Backlit Handset Display
- 3 Redial Memories (up to 32 digits)
- Flash and Pause
- Pulse / Tone Dialing
- 10 Day Standby Battery Life
- 6 Hour Talk Time
- Handset Earpiece and Ringer Volume Control
- Base Speakerphone
- 3-Way Conference Operation
- Bilingual Language, option
Digital Spread Spectrum Technology utilizes a “wider frequency band” vs. a “single narrow band” used in standard digital transmissions. The 2.4 GHz frequency range was recently released to commercial communications. The result is a more secure conversation with the clarity of digital sound, extended range, and minimal interference from other cordless phones.

Random Code™ digital security automatically selects one of over 65,000 codes for the handset and base. These features enhance your phone’s security and also prevents unauthorized calls as a result of your phone being activated by other equipment.

Throughout this manual, terms such as Standby and Talk Mode are used. Below is the terminology explanation.

- **Standby Mode** - The handset is not in use, off the base and talk has not been pressed. A dial tone is not present and the display is blank.
- **Talk Mode** - The handset is off the base and talk has been pressed enabling a dial tone. Talk appears in the display.

Uniden® is a registered trademark of Uniden America Corporation.
Random Code™ and Auto Talk™ are trademarks of Uniden America Corporation.
Controls and Functions

1. Handset Antenna
2. Headset Jack Cover
3. Handset Battery Compartment
4. Handset Earpiece
5. LCD Display
6. Volume Up Key
7. Memory Key

44. Phone Jack
Read This First

This cordless telephone must be set up before use. Follow these steps:

**Step 1 (page 7)**
Unpack the telephone and accessories.

**Step 2 (page 8 to 9)**
Next, choose the best location to set up the base unit.

**Step 3 (page 10 to 11)**
Then, insert the battery pack into the handset. You must charge the battery pack for 15-20 hours before plugging into the phone line and using the phone.

**Step 4 (page 12 to 13)**
Finally, set the Caller ID options and store your area code in the memory to use the Caller ID service.

*Note:* Skip the area code setting if your calling area requires 10-digit dialing.

---

**About the digital security code**
This cordless telephone uses a digital security code to prevent unauthorized access to your base unit. This security code prevents other cordless handsets from making calls through your base unit. A random security code will be assigned automatically between your base unit and handset when you charge the battery pack for the first time.

If you want to reset the security code, see page 49.
Checking the Package Contents

Make sure you have received the following items in the package. If any of these items are missing or damaged, contact the Uniden Parts Department (see below).

- Base unit
- Handset
- AC adapter (AD-313)
- Rechargeable battery pack (BT-800)
- Telephone line cord
- Beltclip

Also included:
- This Owner’s Manual
- Quick Reference Guide
- Registration Card

Uniden Parts Department
(800) 554-3988
Hours: M-F 7:00 AM to 5:00 PM CST.
We can also be reached on the web at www.uniden.com
Setting Up the Base Unit

Do the following steps:
- Choose the best location
- Connect the base unit
- Choose the dialing mode

Choose the best location

Before choosing a location for your new phone, read “INSTALLATION CONSIDERATIONS” in “PRECAUTIONS & WARRANTY”. Here are some important guidelines you should consider:

- Avoid heat sources, such as radiators, air ducts, and sunlight
- Avoid television sets and other electronic equipment
- Avoid noise sources such as a window by a street with heavy traffic
- Avoid microwave ovens
- Avoid excessive moisture, extremely low temperatures, dust, mechanical vibration, or shock
- Avoid personal computers
- Avoid other cordless telephones
- Choose a central location

- After installing the battery pack in the handset, you should charge your handset for **15-20 hours before using the phone**. Once the handset battery pack is fully charged, connect the telephone line cord to the base and telephone wall outlet.
- The location should be close to both a phone jack and a continuous power outlet which is not switchable.
- Keep the base and handset away from sources of electrical noise such as motors and fluorescent lighting.
- Be sure there is sufficient space to raise the base antenna to a vertical position.
Connect the base unit

1. Connect the telephone line cord to the TEL LINE jack and to a telephone outlet.

2. Connect the AC adapter to the DC IN 9V jack and to a standard 120V AC wall outlet.

3. Set the base unit on a desk or tabletop. Place the handset on the base unit as shown. Then raise the antenna to a vertical position.

Tip: If your telephone outlet isn’t modular, contact your telephone company for assistance.

Choose the dialing mode

Depending on your dialing system, set the PULSE-TONE switch as follows:

<table>
<thead>
<tr>
<th>If your dialing system is</th>
<th>Set the switch to</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tone</td>
<td>TONE</td>
</tr>
<tr>
<td>Pulse</td>
<td>PULSE</td>
</tr>
</tbody>
</table>

If you aren’t sure of your dialing system, make a trial call with the PULSE-TONE switch set to TONE. If the call connects, leave the switch as is; otherwise, set to PULSE.
Installing the Handset Battery Pack

Charge the battery pack for 15-20 hours before plugging the phone line into your phone.

1. Press in on the battery cover release and slide the cover down until it comes off.

2. Connect the battery pack connector with the correct polarity (black and red wires), then insert the battery pack into the battery compartment.

3. Slide the battery cover forward until it snaps into place.

4. Place the handset on the base as shown.

5. Make sure that the status LED lights. If the LED doesn’t light, check to see that the AC adapter is plugged in and that the handset makes good contact with the base charging contacts.

Use only the Uniden Battery (BT-800) supplied with your phone. Replacement batteries are also available through the Uniden Parts Department (See page 7).
Battery use time (per charge)

From fully charged
• 6 hours continuous use.
• 10 days when the handset is in the standby mode.

When the battery charge becomes low

When the battery pack is very low and needs to be charged, the phone is programmed to eliminate functions in order to save power. If the phone is not in use, “Low Battery” flashes and none of the keys will operate. If the phone is in use, “Low Battery” flashes and the handset beeps.
Complete your conversation as quickly as possible and return the handset to the base unit for charging.

Cleaning the charging contacts

To maintain a good charge, it is important to clean the battery contacts on the handset and base unit with a dry cloth or a pencil eraser about once a month.

Do not use any liquids or solvents.

note

Even when the battery pack is not being used, it will gradually discharge over a long period of time. For optimum performance, be sure to return the handset to the base unit after each telephone call.

• If you must replace the battery pack during a telephone call, complete the replacement of the battery pack within 30 seconds, and you can return to the original call.
Setting Caller ID Options/Language

There are three Caller ID setup options available: AutoTalk, CIDCW (Caller ID on Call Waiting), and Area Code. (See page 13 for Area Code setup instructions.)

**AutoTalk** allows you to answer the phone without pressing the (talk) button. If the phone rings when AutoTalk is on, simply remove the handset from the base and the phone automatically answers the call. Or if the handset is not on the base, press any key to answer the call. If the phone rings when AutoTalk is off, you must press (talk) to answer the call.

**Caller ID on Call Waiting (CIDCW)** performs the same as regular Caller ID on a call waiting number. Call waiting options allow you to handle call waiting calls in six different ways. (See page 38.) You must subscribe to CIDCW from your local phone company in order to use this feature. The Call Waiting options are a separate service available through your phone company.

**Language** option can be used to choose the language of your display. You can select either English or French.

To change your Caller ID options/Language:

1. Press (options) in the standby mode. The following screen appears.

2. Use (select/channel) or a number key (1-3) to move the pointer to the selection that you would like to change. Press (select/channel) to toggle between “On” and “Off” for “Auto Talk”. For “CIDCW”, choose “On”, “Off”, or “Opt” depending upon the type of service to which you subscribe.

3. To set up the language of your display, press (select/channel) or the number key (4) to move the pointer to “Language”. Press (select/channel) to select “Eng” (English) or “Fr.” (French).

4. After you have made your Caller ID selections, press (options) and return the handset to the base.
**Entering Your Area Code**

If you enter a 3-digit area code number in the “Area Code” option, your local area code does not appear in Caller ID messages. Do not program this option, if your calling area requires 10-digit dialing.

When reviewing Caller ID messages, you will see only the local seven digit number. For calls received from outside your local area code, you will see a full 10-digit number.

1. When the phone is in the standby mode, press \( \text{options} \). The Caller ID setting screen appears.
2. Press \( \text{3} \) to select “Area Code” or press \( \text{Y} \).
3. Press \( \text{select/channel} \).
4. Use the number keypad (0 to 9) to enter the 3-digit area code.
5. Press \( \text{select/channel} \). A tone sounds and the displayed area code is entered.
6. Press \( \text{options} \) to complete the setting or return the handset to the base. The handset returns to the standby mode.

When the area code has already been stored in memory, the stored area code will be displayed. To change it, use the \( \text{delete} \) and number keypad to enter the new area code. Then press \( \text{select/channel} \). To complete the setting, press \( \text{options} \) or return the handset to the base unit.
Making a Call

Dialing from Standby Mode

1. Enter the phone number.

2. Press (talk). "Talk" flashes on the display. Then current volume setting is displayed.

Example: • Volume Medium

• Volume Medium and Ringer Off.

3. The number is dialed. After about 5 seconds, the call-time display appears.

4. To hang up, press (talk) or place the handset on the base. The call-time will be displayed for about 5 seconds.

Other Operations

<table>
<thead>
<tr>
<th>To</th>
<th>Do this</th>
</tr>
</thead>
<tbody>
<tr>
<td>To improve the reception</td>
<td>Press (select/channel) during a call.</td>
</tr>
<tr>
<td>To adjust the earpiece volume</td>
<td>Press (△) or (▽) during a call.</td>
</tr>
<tr>
<td>To temporarily switch to tone dial (when the base is set to pulse mode)</td>
<td>Press (#/tone/•). The following numbers will be sent as tone dialing.</td>
</tr>
<tr>
<td>To enter a pause within the dialing sequence</td>
<td>Press (redial/p). &quot;P&quot; appears in the display which represents a pause.</td>
</tr>
</tbody>
</table>
Dialing from Talk Mode

1. Press (talk). “Talk” flashes on the display. Then the current volume setting is displayed.

   Example: Volume Medium.

   Note: If you set the ringer to off, “<Ringer Off>” appears on the display.

   After about 5 seconds, the call-time display appears.

2. Dial the phone number. Example: Enter 8002971023

3. To hang up, press (talk) or place the handset on the base. The call-time will be displayed for about 5 seconds.
Receiving a Call

From the handset

1. The phone rings. "Incoming Call" appears on the display.
3. Talk with the caller.
4. To hang up, press (talk) or place the handset on the base. The call-time will be displayed for about 5 seconds.

AutoTalk when ringing
When the AutoTalk setting is on and there is an incoming call, simply lift the handset from the base unit to answer the phone. See “Setting Caller ID Options” on page 12 for more details.

Any key answer when ringing
When the AutoTalk setting is on and the handset is off the base, press any handset key to answer the incoming call.

Call Waiting
Note: You must subscribe to Call Waiting service to use this feature.
When a call is received during a telephone call already in progress, press (flash) to switch to the new call. If you also subscribe to Call Waiting on Caller ID, you will see the name and number of the caller in call waiting. (See page 37.)
1. The phone rings. The **status** LED on the base flashes.

2. Press **(speaker)** and begin speaking. The **speaker** LED lights.

3. To hang up, press **(speaker)**.
Adjusting the Volume

**Handset ringer tone and volume**
Press (A) or (Y) in Standby mode to select one of four ringer tone and volume combinations.

**Earpiece volume**
Pressing (A) or (Y) during a call will change the earpiece volume of the handset. This setting will remain in effect after the telephone call has ended.

```
Volume Maximum ← Volume High ← Volume Medium ← Volume Low
```

**note** When you press (A) in Maximum mode or (Y) in Low mode, an error tone sounds.

**Ringer off**
During the standby mode or tone/volume setting, press and hold (Y) until the phone beeps and “Ringer Off” appears. To turn the ringer back on, simply press (A) or (Y). “Ringer A High” appears.

**Base ringer switch**
This switch turns the base ringer on or off.

**Base speaker volume**
To control the speaker volume of the base, adjust the volume (A) and (Y) as desired.
Redialing a Call
The last three phone numbers dialed can be quickly redialed.

Redialing from Standby Mode

From the Handset
1 Press (redial/p).
   The phone number that was last dialed appears on the display.
2 Press (redial/p) again.
   Each press of (redial/p) will display one of the last three numbers dialed.

3 Press (talk). “Talk” appears on the display, then the volume setting is displayed.
4 The selected number is dialed. After about 5 seconds, the call-time display appears.
5 To hang up, press (talk) or place the handset on the base. The call-time will be displayed for about 5 seconds.

If the number exceeds 32 digits, only the first 32 digits are retained for redialing.

Press and hold (delete) to delete the displayed redial number.

Refer to terminology explanation on page 3, if necessary.
Redial from Talk Mode

1 Press \textit{talk}. “Talk” and the volume setting appears on the display.

2 Press \textit{redial/p}. The last number dialed will be displayed and redialed.

3 To hang up, press \textit{talk} or place the handset on the base. The call-time will be displayed for about 5 seconds.

Traveling Out-of-Range

During a call, as you begin to move your handset too far from your base unit, noise increases. If you pass the range limits of the base unit, your call will terminate within 30 seconds.
Storing Phone Numbers and Names

Memory Dialing allows you to dial a number using just a few key strokes. Your 24-148 stores up to 20 names/numbers in the handset.

With the Handset

1 Press and hold (memory) until “Memory Store” is displayed.

2 Press \( \uparrow \) and \( \downarrow \) or enter a two-digit number (01 - 20) to select the memory location where you would like to store the number.

3 Press \( \text{select/channel} \). The following screen appears and a cursor flashes indicating that the display is ready for the name to be entered.

   If this screen appears, the selected memory location is already stored. Then you must either change the entry in this location, clear the entry in this location, or select “Go Back” to choose another location.

4 Use number keys, \( \# \), \( * \), or \( \\text{delete} \) to enter the name. The name cannot exceed 13 characters.

   • See the “Steps for entering names and special characters”. (See pages 23-24)
   • Use \( \# \) and \( * \) to move the cursor to the desired location.
   • Use \( \\text{delete} \) to delete characters as needed.
   • Press and hold \( \\text{delete} \) to delete all the characters.
   • If a name is not required, go to step 5. \( \text{Memory XXX} \) will be stored as the name (XXX is the location number you selected).
5 Press \texttt{select/channel}). “Store Number” is displayed. The cursor flashes indicating that the display is ready for the number to be entered.

6 Use the number keypad to enter the phone number. The phone number cannot exceed 20 digits.
   - Use \texttt{redial/p} to enter pause in the dialing sequence. The display shows a “P”. Each pause counts as one digit and represents a two second delay of time between the digits.

7 Press \texttt{select/channel}). The handset beeps and displays the confirmation screen. Memory storage is complete. For example, if you store a name and number into memory location number 07, the display shows “Memory07 Stored”. After about 2 seconds, “Memory Store” is displayed.

8 Press \texttt{memory} to return to standby mode.

\textbf{[ 22 ] MEMORY DIALING}
Steps for Entering Names and Special Characters

Refer to the letters on the number keys to select the desired characters.

With each press of a numeric key, the displayed character appears in the following order: Upper case letters first, lower case letters next and finally the number corresponding to the key.

If you make a mistake while entering a name

Use (#/tone/#) or (#) to move the cursor to the incorrect character. Press (delete) to erase the wrong character, then enter the correct character. To delete all characters, press and hold (delete).
For example, to enter *Uniden*:

1. Pick up the handset and press and hold (memory).
2. Enter a number or press (A), (Y) to select a memory location number.
3. Press (select/channel).
4. Press (6) twice.
5. Press (6) five times.
6. Press (4) six times.
7. Press (3) four times, then press (#) to move the cursor to the right.

**Note**: If the next character uses the same number key, you must press (#) to move the cursor over. Otherwise, the next time you press the number key, it changes the character that was previously set.

8. Press (3) five times.
9. Press (6) five times.
10. When finished, Press (select/channel).

To continue to store the telephone number, proceed to step 6 on page 22.
Making Calls with Memory Dialing

Memory dialing from Standby Mode

1 Press (memory).
The handset displays your programmed memory locations.

2 Press [A] and [V] or enter a two-digit number (01 - 20) to select the memory location you would like to dial.

3 Press (talk). “Talk” and the volume setting appear on the display. Then the displayed number is dialed.

Display a Programmed Number

Use (A) and (/tone/A) to toggle between the names display and the numbers display.

<table>
<thead>
<tr>
<th>Program name</th>
<th>Program number</th>
</tr>
</thead>
<tbody>
<tr>
<td>01 UNIDEN CORP</td>
<td>01 8002971023</td>
</tr>
<tr>
<td>02 JOHN DOE</td>
<td>02 5452930</td>
</tr>
<tr>
<td>03 MOM AND DAD</td>
<td>03 8175551212</td>
</tr>
</tbody>
</table>

When the stored phone number has 14 or more digits, “” is displayed next to the 12th digit. Press (A) to see the extra digits and (/tone/A) to return.

• If you press (select/channel) before (talk), you can confirm the name and number stored in the selected memory location. To exit this mode, press and hold (delete) until the display clears.

• To exit the memory function without dialing, press (memory). The handset returns to standby.

• Whenever you are using a menu screen, you must press a key within 20 seconds or the phone will return to standby.
Memory dialing from Talk Mode

1. Press \( \text{Talk} \). “Talk” and the volume setting appear.

2. Press \( \text{memory} \).

3. Enter a two-digit number (01 - 20) to select the memory location of the desired phone number. The selected phone number is displayed. Then the number is dialed.

4. To hang up, press \( \text{Talk} \).

Chain Dialing

The 20 memory locations on the handset are not limited to phone numbers. You may want to store in memory a group of numbers (up to 20 digits) that you need to enter once your call connects. This is referred to as Chain Dialing. An example of this is a bank account number. Once you have called your bank, when you are prompted to enter the account number, simply press \( \text{memory} \) and then the location where the special number has been stored. Store your special number with identifying name in memory as you would a phone number (Refer to “Storing Phone Numbers and Names” on page 21). Enter a pause as necessary in the sequence.

A pause counts as one digit and represents a two second delay in time between digits as they are sent.
Editing a Stored Name and/or Phone Number

1. Press and hold (memory) until “Memory Store” is displayed.

2. Press (▲) and (▼) or enter a two-digit number (01 - 20) to select the memory location you would like to edit.

3. Press (select/channel). The following screen appears with the memory location number that you have selected in the display.

4. Press (▲) or (▼) to select “Edit Memory”, then press (select/channel). The following screen appears. The cursor flashes indicating that the display is ready for the name to be edited. When a name has not been stored, the cursor appears at the beginning of the second line.

5. Use the number keypad, (✱), (✱tune/✱), or (delete) to edit the name. (See page 21.) To edit only the phone number, skip this step.

6. Press (select/channel). The following screen appears. The cursor flashes indicating that the display is ready for the number to be edited.
7 Use the number keypad, \texttt{redial/p} or \texttt{delete} to edit the phone number. The phone number cannot exceed 20 digits. (See page 22.) If you don´t want to change the phone number, skip this step.

8 Press \texttt{select/channel}. The handset beeps and displays the confirmation screen. The memory storage is complete. For example, if you store a name and number into memory location number 01, the display shows “Memory01 Stored”. After about 2 seconds, “Memory Store” is displayed.

9 Press \texttt{memory} to return to standby mode.
Erasing a Stored Name and Phone Number

1. Press and hold memory until “Memory Store” is displayed.

2. Press ▲ and ▼ or enter a two-digit number (01 - 20) to select the memory location you would like to erase.

3. Press select/channel. The following screen appears with the memory location number that you have selected in the display.

4. Press ▼ to move the pointer down to “Delete Memory” command line.

5. Press select/channel. The following confirmation screen appears.

6. Press ▲ to move the pointer to “Yes”.

7. Press select/channel or delete. There is a confirmation tone and the entry is deleted. The following screen appears.

8. After a few seconds the display returns to the “Memory Store” screen. You may select another number to erase (return to step 2) or press memory to return to standby.
3-way Conferencing

The Uniden 24-148 permits 3-way conversations between the handset, base, and outside line.

**When speaking on the handset**

1. Press \textit{speaker} on the base to join the 3-way conversation.
2. To hang up, press \textit{speaker} on the base. The handset will still be connected to the call.

**When speaking on the base**

1. Press \textit{talk} on the handset to join the 3-way conversation.
2. To hang up, return the handset to the base, or press \textit{talk} on the handset. The base will still be connected to the call.

\textit{note}

Pressing the \textit{speaker} key on the base while dialing with the handset will set the 3-way conversation mode, and dialing is not affected.
Paging

To locate the handset

1. Press \( \text{page} \) on the base.

2. The handset beeps for 60 seconds.
   The following screen appears:
   
   \[ \text{Paging} \]

3. Press any key on the handset or \( \text{page} \) on the base, or return the handset to the base to end the page.

Note:
When an incoming call is received during paging, paging is canceled and the telephone is switched to the incoming call.
Caller ID

You must subscribe to Caller ID service to use this feature.
When the telephone rings, the Caller ID feature allows you to view the caller’s name and phone number on the display before you answer the phone. The handset displays the phone number of the incoming call, the name, time, and the number of calls. Additionally, you can dial the displayed number and store the information for memory dialing. Make sure you have turned on the Caller ID/Call Waiting feature (See page 12).

When the Telephone Rings

1. When the Caller ID message is received, the display shows the caller’s phone number. The incoming call information is stored in the Caller ID record. If the Caller ID service includes the caller’s name, the caller’s name appears on the display (up to 15 letters).

Here are some typical displays:

<table>
<thead>
<tr>
<th>When the phone number and name data are received</th>
<th>When invalid data is received</th>
</tr>
</thead>
</table>
| Incoming Call
  UNIDEN CORP
  800-297-1023                               | Incoming Call
  Incomplete Data |

CALLER ID FEATURES

Viewing the Caller ID Message List

The Caller ID list stores information for up to 50 incoming calls - even unanswered calls.

1. Press (cid) in the standby mode.
   The summary screen appears.
   The screen shows the number of new messages and total messages.

2. Press ( ) to display the latest Caller ID message.

3. Press ( ) to see the next message. Or press ( ) to see previous message.

4. Press (cid) to return to standby.

When an unknown name is received

When an unknown number is received

Incoming Call
Unknown Name
800-297-1023

Incoming Call
UNIDEN CORP
Unknown Number

• In Caller ID operation, if no key is pressed within 20 seconds, an error tone sounds and the telephone returns to the standby mode.

• If a call comes in via a telephone system that does not offer Caller ID service, no information is stored.

• Each message can be up to 15 characters for the phone number and the name.

Data errors appear as “ ”.

When the ringer is set off, “(Ringer Off)” appears.

2 When you pick up the phone, the display changes to “Talk”. (See page 14)

note
Deleting Information from the Caller ID List

The 24-148 stores up to 50 messages. If the phone receives the 51st message, the oldest one in the list is automatically deleted. Caller ID data can also be deleted manually.

Deleting a Caller ID message

1. Press \texttt{cid}. Display the message to be deleted from the Caller ID list by pressing \texttt{A} or \texttt{V}.
2. Press \texttt{delete}.
3. Press \texttt{A} or \texttt{V} to select "Yes" or "No".
4. Press \texttt{select/channel} or \texttt{delete}.

When the pointer is at "Yes":
A tone sounds and the Caller ID message is deleted. The Caller ID message is then displayed.

When the pointer is at "No":
The display returns to the Caller ID message.

Deleting all Caller ID names/numbers

1. Press \texttt{cid}.
2. Press \texttt{delete}.

\begin{itemize}
\item While using the "Delete All?" or "Delete Message?" screen if no key is pressed within 20 seconds, an error tone sounds and the telephone returns to standby.
\item If there is an incoming call or page, the deleting operation is canceled and the telephone is set to receive the incoming call or page.
\end{itemize}
Using the Caller ID List

Calling a party from the Caller ID list
You can place a call from the Caller ID list. The 24-148 stores up to 50 messages.

1 Press \( \text{(cid)} \). Select the phone number that you want to dial by pressing \( \text{A} \) or \( \text{B} \).

2 Press \( \text{(talk)} \). The displayed phone number dials automatically.

Long Distance calls and Area Code Setting/Cancellation
Pressing \( \text{1} \) while the incoming call information is displayed (in step 1) will set or cancel a long distance call. Pressing \( \text{2} \) will set or cancel an area code setting.

Dial edit
You can edit the phone number of the Caller ID data when you press \( \text{(select/channel)} \) after step 1.

\[ \text{note} \]

- You cannot make a call from the Caller ID list if your 24-148 is connected to a private branch exchange (PBX).
- When a long distance call has been set, “1” appears in the display.

3 Press \( \text{A} \) or \( \text{B} \) to select “Yes” or “No”.

4 Press \( \text{(select/channel)} \) or \( \text{(delete)} \).

When the pointer is at “Yes”:
A tone sounds and all stored Caller ID messages are deleted.

When the pointer is at “No”:
The display returns to the summary screen.
Storing Caller ID messages in Memory dialing

Messages shown in the Caller ID list can be stored in memory dialing. Using the incoming call information (i.e., Caller ID list), the phone number of the party on the Caller ID list can be stored in memory dialing.

1. Press \textit{cid}.
   Select the phone number to be stored from the Caller ID list by pressing \textit{\textup{\textrightarrow{1}}{} \textup{\textrightarrow{2}}}{} or \textit{\textdownarrow{1}}{}\textdownarrow{2}{}.

2. Press \textit{\textup{memory}}.

3. Press \textit{\textup{\textrightarrow{1}}}{} or \textit{\textdownarrow{1}}{} and \textit{\textup{\textrightarrow{2}}}{} or \textit{\textdownarrow{2}}{} to enter a two-digit number (01 - 20) to select the memory location to be stored.

4. Press \textit{\textup{select/channel}}.
   A tone will sound. The number is stored in memory, and the display returns to the Caller ID list.

If a message has already been stored in the selected memory number location, a confirmation screen is displayed. Press \textit{\textup{\textrightarrow{1}}}{} to select "Yes". Press \textit{\textup{select/channel}} to overwrite. The display returns to the Caller ID list.

- You can not store a Caller ID message if no phone number appears in the message.
- If there is an incoming call or page, memory storage is canceled and the telephone is set to receive the incoming call or page.
Using “Caller ID on Call Waiting” Service

“Caller ID” and “Call Waiting” are separate services. CIDCW (Caller ID on Call Waiting) performs the same as regular Caller ID on a Call Waiting number. You must subscribe to the “Caller ID on Call Waiting (CIDCW) services” before you can use the following features. The “Call Waiting” service can also be used independently. Please contact your local telephone company for details.

1 When a new incoming call arrives during your current telephone call, the phone number and the name of the caller are displayed.

2 Press (flash). You will be able to talk with the second caller. The first caller will be put on hold.

3 To return to the first caller, press (flash) again.
Call Waiting Features

Your 24-148 gives you new options for call waiting. At the touch of a button, you can ask the caller to hold or conference them into your current call. You may be required to subscribe to call waiting and call waiting options to use these features. Not all features are available in all areas. Check with your local telephone company for details.

1. When you receive a call waiting call, press \( \text{options} \) for a list of options.

2. Press the \( \text{A} \) or \( \text{T} \) key or number keys to select an option.

3. Press \( \text{select/channel} \). A confirmation screen will appear.

Your 24-148 is pre-programmed with six call waiting options. You may select to ask the calling party to hold, send them a busy message, or conference them into the current call. You may also select to answer and drop the first caller or, at any time, choose to drop the first or drop the last caller.

Check with your local telephone company for a full list of options.
The Integrated Answering Device

The 24-148 has a built-in answering system that answers and records incoming calls. You can also use your answering system to record a conversation, leave a voice memo message for others who use the phone, or to announce a special message to callers when you’re away from your phone.

Features

- Digital Tapeless Recording
- 15 Minutes of Recording Time
- Selective Greetings (Outgoing Messages)
- Message Received Time and Day Announcement
- Remote Message Retrieval and Room Monitor
- Toll Saver
- Conversation Recording

Digital Tapeless Recording allows you to quickly review, save or delete the messages. You’ll never have to worry about a tape wearing out, jamming, or resetting improperly.

The Integrated Answering System is easy and convenient to use, but please read through all of the instructions carefully.
Setting Up Your Answering System

Turning the answering system on/off

1. To turn the answering system on, press (ans on/off). The current greeting message will be played and a tone will sound.

2. To turn the answering system off, press (ans on/off) again.

Setting the clock

The clock on 24-148 Answering System starts when power is supplied to the base. Follow these steps to set the clock to the correct time.

1. Press and hold (clock set) until a tone sounds.

2. First, press (skip) or (repeat) repeatedly until the correct day of the week is announced. (Number 0 through 6 displays on the base as each day is announced.) Press (clock set) again to select the day.

3. Next, press (skip) or (repeat) repeatedly until you hear the correct hour setting. Numbers 1 through 12 display on the base as each hour is announced. Press (clock set) again to select the correct hour.

4. Press (skip) or (repeat) repeatedly until you hear the correct minute setting. Numbers 0 through 59 display on the base as each minute is announced. Press (clock set) again to select the correct minute.
5 The LED displays \( g \) or \( p \). Press (skip) or (repeat) until you hear the correct AM/PM setting.

6 Press (clock set) again to end the time/day setting. The 24-148 announces the day and time that you have set.

**Setting your greeting**

When you receive a call, the answering system automatically plays either a prerecord message or your own greeting.

▼ **Preset Message**

The following message is prerecorded: “Hello, no one is available to take your call. Please leave a message after the tone.”

▼ **Recording a personal outgoing message (Greeting)**

1) Press and hold (greeting) until you hear a tone. Start recording your message immediately after you hear the tone end.

2) When you finish recording your message, press (greeting) or (play). A tone sounds and your message plays back on the phone.

▼ **Choosing between the two outgoing messages**

1) Press (greeting) to play the outgoing message.

2) Press (greeting) again while the message is playing. This switches between the two options.
Selecting the message record time

You can set your answering system to record messages up to one or four minutes long.

One minute option: move the REC TIME switch to 1.
Four minutes option: move the REC TIME switch to 4.

Announce only feature:
The announce only feature plays an outgoing message, but it will not allow the caller to leave a message. Move the REC TIME switch to the ANN position. The message counter LED displays “R” when the system is on standby. Prerecorded outgoing message for Announce only feature is:
For example: “Hello, no one is available to take your call.” (twice)

Selecting a PIN code

To play your messages from a remote location, you will need to enter a two-digit Personal Identification Number (PIN) code (00-99). To select a PIN, perform the following steps.

1 On the base, press and hold (pin set) until a tone sounds and the LED displays 00.

2 To set the first number, press (skip) or (repeat) repeatedly to scroll from 0 to 9. When the desired number appears in the display, press (pin set).

3 To set the second number, press (skip) or (repeat) to scroll from 0 to 9. When the desired number appears in the display, press (pin set). Then the entered PIN code is announced.
Setting ring time switch

The ring time/toll saver switch allows you to set the number of rings the caller hears before the answering system plays your outgoing message. You can set the switch to answer after two rings or after four rings. Once the greeting has started, you can stop it when you pick up the call at the handset or base. In the **TS** (Toll Saver) position, the answering system picks up after two rings if you have new messages, and after four rings if there is none. This way, if you call long distance to check your messages, you can hang up after the third ring to avoid billing charges.

*note*

If you answer at another phone extension and the greeting has started, you cannot stop the message. Wait until your greeting is complete before starting your conversation.
Using Your Answering System

Playing your messages

The base LED display shows the number of total messages. If the display is blinking, then there are new messages waiting for you. The 24-148 is designed to play your new messages first. After you play your new messages you can then play your old messages.

1. Press \( \text{play} \). The system announces the number of new and old messages, then the incoming messages are played. The time and day each message was received is announced after the message is played.

2. When all new messages have played, a tone is heard. The message counter LED stops flashing to indicate that all of the new messages have been reviewed.

3. After you have reviewed all your messages, you can play your old messages. Press \( \text{play} \) and follow the instructions above.

Repeating a message

1. Press \( \text{play} \) to review your message. The number of stored messages is announced.

2. After a message has played for more than two seconds, (four seconds for remote access) press \( \text{repeat} \) to repeat the message. If you press \( \text{repeat} \) before two seconds (four seconds for remote access) the system repeats the previous message.

3. Press \( \text{play} \) at any time to stop reviewing messages and return to standby.
Skipping a message

1. Press (play>) to review your messages. The number of messages is announced.

2. Press (skip>>) at anytime to skip to the next message.

3. Press (play>) at any time to stop reviewing your messages and return to standby.

Deleting a message

- Deleting an individual message
  1. Press (play>) to review your message.

  2. If you decide to delete a message, press (delete) anytime during the message. The system beeps and immediately goes to the next message.

- Deleting all messages
  Press and hold (delete) while the system is in standby. A tone sounds when all messages are deleted. If there are any messages you have not reviewed, you can not delete all messages at once. An error tone occurs.
Voice memo

The voice memo function allows the user to record a message (up to 10 minutes) on the base.

1. Press and hold \( \text{voice memo} \) until you hear a tone. The message counter LED blinks.

2. Speak into the microphone.

3. When you have finished, press \( \text{voice memo} \) or \( \text{play} \) to stop recording. The system returns to standby.

4. To play voice memo, press \( \text{play} \).

Recording a conversation

You can record up to 10 minutes of conversation while you are making your call from the handset.

1. During the conversation from the handset, press and hold \( \text{voice memo} \) on the base. The unit begins recording and the LED blinks. Both parties can hear tones every 15 seconds.

2. To stop the recording, press \( \text{voice memo} \), \( \text{play} \) or \( \text{talk} \), or return the handset to the base.

\[ \text{note} \quad \text{You cannot record a conversation while you are speaking on the base.} \]
Remote access away from home

You can operate your answering system from a remote location using any touch-tone telephone. Use this function to check for recorded messages, to play or delete messages, to record a new outgoing message, and to monitor sounds in the room.

1. Call your telephone number.
2. While the greeting message is played, press # and your PIN code within 2 seconds.
   If the answering system is off, let it ring 10 times. The tone sounds. Then, press # and your PIN code within 2 seconds.
3. The answering system announces the time and day and the number of messages stored in memory. Then the message playback automatically begins.
4. You may continue to listen to your message, or you may select a command from the following chart.

<table>
<thead>
<tr>
<th>Command</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td># then 1</td>
<td>Repeat a message</td>
</tr>
<tr>
<td># then 2</td>
<td>Playing your messages</td>
</tr>
<tr>
<td># then 3</td>
<td>Skipping a message</td>
</tr>
<tr>
<td># then 4</td>
<td>Deleting a message</td>
</tr>
<tr>
<td># then 5</td>
<td>Stop message playback</td>
</tr>
<tr>
<td># then 6</td>
<td>Answering system on</td>
</tr>
<tr>
<td># then 7</td>
<td>Voice memo record/stop (up to 4 minutes recording time)</td>
</tr>
<tr>
<td># then 8</td>
<td>Greeting message record/stop</td>
</tr>
<tr>
<td># then 9</td>
<td>Answer system off</td>
</tr>
<tr>
<td># then *</td>
<td>Room monitor</td>
</tr>
</tbody>
</table>

5. After all of your messages have played, or the playback time exceeds 4 minutes, you will hear intermittent beeps indicating that the system is in the command waiting mode. You may enter another command at this time from the chart above.

Note:
- During the remote operation, \( \text{RC} \) displays on the base.
- You must enter a command within 15 seconds of entering command waiting mode. Otherwise the answering system automatically hangs up and returns to standby.
- The system will only playback messages for four minutes and then it returns to command waiting mode. To continue playing your message, press # then 2 again within 15 seconds.
6 When you finish, hang up to exit the system.
   The answering system automatically returns to standby.

**Remote room monitor**

You can call your answering system from any touch-tone phone and monitor sounds in the room where your base is installed.

1 Call your telephone number.
2 While the greeting message is playing, press # and your PIN code.
3 The answering system begins announcing the time and day.
4 Press # then 5 to stop the messages.
5 Press # then *. You hear sounds in the room where your phone is installed.
   After 15 seconds, the answering system returns to the command waiting mode.
6 Press # then * to monitor the room for another 15 seconds. Or select another remote function. Or hang up to exit the system. The answering system automatically returns to standby.

**Turn on the answering machine remotely**

If you have forgotten to turn on your answering machine, you can turn it on remotely from any touch-tone telephone.

1 Call your telephone number.
2 Wait ten rings until the machine answers.
3 Press # and enter your PIN code within 2 seconds. The answering system begins to announce the time and day.
4 Press # then 6 to turn the answering system on.
5 Hang up the phone and subsequent calls will be answered by the machine.
Changing the Digital Security Code

The digital security code is an identification code used to connect the handset and the base unit. Normally, setting the code is not necessary. The first time you charge your handset, the security code is automatically set. (See page 6.) In the rare situation that you suspect another cordless telephone is using the same security code, you can change the code.

1. Remove the handset from the base unit. Press the page button on the base.

2. While the handset is emitting the paging sound, replace the handset to the base unit and continue to hold the page button for 3 seconds. Release the page button. The paging tone stops. Leave the handset on the base for more than 3 seconds. A random, new security code is set.
**Installing the Beltclip**

**To attach the beltclip**
Insert the beltclip into the holes on each side of the handset. Press down until it clicks.

**To remove the beltclip**
Pull both sides of the beltclip to release the tabs from the holes.

---

**Headset Installation**

Your phone may be used with an optional headset, the Uniden HS910. To use this feature, insert headset plug into the headset jack. Your phone is ready for hands-free conversations. (Headset may be purchased by calling the Uniden Parts Department or visiting the website. See Page 7.)
Note on Power Sources

Battery replacement and handling
When the operating time becomes short, even after a battery is recharged, please replace the battery.
With normal usage, your battery should last about one year.
Please contact your place of purchase or the Uniden Parts Department for a replacement battery. (See Page 7.)

Power Failure
During the period that the power is off, you will not be able to make or receive calls with the telephone.

RECYCLING NICKEL-CADMIUM BATTERIES
NICKEL-CADMIUM BATTERIES MUST BE DISPOSED OF PROPERLY.

Nickel-cadmium cells are used in the battery pack. Please take your used nickel-cadmium battery packs to a store that recycles nickel-cadmium batteries.

Caution
• Use the specified battery pack.
• Do not remove the battery from the handset to charge it.
• Never throw the battery into a fire, disassemble it, or heat it.
• Do not remove or damage the battery casing.
Maintenance

When slightly dirty
Wipe with a soft, dry cloth.

When very dirty
Wipe with a soft cloth that has been dampened with diluted, neutral detergent. Dry with a dry cloth.

When the charging terminals become dirty
Wipe with a dry cloth or a pencil eraser, if necessary.

Caution
Do not use paint thinner, benzene, alcohol, or other chemical products. Doing so may discolor the surface of the telephone and damage the finish.
Troubleshooting

If your phone is not performing to your expectations, please try these simple steps first.

ADDITIONAL INFORMATION [53]
### Symptom | Suggestion
--- | ---
The answering system does not work. | - Make sure the base unit is plugged in.
- Make sure that the answering system is turned on.
- Make sure that the message record time is not set to **ANN** (See page 42).
Messages are incomplete. | - The incoming messages may be too long. Remind callers to leave a brief message.
- The memory may be full. Delete some or all of the saved messages.
After a power failure, the outgoing message is deleted. | - Record your greeting again.
- The preset message remains.
No sounds on the base unit speaker during call monitoring or message playback. | - Adjust the speaker volume on the base unit.
Cannot access remote call-in features from another touch-tone phone. | - Make sure you are using the correct PIN number.
- Make sure that the touch-tone phone you’re using can transmit the tone for at least two seconds. If it cannot, you may have to use another phone to access your message.
Severe noise interference. | - Keep the handset away from microwave ovens, computers, remote control toys, wireless microphones, alarm systems, intercoms, room monitors, fluorescent lights and electrical appliances.
- Move to another location or turn off the source of interference.
If you still have a problem. | - Call our customer hotline at 1-800-297-1023
General Information

The 24-148 complies with FCC Parts 15 and 68.
Operating Temperature: -10ºC to +50ºC (+14ºF to +122ºF)

AC Adapter Information
AC Adapter part number: AD-313
Input Voltage: 120V AC 60Hz
Output Voltage: 9V DC 400 mA

Battery Information
Battery part number: BT-800
Capacity: 800 mAH, 3.6V
Battery Use Time (per charge)
From fully charged:
Talk Mode duration 6 hours
Standby Mode duration 10 days

If the handset is left off of the base, the actual Talk Mode duration will be reduced respective
to the amount of time the handset is off the base.

Recharge your phone on a regular basis about once a week by placing the handset on the base for
15-20 hours. When the operating time becomes short, even after the battery is recharged, please replace
the battery. With normal usage, the battery should last about one year.

Replacement batteries may be purchased at your local Uniden dealer or by contacting the Uniden Parts
Department (800) 554-3988. Hours are from 7:00 a.m. to 5:00 p.m. Central Time, Monday through Friday.
We can also be reached on the web at www.uniden.com

Specifications, features, and availability of optional accessories are all subject to change without
prior notice.
Technical Information

The FCC wants you to know!
Changes or modifications to this product not expressly approved by Uniden, or operation of this product in any way other than as detailed by the owner's manual, could void your authority to operate this product. The equipment cannot be used on public coin phone service provided by the telephone company. Connection to party line service is subject to state tariffs. (Contact the state public utility commission, public service commission or corporation commission for information.)

Below is some information that might concern you while using your new phone.

Range
Your new phone is designed to achieve the maximum possible range by transmitting and receiving according to the highest specifications set forth by the FCC. We have rated this phone to operate at a maximum distance with the qualification that the range depends upon the environment in which the telephone is used. Many factors limit range, and it would be impossible to include all the variables in our rating. The Maximum Range rating of this phone is meant to be used as a means of comparison against other range claims.

Telephone Line Problems
The FCC has granted the telephone company the right to disconnect service in the event that your phone causes problems on the telephone line. Also, the telephone company may make changes in facilities and services which may affect the operation of your unit. However, your telephone company must give adequate notice in writing prior to such actions to allow you time for making necessary arrangements to continue uninterrupted service.

If you are having trouble with your telephone service, you must first disconnect your phone to determine if it is the cause of your problem. If you determine that it is the cause, you must leave it disconnected until the trouble has been corrected.

Radio Interference
Radio interference may occasionally cause buzzing and humming in your cordless handset, or clicking noises in the base. This interference is caused by external sources such as TV, refrigerator, vacuum cleaner, fluorescent lighting, or electrical storm. Your unit is NOT DEFECTIVE. If these noises continue and are too distracting, please check around your home to see what appliances may be causing the
problem. In addition, we recommend that the base not be plugged into a circuit that also powers a major appliance because of the potential for interference. Be certain that the antenna on the unit is fully extended when needed.

In the unlikely event that you consistently hear other voices or distracting transmissions on your phone, you may be receiving radio signals from another cordless telephone or other source of interference. If you cannot eliminate this type of interference, you need to change to a different channel.

Finally, it should be noted that some cordless telephones operate at frequencies that may cause interference to nearby TVs and VCRs. To minimize or prevent such interference, the base of the cordless telephone should not be placed near or on top of a TV or VCR. If interference is experienced, moving the cordless telephone farther away from the TV or VCR will often reduce or eliminate the interference.

More Than One Cordless Telephone
If you want to use more than one cordless telephone in your home, they must operate on different channels. Press the channel key to select a channel that provides the clearest communication.

Cordless Telephone Privacy
Cordless telephones are radio devices. Communications between the handset and base of your cordless telephone are accomplished by means of radio waves which are broadcasted over the open airways. Because of the inherent physical properties of radio waves, your communications can be received by radio receiving devices other than your own cordless telephone unit. Consequently, any communications using your cordless telephone may not be private.
Imported Safety Instructions

When using your telephone equipment, these basic safety precautions should always be followed to reduce the risk of fire, electrical shock, and injury to persons.

1. Read and understand all instructions.
2. Follow all warnings and instructions marked on the product.
3. Unplug this product from the wall outlet before cleaning. Use a dry cloth for cleaning without liquid or aerosol cleaners.
4. Do not use this product near water; for example, near a bath tub, wash bowl, kitchen sink or laundry tub, in a wet basement, or near a swimming pool.
5. Do not place this product on an unstable cart, stand, or table. The telephone may fall, causing serious damage to the unit.
6. Slots and openings in the cabinet and the back or bottom are provided for ventilation. To protect the product from overheating, these openings must not be blocked or covered. This product should never be placed near or over a radiator or heat register.
7. This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply to your home, consult your dealer or local power company.
8. Do not allow anything to rest on the power cord. Do not locate this product where the cord will be damaged by persons walking on it.
9. Do not overload wall outlets and extension cords, as this can result in the risk of fire or electrical shock.
10. Never push objects of any kind into the product. Hazardous voltage points or short out parts that could result in a risk of fire or electric shock. Never spill liquid of any kind on the product.
11. To reduce the risk of electric shock, do not disassemble this product. Take it to a qualified technician when service or repair work is required. Opening or removing covers may expose you to dangerous voltages or other risks. Incorrect reassembly can cause electric shock when the appliance is subsequently used.
12. Unplug this product from the wall outlet and refer servicing to qualified service personnel when service or repair work is required. Opening or removing covers may expose you to dangerous voltages or other risks. Incorrect reassembly can cause electric shock when the appliance is subsequently used.
13. Do not use the telephone to report a gas leak in the vicinity of the leak.

Additional Battery Safety Precautions

Caution! To reduce the risk of fire or injury to persons by the battery, read and follow these instructions:

1. Use only the appropriate type and size battery pack specified in the owner’s manual.
2. Do not dispose of the battery pack in a fire. The cell may explode. Check the nickel-cadmium battery disposal package insert for disposal instructions.
3. Do not open or mutilate the battery pack. Released electrolyte is corrosive and may cause damage to the eyes or skin. It may be toxic if swallowed.
4. Exercise care in handling the battery in order not to short the battery with conducting materials such as rings, bracelets, and keys. The battery or conductor may overheat and cause burns.
5. Charge the battery pack provided with or identified for use with this product only in accordance with the instructions and limitations specified in the owner’s manual provided for this product.
6. Observe proper polarity orientation between the battery pack and battery charger.

SAVE THESE INSTRUCTIONS!

Important Electrical Considerations

Unplug all electrical appliances when you know an electrical storm is approaching. Lightning can pass through your household wiring and damage any device connected to it. This phone is no exception.

Warning: Please do not attempt to unplug any appliance during an electrical storm.

The FCC Wants You To Know

Changes or modifications to this product not expressly approved by Uniden, or operation of this product in any way other than as detailed by the owner’s manual, could void your authority to operate this product. The equipment cannot be used on public coin phone service provided by the telephone company. Connection to party line service is subject to state tariffs. (Contact the state public utility commission, public service commission or corporation commission for information.)

Range

Your new phone is designed to achieve the maximum possible range by transmitting and receiving according to the highest specifications set forth by the FCC. We have rated this phone to operate at a maximum distance with the qualification that the range depends upon the environment in which the telephone is used. Many factors limit range, and it would be impossible to include all the variables in our rating. The Maximum Range rating of this phone is meant to be used as a means of comparison against other range claims.

Telephone Line Problems

The FCC has granted the telephone company the right to disconnect service in the event that your phone causes problems on the telephone line. Also, the telephone company may make changes in facilities and services which may affect the operation of your unit. However, your telephone company must give adequate notice in writing prior to such actions to allow you time for making necessary arrangements to continue uninterrupted service. If you are having trouble with your telephone service, you must first disconnect your phone to determine if it is the cause of your problem. If you determine that it is the cause, you must leave it disconnected until the trouble has been corrected.
Radio Interference
Radio interference may occasionally cause buzzing and humming in your cordless handset, or clicking noises in the base. This interference is caused by external sources such as TV, refrigerator, vacuum cleaner, fluorescent lighting, or electrical storms. Your unit is NOT DEFECTIVE. If these noises continue and are too distracting, please check around your home to see what appliances may be causing the problem. In addition, we recommend that the base not be plugged into a circuit that also powers a major appliance because of the potential for interference. Be certain that the antenna on the unit is fully extended when needed.

In the unlikely event that you consistently hear other voices or distracting transmissions in your phone, you may be receiving radio signals from another cordless telephone or other source of interference. If you cannot eliminate this type of interference, you need to change to a different channel.

Finally, it should be noted that some cordless telephones operate at frequencies that may cause interference to nearby TV and VCRs. To minimize or prevent such interference, the base of the cordless telephone should not be placed near or on top of a TV or VCR. If interference is experienced, moving the cordless telephone farther away from the TV or VCR will often reduce or eliminate the interference.

More Than One Cordless Telephone
If you want to use more than one cordless telephone in your home, they must operate on different channels. Press the channel key to select a channel that provides the clearest communication.

Cordless Telephone Privacy
Cordless telephones are radio devices. Communications between the handset and base of your cordless telephone are accomplished by means of radio waves which are broadcast over the open airways. Because of the inherent physical properties of radio waves, your communications can be received by radio receiving devices other than your own cordless telephone unit. Consequently, any communications using your cordless telephone may not be private.

Installation Considerations
Before choosing a location for your new phone, there are some important guidelines you should consider:

• The location should be close to both a phone jack and continuous power outlet.
• Keep the base and handset away from sources of electrical noise such as motors or fluorescent lighting.
• Be sure there is sufficient space to fully extend the base antenna.
• The base can be placed on a desk or tabletop or mounted on a standard telephone wall plate.
• You should charge your new phone for 15-20 hours before completing the installation or using the handset.

Telephone Line Outlets
There are two types of phone outlets: Modular Jack and Hardwired Jack.

Modular Jack
Most phone equipment available now uses modular jacks. Phone cords are fitted with a molded plastic connector which plugs into this type of jack. If you do not have modular phone jacks, contact your local telephone company for information about their installation.

Hardwired Jack
Some equipment is wired directly to a phone jack, and these types of installations require a modular jack and converter. This type of installation is not difficult; however, you should contact your Uniden telephone dealer or a telephone supply store for advice about the proper adapter or converter for your particular situation.

Connecting the Telephone Cords
Consider these safety guidelines before connecting the telephone cords:

Caution:
• Never install telephone wiring during a lightning storm.
• Never touch uninsulated telephone wires or terminals unless the telephone line has been disconnected at the network interface.

Applying Power to the Base
This unit requires an AC outlet, without a switch to interrupt power, and the included AC adapter. To relieve strain on the DC plug when the phone is placed on a desk or table, wrap the power cord around the strain relief notch on the bottom of the base.

NOTE: Place the power cord so that it does not create a trip hazard, or where it could become chafed and create a fire or other electrical hazards.

Adapter Safety Features
If you cannot plug the AC adapter into the outlet, contact someone about replacing the outlet. Plug the AC Adapter into a standard 120 VAC wall outlet.

Do not use an outlet controlled by a wall switch.

Use only the Uniden AC Adapter supplied with this phone.
