Operating Guide
PRECAUTIONS

Before you read anything else, please observe the following:

WARNING!

Uniden America Corporation DOES NOT represent this unit to be waterproof. To reduce the risk of fire, electrical shock, or damage to the unit, DO NOT expose this unit to rain or moisture.

RECHARGEABLE NICKEL-CADMIUM BATTERY WARNING

- This equipment contains a Rechargeable Nickel-Cadmium Battery.
- Cadmium is a chemical known to the State of California to cause cancer.
- The Rechargeable Nickel-Cadmium Battery contained in this equipment may explode if disposed of in a fire.
- Do not short circuit the battery.
- Do not charge the Rechargeable Nickel-Cadmium Battery used in this equipment in any charger other than the one designed to charge this battery as specified in this Guide. Using another charger may damage the battery, or cause the battery to explode.

RECHARGEABLE NICKEL-CADMIUM BATTERIES MUST BE RECYCLED OR DISPOSED OF PROPERLY

- Residents of Minnesota should contact 1-800-225-PRBA for information concerning reclamation and disposal of Rechargeable Nickel-Cadmium batteries.
- Residents outside of Minnesota should contact their local authorities for information concerning reclamation and disposal of Rechargeable Nickel-Cadmium batteries.
One Year Limited Warranty

WARRANTOR: UNIDEN AMERICA CORPORATION ("Uniden")

ELEMENTS OF WARRANTY: Uniden warrants, for one year, to the original retail owner, this Uniden Product to be free from defects in materials and craftsmanship with only the limitations or exclusions set out below.

WARRANTY DURATION: This warranty to the original user shall terminate and be of no further effect 12 months after the date of original retail sale. The warranty is invalid if the Product is (A) damaged or not maintained as reasonable or necessary, (B) modified, altered, or used as part of any conversion kits, subassemblies, or any configurations not sold by Uniden, (C) improperly installed, (D) serviced or repaired by someone other than an authorized Uniden service center for a defect or malfunction covered by this warranty, (E) used in any conjunction with equipment or parts or as part of any system not manufactured by Uniden, or (F) installed or programmed by anyone other than as detailed by the Operating Guide for this product.

STATEMENT OF REMEDY: In the event that the product does not conform to this warranty at any time while this warranty is in effect, warrantor will repair the defect and return it to you without charge for parts, service, or any other cost (except shipping and handling) incurred by warrantor or its representatives in connection with the performance of this warranty. THE LIMITED WARRANTY SET FORTH ABOVE IS THE SOLE AND ENTIRE WARRANTY PERTAINING TO THE PRODUCT AND IS IN LIEU OF AND EXCLUDES ALL OTHER WARRANTIES OF ANY NATURE WHATSOEVER, INCLUDING, BUT NOT LIMITED TO ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. THIS WARRANTY DOES NOT COVER OR PROVIDE FOR THE REIMBURSEMENT OR PAYMENT OF INCIDENTAL OR CONSEQUENTIAL DAMAGES. Some states do not allow this exclusion or limitation of incidental or consequential damages so the above limitation or exclusion may not apply to you.

LEGAL REMEDIES: This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. This warranty is void outside the United States of America.

PROCEDURE FOR OBTAINING PERFORMANCE OF WARRANTY: If, after following the instructions in this Operating Guide you are certain that the Product is defective, pack the Product carefully (preferably in its original packaging). Include evidence of original purchase and a note describing the defect that has caused you to return it. The Product should be shipped freight prepaid by traceable means, or delivered, to warrantor at:

AutoStandby is a patented invention of Uniden America Corporation.
Important Safety Instructions

When using your telephone equipment, basic safety precautions should always be followed to reduce the risk of fire, electrical shock, and injury to persons, including the following:

1. Read and understand all instructions.

2. Follow all warnings and instructions marked on the product.

3. Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a dry cloth for cleaning.

4. Do not use this product near water; for example, near a sink or in a wet area.

5. Do not place this product on an unstable cart, stand, or table. The telephone may fall, causing serious damage to the unit.

6. To protect the product from overheating, do not block or cover any slots or openings in the base Unit. This product should never be placed near or over a radiator or heat register. This product should not be placed in a built-in installation unless proper ventilation is provided.

7. This product should be operated only from the type of power source indicated on the marking label.

8. Do not allow anything to rest on the power cord. Do not locate this product where the cord will be damaged by persons walking on it.

9. Do not overload wall outlets and extension cords, as this can result in the risk of fire or electrical shock.

10. Never push objects of any kind into this product through the Base Unit slots, as they may touch dangerous voltage points or short out parts that could result in a risk of fire or electric shock. Never spill liquid of any kind on the product.

11. To reduce the risk of electric shock, do not disassemble this product. Contact qualified service personnel when some service or repair work is required. Opening or removing covers may expose you to dangerous voltages or other risks. Incorrect reassembly can cause electric shock when the appliance is subsequently used.

12. Unplug this product from the wall outlet and refer servicing to qualified service personnel under the following conditions:
   A. When the power supply cord is damaged or frayed.
   B. If liquid has been spilled into the product.
   C. If the product has been exposed to rain or water.
D. If the product does not operate normally when following the operating instructions. Adjust only those controls that are covered by the operating instructions. Improper adjustment of other controls may result in damage, and will often require extensive work by a qualified technician to restore the product to normal operation.

E. If the product has been dropped, or the cabinet has been damaged.

F. If the product exhibits a distinct change in performance.

13. **Do not** use the telephone to report a gas leak in the vicinity of the leak.

**CAUTION: To reduce the risk of fire or injury to persons by the battery, read and follow these instructions:**

1. Use only the appropriate type and size Battery Pack specified in this Operating Guide.

2. **Do not** dispose of the Battery Pack in a fire. The cell may explode. Check the Nickel-Cadmium Battery Disposal information at the beginning of this Guide for disposal instructions.

3. **Do not** open or mutilate the Battery Pack. Released electrolyte is corrosive and may cause damage to the eyes or skin. It may be toxic if swallowed.

4. Exercise care in handling the battery in order not to short the battery with conducting materials such as rings, bracelets, and keys. The battery or conductor may overheat and cause burns.

5. Charge the Battery Pack provided with or identified for use with this product only in accordance with the instructions and limitations specified in the instruction manual provided for this product.

6. Observe proper polarity orientation between the Battery Pack and battery charger.

**SAVE THESE INSTRUCTIONS**
About Your ANA 9500

Congratulations on your purchase of the Uniden ANA 9500 Cordless Telephone. The ANA 9500 is designed and engineered to exacting standards for reliability, long life, and outstanding performance. It is designed to work with a PBX system. To get the most from your ANA 9500, please read this Operating Guide thoroughly. To help familiarize you with the features of your cordless phone, refer to the Handset illustration foldout from the front cover, and the Base Unit illustration foldout from the rear cover.

Your ANA 9500 includes the following items:

- Base Unit EXP950B
- Handset EXP950H
- Telephone Cord
- AC Adapter EXP9504
- Rechargeable Battery EXP9580
- Belt Clip EXP9502
- Operating Guide OMUNIDEXP9500

If any of these items are missing or damaged, contact your PBX Administrator. If your ANA 9500 is not performing to your expectations, please try the simple steps listed in the Trouble Shooting Section of this Guide. If you are still unable to resolve the problem, contact your PBX Administrator.
ANA 9500 Features

- Super Long Range 900MHz Spread Spectrum
- 2-line, 10-digit LCD Display
- Headset Jack
- Ringer Volume Control
- Handset Volume Control
- Single button access to: CONFERENCE, HOLD, and TRANSFER features
- Four Function Keys: PAUSE, FLASH, REDIAL, SEARCH
- 20 Number Memory Store and Search
- Battery Charging System for Optional Standby Battery
- AutoStandby
- AutoTalk
- 2-Way Handset Mounting
- Vibrator Ringer Alert
- Easy Installation
- Compact Handset Design
Installing Your ANA 9500

Selecting the Installation Location
Select a location for the ANA 9500 to avoid excessive heat or humidity. The Base Unit of your ANA 9500 can be placed on a desk or tabletop near a standard 120V AC outlet and telephone line jack. The Base Unit can also be mounted on a standard AT&T or GTE wall plate using the optional Wall Mount Adapter. If you will use the ANA 9500 with a Standard 2500 type Telephone Desk Unit, place the ANA 9500 near that phone. Keep the Base Unit and Handset away from sources of electrical noise (motors, fluorescent lighting, computers).

Connecting the Telephone Line
There are two types of phone outlets:

1) Modular Jack
Plug the telephone line cord from the Base Unit into a standard modular telephone jack. (Note: If you do not have a modular jack, contact your local telephone company for information on the installation of these jacks.)

2) Hard-wired Jack
A modular jack converter (not included) is required. You may need to rewire when connecting the converter (making color-coded connections).

Note: Your Uniden Telephone Dealer or a telephone supply store can advise you on the proper adapter or converter.
Connecting the Telephone Cords

The **ANA 9500** must be connected to an analog PBX port or a standard analog telephone line.

**CAUTION:**
- Never install telephone wiring during a lightning storm.
- Never touch uninsulated telephone wires or terminals unless the telephone line has been disconnected at the network interface.
- Use caution when installing or modifying telephone lines.

You can also connect a standard 2500-type desk phone to the **ANA 9500**:

Connect to the Line OUT Jack
Tone/Pulse Switch

Be sure the TONE/PULSE switch is in the TONE position.

Note: Most systems are Tone dialing. Check with your PBX Administrator if you are not sure whether your system is Tone or Pulse dialing.

Applying Power to the Base Unit

Use only the supplied AC Adapter: EXP9504

Wrap the Power Cord around the convenient notch on the bottom.
IMPORTANT! Route the power cord where it will not create a trip hazard, or where it could become chafed and create a fire or other electrical hazards.

Note: The AC Adapter furnished with this phone may be equipped with a polarized line plug (a plug having one blade wider than the other.) This plug will fit into the power outlet only one way. If you are unable to insert the plug fully into the outlet, try reversing the plug.

Do not alter the shape of the blades of the polarized plug.

Note: If you cannot plug the AC Adapter into the outlet, contact someone about replacing the outlet.

The unique design of your ANA 9500 allows you to place the Handset on the Base Unit either face down or face up, with or without the Belt Clip attached. The Battery Pack in the Handset automatically recharges in either position.
Before using your **ANA 9500**, be sure to raise the antenna to the vertical position.

![Antenna Raised to Vertical Position]

**Attaching the Belt Clip to the Handset**

You can use the Belt Clip to attach the Handset to your belt or pocket for convenient portability.

Snap the tabs of the Belt Clip into the notches on the sides of the Handset.

To remove the Belt Clip, pry one tab at a time from the notch on the side of the Handset. Carefully lift the Belt Clip off.

*(CAUTION: The Belt Clip is designed to fit snugly onto the Handset.)*

**Installing the Handset Battery Pack**

1. Place the Battery Pack onto the Handset so that it slides easily along the ridges.

2. Slide the Battery Pack up onto the Handset until it clicks into place.
Removing the Handset Battery Pack

1. Press in on the Battery Pack Release Latch

2. Slide the Battery Pack off the Handset

   Note: You may have to pull **hard** to slide the Battery Pack off.

Charging the Handset Battery Pack

The Rechargeable Nickel-Cadmium Battery Pack must be fully charged before using your ANA 9500 for the first time. (Note: Charge the Standard 400 mAh Battery Pack without interruption for 6-8 hours.)

1. Place the Handset on the Base Unit.

2. Make sure the LED lights. If the LED doesn’t light, check to see that the AC Adapter is plugged in, and that the Handset is making good contact with the Base Unit Charging Contacts.
Charging Spare Battery Packs

The Base Unit of your ANA 9500 is equipped with a Battery Charger for charging an Optional Spare Battery Pack.

1. Position the Battery Pack so the inner side is facing toward the top of the Base Unit.

2. Slide the Battery Pack into the Charging Compartment until it clicks into place. (Note: The Battery Pack Charging Compartment has a latch that keeps the Battery Pack in place during charging.)

Make sure the BATTERY CHARGE LED lights. If the BATTERY CHARGE LED does not light, check to see that the AC Adapter is plugged in, and that the Battery Pack is seated into the Charging Compartment.

Note: Charge the Standard 400 mAh Battery Pack without interruption for 6-8 hours. Charge the optional 730 mAh Battery Pack without interruption for 8-10 hours.

When charging is complete, press down on the latch to remove the Battery Pack for use. Or, if you don’t need the Battery pack immediately, leave it in the Charging Compartment (It will not overcharge.)

Low Battery Indicator

When the Battery Pack in the Handset is low and needs to be charged, you will see a message on the display.

<table>
<thead>
<tr>
<th>On a Call</th>
<th>In Standby Mode</th>
</tr>
</thead>
<tbody>
<tr>
<td>Only the TALK button operates.</td>
<td>None of the buttons operate.</td>
</tr>
<tr>
<td>Handset beeps once every 3 seconds</td>
<td>Handset beeps once.</td>
</tr>
<tr>
<td>Complete your call as quickly as possible</td>
<td>Cannot make call.</td>
</tr>
<tr>
<td>Replace Battery pack within 20 seconds to</td>
<td>Replace Battery Pack before making a call.</td>
</tr>
<tr>
<td>continue call.</td>
<td></td>
</tr>
</tbody>
</table>

Return the Handset to the Base Unit for charging or replace the Handset Battery Pack with another charged Battery Pack.
Cleaning the Battery Contacts
To maintain a good charge, it is important to clean all charging contacts on the Handset and Base Unit about once a month. Use a pencil eraser or other contact cleaner. Do not use any liquids or solvents.
Using Your ANA 9500 Handset

**Note:** Operation of the ANA 9500 is performed using the Handset off the Base Unit. The exceptions are charging the Handset Battery Pack, and terminating a call with AutoStandby. The Base Unit is used to place a call on HOLD, or to Page the Handset. These operations are discussed in the Section: “Using Your ANA 9500 Base Unit”.

**ANA 9500 Handset Controls**

<table>
<thead>
<tr>
<th>Handset Earpiece Volume (During a Call)</th>
<th>Ringer Select (Standby Mode)</th>
<th>Mute</th>
</tr>
</thead>
<tbody>
<tr>
<td>Press VOL on the side of the Handset to select a loud or soft Earpiece volume level.</td>
<td>Press VOL on the side of the Handset to select from RING HIGH</td>
<td>RING LOW</td>
</tr>
<tr>
<td>Note: You get a vibrator alert instead of a ring tone when you set the Ringer Volume to RING OFF.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Handset Earpiece Volume (During a Call)**

- **Volume**: Press VOL on the side of the Handset to select a loud or soft Earpiece volume level.

**Ringer Select (Standby Mode)**

- **Ringer Select**: Press VOL on the side of the Handset to select from RING HIGH.

**Mute**

- **Mute**: RING LOW
Using the Handset

When you pick up the Handset and press TALK, you will see:

Then you’ll see one of the following:

<table>
<thead>
<tr>
<th>Condition</th>
<th>Indicator</th>
<th>LCD Display</th>
</tr>
</thead>
<tbody>
<tr>
<td>Line OK</td>
<td>TALK LED</td>
<td></td>
</tr>
<tr>
<td>No Connection to Base Unit</td>
<td>Error Tone</td>
<td>NO SERVICE</td>
</tr>
<tr>
<td>Channel Busy</td>
<td>Error Tone</td>
<td>SYSTEM BUSY</td>
</tr>
<tr>
<td>Line in Use</td>
<td>Error Tone</td>
<td>LINE IN USE</td>
</tr>
</tbody>
</table>

When communication is made between the Base Unit and the Handset, the screen will go to “Standby”, and the phone is ready to use.

If the Handset is at the range limit of the ANA 9500, you may see:

Take the following action:

<table>
<thead>
<tr>
<th>During a Call</th>
<th>In Standby Mode</th>
</tr>
</thead>
<tbody>
<tr>
<td>Condition</td>
<td>Warning Tone</td>
</tr>
<tr>
<td>Action</td>
<td>Can’t make or answer calls (Phone may ring intermittently)</td>
</tr>
<tr>
<td>Move back in range within 20 seconds</td>
<td>Move back within range.</td>
</tr>
</tbody>
</table>
Answering a Call

When you receive a call, the Handset rings and you’ll see:

<table>
<thead>
<tr>
<th>Handset on the Base Unit</th>
<th>Handset off the Base Unit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pick up the Handset. The AutoTalk feature allows you to answer the call immediately.</td>
<td>Press TALK.</td>
</tr>
<tr>
<td>When you finish the call, place the Handset back on the Base Unit. AutoStandby automatically hangs up the phone.</td>
<td>—OR—</td>
</tr>
<tr>
<td>—OR—</td>
<td>Press TALK to hang up the phone.</td>
</tr>
</tbody>
</table>

Making a Call

(If the Handset is on the Base Unit, pick it up.)

Press TALK. The TALK LED will light, and you’ll see:

If the Line is all right, enter the number you are calling. (You can also dial from memory. See the section on “Using Memory”.)

When you finish the call, place the Handset back on the Base Unit. AutoStandby automatically hangs up the phone.

—OR—

Press TALK to hang up the phone.
Feature Buttons

Note: The exact operation of the Feature Buttons depends on how your PBX system is configured. Contact your PBX Administrator for more information.

Placing a call “on hold”
Press HOLD. You’ll hear a “beep” and see:

To resume the call, press HOLD or TALK.

Transferring a Call
Press TRANSFER. You’ll hear a “beep”, and see:

Dial the target number.

When the receiving party answers, press TALK to complete the transfer.

Connecting a Conference Call
To connect a second party to a call in progress, press CONFERENCE. You’ll hear a “beep”, and see:

Dial the second party’s number.

When the other party answers, press CONFERENCE to have a three-way conversation.
Programming the Feature Buttons

The Feature Buttons can be programmed for special use, such as causing a “Hook Flash” followed by a special number or function.

For example — to program the TRANSFER button for “Hook Flash” and 9 for outside transfers only:

Press MEMO.

Press FLASH.

Press 9.

Press MEMO.

Press TRANSFER.
Function Keys

FLASH (F1)
Press once to cause a “Hook Flash” while on a call.
Press once to program a “Hook Flash” in a Feature Button.
The FLASH LED lights momentarily while the Key is pressed.

PAUSE (F2)
Press once to program a Pause while storing a number in Memory.
The PAUSE LED lights momentarily while the Key is pressed.

REDIAL (F3)
To dial the last number called, press TALK, then F3 (REDIAL). The phone will redial the last number called.
The REDIAL LED lights momentarily while the Key is pressed.

SEARCH (F4)
Press to begin Memory Search. (See the following Section for Memory Search.)
The SEARCH LED remains lit during the Search operation.
Using Your ANA 9500 Memory

Use these buttons to operate the ANA 9500 Memory

Storing a Number

1. Press MEMO. You will hear a beep, and see the message:

   PHONE#

2. Enter the number (up to 16 digits) you want to store.

   8178583300

   a. To program a Pause in the dialing sequence, press.

   9P

   8178583300

   b. To program a “Hook Flash” in the dialing sequence, press F1.

   2F5559628

3. Press MEMO. You will see the message:

4. Enter the number (01) -(20) for the memory location to store. You’ll hear a confirmation beep and see the message:

   MEMORY#

   STORED

Note: After pressing MEMO the second time, you have 20 seconds to enter the memory location. Otherwise, an error tone sounds and the unit returns to Standby.

5. The ANA 9500 then returns to Standby mode.
Example: Store 555-1234 in memory location 12:

a. Press MEMO

b. Enter 5551234

c. Press MEMO

d. Press 12

The Handset beeps confirmation and you see:

The phone then returns to Standby.

Erasing a Stored Number

1. Press MEMO

2. Press MEMO

3. Enter the memory location number (01) to (20) you want to clear. You will hear a long beep and see:

Dialing with a Stored Number

NOTE: The following applies when the phone is in Standby Mode, and you have already established a connection between Handset and Base Unit.

1. Press TALK

2. Press MEMO
3. Enter the Memory Location (01 - 20)  

The phone automatically dials the number shown.

**Memory Search**

You can search all 20 Memory Locations to find the number you need. Once you have found the number, you can automatically dial that number.

1. Press SEARCH (F4)

2. Press ▲ (VOL) to move to Memory Location 01.  

   (If Memory Location 01 doesn’t have a stored number, ▲ will display the first stored number.)

3. a. Press ▲ (VOL) again to move to the next Memory Location.

3. b. You can also press ▼ (MUTE) to move to a previous Memory Location.

3. c. If you press ▼ at Memory Location 01, you’ll move directly to location 20.

4. Once you have the desired number, press TALK.  

   The TALK LED lights, and the SEARCH LED goes out.

   The phone will then automatically dial the number.
Chain Dialing

You can dial any stored number while you are on a call. This is sometimes needed for Long Distance Access Codes or Account Access Numbers.

1. While you are on the call, press SEARCH (F4). The SEARCH LED lights.

2. Press ▲ (VOL) or ▼ (MUTE) as needed to locate the number in Memory.

3. Once you have the desired number, press TALK.

The SEARCH LED goes out, and the phone dials the number.
Using Your ANA 9500 Base Unit

Although most of the ANA 9500 operations are performed at the Handset, there are two operations performed at the Base Unit.

The IN USE/HOLD LED lights steadily whenever the Handset is connected to a call.

Placing a Call On Hold

1. Press HOLD on the Base Unit.

   The IN USE/HOLD LED blinks, and the call is “on Hold”.

2. To resume the call, press HOLD on the Base Unit, or press HOLD on the Handset twice.

   The IN USE/HOLD LED lights steadily.

Paging the Handset

Press PAGE/FIND on the Base Unit to Page the Handset for a call, or to find the Handset if it is misplaced.
Optional Head Set (EXP9530)

The optional Head Set provides a “Hands-Free” Option for the **ANA 9500**. With the Head Set installed, you can use the Belt Clip to carry the Handset, and conduct a conversation using the Head Set.

To install the optional Head Set, open the cover over the HEAD SET Jack and plug the Head Set in.

No other settings are needed.

Operation of the **ANA 9500** using the Head Set is exactly the same as using the Handset. However, you will hear through the Head Set earphone, and talk through the Head Set microphone. The Handset earphone and microphone (mouthpiece) are disconnected.
Optional Backup AC Adapter (EXP9505)

The Optional Backup AC Adapter provides protection against losing a call in case of AC Power failure. The Backup Adapter contains a Battery Pack that provides enough power for you to complete the call and hang up.

To install the Backup Adapter:

1. Disconnect the Standard AC Adapter from the Base Unit of the ANA 9500.
2. Plug the AC Adapter into the jack of the EXP9505.
3. Plug the wire from the EXP9505 into the DC IN jack of the Base Unit.
Using an Optional Second 2500-type Analog Telephone.

A standard 2500-type Desk telephone can be used with the **ANA 9500**. Calls can then be answered with the Desk phone and transferred to the **ANA 9500**.

*Note: A special Security Feature disconnects the Desk phone whenever the ANA 9500 Handset is in use.*

Connecting the Desk Telephone.

Connect a telephone cord from the Desk phone to the LINE OUT jack on the **ANA 9500** Base Unit.

The Desk phone can now be used to answer or place calls in the normal manner.

Transferring a Call to the **ANA 9500**.

1. Press HOLD on the Base Unit.

   The IN USE/HOLD LED blinks, and the call is “on Hold”.

2. Pick up the Handset from the Base Unit.

   The IN USE/HOLD LED lights steadily.

   The call is now transferred to the **ANA 9500**, and the Desk phone is disconnected.
Transferring a Call to the Desk Telephone

1. Press HOLD on either the ANA 9500 Handset or Base Unit.
2. Pick up the Handset of the Desk Phone.

You can now place the ANA 9500 Handset on the Base Unit.

Typical Applications

You can use the ANA 9500 together with a standard PBX telephone to give you effective business communications both at your desk and away from it. Contact your PBX Administrator for more information about your System.

You can have your PBX system programmed so the following sequence occurs:

1. Your PBX telephone rings first.
2. If you don’t answer the PBX telephone after a set number of rings, the call is automatically transferred to the ANA 9500.
3. If you don’t answer the call after a set number of rings, it is automatically transferred to your Voice Mail.

Note: It is good practice to keep the number of rings in each case to 2 or 3. This gives you a chance to answer the call, and doesn’t keep the other party waiting too long.
Optional Accessories and Replacement Parts

For the following Optional Accessories and Replacement Parts contact your PBX Administrator.

- AC Adapter EXP9504
- Telephone Cord
- Belt Clip EXP9502
- Backup AC Adapter EXP9505
- 400maH Battery EXP9580
- 730maH Battery EXP9586
- Base Unit Wall Mount EXP9590
- Head Set EXP9530
- Desktop/Wallmount Charger EXP9585
- Vibrator EXP9570
- Operating Guide OMUNIDEXP9500
# Trouble Shooting

If your **ANA 9500** Cordless Telephone is not performing to your expectations, please try these simple steps. If you are still unable to resolve the problems, contact your PBX Administrator.

**Note:** *Do not attempt to service this unit yourself. All service must be done by qualified service personnel.*

Specifications

General
Frequency Control : Phase Lock Loop
Modulation : MSK
Operating Temperature : -10 to 50 C

Base Unit
Receive/Transmit Frequency : 902 MHz to 928 MHz Spread Spectrum
Power Requirements : 10V DC from supplied AC Adapter
Size : 7\frac{3}{4}\text{ in. W} \times 7\frac{1}{8}\text{ in. D} \times 5\frac{5}{32}\text{ in. H}
Weight : Approx. 1 lb., 5 oz.

Handset
Receive/Transmit Frequency : 902 MHz to 928 MHz Spread Spectrum
Power Requirements : Rechargeable Ni-Cd Battery Pack
Size : 2\frac{1}{8}\text{ in. W} \times 7\frac{1}{8}\text{ in. D} \times 6\frac{1}{2}\text{ in. H with antenna}
Weight : Approx. 8.6 oz. with battery
Battery : Capacity 400 mAH, 4.8V
Talk Mode 3 hours (typical)
Standby Mode 42 hours (typical)

Specifications shown are typical and subject to change without notice.
