Important Safety Instructions

When using your telephone equipment, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury to persons, including the following:

- **This unit is NOT waterproof.** DO NOT expose it to rain/moisture.
- Do not use this product near water, for example, near a bath tub, wash bowl, kitchen sink or laundry tub, in a wet basement or near a swimming pool.
- Avoid using a telephone (other than a cordless type) during an electrical storm. There may be a remote risk of electric shock from lightning.
- Do not use the telephone to report a gas leak in the vicinity of the leak.
- Use only the power cord and batteries indicated in this manual. Do not dispose of batteries in a fire. They may explode. Check with local codes for possible special disposal instructions.
- Do not place the handset in any charging cradle without the battery installed and the battery cover securely in place.

**SAVE THESE INSTRUCTIONS**

**CAUTION!** Risk of explosion if battery is replaced by an incorrect type. Dispose of used batteries according to the instructions. Do not open or mutilate the battery. Disconnect the battery before shipping this product.
GETTING STARTED

Installing Your Phone

Charge the Battery

1. Unpack the handset, battery pack, and battery cover. If you need to remove the cover, press in on the notch and slide the cover down and off.
2. Line up the battery connector with the jack inside the handset; the connector only fits one way.
3. Push the connector in until it clicks into place; tug gently on the wires to make sure the battery pack is securely connected.
4. Replace the battery cover and slide it into place.
5. Use the AC adapter to connect the power jack on the base to a regular indoor (120V AC) power outlet.
6. Place the handset in the base with the display facing forward. If the display doesn’t light up, reseat the handset or connect the base to a different outlet.

Charge the handset completely (about 15 hours) before using.

Connect the Telephone Cord

1. Use the telephone cord to connect the TEL LINE jack on the base to a standard telephone wall jack.

If the display says Check TEL Line, check the connection between the base and the phone jack.

2. If you are mounting the phone on the wall, place the mounting slots (on the rear of the base) over the pins on the wall plate; slide the base down to lock it into place.

Test the Connection

Make a quick test call. Pick up the handset and press TALK/FLASH. (Press END to hang up.)

• If there’s a lot of noise, check for interference (see p. 10).
• If you keep hearing a dial tone, change to pulse dialing (see below).

Changing from Tone to Pulse Dialing

Your phone uses tone dialing by default. If your phone company uses pulse dialing, you need to change your phone’s dial mode.

1. Press MENU/SELECT and select Global Setup.
2. Select Dial Mode then Pulse. You’ll hear a confirmation tone.

To send DTMF tones during a call (e.g., for an automated response system), press * to temporarily switch to tone dialing. When you hang up, the phone automatically returns to pulse dialing.
## GETTING TO KNOW YOUR PHONE

### Base

<table>
<thead>
<tr>
<th>Key</th>
<th>What it does</th>
</tr>
</thead>
<tbody>
<tr>
<td>FIND</td>
<td>• In standby: page the handset.</td>
</tr>
</tbody>
</table>

### Handset

<table>
<thead>
<tr>
<th>Key (icon)</th>
<th>What it does</th>
</tr>
</thead>
</table>
| **UP (▲)** | • In standby: increase the ringer volume.  
• During a call: increase the volume.  
• In any menu or list: move the cursor up one line. |
| CLEAR | • When entering text or numbers: erase the character at the cursor (press and hold to erase all characters). |
| PHONEBOOK/LEFT (📞) | • In standby or during a call: open the phonebook.  
• In the menu: go back to the previous screen. |
| TALK/FLASH | • In standby: start a telephone call (get a dial tone).  
• During a call: switch to a waiting call. |
| REDIAL/PAUSE | • In standby: open the redial list.  
• While entering a phone number: insert a 2-second pause. |
| MUTE | • During a call: mute the microphone.  
• While the phone is ringing: ignore this call (mute the ringer). |
<table>

<tr>
<td>ignore a call (mute the ringer)</td>
<td>MUTE while the phone is ringing.</td>
</tr>
<tr>
<td>mute the microphone during a call</td>
<td>MUTE. (Press again to turn it back on.)</td>
</tr>
</tbody>
</table>

**Changing the Volume**

You can adjust the volume of the earpiece and ringer separately.

<table>
<thead>
<tr>
<th>To change the...</th>
<th>When...</th>
<th>Press...</th>
</tr>
</thead>
<tbody>
<tr>
<td>earpiece volume</td>
<td>you are on a call</td>
<td>UP to increase the volume or DOWN to decrease it.</td>
</tr>
<tr>
<td>ringer volume *</td>
<td>the phone is in standby</td>
<td></td>
</tr>
</tbody>
</table>

* To turn off the ringer, turn the ringer volume all the way down.

**Using the Phonebook, Caller ID, and Redial Lists**

- The phone can store up to 30 entries in its phonebook.
- If you subscribe to Caller ID (CID) service, the phone stores the information for the last 30 received calls to the CID list. Contact your telephone provider for more information.
- The handset remembers the last 5 numbers you dialed on it.

<table>
<thead>
<tr>
<th>To...</th>
<th>Press...</th>
</tr>
</thead>
<tbody>
<tr>
<td>open the list</td>
<td>PHONEBOOK/LEFT, CALLER ID/RIGHT, or REDIAL/PAUSE.</td>
</tr>
<tr>
<td>scroll through the list</td>
<td>UP or DOWN.</td>
</tr>
<tr>
<td>dial the current entry</td>
<td>TALK/FLASH.</td>
</tr>
<tr>
<td>To...</td>
<td>Press...</td>
</tr>
<tr>
<td>----------------------------------------------</td>
<td>----------------------------------------------------------</td>
</tr>
<tr>
<td>add 1 at the front of CID number</td>
<td>* before dialing for a toll call.</td>
</tr>
<tr>
<td>add the area code</td>
<td># before dialing.</td>
</tr>
<tr>
<td>store the current CID or redial entry to the phonebook</td>
<td>MENU/SELECT, then select Store Into PB. Proceed to edit the name and number.</td>
</tr>
<tr>
<td>edit the current phonebook entry</td>
<td>MENU/SELECT, then select Edit.</td>
</tr>
<tr>
<td>delete the current entry</td>
<td>MENU/SELECT, then select Delete (or Delete Entry). To confirm, select Yes.</td>
</tr>
<tr>
<td>close the list</td>
<td>PHONEBOOK/LEFT.</td>
</tr>
</tbody>
</table>

- When it’s in standby, the handset shows how many calls came in since the last time you checked the CID list.

Adding Phonebook Entries

With the phone in standby, open the phonebook. Press MENU/SELECT and then select Create New. Proceed to enter a name and number.
- Enter the phone number (up to 20 digits) exactly as you would dial it.
- If you need to enter a pause between the numbers, press REDIAL/PAUSE; you’ll see a P in the display. (The dialing will pause for about 2 seconds per a digit.)
- To edit the number, press CLEAR to back up the cursor and delete numbers. Re-enter the correct numbers.

Deleting All the Entries

With the phone in standby, open the list (phonebook, CID, or redial). Press MENU/SELECT and then select Delete All. To confirm, select Yes.

Chain Dialing

If you often have to enter a series of digits or a code number during a call, you can save that code number as a regular phonebook entry and use the phonebook to send the code number.

Make a call normally. When you hear the prompt that asks you to enter your number, open the phonebook and find the entry. Press MENU/SELECT to send the code. If you change your mind, just close the phonebook.

Using Call Waiting

- Call Waiting, a service available from your telephone provider, lets you receive calls while you are on another call. Caller ID on Call Waiting (CIDCW) service displays Caller ID information for a waiting call.
- If you get a Call Waiting call, the phone sounds a tone. Press TALK/FLASH to switch between the current call and the waiting call; each time you switch, there is a short pause before you’re connected to the other caller.
Finding the Handset

With the phone in standby, press **FIND** on the base. The handset will beep for 1 minute. To cancel, press **FIND** again or press any handset key.

Voice Message Notification

If you subscribe to a voice mail service, your phone displays the voice mail icon (🌁) when you have a new message. After you listen to your messages, the message icon turns off. If it doesn’t, you can reset it: With the phone in standby, open the menu and select *Global Setup*; select *VMWI Reset*, then select *Yes*.

Setting Up Voice Mail Access

If you have voice mail access through your service provider, you can program that access number into your phone and then just press one key to dial - **MESSAgES**. You will set up an access code to your account, and you can either enter that manually after you have accessed the voice mail or you can program that into your phone, too.

1. Press **MESSAgES**. If no voice mail access number has been set up, the system prompts you to do that now. (You can add the access number later; press **MENu/SELECT** then *Global Setup/Edit Voice Mail.*
2. Enter the provider’s voice mail access number. Press **MENu/SELECT** to set the number.
3. The screen displays *Done!* and returns to the Global Setup menu.
4. To access your provider’s voice mail service now, press **MESSAgES**. The system will dial the voice mail service and you can enter your security code manually when prompted.

Editing Your Voice Mail Number

You can add your voice mail security code to the voice mail number string.

1. Press **MENu/SELECT**, then scroll to *Global Setup/Edit Voice Mail*.
2. Enter your voice mail number again, then press **REDIAL/PAUSE** twice to enter a 4-second pause. Next, enter your security code.
3. Press **MENu/SELECT** when you are finished. The system displays *Done!* and returns to the Global Setup menu.
4. To access your provider’s voice mail service now, just press **MESSAgES**. The system will dial the access number, wait 4 seconds, and then dial the security code.
# TROUBLESHOOTING

<table>
<thead>
<tr>
<th>Problems</th>
<th>Possible solutions</th>
</tr>
</thead>
</table>
| I can’t make or receive calls.              | • Check the telephone cord connection.  
• Disconnect the base AC adapter. Wait a few minutes, then reconnect it.  
• Make sure the base is plugged in.       |
| The handset won’t ring.                     | • Make sure the ringer is turned on.                                                |
| The handset is not working.                 | • Charge the battery for 15-20 hours.  
• Check the battery connection.            |
| The handset won’t display CID information.  | • Let calls ring twice before answering.  
• Make sure your CID service is active.    |
| I hear a beeping during a call.             | • The battery is getting low. Check the handset for a low battery alert. Finish your conversation and return the handset to the cradle as soon as possible. |
| There’s a lot of noise or static on the line| • Check for interference from appliances (microwave ovens, TVs, etc.) or wireless devices (baby monitors, WiFi equipment, etc.). Move the handset or base away from the interference source.  
• Move the handset closer to the base.  
• Turn the T-coil on for telecoil hearing aids (see p. 6). |

## Installing a Line Filter or DSL Filter

- A telephone line filter or DSL filter prevents services that use the phone line from causing interference on your phone. To get a line filter, contact your service provider or look in an electronics store.  
- Plug the filter into the telephone wall jack and plug the base into the filter. Make a test call to make sure the noise is gone.

## Liquid Damage

**CAUTION:** If the base is covered in liquid, disconnect the adapter and phone cord from the wall before touching it.

If the liquid is only on the exterior housing of the base or handset, wipe it off and use as normal. If you can hear liquid inside the housing:
1. Remove all compartment covers, and disconnect all cables and cords.  
2. If liquid is leaking from any vent or hole, turn the phone so that vent faces down. If not, place the largest vent face down.  
3. Let dry for at least 3 days. Check for liquid inside the phone before replacing compartment covers and reconnecting cords.
**Adapter and Battery Information**

<table>

</tr>
</tbody>
</table>

- Use only the supplied AC adapter.
- Use the proper adapter for the base.
- Do not place the unit in direct sunlight or subject it to high temperatures.
- Replace the battery when the talk or standby time becomes noticeably reduced. For replacements, call the Parts Department (see the front cover).
- When the battery gets low, the handset beeps or shows a low battery alert; put the handset in the cradle for recharging.

**Rechargeable Battery Warning**

- This equipment contains a rechargeable Nickel-Metal-Hydride (Ni-MH) battery.
- Nickel is a chemical known to the state of California to cause cancer.
- Do not short-circuit the battery.
- The batteries in this equipment may explode if disposed of in a fire.
- Do not charge the batteries in any charger other than the one specified in the owner’s manual. Using another charger may damage the battery or cause it to explode.

- As part of our commitment to protecting our environment and conserving natural resources, Uniden voluntarily participates in an RBRC® industry program to collect and recycle used Ni-MH batteries within the United States. Please call 1-800-8-BATTERY for information on Ni-MH battery recycling in your area. (RBRC® is a registered trademark of the Rechargeable Battery Recycling Corporation.)

Rechargeable batteries must be recycled or disposed of properly.

**Warning!** The cords on this product and/or accessories contain lead, a chemical known to the state of California to cause birth defects or other reproductive harm. Wash hands after handling.

Uniden works to reduce lead content in PVC coated cords in our products and accessories.

**Compliance Information**

**FCC Part 68 Information**

This equipment complies with Part 68 of the FCC rules and the requirements adopted by the ACTA. On the bottom of this equipment is a label that contains, among other information, a product identifier in the format US: AAAEQ##TXXXX. If requested, this number must be provided to the phone company.

An applicable Universal Service Order Codes (USOC) certification for the jacks used in this equipment is provided (i.e., RJ11C) in the packaging with each piece of approved terminal equipment. A plug and jack used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. A compliant telephone cord and modular plug is provided with this product. It is designed to be connected to a compatible modular jack that is also
compliant. See installation instructions for
details.
The REN is used to determine the number
of devices that may be connected to a phone
line. Excessive RENs on a phone line may
result in devices not ringing in response
to an incoming call. In most but not all
areas, the sum of RENs should not exceed
five (5.0). To be certain of the number of
devices that may be connected to a line,
as determined by the total RENs, contact
the telephone provider. The REN for this
product is part of the product identifier that
has the format US:AAAEQQ##TXXXX.
The digits represented by ## are the REN
without a decimal point (e.g., 03 is a REN
of 0.3).

If this equipment causes harm to the
telephone network, the telephone company
will notify you in advance that temporary
discontinuance of service may be required.
But if advance notice isn't practical, the
telephone company will notify the customer
as soon as possible. Also, you will be
advised of your right to file a complaint
with the FCC if you believe it is necessary.
The telephone company may make changes
in its facilities, equipment, operations or
procedures that could affect the operation
of the equipment. If this happens the
telephone company will provide advance
notice in order for you to make necessary
modifications to maintain uninterrupted
service.

Please follow instructions for repairing,
if any (e.g. battery replacement section);
otherwise do not substitute or repair any
parts of the device except as specified in this
manual. Connection to party line service
is subject to state tariffs. Contact the state
public utility commission, public service
commission or corporation commission for
information. This equipment is hearing aid
compatible.

If you experience trouble with this
equipment, contact the manufacturer or
an authorized agent. If the equipment is
causing harm to the telephone network, the
telephone company may request that you
disconnect the equipment until the problem
is resolved.

If your home has wired alarm equipment
connected to a phone line, be sure that
installing the system does not disable your
alarm equipment. If you have questions
about what will disable alarm equipment,
contact your telephone company or a
qualified installer.

Any changes or modifications to this
product not expressly approved by the
manufacturer or other party responsible for
compliance could void your authority to
operate this product.

NOTICE: According to telephone company
reports, AC electrical surges, typically
resulting from lightning strikes, are very
destructive to telephone equipment
connected to AC power sources. To
minimize damage from these types of
surges, a surge arrester is recommended.

**FCC Part 15 Information**

This device complies with part 15 of the
FCC rules. Operation is subject to the
following two conditions: (1) This device
may not cause harmful interference, and (2)
This device must accept any interference
received, including interference that may
cause undesired operation. Privacy of
communications may not be ensured when
using this phone.

**FCC PART 15.105(b):** Note: This
equipment has been tested and found to
comply with the limits for a Class B digital
device, pursuant to part 15 of the FCC
Rules. These limits are designed to provide
reasonable protection against harmful
interference in a residential installation.
This equipment generates, uses and can
radiate radio frequency energy and, if not
installed and used in accordance with the
instructions, may cause harmful interference
to radio communications. However, there
is no guarantee that interference will not
occur in a particular installation. If this
equipment does cause harmful interference
to radio or television reception, which can
be determined by turning the equipment
off and on, the user is encouraged to try to
correct the interference by one or more of
the following measures:

- Reorient or relocate the receiving antenna.
Increase the separation between the equipment and receiver.
Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
Consult the dealer or an experienced radio/TV technician for help.

**RF Exposure Information**

This product complies with FCC radiation exposure limits under the following conditions:

- The base must be placed to allow a minimum of 20 cm (8 inches) between the antenna and all persons during normal operation.
- The base must not be collocated or operated in conjunction with any other antenna or transmitter.
- The handset is designed for body-worn operation and meets FCC RF exposure guidelines when used with any belt clip, carrying case, or other accessory supplied with this product. (All necessary accessories are included in the package; any additional or optional accessories are not required for compliance with the guidelines.) Third party accessories (unless approved by the manufacturer) should be avoided as these might not comply with FCC RF exposure guidelines.

**Disable All Functions Except Charging**

**D1364 Base**
1. Plug in the AC adapter.
2. Immediately begin to press **FIND HS** repeatedly on the base. All functions will be disabled after **FIND HS** is pressed approximately 20 times in 15 seconds.

**D1364 Handset**
1. Install the battery.
2. Once **Welcome, Please wait...** disappears from the display, press and hold **END**, **MENU**, and * simultaneously.
3. After about 5 seconds, a confirmation tone sounds, indicating all functions except charging have been disabled.

**To return to normal operation, cycle the power for the base and remove and reinstall the handset battery.**

**Industry Canada (I.C.) Notice**

**Terminal equipment**

NOTICE: This equipment meets the applicable Industry Canada Terminal Equipment Technical Specifications. This is confirmed by the registration number. The abbreviation *IC* before the registration number signifies that registration was performed based on a Declaration of Conformity indicating that Industry Canada technical specifications were met. It does not imply that Industry Canada approved the equipment.

NOTICE: The Ringer Equivalence Number (REN) for this terminal equipment is marked on the equipment itself. The REN assigned to each terminal equipment provides an indication of the maximum number of terminals allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the Ringer Equivalence Numbers of all the devices does not exceed 5.

**Radio equipment**

The term *IC* before the radio certification number only signifies that Industry Canada technical specifications were met. Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device. "Privacy of communications may not be ensured when using this telephone."

**Warranty (1 Year, Limited)**

Evidence of original purchase is required for warranty service.

WARRANTOR: UNIDEN AMERICA CORPORATION ("Uniden")

ELEMENTS OF WARRANTY: Uniden warrants, for one year, to the original retail owner, this Uniden Product to be free from defects in materials and craftsmanship with
only the limitations or exclusions set out below.

WARRANTY DURATION: This warranty to the original user shall terminate and be of no further effect 12 months after the date of original retail sale. The warranty is invalid if the Product is (A) damaged or not maintained as reasonable or necessary, (B) modified, altered, or used as part of any conversion kits, subassemblies, or any configurations not sold by Uniden, (C) improperly installed, (D) serviced or repaired by someone other than an authorized Uniden service center for a defect or malfunction covered by this warranty, (E) used in any conjunction with equipment or parts or as part of any system not manufactured by Uniden, or (F) installed or programmed by anyone other than as detailed by the owner’s manual for this product.

STATEMENT OF REMEDY: In the event that the product does not conform to this warranty at any time while this warranty is in effect, warrantor will either, at its option, repair or replace the defective unit and return it to you without charge for parts, service, or any other cost (except shipping and handling) incurred by warrantor or its representatives in connection with the performance of this warranty. Warrantor, at its option, may replace the unit with a new or refurbished unit. THE LIMITED WARRANTY SET FORTH ABOVE IS THE SOLE AND ENTIRE WARRANTY PERTAINING TO THE PRODUCT AND IS IN LIEU OF AND EXCLUDES ALL OTHER WARRANTIES OF ANY NATURE WHATSOEVER, WHETHER EXPRESS, IMPLIED OR ARISING BY OPERATION OF LAW, INCLUDING, BUT NOT LIMITED TO ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. THIS WARRANTY DOES NOT COVER OR PROVIDE FOR THE REIMBURSEMENT OR PAYMENT OF INCIDENTAL OR CONSEQUENTIAL DAMAGES. Some states do not allow this exclusion or limitation of incidental or consequential damages so the above limitation or exclusion may not apply to you.

LEGAL REMEDIES: This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. This warranty is void outside the United States of America and Canada.

PROCEDURE FOR OBTAINING PERFORMANCE OF WARRANTY: If, after following the instructions in the owner’s manual you are certain that the Product is defective, pack the Product carefully (preferably in its original packaging). Disconnect the battery from the Product and separately secure the battery in its own separate packaging within the shipping carton. The Product should include all parts and accessories originally packaged with the Product. Include evidence of original purchase and a note describing the defect that has caused you to return it. The Product should be shipped freight prepaid, by traceable means, to warrantor at: Uniden America Service 4700 Amon Carter Blvd. Fort Worth, TX 76155
