Step 1 Checking the Package Contents

Make sure your cordless phone's packaging includes the following items (the number of items may vary depending on model number within this series). If any of these items are missing or damaged, contact the Uniden Parts Department.

• Base Unit
• Handset(s)
• AC Adapter(s)
• Wall Mount Adapter
• Rechargeable Battery Pack(s)
• Telephone Cord
• Belt Clip(s)
• Owner's Manual
• Other Printed Materials

Step 2 Install and Charge the Handset Battery

TO INSTALL THE HANDSET BATTERY
(See page 12 for details)

Charge the handset battery pack for at least 15-20 hours before using your new cordless telephone for the first time!

Use only the Uniden rechargeable battery pack supplied with your new phone.

A: Remove the cover.
B: Connect the battery pack connector with the correct polarity and listen for a click to insure connection.
C: Replace the cover.

Use only the Uniden AC adapter supplied with your new phone.

D: Plug the AC adapter cord into the base unit and then into a 120V AC outlet.
E: Place the handset in the base and charge continuously for 15-20 hours before using the phone.
Step 3  Connect to Phone Line

When the handset battery pack is fully charged after 15-20 hours of charging, plug the telephone cord into the base unit and then into a telephone wall jack. Your phone is set for tone dialing. If your local network requires pulse dialing, please see "D. Choose the dialing mode" on page 15.

Step 4  Setting Caller ID & Language Display Options

TO SET CALLER ID ON CALL WAITING AND CALL WAITING DELUXE
For all Handset Menu Setup Options, refer to page 22.

A  Press menu/del in standby mode.
B  Press ring/vol/∧ or ring/vol/∨ to select Global Setup and then select/ EXIT.
C  Press ring/vol/∧ or ring/vol/∨ to select CIDCW and then select/EXIT.
D  Press ring/vol/∧ or ring/vol/∨ to select CW On/CWDX On, CW On/CWDX Off, or CW Off/CWDX Off and then select/EXIT.

TO SET LANGUAGE

A  Press menu/del in standby mode.
B  Press ring/vol/∧ or ring/vol/∨ to select Handset Setup and then select/EXIT.
C  Press ring/vol/∧ or ring/vol/∨ to select Language and then select/EXIT.
D  Press ring/vol/∧ to choose a language and then select/EXIT.

Step 5  Setting Up the Answering System

TO TURN THE ANSWERING SYSTEM ON/OFF
Each time ans on/off is pressed, the answer mode is switched between On and Off.

TO SET GREETING MESSAGE

A  Press and hold greeting until voice prompt "recording greeting" plays.
B  Position yourself near the base mic, and begin recording your greeting.
C  When finished recording, press greeting or play/stop. Your greeting will playback for confirmation.
1° Paso  Inspección del contenido del embalaje

Asegúrese de que haya recibido los siguientes artículos en el paquete (la cantidad de artículos puede variar dependiendo del número del modelo dentro de la serie). Si alguno de estos artículos falta o está dañado, comuníquese con el departamento de partes de Uniden.

- Base
- Receptor(es)
- Adaptador(es) CA
- Adaptador de montaje de pared
- Paquete(s) de pilas recargable(s)
- Cable telefónico
- Pinza(s) para la correa
- Manual para el usuario
- Otros impresos

Uniden Parts Department
Teléfono: (800)554-3988
Horas: de Lunes a Viernes desde las 8 a.m. hasta las 5:00 p.m., hora central
O visitenos en nuestra página Web en www.uniden.com para conseguir las partes de reemplazo.

2° Paso  Instalación y carga de la pila para el receptor

Para instalar la pila del receptor
(Consulte la página 12 para más detalles)

Cargue el paquete de batería to pila por lo menos de 15 á 20 horas antes de conectarlo a una línea telefónica.

Use solamente el paquete de pilas recargable de Uniden suministrado con su nuevo teléfono.

A Quite la tapa.
B Conecte el enchufe del paquete de las pilas con la polaridad correcta y escuche por un clic para asegurar la conexión.
C Reponga la tapa.
D Use solamente el adaptador CA de Uniden suministrado con su nuevo teléfono.
E Antes de usar el teléfono, coloque el receptor en la base y cárguelo continuamente por 15 – 20 horas.

www.uniden.com

Guía de referencia rápida [3]
3° Paso  Conexión a la línea telefónica

Cuando el paquete de pilas del receptor esté totalmente cargado, después de una carga de 15-20 horas, conecte el cable telefónico en la base y luego en el enchufe telefónico de la pared.

Su teléfono está programado para marcar por tono.

Si su red local requiere la marcación por pulso, por favor consulte "B. Selección del modo de marcación" en la página 15.

4° Paso  Programación de las opciones de identificación de llamadas y del lenguaje en la pantalla

Para programar las opciones de identificación de llamadas de llamadas en espera y llamada en espera de lujo

Para todas las demás opciones de programación en el menú, consulte la página 22.

A Oprima menu/del en el modo de espera.

B Oprima ring/vol/∧ o ring/vol/∨ para seleccionar la Progr global, y luego select/Ò.

C Oprima ring/vol/∧ o ring/vol/∨ para seleccionar CIDCU, y luego select/Ò.

D Oprima ring/vol/∧ o ring/vol/∨ para seleccionar CV Act/CVDX Act, CV Act/CVDX Apg, o CV Apg/CVDX Apg, y luego select/Ò.

5° Paso  Programación del contestador automático

Para encender o apagar el contestador automático

Cada vez que se oprime ans on/off, el modo de contestación se intercambia entre encendido y apagado.

Para programar un mensaje personal

A Mantenga oprimido greeting hasta que escuche la indicación para grabar el mensaje.

B Colóquese cerca del micrófono en la base, y comience a grabar su mensaje.

C Cuando termine con la grabación, oprima greeting o play/stop. Su mensaje se escuchará como confirmación.

Welcome

Congratulations on your purchase of the Uniden Multi-Handset Cordless System telephone. This unit is different from conventional cordless telephones. When the base unit is connected to AC power and a telephone line, it can support up to 4 handsets. Using extra handsets, you can establish a 4-way conference call (2 handsets - Base Speaker Phone - an outside line). Additionally, with 4-way conference using 2 handsets, another 2 handsets can establish an intercom call. You can now place a fully featured cordless handset anywhere in your home or office where AC power is available to connect the handset chargers.

Note: Some illustrations in this manual may differ from the actual unit for explanation purposes.

As an Energy Star® Partner, Uniden has determined that this product or product models meets the Energy Star® guidelines for energy efficiency. Energy Star® is a U.S. registered mark.

Note: Energy Star® applies to DCT648 only.

Features

- 2.4GHz Frequency Hopping Spread Spectrum
- Integrated Answering Device
- Trilingual Voice Prompts (English, French, Spanish)
- 4 Multi-Handset Expandability
- Hands Free Speaker Phone at Handset and Base
- Caller ID/Caller ID on Call Waiting
- Call Waiting Deluxe
- 100 Dynamic Memory Location (Phonebook & Caller ID)
- Trilingual Handset Display Menus (English, French, and Spanish)
- Intercom/CALL Transfer between Handsets
- 20 Distinctive Ring Options (10 ringer tones and 10 melody ringers)
- Mute Feature
- DND Feature (Do Not Disturb)
- 88 Channel Auto Scan
- DirectLink™ Mode
- Room Monitoring Feature
- Battery Level Indicator
- Clock Display
This series features include AutoTalk and AutoStandby. AutoTalk allows you to answer a call by just removing the handset from the cradle so you don't have to waste time pushing buttons. AutoStandby allows you to hang up by simply returning the handset to the cradle.

To protect you against mis-billed calls, which might result from your phone being activated by other equipment, this series has Random Code digital security, which automatically selects one of over approx. 130,000 digital security codes for the handset and base.

Frequency Hopping Spread Spectrum (FHSS) technology improves calling range and clarity, and eliminates cross talk. Because it rapidly changes transmission frequencies within the 2.4GHz bandwidth, this cordless phone helps reduce the possibility of eavesdropping.

DirectLink mode is used when you have 2 or more handsets. You can use your handsets as transceivers.

Be sure to visit our web site: www.uniden.com

Uniden is a registered trademark of Uniden America Corporation.

AutoTalk, AutoStandby, DirectLink, and Random Code are trademarks of Uniden America.

**Terminology**

- **Standby Mode** - The handset is not in use and talk/flash has not been pressed.
- **Talk Mode** - The handset is not in the cradle and talk/flash or speaker has been pressed enabling a dial tone. Talk appears on the display.

Setting up the Phone

Do the following steps:
A. Choose the best location.
B. Install the rechargeable battery pack into the handset.
C. Connect the base unit.
D. Choose the dialing mode.

A. Choose the best location
Before choosing a location for your new phone, read “Installation Considerations” on page 79. Here are some important guidelines you should consider:

- Avoid heat sources, such as radiators, air ducts, and sunlight
- Avoid noise sources such as a window by a street with heavy traffic
- Avoid television sets and other electronic equipment
- Avoid microwave ovens
- Avoid excessive moisture, extremely low temperatures, dust, mechanical vibration, or shock
- Avoid personal computers
- Avoid other cordless telephones
- Choose a central location

note
If your home has specially wired alarm equipment connected to the telephone line, be sure that installing the system does not disable your alarm equipment.

If you have questions about what will disable alarm equipment, contact your telephone company or a qualified installer.
B. Install the rechargeable battery pack into the handset

Charge the handset battery pack for at least 15-20 hours before using your new cordless telephone for the first time! The handset is powered by a rechargeable battery pack. The battery recharges automatically when the handset is placed in the base unit. To maximize the charge capacity of your battery pack, DO NOT plug the telephone cord into the base unit and wall jack until the battery is fully charged.

1) Press down on the handset battery case cover (use the finger indentation for a better grip) and slide the cover downward to remove.

2) Plug the battery pack connector (red & black wires) into the jack inside the battery compartment (the connector notches fit into the grooves of the jack only one-way). Match the wire colors to the polarity label in the battery compartment, connect the battery, and listen for a click to insure connection.

3) Make sure you have a good connection by slightly pulling on the battery wires. If the connection is secure, the battery jack will remain in place.

4) Place the battery case cover back on the handset by sliding it upwards until it clicks into place.

5) Place the handset in the base unit for 15-20 hours without interruption. The base unit's LED light (labeled charge) illuminates once the handset is placed in the base. The LED light will illuminate whether the battery pack is connected or not.

If the base charge LED light does not illuminate:

- Check to see if the AC adapter is plugged into the base unit and the electrical wall outlet properly (use only the supplied AC adapter. Do not use any other AC adapter.)
- Check to see if the handset is sitting correctly in the base and making good contact with the base unit's charging contacts.
Low battery alert
When the battery pack is very low and needs to be charged, the phone is programmed to eliminate functions in order to save power.

The battery pack needs to be charged when:
- The empty battery icon appears.
- Low Battery appears in the display.
If the phone is in standby mode, none of keys will operate.
If you are on a call, complete your conversation as quickly as possible, and return the handset to the cradle.

Cleaning the battery charging contacts
To maintain a good charge, it is important to clean the charging contacts on both the handset and the base unit once a month. Using water only, dampen a cloth to clean the charging contacts. Then make sure to go back over the charging contacts with a dry cloth before returning the handset to the base to charge.

Caution: Do not use paint thinner, benzene, alcohol, or other chemical products. Doing so may discolor the surface of the telephone and damage the finish.

note
- Even when the battery pack is not being used, it will gradually discharge over a long period of time. For optimum performance, be sure to return the handset to the base unit after a telephone call.
- Standby Mode - The handset is not in use and talk/flash has not been pressed.
- Talk Mode - The handset is not in the cradle and talk/flash or speaker has been pressed enabling a dial tone. Talk appears on the display.
C. Connect the base unit

1) Connect the AC adapter to the DC IN 9V jack and to a standard 120V AC wall outlet.

2) Set the base on a desk or tabletop, and place the handset in the base unit.

3) Raise the antenna to a vertical position.

4) Make sure that the charge LED illuminates.
   - If the LED does not illuminate, check to see that the AC adapter is plugged in and the handset makes good contact with the base charging contacts.
   - Connect the AC adapter to a continuous power supply.
   - Place the base unit close to the AC outlet so that you can unplug the AC adapter easily.

5) Once the handset battery pack is fully charged, connect the telephone line cord to the TEL LINE jack and to a telephone outlet.
   - If your telephone outlet isn’t modular, contact your telephone company for assistance.

[14] GETTING STARTED
D. Choose the dialing mode
Most phone systems use tone dialing, which sends DTMF tones through the phone lines. However, some phone systems still use pulse dialing such as in rural areas. The default setting is tone dialing. Depending on your dialing system, set the dial mode. To set the dial mode, see “Setting the Dial Mode” on page 28.

- If you are not sure of your dialing system, set the unit to tone dialing. Make a trial call. If the call connects, leave the setting as is, otherwise set the unit to pulse dialing.
- If your phone system requires pulse dialing and you need to send DTMF tones in certain situations during a call, you may Switch Over to tone dialing (refer to “Tone Dialing Switch-over” on page 34).
Mounting the Base Unit on a Wall

**Standard wall plate mounting**

This phone can be mounted on any standard wall plate.

1) Snap the wall mount adapter into the notches on the base top.

2) Plug the AC adapter into the **DC IN 9V** jack.

3) Wrap the AC adapter cord inside the molded wiring channel as shown.

4) Plug the AC adapter into a standard 120V AC wall outlet.

5) Plug the telephone line cord into the **TEL LINE** jack. Wrap the cord inside the molded wiring channel as shown.

6) Plug the telephone line cord into the telephone outlet.

7) Raise the antenna to a vertical position.

8) Align the mounting slots on the base with the mounting posts on the wall. Then push in and down until the phone is firmly seated.

**DO NOT** use an AC outlet controlled by a wall switch.
Direct wall mounting
If you don't have a standard wall plate, you can mount your phone directly to the wall. Before doing this, consider the following:

- Avoid electrical cables, pipes, or other items behind the mounting location that could cause a hazard when inserting screws into the wall.
- Try to mount your phone within 5 feet of a working phone jack to avoid excessive lengths.
- Make sure the wall material is capable of supporting the weight of the base and handset.
- Use #10 screws (minimum length of 1-3/8 inches) with anchoring devices suitable for the wall material where the base unit will be placed.

1) Insert two mounting screws into the wall (with their appropriate anchoring device), 3-15/16 inches apart. Allow about 1/8 of an inch between the wall and screw heads for mounting the phone.
2) Refer to steps 1 through 8 on page 16 to mount the telephone.
About the Menu Options

There are 6 main menu setup options, (DirectLink Mode, Room Monitor, Handset Setup, Answ. Setup, Global Setup and System Reset) and 16 submenu options.

Summary of Main Menu Options and Submenu Option

DirectLink Mode
DirectLink Mode allows a pair of handsets to work without the base unit for direct handset-to-handset communication. Use them at sporting events or while shopping to stay in contact with family members or friends. You must set the two handsets to DirectLink Mode to utilize this feature.

Room Monitor
This feature only works if you have two or more handsets, allowing you to monitor sounds in another room (see page 23 for setup). One handset is placed in the desired room to monitor (acts as remote mic), and the other is placed near listener (remote speaker). This is useful for monitoring child activities.
Handset Setup
The following submenu options must be set separately for each handset.

<table>
<thead>
<tr>
<th>Submenu option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ringer Tones (Default is Flicker)</td>
<td>Adjusting the ringer tone (see page 23).</td>
</tr>
<tr>
<td>Distinct. Ring (Default is on)</td>
<td>Set the distinctive ring (tone your phone makes when ringing) (see page 24). “Distinctive Ringer” allows you to preset memory locations with a designated ring tone. When an incoming call is received and the Caller ID information matches the information in one of the memory locations, the distinctive ring that has been stored for that particular Caller will sound. If you have set multiple memory locations with distinctive rings, switching the setting to “Distinctive Off” will result in no distinctive ringing. All incoming calls will have a normal ring tone. Switching to “Distinctive On” will activate all programmed distinctive ring memory locations.</td>
</tr>
<tr>
<td>AutoTalk (Default is off)</td>
<td>Allows you to answer the phone without pressing talk/flash or speaker. When the AutoTalk is set to On, simply remove the handset from the cradle and the phone automatically answers the call (see page 24).</td>
</tr>
<tr>
<td>Anykey Answer (Default is off)</td>
<td>Allows you to answer the phone without pressing talk/flash or speaker. When the Anykey Answer is On, you can answer a call by pressing any number key, #/tone/←, or #/→ on the handset (see page 24).</td>
</tr>
<tr>
<td>Banner (True Banner)</td>
<td>Customize your handset(s) by giving it a banner name. The name will be displayed on the LCD screen during standby mode, Intercom, Transfer, Room Monitor and Copy Phonebook operation. The banner name will be displayed on the receiving handset as well (see page 24).</td>
</tr>
<tr>
<td>Language (Default is English)</td>
<td>The menu display options can be set to English, French or Spanish for easy setup use (see page 25).</td>
</tr>
<tr>
<td>Key Touch Tone (Default is on)</td>
<td>Allows you to set your phone’s key touch-tone to On or Off (tone your keypad makes when keys are pressed) (see page 25).</td>
</tr>
</tbody>
</table>
**Answering Setup**

This main menu option allows you to set up TAD settings from your handset. You can also set these submenu options from the base (see page 53).

<table>
<thead>
<tr>
<th>Submenu option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Security Code</td>
<td>Select a two-digit Personal Identification Number (PIN) code. A PIN code is required to play your messages from a remote location, you will need to enter a two-digit PIN code (see page 25).</td>
</tr>
<tr>
<td>Ring Time</td>
<td>Allows you to set the number of rings the caller hears before your answering system plays the outgoing message. You can set the ring time to answer after two, four, or six rings. Setting &quot;TS&quot; (Toll Saver), the answering system picks up after two rings if you have new messages, and after four rings if there are none (see page 28).</td>
</tr>
<tr>
<td>Record Time</td>
<td>Set the duration for recording the incoming messages. You have three record time options. The options &quot;1 minute&quot; or &quot;4 minutes&quot; set the duration for recording the incoming messages. &quot;Announce only&quot; answers the call with the preset greeting or your personal greeting but prevents the caller from leaving a message (see page 26).</td>
</tr>
<tr>
<td>Message Alert</td>
<td>Lets you know when you have a new incoming message by sounding a short alert tone (see page 26).</td>
</tr>
<tr>
<td>Language</td>
<td>Select the Language of your answering system announcements from English, French, or Spanish (see page 26).</td>
</tr>
<tr>
<td>Call Screen</td>
<td>Allows you to screen an incoming call before answer the call. Set the call-screening feature to On or Off (see page 27).</td>
</tr>
</tbody>
</table>
Global Setup

If you change one of the Global settings, you change the setting for all additional handsets. Only one handset can change Global settings at a time.

<table>
<thead>
<tr>
<th>Submenu option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Day &amp; time</td>
<td>Set the day and time of your display (see page 27).</td>
</tr>
<tr>
<td>CIDCW (Default is CW on/ CWDX off)</td>
<td>Set the Caller ID on Call Waiting (CIDCW) setting. CIDCW performs the same as regular Caller ID on a call waiting number (see page 27). Call Waiting Deluxe allows you to handle call waiting calls in seven different ways (see page 49).</td>
</tr>
<tr>
<td>Area Code</td>
<td>Store or edit the area code. If you enter a 3-digit area code number in the &quot;Area Code&quot; option, your local area code does not appear in the Caller ID message. For calls received from outside your local area code, you will see a full 10-digit number (see page 28). Note: If your calling area requires 10-digit dialing, do not program this option.</td>
</tr>
<tr>
<td>Dial Mode (Default is tone)</td>
<td>Set the dial mode to tone or pulse (see page 28). Most phone systems use tone dialing, which sends DTMF tone through phone line, the default setting is tone dialing. Depends on your dialing system, set the dial mode.</td>
</tr>
<tr>
<td>Copy Phonebook</td>
<td>Allow you to transfer the phonebook data stored in one handset to another handset (see page 28).</td>
</tr>
</tbody>
</table>

System Reset

System Reset is used to clear the handset’s ID from the main base unit, or the base ID from the handset.

<table>
<thead>
<tr>
<th>Submenu option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>De register HS</td>
<td>Clear the handset ID from the base. Use this option, for example, when you change the digital security code (see page 29).</td>
</tr>
<tr>
<td>Replacing Base</td>
<td>Clear the base ID. Use this option, for example, if you wish to deregister the base to use the handset with another base of the DSS series (DCT646/ DCT646S/DCT648/DCT648S series) (see page 29).</td>
</tr>
</tbody>
</table>
Setting Up the Menu

**Entering the Menu**

1) Press the menu/del key in standby mode.
2) Use ring/vol/∧ or ring/vol/∇ to move the pointer to a desired main menu (DirectLink Mode, Room Monitor, Handset Setup, Answ. Setup, Global Setup, and System Reset).
3) Press select/□ to select the desired main menu.
4) Use ring/vol/∧ or ring/vol/∇ to select a desired submenu and then press select/□ to enter.
   In the submenu, use ring/vol/∧ or ring/vol/∇ to select an item. Press select/□ to confirm your selection. For detailed instructions, see the following sections for the desired submenu.
5) To exit the menu, press end or place the handset to the cradle.

**DirectLink Mode**

**Using the DirectLink Mode**

1) Enter the DirectLink Mode menu (see "Entering the Menu" on page 22). To enter DirectLink mode press [SELECT] appears.
2) Press select/□ to enter the DirectLink mode. You will hear a confirmation tone, and DirectLink Mode Complete appears.
3) To return back to the normal mode, exit the DirectLink mode. To exit the DirectLink mode, press menu/del, and then select/□, or return the handset to the cradle.
Room Monitor
Using Room Monitor
1) Enter the Room Monitor menu (see “Entering the Menu” on page 22). To Room Monitor appears.
2) Select the handset you want to monitor by using ring/vol/\ or ring/vol/\.
3) Press select/\.
   RoomMonitor appears and you hear sounds in the room where the handset is installed.
4) To finish the Room Monitor, press end or return the handset to the cradle.

Handset Setup
Selecting a Ringer Tone
1) Enter the Handset Setup menu, and then the Ringer Tones submenu (see “Entering the Menu” on page 22).
   There are 10 ringer tones or 10 melodies to choose from.
   - Ringers [Flicker, Clatter, Soft Alert, Wake Up, Light Bug, Beep Boop, Tone Board, Chip Chop, Party Clap, Reminder]
   - Melodies [Beethoven’s Symphony #9 (Beethoven9), For Elise (Elise), We Wish You A Merry Christmas (Merry- Xmas), Home Sweet Home (Hm Swt Hm), Lorri Song #6 (Lorri Song), When the Irish Eyes Are Smiling (Irish Eyes), Aura Lee, Let Me Call You Sweet Heart (Sweetheart), Star Spangled Banner(Star Spngl), Old MacDonald(Old MacDld)]
2) Press ring/vol/\ or ring/vol/\ to move the pointer. You will hear the ringer or melody as you scroll through the options.
3) Press select/\.
   You will hear a confirmation tone.

note
This is an example, if you have handset #1 and #2.
Distinctive Ringer Setup
1) Enter the Handset Setup menu, and then the Distinct. Ring submenu (see “Entering the Menu” on page 22).
2) Press ring/vol/∧ or ring/vol/∨ to select On or Off.
3) Press select/取消. You will hear a confirmation tone.

Setting the AutoTalk
1) Enter the Handset Setup menu, and then the Auto Talk submenu (see “Entering the Menu” on page 22).
2) Press ring/vol/∧ or ring/vol/∨ to select On or Off.
3) Press select/取消. You will hear a confirmation tone.

Setting the Anykey Answer
1) Enter the Handset Setup menu, and then the Anykey Answer submenu (see “Entering the Menu” on page 22).
2) Press ring/vol/∧ or ring/vol/∨ to select On or Off.
3) Press select/取消. You will hear a confirmation tone.

Setting the True Banner
1) Enter the Handset Setup menu, and then the Banner submenu (see "Entering the Menu" on page 22).
2) Use the number keypad (0-9), #/tone ←, #/→, or menu/del to enter or edit the name.
3) Press select/取消. You will hear a confirmation tone.
Selecting a Language
1) Enter the Handset Setup menu, and then the Language submenu (see "Entering the Menu" on page 22).
2) Press ring/vol/∧ or ring/vol/∨ to choose English, Français (French), or Español (Spanish).
3) Press select/□. You will hear a confirmation tone.

Setting the Key Touch Tone
1) Enter the Handset Setup menu, and then the Key Touch Tone submenu (see "Entering the Menu" on page 22).
2) Press ring/vol/∧ or ring/vol/∨ to select On or Off.
3) Press select/□. You will hear a confirmation tone.

Answering System Setup
Setting a PIN Code
1) Enter the Answ. Setup menu, and then the Security Code submenu (see "Entering the Menu" on page 22).
2) Enter a two-digit PIN code (01-99) using the number keypad (0-9).
3) Press select/□. You will hear a confirmation tone.
Setting the Ring Time
1) Enter the Answ. Setup menu, and then the Ring Time submenu (see "Entering the Menu" on page 22).
2) Press \texttt{ring/vol/} or \texttt{ring/vol/} to select a Ring Time (Toll Saver, 2 Times, 4 Times, or 6 Times).
3) Press \texttt{select/}. You will hear a confirmation tone.

Setting the Record Time
1) Enter the Answ. Setup menu, and then the Record Time submenu (see "Entering the Menu" on page 22).
2) Press \texttt{ring/vol/} or \texttt{ring/vol/} to select Record Time (1 Minute, 4 Minutes, or Announce Only).
3) Press \texttt{select/}. You will hear a confirmation tone.

Setting the Message Alert On or Off
1) Enter the Answ. Setup menu, and then the Message Alert submenu (see "Entering the Menu" on page 22).
2) Press \texttt{ring/vol/} or \texttt{ring/vol/} to select On or Off.
3) Press \texttt{select/}. You will hear a confirmation tone.

Setting the Language of your Answering System
1) Enter the Answ. Setup menu, and then the Language submenu (see "Entering the Menu" on page 22).
2) Press \texttt{ring/vol/} or \texttt{ring/vol/} to choose English, Français (French), or Español (Spanish).
3) Press \texttt{select/}. You will hear a confirmation tone.
Setting the Call Screen
1) Enter the Answ. Setup menu, and then the Call Screen submenu (see "Entering the Menu" on page 22).
2) Press ring/vol/\ or ring/vol/^ to select On or Off.
3) Press select/. You will hear a confirmation tone.

Global Setup
Setting Day and Time
1) Enter the Global Setup menu, and then the Day & Time submenu (see "Entering the Menu" on page 22).
2) Press ring/vol/\ or ring/vol/^ to select the day of the week, and then press select/.
3) Press ring/vol/\ or ring/vol/^ to set hour, and then press select/.
4) Press ring/vol/\ or ring/vol/^ to set minute and then press select/.
5) Press ring/vol/\ or ring/vol/^ to choose AM or PM and then press select/.
   You will hear a confirmation tone.

Setting CIDCW (Caller ID on Call Waiting)
1) Enter the Global Setup menu, and then the CIDCW submenu (see "Entering the Menu" on page 22).
2) Press ring/vol/\ or ring/vol/^ to select CW On/CMDX On, CW On/CMDX Off, or CW Off/CMDX Off and then press select/.
   You will hear a confirmation tone.
Setting the Area Code
1) Enter the Global Setup menu, and then the Area Code submenu (see "Entering the Menu" on page 22).
2) Press the number keypad (0-9) to enter a 3-digit area code.
3) Press select/. You will hear a confirmation tone.

Setting the Dial Mode
1) Enter the Global Setup menu, and then the Dial Mode submenu (see "Entering the Menu" on page 22).
2) Press ring/vol/ or ring/vol/ to select Tone or Pulse (the initial setting is Tone).
3) Press select/. You will hear a confirmation tone.

Copy Phonebook
1) Enter the Global Setup menu, and then the Copy Phonebook submenu (see "Entering the Menu" on page 22).
2) Press ring/vol/ or ring/vol/ to choose One memory or All Memory, and then press select/.
   If you choose All Memory, go to step 4.
3) Press ring/vol/ or ring/vol/ to select the phonebook location you want to export and then press select/.
   If you choose All Memory in the step 2, Are you sure? appears. Press ring/vol/ or ring/vol/ to select Yes, and then press select/.
   The phonebook locations will be transferred to the handset. On the receiving handset, Receiving and the handset name appear. When the transfer complete, Done! appears on the handset.

note
• When the area code has already been stored in memory, the stored area code will be displayed. To change it, use menu/del and number keys to enter the new area code.
• If you receive a call or setup the Global Setup menu, the transfer will be canceled.
• If an error occurs, the phonebook locations transferred before the error were stored in the receiving handset. Unavailable appears on the display.
• When the memory of the receiving handset is full, Not enough memory in Receiving Handset appears. You cannot transfer the phone book location.
System Reset

De-register the Handset
1) Enter the System Reset menu, and then the Deregister HS submenu (see "Entering the Menu" on page 22).
2) Press ring/vol/ or ring/vol/ to select the handset ID to be de-registered from the list, and then press select. Deregister HS? appears.
3) Press select. You will hear a confirmation tone. When de-registration is complete, Deregistration Complete appears.
4) After de-registering the handset, move to "Replacing the Base Setting" below.

Replacing the Base Setting
1) Enter the System Reset menu, and then the Replacing Base submenu (see "Entering the Menu" on page 22). Replace base? appears.
2) Press select. You will hear a confirmation tone. The base information will be deleted. When replacing the base is complete, Place handset on main base to register appears, register the handset to the new base (see page 66).
Making and Receiving Calls

From the Handset

This handset has a built-in speakerphone that allows you to have a hands-free conversation. This feature allows you to communicate easily while performing other tasks, such as cooking. ✉️ appears during hands-free conversations.

You can easily switch a call from normal conversation to hands-free conversation. To switch a call, press speaker during the call.

<table>
<thead>

<td></td>
</tr>
</tbody>
</table>
From the Base (Receiving calls only)
1) Press speaker and begin speaking.
2) To hang up, press (speaker).

Placing a Call on Hold
1) During a call, press hold/transfer/int’com or hold on the base. The call will be put on hold.

Hold, to transfer
▸ Handset #2
▸ Handset #3

For the handset, after 10 seconds of pressing hold/transfer/int’com or by pressing the end key, the handset display screen will read, Line On Hold.

2) To talk to the caller, press talk/flash or speaker on a handset (or (speaker) on the base). The phone will return back to the call.

• The base microphone is located under the base (see "Controls and Functions" on page 9). Position yourself as near to the base as possible.
• You can hold a call for 5 minutes, when 5 minutes has passed, the call is disconnected and the phone returns to standby mode.
• While a call is on hold, CIDCW can not be received.
Redialing a Call

The last three phone numbers dialed can be quickly redialed.

Redialing from Standby Mode
1) Press redial/pause in standby mode.
2) Press redial/pause again. Each press of redial/pause will display one of the last three number redialed.
3) Press talk/flash or speaker. The selected number is dialed.
4) To hang up, press end.

Redialing from Talk Mode
1) Press talk/flash or speaker.
2) Press redial/pause. The last number dialed will be displayed and redialed. To hang up, press end.

Deleting a Redial Record
1) Press redial/pause in standby mode.
2) Press redial/pause repeatedly to display the number to be deleted.
3) Press menu/del.
4) Press ring/vol/\ or ring/vol/\ to choose Yes.
5) Press select/\ . The redialed number is deleted.

Storing a Redial Record
1) Press redial/pause in standby mode.
2) Press redial/pause repeatedly to display the number to be stored.
3) Press select/\ . Store/Edit Name appears.
4) To complete the setting, follow the steps 3-8 in "Storing Phone Numbers, Names, Distinctive Rings, and Speed dial" on page 37-38.
Adjusting the Handset Ringer, Earpiece and Speaker Volume

**Handset ringer volume**
Press the volume up key or volume down key (labeled as △/vol/∧ or △/vol/∨ in standby mode) to select one of three ringer volume (off, low, or high).

**Earpiece and speaker volume**
Pressing the volume up key or volume down key (labeled as △/vol/∧ or △/vol/∨ key) during a call will change the earpiece volume of the handset. This setting will remain in effect after the telephone call has ended.

When you press volume up key (ring/vol/∧) in the maximum volume level or volume down key (ring/vol/∨) in the lowest volume level, an error tone sounds.

**Do Not Disturb (DND)**
DND allows you to mute the ringer of the handset and the base at once. Additionally, if you have more than one handset, ringer for all handsets will be muted. To do this, in the standby mode, press and hold do not disturb on the base. You will hear a confirmation tone and the DND LED right. To cancel ringer mute, press do not disturb again. You can also mute the ringer tone while the phone is ringing by pressing do not disturb on the base.

To mute the ringer tone for each handset or the base temporarily, when the phone is ringing:
- Press end on a handset, or
- Press play/stop on the base.
The ringer tone will return to the previous setting starting with the next incoming call.
Mute Microphone

With the handset
You can temporarily turn Off the microphone so that the person you are talking with cannot hear you.
1) Press menu/del during talk mode (while phone is in use).
2) Press ring/vol/ or ring/vol/ to move the pointer to Mute and then select/

Mute On and \[ \text{appear in the display. To cancel muting, repeat above step again when Mute} \]
\[ \text{is set to on, Mute Off appears.} \]

With the base
While using the base speakerphone, press mute on the base to turn Off the microphone.
Press mute again or press \( \text{speaker} \) to cancel muting.

Tone Dialing Switch-over

Some telephone companies use equipment that requires pulse dialing (sometimes referred to as rotary dialing). If you need to enter tone dialing digits, you can switch-over to tone dialing during the call. This feature is useful when you need tone dialing to use automated systems, for example, entering your bank account number after you have called your bank.

Initially make your call with the pulse dialing mode. Once your call connects, press *tone/ or *tone/. Enter the desired number. These digits will be sent as tone dialing. Once the call ends, the tone mode is canceled and pulse dialing mode resumes.

Traveling Out-of-Range

During a call, as you begin to move your handset too far from your base unit, noise may increase. If you pass the range limits of the base unit, you will hear a beep and see Out of Range on the display, and then the handset returns to standby mode. You may return back to the call if you move your handset within the range limits of the base and press talk/flash or speaker within 30 seconds.
Clarity Booster

If you encounter interference while using your phone, you can manually improve the sound by setting the Clarity Booster to on. **This works only when the phone is in use.**

1) Press menu/del during talk mode (while phone is in use).
2) Press ring/vol/∧ or ring/vol/∨ to move the pointer to Clarity Boost and then select/√.
   - **Boost On** and B appear in the display.
   - To turn Off the Clarity Booster, repeat above step again when the Clarity Booster is on, **Boost Off** appears.

Privacy Mode

Privacy Mode allows you privacy, and guarantee of no interruption from the base and other registered handsets. **This works only when the phone is in use.**

1) Press menu/del during talk mode (while phone is in use).
2) Press ring/vol/∧, or ring/vol/∨ to move the pointer to Privacy Mode, and then select/√.
   - Privacy Mode On and  appear in the display.
   - To exit the Privacy Mode, repeat above step again when the Privacy Mode is on. Privacy Mode Off appears.

Intercom/Call Transfer Feature

Intercom and transfer features are available for your phone. See "Intercom/Call Transfer Feature" on page 68 for details.
3-Way Conferencing

The phone permits 3-way conversations between the handset, base, and an outside line.

**When speaking on the handset**
1) Press 'speaker' on the base to initiate the 3-way conversation.
2) To hang up, press 'speaker' on the base. The handset will still be connected to the call.

**When speaking on the base**
1) Press talk/flash or speaker on the handset to initiate the 3-way conversation.
2) To hang up, return the handset to the cradle, or press end key on the handset. The base will still be connected to the call.

Flash and Call Waiting

If you have Call Waiting service and a call waiting tone sounds while you are on a call, press talk/flash to accept the waiting call. There is a short pause, and then you will hear the new caller. To return to the original caller, press talk/flash again.

New Message LED

The new message LED on the handset is designed to work with your answering system. The LED flashes when you have new messages in your answering system. The LED stops flashing when all new messages are played back (see "Using your Answering System" on page 59).
Phonebook

The Phonebook allows you to dial a number using just a few key presses. Your phone stores names/numbers in the phonebook memory location, and you can search names in alphabetical order. You have a total of 100 locations that can be used for the phonebook (including the speed dials) and Caller ID messages.

Storing Phone Numbers, Names, Distinctive Rings, and Speed Dial

1) When the phone is in standby mode, press phonebook.
   The handset displays the following items:
   (1st line) The number of the phonebook locations used
   (2nd line) How to search (press the number keypad,
   ring/vol/, or ring/vol/<)
   (3rd line) How to enter the storing operation (press the select/ key)

2) Press select/, Store/Edit Name appears.
3) Enter the name (up to 16 characters) by using the number keypad (see the "Steps for Entering Names and Special Characters" on page 39).
   If a name is not required, go to step 4. <No Name> will be used as the name.
4) Press select/ to store the name,
    Store/Edit No. appears.
5) Press the number keypad to enter the phone number (up to 20 digits), press select/ to store the number.

Your phone has 100 memory locations for Caller ID messages or stored Phonebook numbers.
* Selecting a speed dial location where a number is already stored, releases the old number's speed dial setting.
   The new number will be stored in the speed dial location.
* When the memory is full, you will hear a beep and Memory Full appears. You cannot store names and numbers.
* The pause key counts as one digit. Pressing redial/pause more than once increases the length of the pause between numbers. Each pause represents a 2 second delay.
6) Distinctive Ring appears. Press ring/vol/∧ or ring/vol/∨ to move the pointer to one of the Distinctive Ring options, and then press select/□.

Note: If you choose not to store a "Distinctive Ring", simply select the "No Selectn" option.

7) Speed Dial appears. Press ring/vol/∧ or ring/vol/∨ to move the pointer to select the Speed dial location (10 locations: SPD1-SPD0).

Note: If you choose not to store the name/number as a Speed Dial, simply select the "No Selectn" option.

8) Press select/□. You will hear a confirmation tone, and Done! appears in the display.
Steps for Entering Names and Special Characters

Refer to the letters on the number keys to select the desired characters. With each press of a number key (0-9), the displayed character appears in the following order: upper case letters first, lower case letters next and finally the number corresponding to the key.

<table>

</table>
If you make a mistake while entering a name
Use */tone/← or */tone/→ to move the cursor to the incorrect character.
Press menu/del to erase the wrong character, and then enter the correct character.
To delete all characters, press and hold menu/del.

For example, to enter Movies:
1) When the phone is in standby mode, press phonebook.
2) Press select/писан, Store/Edit Name appears.
3) Press 6 once, and then press */tone/→ to move the cursor to the right.
4) Press 6 six times.
5) Press 8 six times.
6) Press 4 six times.
7) Press 3 five times.
8) Press 7 eight times.
9) When finished, press select/писан.

To continue to store the telephone number, proceed to step 5 on page 37.
Viewing the Phonebook

Your phone stores names/numbers in the phonebook memory locations, and you can search names in alphabetical order. You can view the phonebook even while the phone is in use.

1) Press **phonebook**.
   If you recall the phonebook during a call,
   Store (SELECT) will not appear.

2) Press **ring/vol/\(^\downarrow\)** or **ring/vol/\(^\uparrow\)**, or the number keypad to scroll through the phonebook locations. Phonebook locations appear in alphabetical order (from first to last when you press **ring/vol/\(^\uparrow\)**, from last to first when you press **ring/vol/\(^\downarrow\)**).

   You can also use letters on the number keys to select the first letter of the desired name. Press a number key (2-9 and 0) once for the first letter, press twice for the second letter, and so on. The first location that begins with the letter you entered appears.

   For example, to search for "Movies", press 6 once. Press **ring/vol/\(^\downarrow\)** or **ring/vol/\(^\uparrow\)**, until the phonebook location is displayed.

3) To finish the viewing operation, press **end** (or **phonebook** during a call).
Making Calls Using the Phonebook

From Standby Mode
1) When the phone is in standby mode, view the phonebook location to dial (see "Viewing the Phonebook" on page 41).
2) Press talk/flash or speaker. The displayed number is dialed.
3) To hang up press end.

From Talk Mode
1) Press talk/flash or speaker.
2) View the phonebook location to dial (see "Viewing the Phonebook" on page 41).
3) Press select/. The number in the displayed phonebook location is dialed.
4) To hang up press end.

Speed Dialing
If you store a phone number in a speed dial memory location (10 locations: SPD1 - SPD0), you can use the speed dialing feature. When the phone is in standby mode, press and hold a number key (0-9) associated with the speed dial until the phone number appears and then press talk/flash or speaker. The number stored in the speed dial (SPD1 - SPD0) is dialed.
Editing or Erasing a Stored Name, Phone Number, Distinctive Ring, and Speed Dial

1) When the phone is in standby mode, press phonebook.
2) Press ring/vol/\* or ring/vol/\+, or the number keypad to view the phonebook locations (see "Viewing the Phonebook" on page 41).

   a. Editing the Stored Data
      1) When the phonebook location to be edited appears, press select. Store/Edit Name appears.
      2) Follow the steps 3 to 7 under "Storing Phone Numbers, Names, Distinctive Rings, and Speed Dial" on page 37-38 to complete the editing operation.
      3) Press select. You will hear a confirmation tone.

   b. Deleting the Stored Data
      1) When the phonebook location to be deleted appears, press menu/del.
         Delete Memory? appears.
      2) Press ring/vol/\* or ring/vol/\- to move the pointer to Yes.
Chain Dialing

The memory locations in the handset are not limited to phone numbers. You can also store a group of numbers (up to 20 digits), that you need to enter once your call connects. This is referred to as Chain Dialing.

An example of this is a bank account number. Store the account or special number in one of the phonebook locations. (Refer to "Storing Phone Numbers, Names, Distinctive Rings and Speed Dial" on page 37). When you call your bank, and you are prompted to enter the account number, scroll through your phonebook locations until you find your account or special number, and then press select/حدد.
Caller ID and CIDCW (Caller ID on Call Waiting)

You must subscribe to Caller ID services through your local telephone provider to use these features.

When the telephone rings, the Caller ID feature allows you to view the caller’s name, and phone number along with the date and time of call. With CIDCW (Caller ID on Call Waiting), you will hear a call waiting tone while you are on a call, and the Caller ID data is displayed. To accept the waiting call, press talk/flash (see page 36). Additionally, you can dial a number stored in the Caller ID list or save data to your Phonebook locations.

Important:
Memory locations for Caller ID messages and Phonebook locations (including Speed Dials) are common, you can store up to 100 in total. A Caller ID message is not stored when you have stored 100 of the phonebook locations. The earliest Caller ID message is overwritten when you have stored 100 of the phonebook locations and Caller ID messages in total.

1) When the Caller ID message is received, the display shows the caller’s phone number along with the date and time. The incoming call information is stored in the Caller ID record. If the Caller ID service includes the caller’s name, the name will appear in the display (up to 15 characters).

You may receive any one of the following messages:
- When invalid data is received: Incomplete Data
- When a private name is received: Private Name
- When a private number is received: Private Number
- When an unknown name is received: Unknown Name
- When an unknown number is received: Unknown Number
2) When you pick up the phone, the display changes to Talk. (AutoTalk feature is set to on).

   Data errors appear as "M".

Viewing the Caller ID List

The Caller ID list stores information for incoming calls - even unanswered calls. You can store 100 of the Caller ID messages and Phonebook locations (including SpeedDials) in total. You can view the Caller ID list during a call or when the phone is in standby mode.

1) Press call id.
   The summary screen appears. The screen shows the number of new messages and total messages.

2) To view the Caller ID messages in historical order (from new to old or from old to new), repeatedly press ring/vol/↓ to scroll through the messages from the latest to the earliest, or ring/vol/↑ to scroll back through the messages.
   To view the Caller ID messages with alphabetical search, press the number key pad (2-9 and 0) with the letter associated with the first letter of the desired message.

   Once you view the Caller ID list with alphabetical search, you cannot switch back to historical order (from new to old or from old to new) unless you exit and re-enter the operation.

3) To finish the viewing operation, press end (or call/id during a call).
Deleting a Caller ID Message

Deleting Information from the Caller ID List
1) When the phone is in standby mode, view the Caller ID information to be deleted (see "Viewing the Caller ID List" on page 46).
2) Press menu/del. Delete Caller ID appears.
3) Press ring/vol/\ or ring/vol/\ to choose Yes.
4) Press select/\(\). You will hear a confirmation tone.

Deleting all Caller ID names/numbers
1) When the phone is in standby mode, press call id.

www.uniden.com
Using the Caller ID Message List

Calling a party from the Caller ID list

From Standby mode
1) When the phone is in standby mode, view the Caller ID message (see "Viewing the Caller ID List" on page 46).
2) Press talk/flash or speaker. The displayed phone number dials automatically.

From Talk mode
1) Press talk/flash or speaker.
2) View the Caller ID message you want to dial (see "Viewing the Caller ID List" on page 46).
3) Press select/. The displayed phone number will be dialed.

Long Distance calls and Area Code Setting/Cancellation
While the present Caller ID information is displayed, pressing #/tone/← will place or remove the prefix "1" in the display to set the call for a long distance call, or pressing #/→ will set or cancel an area code (see page 28).

Storing Caller ID messages in the Phonebook
Messages shown in the Caller ID list can be stored in the phonebook. The phone number and name of the party on the Caller ID list can be stored in memory.

1) When the phone is in standby mode, view the Caller ID message to be stored.
   Then press select/. Store/Edit Name appears.
2) To complete the setting, follow the steps 3-8 in "Storing Phone Numbers, Names, Distinctive Rings, and Speed dial" on page 37-38.
Call Waiting Deluxe Features

Your phone gives you new options for call waiting. At the touch of a button, you can place the caller on hold, send them to your voice mail service, or conference them into your current call. You may be required to subscribe to Call Waiting and Call Waiting Deluxe to use these features. Not all features are available in all areas. Check with your local telephone company for details.

1) When you receive a Call Waiting call, press menu/del for a list of options.

2) Press ring/vol/∧ or ring/vol/∨ to select CW Deluxe and then press select/√.

3) Press ring/vol/∧ or ring/vol/∨ or the number keypad (1-7) to select an option.

   For example: press ring/vol/∨ 4 times press ring/vol/∨ 2 times

   1) Ask to Hold  2) Tell Busy  3) Forward Call  4) Forward Call  5) Conference
   6) Answer/Drop 1  7) Drop First  8) Conference
   9) Drop Last

3) Press select/√. A confirmation screen will appear, and returns back to the call.

Your phone is pre-programmed with seven call waiting options. You may select to ask the calling party to hold, send them a busy message, forward them to your voice mail, or answer and drop the first caller. You may also select to conference them into the current call or, at any time, choose to drop the first or drop the last caller. Check with your local telephone company for a full list of options.

www.uniden.com
The Integrated Answering Device

The phone has a built-in answering system that answers and records incoming calls. You can also use your answering system to record a conversation, leave a voice memo message or to announce a special outgoing message to callers when you're away from your phone.

Features

- Digital Tapeless Recording
- Up to 12 Minutes of Recording Time
- Call Screening On/Off
- Personal or Pre-recorded Outgoing Messages
- Voice Prompts for Menu Setup Guidance (English, Spanish, or French)
- Time and Day Announcement
- Remote Message Retrieval
- Toll Saver
- Conversation Recording
- Voice Memo
- Message Alert
- Hands Free Speaker Phone at Base

Digital Tapeless Recording allows you to quickly review, save, or delete the messages you choose. You will never have to worry about a tape wearing out, jamming, or resetting improperly.

The Integrated Answering System is easy and convenient to use, but please read through all of the instructions carefully.
Answering System Default Settings

Some answering system functions can be set through the base or handset. Default settings for each function are as follows:

<table>
<thead>
<tr>
<th>Functions</th>

</tbody>
</table>

*To activate the clock and time stamp, you must setup the Time function.

Turning the Answering System On/Off

1) To turn the answering system On, press `ans on/off` in standby mode.
   After the announcement "Answering System is on", the current greeting message will be played and you will hear a confirmation tone. The message counter displays the number of messages stored in memory. If the display flashes, then there are new messages waiting for you.

2) To turn the answering system Off, press `ans on/off`. After the announcement "Answering System is off", the message counter display will no longer be illuminated.

www.uniden.com
Setting up your Answering System

Setting your outgoing message (Greeting)
When you receive a call, the answering system automatically plays either the pre-recorded message or your own personal message (greeting).

Pre-recorded message
The following message is pre-recorded:
"Hello, no one is available to take your call. Please leave a message after the tone."

Recording a personal outgoing message (Greeting)
You can record a greeting up to 30 seconds long (must be more than 2 seconds long).
1) When the phone is in the standby mode, press and hold greeting.
2) Start your recording after the announcement "Record greeting". The message counter displays "- -", then begins to count down.
3) When you have finished recording your greeting, press greeting, SET, or play/stop. You will hear a confirmation tone and your recorded greeting plays back for you.

Choosing between the two outgoing messages
When the phone is in standby mode, press greeting. Press greeting again when the outgoing message is played. Each time greeting is pressed, the outgoing message is switched between the pre-recorded and the personal outgoing message.

Deleting an outgoing message
To delete the personal outgoing message, press delete while the message is playing. The system announces "Greeting has been deleted".

Setting the base ringer volume
Your base unit has four ringer options, 3 will display for high, 2 for medium, 1 for low and 0 for off.

note
• When the answering system is full, FL appears on the base. You should delete some messages so that the system can record new messages.
• Position yourself as near to the base as possible and speak clearly when recording your outgoing message.
• If you make an outside call, or a call is received on the base during the operation, the operation is canceled.
1) When the phone is in standby mode, press ring/volume/∧ or ring/volume/∨ repeatedly to scroll through ringer volumes. The ringer level is displayed and you will hear each volume level. The last ringer heard will be the volume setting, then the phone returns to standby mode.

2) You can also set the base ringer volume while the phone is ringing by pressing the ring/volume/∧ or ring/volume/∨.

**Adjusting the speaker volume level**

When the base speaker is in use, press ring/volume/∧ or ring/volume/∨ on the base to adjust the volume. Press ring/volume/∧ for louder or ring/volume/∨ for softer.

The number 1-10 appears on the base indicating the volume levels. 1 being the softest and 10 being the loudest.

**Answering System Settings**

To set the following seven functions you must enter the menu mode.

- To scroll through the menu options, repeatedly press clock/MENU on the base in standby mode.

The system returns to standby after the last menu option. A confirmation tone sounds to indicate standby mode.

- When you have completed the setting, press play/stop to exit the menu mode, or clock/MENU to move to the next menu option.

- You can also set these menus from the handset. See "Answering System Setup" on page 25 for instructions.
Setting the Time
Follow these steps to set the clock on the answering system to the correct time.
1) Press **clock/MENU**.
2) Press **skip/SELECT** or **repeat/SELECT** until the correct day is announced and the corresponding number (from 1 Sunday to 7 Saturday) appears.
3) Press **SET** to select the day.
4) Press **skip/SELECT** or **repeat/SELECT** until you hear the correct hour setting. The numbers 1 through 12 appear on the base as each hour is announced.
5) Press **SET** to select the hour.
6) Press **skip/SELECT** or **repeat/SELECT** until you hear the correct minute setting. The numbers 00 through 59 appears on the base as each minute is announced.
7) Press **SET** to select the minute.
8) Press **skip/SELECT** or **repeat/SELECT** until you hear the correct AM or PM setting. The message counter displays A or P.
9) Press **SET** to select the AM/PM setting.
   A confirmation tone sounds, the day and time you set are announced for your review.

Setting a PIN code
To play your messages from a remote location, you will need to enter a two-digit Personal Identification Number (PIN) code (- -). To select a PIN code, perform the following steps:
1) Press **clock/MENU** twice. The current PIN code appears on the base and it is announced.
2) Press **skip/SELECT** or **repeat/SELECT** until the desired number appears. Press and hold **skip/SELECT** or **repeat/SELECT** to quickly scroll through the numbers on the display.
3) Press **SET** to select the PIN code.
   A confirmation tone sounds, the system announces the new PIN code.
Setting the ring time
The ring time setting allows you to set the number of rings the caller hears before your answering system plays the outgoing message. You can set the ring time to answer after two, four, or six rings. Setting "TS" (Toll Saver), the answering system picks up after two rings if you have new messages, and after four rings if there are none. This way, if you make a long distance call to check your messages, you can hang up after the second ring to avoid billing charges.

1) Press clock/MENU three times.
   The current ring time setting (2, 4, 6, TS (Toll saver)) appears on the base and it is announced.
2) Press skip/SELECT or repeat/SELECT until the desired ring time appears.
3) Press SET to select the new ring time.
   A confirmation tone sounds, the system announces the new ring time.

Selecting the message record time
You have three record time options. The options "1 minute" or "4 minutes" set the duration for recording the incoming messages. "Announce only" answers the call with the preset greeting or your personal greeting but prevents the caller from leaving a message.

1) Press clock/MENU four times.
   The current recording time (1 minute, 4 minutes, A (Announce only)) appears on the base and it is announced.
2) Press skip/SELECT or repeat/SELECT until the desired message record time appears.
3) Press SET to select the new recording time.
   A confirmation tone sounds, the system announces the new record time.
Announce only feature

The Announce only feature plays a pre-recorded outgoing message or your own personal outgoing message, but it will not allow the caller to leave a message. To set "Announce only", follow the steps on page 55. To choose between the pre-recorded message or your own personal greeting, press greeting, when the outgoing message is played. Press greeting to select the greeting of your choice.

If you want to use your own greeting, you may want to change your greeting to omit the prompt to leave a message. Refer to "Recording a Personal outgoing message (Greeting)" on page 52.

The following message is pre-recorded:
"Hello, no one is available to take your call. Please call again."

Setting the message alert

Message Alert feature lets you know when you have a new incoming message by sounding a short alert tone.

If you set the Message Alert On, and when a new message is received, the alert tone will sound every 15 seconds. Set the Message Alert to On or Off by using clock/MENU.

1) Press clock/MENU five times. The current setting (On or Off) appears on the base and it is announced.

2) Press skip/SELECT or repeat/SELECT to choose On or OFF.

3) Press SET.

A confirmation tone sounds, the system announces the current setting you have selected. When the first new message is received, the alert tone will begin to sound.
Turning the message alert tone Off by pressing any key
To quickly turn Message Alert tone to Off, press any key on the base unit and the tone will automatically deactivate.

Turning the message alert tone Off when you are away from your phone
When all new messages are played back using the remote playback feature (see pages 62) the Message Alert tone will automatically deactivate. The tone will not deactivate until all new messages are played back.

Selecting the language
You can select the Language of your answering system announcements to English, French, or Spanish.
1) Press clock/MENU six times.
   The current setting (“E” English, “F” French, or “S” Spanish) appears on the base, and it is announced (“English” English, “Français” French, or “Español” Spanish).
2) Press skip/SELECT or repeat/SELECT to select the language.
3) Press SET. A confirmation tone sounds, the system announces the new setting in the selected language.

Setting the call screen
You can screen calls when the Call Screen function is set to On.
1) Press clock/MENU seven times.
   The current Call Screen setting (On or Off) appears on the base.
2) Press skip/SELECT or repeat/SELECT to choose On or Off.
3) Press SET. A confirmation tone sounds, and the system announces the new setting.

.note
• If you set the call screen to off, you can not screen a call.
• If you press talk/flash, call screen will be canceled and the handset is put in talk mode.
• If you press select/ while another handset is screening a call, you will hear a beep and you can not screen a call.
Screening a call

From the base
To screen an incoming call, do the steps as follows:

1) After the answering system answers, the base speaker will let you hear the calls as the machine records the message. To adjust the volume, press ring/volume/↑ or ring/volume/↓. If you set the answering system to Off, you cannot screen a call.

   To mute the call screen, press play/stop when the system is answering.

2) To answer the call, press (speaker) or pick up the handset from the base (when AutoTalk is set to On).
   If the handset is away from the base, press talk/flash, speaker or any number key, *tone/←, or #→ (when Any Key Answer is set to On). The answering system will disconnect automatically.

From the handset
1) Press select/ when the system is answering.

   To mute the call screen, press end when the system is answering.

2) To answer the call, press talk/flash, otherwise press end to cancel the call screen and the system return to standby mode.
Using your Answering System

The message counter displays the number of messages stored in memory. If the display flashes, then there are new messages waiting for you. The answering system is designed to play your new messages first. After you play all your new messages, you can then play your old messages.

Playing your messages
1) When the phone is in standby mode, press play/stop.
   The system announces the number of new and old messages while the message counter displays only the number of new messages. The time and day that each message was received is announced after the message is played. The message counter will then display the number of current stored messages.
2) When all new messages have been played, you hear a confirmation tone and the system announces "End of messages." The system returns to standby. After you have reviewed your new messages, you can play your old messages by again pressing. Once you have listened to a new message, it then becomes an old message. The old messages will be played in the order in which they were received.

Repeating a message
1) Press play/stop to review your messages. The number of stored messages is announced.
2) To repeat the current message, press repeat/SELECT after a few seconds of beginning the message. To quickly scroll backwards through a message, press and hold repeat/SELECT. To repeat the previous message, press repeat/SELECT within a few seconds (about 4 seconds during remote operation) after a message begins playing. If you have several messages, press repeat/SELECT repeatedly until you return to the message you want to replay. If the current message is the first new message, the system plays back from the beginning of the current message (it does not go back into the old message group).
3) Press play/stop at any time to stop reviewing messages and return to standby. The message counter shows the number of messages stored in memory.

*Time stamp will not be heard until you have set the time.

*When the answering system is full, FL appears on the base. You should delete some messages so that the system can record new messages. (Refer to "Deleting a message" on page 60.)
Skipping a message
1) Press play/stop to review your messages. The number of stored messages is announced.
2) Press skip/SELECT at anytime to skip to the next message.
   Each time skip/SELECT is pressed, the system scans forward one message. If you have several messages, press skip/SELECT repeatedly to find the message you want to play.
   To quickly scroll through a message, press and hold skip/SELECT. The system advances through the playback at double speed.
3) Press play/stop at anytime to stop reviewing your messages and return to standby.
   The message counter shows the number of messages stored in memory.

Deleting a message
To maintain maximum record time, delete the old messages.
1) Press play/stop to review your messages.
2) Press delete at anytime during the message to delete the message. You hear a confirmation tone and the message is deleted.
3) To delete all messages, press delete in standby mode. Press delete again after the announcement “To delete all messages, press delete again.”

When you try to delete all messages without first listening to your new messages, you hear several short beeps followed by an announcement "Please playback all messages". This protects you from accidentally erasing messages you have not yet reviewed.

Important:
When you press delete, you are permanently deleting the message. Once deleted, the message cannot be replayed or retrieved.
Voice memo
The voice memo function allows the user to record messages (more than 2 seconds and within 4 minutes).

1) Press and hold memo record. You hear a beep.
2) Start your recording after the announcement "Record Memo Message" and a confirmation tone. The message counter displays "- -".
3) When you have finished, press memo record, play/stop, or SET to stop recording. The system returns to standby.

Recording a conversation
You can record a conversation from the handset or the base (more than 2 seconds and within 10 minutes).

From the handset
1) During a conversation, press menu/del on the handset.
2) Press ring/vol/\ or ring/vol/\ to select Call Record, and then press select. Recording a Call appears on the handset, and "- -" flashes on the base.
   A confirmation tone, that can be heard by both parties, sounds during recording.
3) To stop recording, press menu/del and ring/vol/\ or ring/vol/\ to select Call Record, and then press select. You will hear a confirmation tone.

From the base
1) During a conversation using the base speaker phone, press and hold memo record on the base until you hear a confirmation tone. The unit begins recording and "- -" flashes on the display. A confirmation tone, that can be heard by both parties, sounds during recording.
2) To stop recording, press play/stop or memo record. You hear a confirmation tone.
Remote Operation

You can check, play, or delete messages, even record a new greeting message from a remote location (when you are away from home, or from another room using a handset). Additionally, you can turn On or Off your answering system remotely.

Remote access away from home

You can operate your answering system from a remote location using any touch-tone telephone.

1) Call your telephone number and wait for the system to answer. If the answering system is off, it will answer after about 10 rings and sounds a series of beeps.

2) During the greeting message (or a series of beeps when the answering system is off), press 0 then 2 again within 15 seconds.

3) The answering system announces the current time and the number of messages stored in memory. You hear "To play incoming messages, press zero-two. For help, press one-zero".

4) Enter a command within 15 seconds, each command there after must be entered within 2 seconds. You may select a command from the following chart:

<table>
<thead>
<tr>
<th>Command</th>
<th>Function</th>
<th>Command</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 then 1</td>
<td>Repeat a Message*</td>
<td>0 then 6</td>
<td>Answering System On</td>
</tr>
<tr>
<td>0 then 2</td>
<td>Playing incoming Messages</td>
<td>0 then 7</td>
<td>Memo Record/Stop**</td>
</tr>
<tr>
<td>0 then 3</td>
<td>Skipping a Message</td>
<td>0 then 8</td>
<td>Greeting Message Record/Stop**</td>
</tr>
<tr>
<td>0 then 4</td>
<td>Deleting a Message</td>
<td>0 then 9</td>
<td>Answer System Off</td>
</tr>
<tr>
<td>0 then 5</td>
<td>Stop Operation</td>
<td>1 then 0</td>
<td>Help Guidance</td>
</tr>
</tbody>
</table>

Note

- Time stamp will not be heard until you have set the time. See "Setting the Time" on page 54.
- The system will only playback messages for four minutes and then it returns to the command waiting mode. To continue playing your messages, press 0 then 2 again within 15 seconds.
- If you enter an incorrect PIN code three times, you will hear a beep and the system will return to standby.
- During the remote operation, \( L \) appears on the base.
- If the answering system is recording an incoming message, the recording operation is canceled when you start remote operation.
- For your convenience a remote operation card is provided for you to use while away from home (refer to page 83).
* For Repeat a Message function, press 0 then 1 within about four seconds to repeat the previous message, or press 0 then 1 after about four seconds to repeat the current message.

** For Memo Record and Greeting Message Record function, the first time you enter the corresponding command, it starts the Recording function. If you want to stop the recording, press 0 then 7 or 8.

5) After the command has finished, you hear intermittent beeps indicating that the system is in the command waiting mode. You may enter another command at this time from the chart above.

6) When you are finished, hang up to exit the system. The answering system automatically returns to standby.

Remote access with the handset
You can operate your answering system from another room using a handset.

1) When the phone is in the standby mode, press select/ on the handset. Remote Answering Machine operation appears on the handset display. The answering system announces the current time and the number of messages stored in the memory. Messages will be played in the order in which they were received. The time and day that each message was received is announced after the message is played.

2) You hear "To play incoming messages, press two. For help, press zero". You will hear a beep.

3) Enter a command within 30 seconds, each command there after must be entered within 2 seconds. You may select a command from the following chart:

---

**note**

- If you press end before the answering system answers, the phone will return to standby.
- When the answering system does not answer within 6 seconds, you hear a beep and the phone will return to standby.
- The base's keypad is disabled during remote operation.
- When you receive a call, the remote operation is canceled.
- You can change the handset volume during a remote operation.
- During the remote operation -- appears on the base.
- If you have new messages and old messages, only the new messages will be played. After you have reviewed your new messages, you can play your old messages by again pressing 2.

* For Repeat a Message function, press 1 within about four seconds to repeat the previous message, or press 1 after about four seconds to repeat the current message.

** For Memo Record and Greeting Message Record function, the first time you enter the corresponding command, it starts the Recording function. If you want to stop the recording, press 7 or 8.

4) After the command has finished, you hear intermittent beeps indicating that the system is in the command waiting mode. You may enter another command at this time from the chart above.

5) When you are finished, hang up or press end to exit the system. The answering system automatically returns to standby.
Expanding Your Phone

4 Multi-Handset Expandability

Your phone supports up to 4 handsets (including the handset(s) supplied with your phone). You can now place a fully-featured cordless handset anywhere AC power is available to connect the handset charger.

Up to 2 handsets can be used for outside and/or intercom call.

Effective combination, for example:
- 4-way conferencing (the base, 2 handsets, and one outside line) while on an intercom call using the other 2 handsets.

IMPORTANT:
- If you purchase a DCX640 extra handset, please register the handset to the original/main base before use. The DCX640 will not operate until it is registered.
- If you change a Global setting in one handset, you change that particular setting for all registered handsets. All other settings (not included under Global Setup), must be set separately through each handset.

Connecting the Charger

1) Connect the AC adapter to the DC IN 9V jack and to a standard 120V AC wall outlet.

2) Set the charger on a desk or tabletop, and place the handset in the charger with the keypad facing forward. (See "B. Install the rechargeable battery pack into the handset" on page 12).

To use the DCX640, register it to the original base.

Save this manual for detailed operation.

All of the handsets ring when a call is received.

Charge the handset battery pack for at least 15-20 hours before using your new cordless telephone for the first time.
Register the Handset to the Base

If you purchase an extra handset, you need to register the handset to the base before use. Only one handset can be registered at a time.

The handset ID for the supplied handset(s) was assigned by the factory, which has #1, #2 or #3 in the display (#2 for models that have two handsets in packaging, and #3 for models that have three handsets in the packaging). When you register additional handset to the base, the handset ID will be assigned.

1) Before registering the extra handset, the battery pack MUST be charged for 15-20 hours.

2) Place the extra handset in the main base unit to begin registration.

3) While the handset is registering, Handset Registering will appear in the LCD. When Registration Complete is displayed, the handset has been registered to the base. If Registration Failed appears, please try these steps again.

• An extra handset can be registered when the main base is in standby mode.

• Standby Mode - The handset is not in use and talk/flash has not been pressed.

Note: An extra handset can be registered when the main base is in standby mode.

Standby Mode - The handset is not in use and talk/flash has not been pressed.
Using the DirectLink Mode

To use this feature, you must enter the two handsets into the DirectLink mode first.

To enter the DirectLink mode, see page 22

**DirectLink call**

1) When the phone is in the DirectLink standby mode, press **talk/flash** (example of DirectLink from handset #1).

2) Select the handset to which you wish to DirectLink with by pressing the number keys (1-4). Your handset will then page the other handset.

3) On the receiving handset, press **talk/flash**, or if Any Key Answer is on, press any number key, *)/tone/←, or #/→.

4) When you finish your conversation, press **end** on either handset. Return the handset to the cradle, or press **menu/del**, and then **select** to return to normal standby mode (canceling DirectLink mode).

**Room Monitor**

This feature allows you to monitor sounds in another room. To use this feature, place the handset in the desired room to monitor (acts as remote mic), and place the other near listener (remote speaker). For instruction, see “Using Room Monitor” on page 23.
4-Way Conferencing

Fourth person, at either the handset or the base, may be added to the conference call. For example, to add a fourth party to an ongoing conference call at the base or another handset, press talk/flash on the fourth party's handset (or speaker on the base). To remove either caller from your conversation, press end on the party's handset (or speaker on the base). The other parties will still be connected to the call.

Intercom/Call Transfer Feature

Intercom and Call Transfer features are available for your phone.

Intercom

From handset to handset or to the base

1) Press hold/transfer/int'com in standby mode.

2) Select the base or the handset you want to talk with from the selection list within 30 seconds. To select the handset (or the base), press ring/vol/ or ring/vol/, and then press select/. If you select All, all handsets and the base will be paged. An intercom tone sounds.

3) On the receiving handset (or the base), to answer the call, press talk/flash or hold/transfer/int'com (or intercom/find handset) or speaker (on the base). Or press any number key, */tone/←, or #/→ (when Any Key Answer is on), or pick up the handset from the cradle (when AutoTalk is on).

4) To hang up the intercom call, press end on either handset (or intercom on the base).
From the base to a handset
1) Press *intercom/find handset* on the base in standby mode.
2) All the handsets will be paged.
3) On the receiving handset, to answer the call, press *talk/flash* or *hold/transfer/int’com*.
   Or press any number key, */tone/←-, or #/→* (when Any Key Answer is on), or pick up
   the handset from the cradle (when AutoTalk is on).
4) To hang up the intercom call, press *end* or *intercom/find handset* on the base.

Call Transfer Feature
From handset to handset or to the base
1) During a call, press *hold/transfer/int’com* on the handset.
2) Select a handset or the base to transfer the call within
   10 seconds. (Refer to step 2 in the intercom section on
   page 68).
   The call will automatically be placed on hold, and an
   intercom tone sounds.
   To cancel the transfer, press *talk/flash* or *speaker* on the initiating handset.
3) On the receiving handset, to answer the page, press *talk/flash* or *hold/transfer/int’com*
   (or *←* (speaker) or *intercom/find handset* on the base). Or press any number key, */tone/←-, or #/→* (when Any Key Answer is on), or pick up the handset from the cradle
   (When AutoTalk is on).
4) To speak to the caller, press *talk/flash* (or *←* (speaker) on the base) on the
   receiving handset.
From the base to a handset
1) During a call, press **intercom/find handset** on the base. The call will automatically be placed on hold, and an intercom tone sounds. All the handset(s) will be paged.

2) On the receiving handset, to answer the call, press **talk/flash** or **hold/transfer/int’com**. The intercom mode is activated, but the caller is still on hold. Or press any number key, #/tone/←, or #/→ (when Any Key Answer is On), or pick up the handset from the cradle (when AutoTalk is on).

3) To speak to the caller, press **talk/flash** on the receiving handset.

Replacing the Base
If the base unit is replaced with a different base from this same series of cordless models, you must clear the handset(s) and base identification numbers. To do this, select “System Reset” from handsets display menu option list (see page 29 for guidance).
Changing the Digital Security Code

The digital security code is an identification code used to connect the handset and the base unit. Normally, setting the code is not necessary. In the rare situation that you suspect another cordless telephone is using the same security code, you can change the code.

To change the digital security code:
1. Perform the "System Reset" menu options ("De-register the Handset" and "Replacing the Base Setting") for all the handsets you have (see page 29).
2. To register all the handsets do the following steps:
   1) Place a handset, one at a time in the base.
   2) Registration starts automatically.
   While registering Handset Registering appears in the display.
   3) When the registration is complete, Registration Complete appears in the display.
   4) Repeat steps 1 - 3 for another handsets.
   If the registration fails, Registration Failed appears in the display. Try the steps above again.

Installing the Beltclip

To attach the beltclip
Insert the beltclip into the holes on each side of the handset.
Press down until it clicks.

To remove the beltclip
Pull either side of the beltclip to release the tabs from the holes.

Headset Installation

Your phone may be used with an optional headset, the Uniden HS910. To use this feature, insert the headset plug into the headset jack. Your phone is ready for hands-free conversations (headset may be purchased by calling the Uniden Parts Department or visiting the web site. See page 1).
Note on Power Sources

Battery replacement and handling
When the operating time becomes short, even after a battery is recharged, please replace the battery. With normal usage, your battery should last about one year. Please contact your place of purchase or the Uniden Parts Department for a replacement battery.

Warning
To avoid the risk of personal injury or property damage from fire or electrical shock, only use the Uniden battery model and Uniden adapter model specifically designated for this product.

Power Failure
During the period that the power is off, you will not be able to make or receive calls with the telephone.

Caution
- Use only the specified Uniden battery pack (BT-446).
- Do not remove the batteries from the handset to charge them.
- Never throw the battery into a fire, disassemble them, or heat them.
- Do not remove or damage the battery casing.

Maintenance
To maintain a good charge, it is important to clean the charging contacts on both the handset and the base unit once a month. Using water only, dampen a cloth to clean the charging contacts. Then make sure to go back over the charging contacts with a dry cloth.

Caution
Do not use paint thinner, benzene, alcohol, or other chemical products. Doing so may discolor the surface of the telephone and damage the finish.
General Information

The phone complies with FCC Parts 15 and 68. Operating temperature: 0 °C to +50 °C (+32 °F to +122 °F)

AC Adapter Information
AC Adapter part number: AD-830 for the base AD-310 for the charger (DCT648-2 and DCT648-3 only)
Input Voltage: 120 AC 60Hz 120V AC 60Hz
Output Voltage: 9V DC 400mA 9V DC 210mA

Battery Information
Battery part number: BT-446
Capacity: 800mAh, 3.6V

To avoid damage to the phone use only Uniden AD-830 and BT-446 with your phone.

If the handset is left off the base, the actual Talk mode duration will be reduced respective to the amount of time the handset is off the base.

Recharge your phone on a regular basis by returning the handset to the base after each phone call. When the operating time becomes short, even after the battery is recharged, please replace the battery. With normal usage, the battery should last about one year.

A replacement Uniden adapter or battery may be purchased by contacting the Uniden Parts Department (800) 554-3988. Hours are from 8:00 a.m. to 5:00 p.m. Central Time, Monday through Friday, or www.uniden.com.

Specifications, features, and availability of optional accessories are all subject to change without prior notice.
Troubleshooting

If your phone is not performing to your expectations, please try these simple steps first.

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Suggestion</th>
</tr>
</thead>
</table>
| The charge LED won't illuminate when the handset is placed in the cradle. | • Make sure AC adapter is plugged into base (or charger (for DCT648-2 and DCT648-3 only)) and wall outlet.  
• Make sure handset is properly seated in the cradle.  
• Make sure charging contacts on handset and base (or charger (for DCT648-2 and DCT648-3 only)) are clean. |
| The audio sounds weak.                      | • Move the handset and/or base to a different location away from and/or scratchy metal objects or appliances and try again.  
• Make sure that you are not too far from the base. |
| Can't make or receive calls.                | • Check both ends of base telephone line cord.  
• Make sure AC adapter is plugged into base and wall outlet.  
• Disconnect AC adapter for a few minutes and then reconnect it.  
• Remove the base ID (see "Replacing the Base Setting" on page 29) and register the handset (see "Register the Handset to the Base" on page 66).  
• Make sure that you are not too far from the base.  
• If an outside call is already established, you cannot make another outside call. |
| The handset doesn't ring or receive a page. | • Charge batteries in the handset for 15-20 hours by placing handset on base or charging cradle.  
• The handset may be too far away from the base unit.  
• Place the base unit away from appliances or metal objects.  
• Remove the base ID (see "Replacing the Base Setting" on page 29) and register the handset (see "Register the Handset to the Base" on page 66). |
| Unavailable appears in the display.         | • Make sure that another handset(s) or the base is not in use, and try the phone again.  
• Make sure that you are not too far from the base. |
<table>
<thead>
<tr>
<th>Symptom</th>
<th>Suggestion</th>
</tr>
</thead>
</table>
| Severe noise interference.                                             | • Keep the handset away from microwave ovens, computers, remote control toys, wireless microphones, alarm systems, intercoms, room monitors, fluorescent lights, and electrical appliances.  
• Move to another location or turn off the source of interference. |
| The Caller ID does not display.                                         | • The handset was picked up before the second ring.                           
• The call was placed through a switchboard.                            
• Call your local telephone company to verify your Caller ID service is current. |
| You cannot register the handset at the base.                           | • Charge the battery pack for 15-20 hours.                                   
• Remove the base ID (see "Replacing the Base Setting" on page 29) and register the handset (see "Register the Handset to the Base" on page 66). |
| The handset doesn’t communicate with another handsets.                 | • Remove the base ID (see "Replacing the Base Setting" on page 29) and register the handset (see "Register the Handset to the Base" on page 66).  
• Make sure that you have registered all handsets.                       |
| An extra handset can’t join the conversation.                          | • Make sure there are not 2 handsets already using the 3-way conference feature. |
| The handset or the base can’t join the conversation                    | • Make sure that more than 2 handsets are not in use.                        
• When recording a conversation, the 2nd handset (or the base) cannot join the conversation. |
| The answering system does not work.                                    | • Make sure the base unit is plugged in.                                     
• Make sure that the answering system is turned on.                     
• Make sure that the message record time is not set to Announce only (see page 56). |
| Messages are incomplete.                                               | • The incoming messages may be too long. Remind callers to leave a brief message.  
• The memory may be full. Delete some or all of the saved messages.    |
| After a power failure, the outgoing message is deleted.                | • Record your greeting again. The default message should remain.            |
| No sound on the base unit speaker during call monitoring or message playback. | • Adjust the speaker volume on the base unit.                               
• Make sure the call screen feature is set to On.                       |
Cannot access remote call-in features from another touch-tone phone.

- Make sure you are using the correct PIN number.
- Make sure that the touch-tone phone you’re using can transmit the tone for at least two seconds. If it cannot, you may have to use another phone to access your phone.

Time stamp cannot be heard.

- Make sure you have set the time (see "Setting Day and Time" on page 27 or "Setting the Time" on page 54).

If you still have a problem.

- Call our customer hotline at 1-800-297-1023.
Liquid Damage

Moisture and liquid can damage your cordless phone. In case of accidental submersion, please read the following steps.

<table>
<thead>
<tr>
<th>Case</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>If the handset or base is exposed to moisture or liquid, but only affects the exterior plastic housing.</td>
<td>Wipe off the liquid, and use as normal.</td>
</tr>
</tbody>
</table>
| If moisture or liquid has entered the plastic-housing (i.e. liquid can be heard in the phone or liquid has entered the handset battery compartment or vent openings on the base). | **Handset:**  
1) Remove the battery cover and leave it off for ventilation.  
2) Remove the battery pack by disconnecting.  
3) Leave the battery cover off and the battery pack disconnected for at least 3 days.  
4) Once the handset is completely dry, reconnect the battery pack and the battery cover.  
5) Recharge the handset’s battery pack for 20 hours before using again.  
**Base:**  
1) Disconnect the AC adapter from the base unit, cutting off electrical power.  
2) Disconnect the telephone cord from the base unit.  
3) Let dry for at least 3 days.  
**IMPORTANT:** You must unplug the telephone line while recharging the battery pack to avoid charge interruption.  
**CAUTION:**  
DO NOT use a microwave oven to speed up the drying process. This will cause permanent damage to the handset, base and the microwave oven.  
After following these steps, if your cordless telephone does not work, please send to:  
Uniden America Corporation  
Parts and Service Division  
4700 Amon Carter Blvd.  
Ft. Worth TX 76155

Precautions!

Before you read anything else, please observe the following:

Warning!

Uniden America Corporation DOES NOT represent this unit to be waterproof. To reduce the risk of fire, electrical shock, or damage to the unit, DO NOT expose this unit to rain or moisture.

Rechargeable Nickel-Metal-Hydride Battery Warning

This equipment contains a rechargeable Nickel-Metal-Hydride battery.

NICKEL is a chemical known to the State of California to cause cancer.

The rechargeable Nickel-Metal-hydride battery contained in this equipment may explode if disposed of in a fire.

Do not short-circuit the battery.

Do not charge the rechargeable Nickel-Metal-Hydride battery used in this equipment in any charger other than the one designed to charge this battery as specified in the owner's manual. Using another charger may damage the battery or cause the battery to explode.

Rechargeable Nickel-Metal-Hydride Batteries Must Be Recycled or Disposed of Properly

The rechargeable Nickel-Metal-Hydride battery used in this equipment is recyclable. Please call 1-800-8-BATTERY for information on how to recycle this battery in your area. The battery must be disposed of or recycled in accordance with all local laws and regulations.

Important Safety Instructions

When using your telephone equipment, these basic safety precautions should always be followed to reduce the risk of fire, electrical shock, and injury to persons:

1. Read and understand all instructions.
2. Follow all warnings and instructions marked on the product.
3. Unplug this product from the wall outlet before cleaning. Use a dry cloth for cleaning. Do not use liquid or aerosol cleaners.
4. Do not use this product near water, for example, near a bathtub, washbowl, kitchen sink or laundry tub, in a wet basement, or near a swimming pool.
5. Do not place this product on an unstable cart, stand, or table. The telephone may fall, causing serious damage to the unit.
6. Slots and openings in the cabinet and the back or bottom are provided for ventilation. To reduce the risk of fire, electrical shock, or damage to the unit, DO NOT block these openings. Install this product in accordance with the manufacturer’s instructions.
7. This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply to your home, consult your dealer or local power company.
8. Unplug this product from the wall outlet and refer servicing to qualified service personnel when the following conditions occur: A. When the power supply cord is damaged or frayed. B. If liquid has been spilled into the product. C. If the product has been damaged.
9. Do not place anything on the product, because damage to the product may result.
10. Never push objects of any kind into this product through cabinet slots, as they may touch dangerous voltage points or short out parts.
11. To reduce the risk of electrical shock, do not disassemble this product. Take it to qualified service personnel when service or repair work is required. Opening or removing covers may expose you to dangerous voltage or other risks. Incorrect reassembly can cause electric shock when the appliance is subsequently used.
12. Unplug this product from the wall outlet and refer servicing to qualified service personnel under the following conditions: A. When the power supply cord is damaged or frayed. B. If liquid has been spilled into the product. C. If the product has been exposed to rain or water. D. If the product does not operate normally when following the operating instructions. (Adjust only those controls that are covered by the operating instructions. Improper adjustment of other controls may result in damage and will often require extensive repair work by a qualified technician.) E. If the product has been dropped or the cabinet has been damaged.
13. If the product exhibits a distinct change in performance.
14. Do not use the telephone to report a gas leak in the vicinity of the leak.

Additional Battery Safety Precautions

Caution! To reduce the risk of fire or injury to persons by the battery, read and follow these instructions:

1. Use only the Uniden battery pack specified in the owner’s manual.
2. Do not dispose of the battery pack in a fire. The cell may explode.
3. Do not open or mutilate the battery pack. Released electrolyte is corrosive and may cause damage to the eyes or skin. It may be toxic if swallowed.
4. Exercise care in handling the battery in order not to short the battery or conductor may overheat and cause burns.
5. Charge the battery pack provided with or identified for use with this product only in accordance with the instructions and limitations specified in the owner’s manual provided for this product.
6. Dispose of properly: Call or check your local recycling center before disposing of your battery. Your rechargeable Nickel-Metal-Hydride battery must be recycled or disposed of properly.

SAVE THESE INSTRUCTIONS!

Important Electrical Considerations

Unplug all electrical appliances when you know an electrical storm is approaching. Lightning can pass through your household wiring and damage any device connected to it. This phone is no exception.

The FCC Wants You To Know

Changes or modifications to this product not expressly approved by Uniden, or operation of this product in any manner other than as detailed by the owner’s manual, could void your authority to operate this product. Your telephone complies with Part 68 of FCC Rules. You must, upon request, provide the FCC registration number and the REN to your telephone company. Both numbers are on the base unit.

Note: You must connect your phone to:

• coin-operated systems
• most electronic key telephone systems

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation. Privacy of communications may not be ensured when using this phone.

Range

Your new phone is designed to achieve the maximum possible range by transmitting and receiving according to the highest specifications set forth by the FCC. We have tested this phone to operate at a maximum distance with the qualification that the range depends upon the communication system and the terrain over which the transmission must take place, and it would be impossible to include all the variables in our rating. The Maximum range rating of this phone is meant to be used as a means of comparison against other range claims.
Telephone Line Problems

The FCC has granted the telephone company the right to disconnect service in the event that your phone causes problems on the telephone line. Also, the telephone company may make changes in facilities and services which may affect the operation of your unit. However, your telephone company must give adequate notice in writing prior to such actions to allow you time for making necessary arrangements to continue uninterrupted service. If you are having trouble with your telephone service, you must first disconnect your phone to determine if it is the cause of your problem. If you determine that it is the cause, you must be disconnected until the trouble has been corrected.

Radio Interference

Radio interference may occasionally cause buzzing and humming in your cordless handset, or clicking noises in the base. This interference is caused by external sources such as TV, refrigerators, vacuum cleaners, fluorescent lighting, or electrical storms. In addition, your telephone may be affected by interference from devices that are not telephones. If you cannot eliminate this type of interference, you need to change to a different channel.

Radio interference may also cause transmissions on your phone, you may be receiving radio signals from other cordless telephone or other source of interference. If you cannot eliminate this type of interference, you need to change to a different channel.

More than One Cordless Telephone

If you want to use more than one cordless telephone in your home, they must operate on different channels. Press the channel key to select a channel that provides the clearest communication.

Cordless Telephone Privacy

Cordless telephones are radio devices. Communications between the handset and the base of your cordless telephone are accomplished by means of radio waves which are broadcast over the open airways. Because of the inherent physical properties of radio waves, your communications can be received by radio receiving devices other than your own cordless telephone unit. Consequently, any communications using your cordless telephone may not be private.
I.C. Notice

TERMINAL EQUIPMENT

NOTICE: This equipment meets the applicable Industry Canada Terminal Equipment Technical Specifications. This is confirmed by the registration number. The abbreviation, IC, before the registration number signifies that registration was performed based on a Declaration of Conformity indicating that Industry Canada technical specifications were met. It does not imply that Industry Canada approved the equipment.

NOTICE: The Ringer Equivalence Number (REN) for this terminal equipment is marked on the equipment itself. The REN assigned to each terminal equipment provides an indication of the maximum number of terminals allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the Ringer Equivalence Numbers of all the devices does not exceed five.

RADIO EQUIPMENT

The term “IC:” before the radio certification number only signifies that Industry Canada technical specifications were met.

Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device. "Privacy of communications may not be ensured when using this telephone".

[82] MEMORY LIST  www.uniden.com
Remote Operation Card

Remote access away from home
1. Call your phone number from a touch-tone phone.
2. During the outgoing message, press 0 and enter your PIN code.
   The answering system announces the number of messages stored in memory and the help guidance.
3. To quit, hang up the phone.

Turn on the answering system remotely
1. Call your phone and let it ring 10 times until you hear a beep.
2. Press 0 and then enter your PIN code.
3. Press 0 then 5 to stop the announcement.
4. Press 0 then 6 to turn the answering system on.
