Step 1 Checking the Package Contents
Make sure you have received the following items in the package. If any of these items are missing or damaged, contact the Uniden Parts Department.
• Base unit (1)
• Handset (2)
• Charging cradle (1)
• AC adapter (2)
• Rechargeable battery (2)
• Telephone cord (1)
• Wall mount adapter (1)
• Beltclip (2)
• This Owner's Manual
• Other Printed Material

Uniden Parts Department at
(800) 554-3988
Hours: M-F 8:00 a.m. to 5:00 p.m. CST.
We can also be reached on the web at www.uniden.com

Step 2 Install and Charge the Handset Batteries
CONNECT TO A PHONE LINE
When the handset battery pack is fully charged, after 15-20 hours of charging, plug the telephone cord into the base unit and then into a 120V AC outlet.

Step 3 Connect to Phone Line
Place the handset on the base and place the other handset in the charging cradle. It does not matter which handset is placed on the base and charging cradle. Charge continuously for 15-20 hours before using the phone.

Step 4 Before Using, Register Second Handset to Base
A After fully charging the handsets, remove the handset from the charging cradle and place it on the base. (Base charge/in use LED light will begin to flash indicating registration is occurring.)
Wait for at least 5 seconds before removing the second handset from the base.
Congratulations, the registration has been completed, and your dual handset cordless phone is ready for use!

Step 5 Setting Display Options
Step 6 Set Answering System
To turn answering system on, press answer on/off. A pre-recorded greeting will play and your system is ready to accept calls.
To record a personal outgoing greeting to callers, please see page 45.

OPTIONS INCLUDE
A Auto Talk On/Off
B CIDCW On/Off
(Caller id/call waiting)
C Area Code Enter/Remove
D Dial Pulse/Tone
E Language Eng (English)/Fr (French)

Note: Three Caller ID options are available: AutoTalk, Caller ID on Call Waiting (CIDCW), and Area Code.

TO SET CALLER ID, LANGUAGE AND DIALING OPTIONS
A Press and hold the cid/menu key.
B Press the vol/ring/✓ or ✓ key to move the pointer to an option.
C Press the select/channel key to change the option setting.
D Press the end key to exit, and return the handset to the base.

Welcome

Congratulations on your purchase of the Uniden DXAI3288-2 series cordless telephone and answering system. This phone is designed and engineered to exacting standards for reliability, long life, and outstanding performance.

Note: Some illustrations in this manual may differ from the actual unit for explanation purpose. The color of your cordless phone may vary.

Features

- Dual Handset
- 2.4GHz Extended Range Technology
- 16 Digit, 3-line Backlit Display
- Integrated Telephone Answering Device (ITAD) (Bi-lingual Announcement Option)
- Voice Prompted Guidance through ITAD Setup Menu
- 20 Number Memory Dialing (each handset)
- RocketDial™ (each handset)
- Caller ID and Call Waiting Caller ID (each handset)
- 30 Number Caller ID Memory (each handset)
- 32 Digit Redial (each handset)
- Flash and Pause
- Page/Tone Dialing
- 7 Hour Talk Time/7 Day Standby Time
- Handset Earpiece and Ringer Volume Control
- Hearing Aid Compatible
- 20 Channel Autoscan
- English or French Display Option
- Call Transfer

40. (Microphone) mic
41. Charging contacts
42. Charge LED
43. DC IN 9V jack
Setting up the Phone

Do the following steps:
A. Choose the best locations
B. Install the rechargeable battery packs into both handsets
C. Connect the base unit and charging cradle

A. Choose the best location
Before choosing a location for your new phone, read the INSTALLATION CONSIDERATIONS included in the PRECAUTIONS AND IMPORTANT SAFETY INSTRUCTIONS. Here are some important guidelines you should consider:

- The location should be close to both a phone jack and a continuous power outlet which is not switchable.
- Keep the base and each handset away from sources of electrical noise such as motors, microwave ovens, and fluorescent lighting.
- Be sure there is sufficient space to raise the base antenna to a vertical position.
- The base can be placed on a desk, tabletop, or mounted on a standard wall plate.

Avoid heat sources, such as radiators, air ducts, and sunlight
Avoid noise sources such as a window by a street with heavy traffic
Avoid television sets and other electronic equipment
Avoid microwave ovens
Avoid excessive moisture, extremely low temperatures, dust, mechanical vibration, or shock
Avoid personal computers
Avoid other cordless telephones

Choose a central location

If your home has specially wired alarm equipment connected to the telephone line, be sure that installing the system does not disable your alarm equipment.

If you have questions about what will disable your alarm equipment, contact your telephone company or a qualified installer.
B. Install the rechargeable battery packs into both handsets

Both handsets are powered by rechargeable battery packs. The battery recharges automatically when the handset is placed in the base unit or the charging cradle.

Charge the handset battery packs for at least 15-20 hours before using your new cordless telephone for the first time! To maximize the charge capacity of your battery pack, DO NOT plug the telephone cord into the base unit and wall jack until the battery is fully charged.

1) Press down on the handset battery case cover (use the finger indentation for a better grip) and slide the cover downward to remove.

2) Plug the battery pack connector (red & black wires) into the small, black jack inside the battery compartment. (The connector notches fit into the grooves of the jack only one-way.) Match the wire colors to the polarity label in the battery compartment, connect the battery and listen for a click to insure connection.

3) Make certain you have made a good connection by slightly pulling on the battery wires to insure that there is a secure connection. If the battery connector is not securely connected, the handset will not charge properly.

• Use only the Uniden (BT-905) rechargeable battery pack supplied with your cordless telephone.
• Place the second handset in the charger with the keypad facing forward for 15-20 hours before use.
4) Place the battery case cover back on the handset by sliding it upwards until it clicks into place.

5) Place each handset in the base or charging cradle for 15-20 hours without interruption. The base unit’s and charging cradle’s LED light (labeled charge/in use and charge) illuminates once the handset is placed in the base or charging cradle. The LED light will illuminate regardless if the battery pack is connected or not.

DO NOT rely on the LED light as an indicator that the battery pack is connected and the handset is charging!

If the base charge/in use or charging cradle charge LED light does not illuminate:

- Check to see if the AC adapter is plugged into each charging cradle and the electrical wall outlet properly. (Use only the supplied AC adapter. Do not use any other AC adapter.)
- Check to see if each handset is sitting correctly in each charging cradle and making good contact with each charging contacts.

Replacement batteries are also available through the Uniden Parts Department at (800) 554-3988, Monday to Friday from 8:00 a.m. to 5:00 p.m. or online at www.uniden.com
Battery use time (per charge)
From fully charged (15-20 hours charge time)
• Seven hours continuous use during talk mode.
• Seven days when the handset is in the standby mode.

Low battery alert
When the battery pack is very low and needs to be charged, the phone is programmed to eliminate functions in order to save power. If the phone is not in use, “Low Battery” appears on the LCD and none of the keys will operate.
If the phone is in use, “Low Battery” flashes and the handset beeps. Complete your conversation as quickly as possible and return the handset to either charging cradle for charging.

Cleaning the charging contacts
To maintain a good charge, it is important to clean the charging contacts on both the handsets, base unit, and charging cradle once a month. Use a dry cloth or pencil eraser to clean. If the contacts became very dirty, using water only, dampen a cloth to clean the charging contacts. Then make sure to go back over the charging contacts with a dry cloth before returning the handsets to the base unit or charging cradle to charge.
C. Connect the base unit and charging cradle

1) Connect each AC adapter to the DC IN 9V jack and to each standard 120V AC wall outlet.

2) Set the base and charging cradle on a desk or tabletop, and place one handset on the base unit and one in the charging cradle. (For wall mounting, see "Mounting the Base Unit on a Wall", on page 13.)

3) Raise the antenna to a vertical position.

4) Make sure the charge/in use and charge LED illuminates. If the LED does not illuminate, check to see that the AC adapter is plugged in and the handset makes good contact with the cradle's charging contacts.

   • Connect the AC adapter to a continuous power supply.
   • Place the base unit and charging cradle close to the AC outlets so that you can unplug the AC adapters easily.

After installing the battery packs in the handsets, charge your handsets at least 15-20 hours before plugging into the phone line.

5) Once the handset battery packs are fully charged, connect the telephone line cord to the TEL LINE jack and a telephone outlet.

   • If your telephone outlet isn't modular, contact your telephone company for assistance.

   note

The handset can be placed face up or face down in the base for charging.
Before Using, Register Second Handset to the Base Unit

When the dual handsets are removed from the packaging, the handset that is placed in the base unit first (to charge battery for 15-20 hours), will automatically be registered to the base unit. (It does not matter which handset you choose to place in the base unit first.)

You will also need to register the second handset by placing it in the base cradle. The second handset WILL NOT operate properly until the registration has been completed. Once the handset is registered, it is ready for use.

Follow these simple steps to register:

1) First, install the battery packs in both handsets. Place either handset in the base cradle, then place the second handset in the charging cradle. Charge both handsets for **15-20 hours**.

2) After fully charging both batteries, remove the handset in the charging cradle, and place it in the base cradle. The **charge/in use** LED light on the base will begin to flash, indicating that the registration is taking place between the second handset and the base.

3) Wait for at least 5 seconds before removing the handset from the base.

Congratulations, the registration has been completed, and your dual handset cordless phone is ready for use!

- When you charge the handset, Caller ID summary screen and the name of the handset, HS1 appears. If HS2 appears, you are charging the handset No.2.
- The charging cradle can be used to charge either handset.
When to Re-register Handsets

1) You'll need to re-register the second handset (follow steps on page 11) each time the digital security code is changed. Refer to page 53 for details regarding the Digital Security Code.

2) When there is a power failure for more than one hour: If power failure occurs (e.g. due to electrical storm or if the unit is unplugged during a move), both handsets will need to be re-registered. To re-register, follow the same registration process on page 11.

Call Transfer Feature

Conveniently, your cordless phone allows you to transfer outside calls from handset to handset, simply by pressing the delete/transfer key. Not to worry, conversations will not be interrupted; only one handset at a time can talk with an outside caller. The second handset cannot go off hook to listen to conversations or make an outgoing call while the other handset is in use.

To transfer a call (to the second handset)

1) Press delete/transfer during a call. The call will automatically be placed on hold and the transfer tone sounds.

2) When the other handset receives the call, the transfer tone stops. To cancel the transfer, press the delete/transfer or talk/flash key on the handset.

To receive a transfer call (from the second handset)

Pick up the handset (when AutoTalk is set to On), or pick up the handset and press the talk/flash key to answer the transferred call. Additionally, you can answer the transferred call by pressing any number key, *tone/＜, or ＃/＞, (when AutoTalk is set to On).
Mounting the Base Unit on a Wall

**Setting the handset retainer clip for wall mounting**

1) On the base unit, pull the handset retainer clip out of the slot and rotate it clockwise 180 degrees.

2) Flip the retainer clip from front to back. Slide it back into the slot so that the lip of the retainer is up and the ▼ is down. The retainer holds the handset in place.

**Standard wall plate mounting**

This phone can be mounted on any standard wall plate.

1) Plug the AC adapter to the DC IN 9V jack.

2) Wrap the AC adapter cord inside the molded wiring channel as shown.

3) Plug the AC adapter into a standard 120V AC wall outlet.

4) Plug the telephone line cord into the TEL LINE jack.

5) Plug the telephone line cord into the telephone outlet.

6) Raise the antenna to a vertical position.

7) Align the mounting slots on the base with the mounting posts on the wall. Then push in and down until the phone is firmly seated.

DO NOT use an AC outlet controlled by a wall switch.
Direct wall mounting

If you don’t have a standard wall plate, you can mount your phone directly to the wall. Before doing this, consider the following:

• Avoid electrical cables, pipes, or other items behind the mounting location that could cause a hazard when inserting screws into the wall.
• Try to mount your phone within 5 feet of a working phone jack to avoid excessive cord lengths.
• Make sure the wall material is capable of supporting the weight of the base and handset.
• Use #10 screws (minimum length of 1-3/8 inches) with anchoring devices suitable for the wall material where the base unit will be placed.

1) Insert two mounting screws into the wall, (with their appropriate anchoring device), 3-15/16 inches apart. Allow about 1/8 of an inch between the wall and screw heads for mounting the phone.

2) Refer to steps 1 through 7 on page 13 to mount the telephone.
Setting Menu Options

There are five setup options available. They are Caller ID options [AutoTalk, CIDCW (Caller ID on Call Waiting), Area Code], Dial Mode and Language.

AutoTalk allows you to answer the phone without pressing the talk/flash key. If the phone rings when AutoTalk is On, simply remove the handset from the base or charging cradle and the phone automatically answers the call. If the phone rings when AutoTalk is Off, you must press the talk/flash key to answer the call.

CIDCW and Dial Mode options can only be set by using Handset 1. If you try to set by using Handset 2, you will not see these options listed on the LCD screen. To confirm which handset is HS1, refer to the display indicating "HS1" or "HS2".

AutoTalk, Area Code and Language options can be set by using either Handset 1 or Handset 2.

Caller ID options

To change your AutoTalk and CIDCW:

1) Press and hold the cid/menu key. The following screen appears.

2) Use the vol/ring/\ or vol/ring/^ key to move the pointer to the selection that you would like to change. Press the select/channel key to toggle between "On" and "Off".

3) Press the end key and return the handset to the base unit to complete the setting.

The handset returns to the standby mode.

The cordless phone features include AutoTalk® and AutoStandby®. AutoStandby allows you to hang up by simply returning the handset to the base or charging cradle.
To enter your Area Code

If you enter a 3-digit area code number in the Area Code option, your local area code does not appear in Caller ID messages. Do not program this option, if your calling area requires 10-digit dialing. When reviewing Caller ID messages, you will see only the local seven digit number. For calls received from outside your local area code, you will see a full 10-digit number.

1) When the phone is in the standby mode, press and hold the cid/menu key. The Caller ID setting screen appears.

2) Use the vol/ring/▽ key to move the pointer to “Area Code”.

3) Press the select/channel key.

4) Use the number keys (0 - 9) or the delete/transfer key to enter the 3-digit area code.

5) Press the select/channel key. A confirmation tone sounds and the displayed area code is entered.

6) Press the end key or return the handset to the base unit or charging cradle to complete the setting. The handset returns to the standby mode.

When the area code has already been stored in memory, the stored area code will be displayed. To change it, use the delete/transfer key and number keys to enter the new area code. Then press the select/channel key. A confirmation tone sounds. To complete the setting, press the end key or return the handset to the base unit or charging cradle.
Choosing the dialing mode
Most phone systems use tone dialing which sends DTMF tones through the phone lines. However, some phone systems still use pulse dialing such as in rural areas. The default setting is tone dialing. Depending on your dialing system, set the mode as follows:

1) When the phone is in the standby mode, press and hold the cid/menu key. The following screen appears.

2) Press the vol/ring/✓ key three times to select “Dial”.

3) Press the select/channel key to toggle between “Tone” and “Pulse”.

4) Press the end key and return the handset to the base unit to complete the setting.
   The handset returns to the standby mode.

Setting the language
1) When the phone is in the standby mode, press and hold the cid/menu key. The following screen appears.

2) Use the vol/ring/✓ key to move the pointer to “Language”.

3) Press the select/channel key to toggle between “Eng” and “Fr.”.

4) Press the end key or return the handset to the base unit or charging cradle to complete the setting.
   The handset returns to the standby mode.

• Make sure your battery pack is fully charged before choosing the dialing mode.
• If you are not sure of your dialing system, make a trial call. If the call connects, leave the setting as is, otherwise set for pulse dialing.
• If your phone system requires pulse dialing and you need to send the DTMF tones for certain situations during a call, you may “switch-over” to tone dialing (refer to “Tone Dialing Switch-over” on page 20).
• Dialing mode can only be changed from handset 1. To confirm which handset is HS1, look at the display indicating “HS1” or “HS2”.

Adjusting the Handset Ringer and Earpiece Volume

**Handset ringer tone and volume**
Press the `vol/ring/ ▲` or `vol/ring/ ▼` key in standby mode to select one of five ringer tones and volume combinations.

**Earpiece volume**
Pressing the `vol/ring/ ▲` or `vol/ring/ ▼` key during a call will change the earpiece volume of the handset. This setting will remain in effect after the telephone call has ended.

- **Note:** When you press the `vol/ring/ ▲` key in Maximum mode or the `vol/ring/ ▼` key in Low mode, an error tone sounds.

**Temporarily Mute Ringer**
If one handset is off the base or charging cradle, simply press the `end` key to temporarily mute the incoming ring only for that handset. The ringer will sound with the next incoming call.

If you select "Ringer Off", "<Ringer Off>" appears on the display when you make or receive calls, or when charging the handset.
Redial

The *redial/pause* key redials the last number dialed. The redialed number can be up to 32 digits long.

Tone Dialing Switch-over

Some telephone companies use equipment that requires pulse dialing (sometimes referred to as rotary dialing). If you need to enter tone dialing digits, you can switch-over to tone dialing during the call. For example, entering your bank account number after you have called your bank.

Initially make your call with the pulse dialing mode. Once your call connects, press the *tone* key. Enter the desired number. These digits will be sent as tone dialing. Once the call ends, the tone mode is canceled and pulse dialing mode resumes.

Traveling Out-of-Range

During a call, as you begin to move your handset too far from your base unit, noise increases. If you pass the range limits of the base unit, your call will terminate within 1 minute.

- The tone feature only applies when the dial mode is set to pulse.
- This special number can be stored in a memory location. This is referred to as Chain Dialing (see page 26.)
Selecting a Different Channel

If you encounter interference while using your phone, you can manually change the phone’s channel for clear operation. This function works only when the phone is in use. Press the select/channel key. “Scanning” appears on the display, indicating the phone is changing to another channel. For more information on interference, refer to "Precautions" on page 59.

Find Handsets

To locate the handsets, press the find hs key on the base. Both handsets beep for 60 seconds. Paging of both handsets are canceled when pressing any key on either handset or pressing the find hs key again.

Flash and Call Waiting

If you have “Call Waiting” service and a call waiting tone sounds while you are on a call, press the talk/flash key to accept the waiting call. There is a short pause, then you will hear the new caller. To return to the original caller, press the talk/flash key again.

You must subscribe through your local telephone company to receive Call Waiting Service.

note

• The UltraClear Plus™ true compander circuitry virtually eliminates background noise. This innovative technology, together with 20 different channels, provides you with the best possible reception during all your conversations.
• You can change the phone’s channel by pressing the select/channel key on either handset.
• Paging is also canceled when the phone receives an incoming call.

www.uniden.com
Storing Phone Numbers and Names

Memory Dialing allows you to dial a number using just a few key presses. Your cordless phone stores up to 20 names/numbers in each handset.

1) Press the mem key, “Select Memory” is displayed.

2) Press the vol/ring/▲ or vol/ring/▼ key, or enter a number (01 - 20) to select the memory location where you would like to store the number.

3) Press the mem or select/channel key.

4) Press the mem or select/channel key. The following screen appears and a cursor flashes indicating that the display is ready for the name to be entered.

If this screen appears, the selected memory location is already stored. Then you must either edit the entry in this location, delete the entry in this location, or select “Go Back” to choose another location.

5) To enter a name (up to 13 characters), use the number keys.
   • See the "Steps for entering names and special characters" (see page 24).
   • Use the #/> and */tone/< keys to move the cursor to the desired location.
   • Use the delete/transfer key to delete characters as needed.
   • Press and hold the delete/transfer key to delete all the characters.
   • If a name is not required, go to step 6.
6) Press the **mem** or **select/channel** key. “Store Number” is displayed. The cursor flashes indicating that the display is ready for the number to be entered.

7) Use the number keys to enter the phone number. The phone number cannot exceed 20 digits. Use the **redial/pause** key to enter a pause in the dialing sequence. The display shows a “P”. Each pause counts as one digit and represents a two second delay of time between the digits. Use the **delete/transfer** key to delete digits as needed.

8) Press the **mem** or **select/channel** key. You will hear a confirmation tone, and the following screen appears. Memory storage is complete. For example, if you store a name and number into memory location number 01, the display shows “Memory01 Stored”. After about 2 seconds, the display is ready for a new screen. Repeat steps 2 - 8 to store more numbers.

9) Press the **end** key to return to the standby mode.
Steps for Entering Names and Special Characters

Refer to the letters on the number keys to select the desired characters. With each press of a numeric key, the displayed character appears in the following order: Upper case letters first, lower case letters next and finally the number corresponding to the key.

**If you make a mistake while entering a name**

Use the */#/tone/< or #/> key to move the cursor to the incorrect character. Press the delete/transfer to erase the wrong character, then enter the correct character. To delete all characters, press and hold the delete/transfer key.

For example, to enter **Movies**.

1) Pick up the handset. Press the mem key.
2) Enter a number or press the vol/ring/ \ or vol/ring/ \ key to select a memory location.
3) Press the mem or select/channel key.
4) Press the mem or select/channel key. (When there is information already stored in the selected memory location, "Edit MemoryXX" is displayed. See page 27 for information on "Editing a Stored Name and/or Phone Number").
5) Press 6 then press the #/> key to move the cursor to the right.
6) Press 6 six times.
7) Press 8 six times.
8) Press 4 six times.
9) Press 3 five times.
10) Press 7 eight times.
11) When finished, press the mem or select/channel key.

To continue to store the telephone number, proceed to step 7 on page 23.
Making Calls with Memory Dialing

Memory dialing from Standby Mode

1) Press the **mem** key. The handset displays your programmed memory locations.

2) Press the **vol/ring/↑** or **vol/ring/↓** key, or enter a number (01 - 20) to select the memory location you would like to dial.

3) Press the **talk/flash** key. “Connecting” and the number you would like to dial appear on the display. Then the displayed number is dialed.

   **Note:** To exit the memory function without dialing, press the **end** key. The handset returns to standby.

Memory dialing from Talk Mode

1) Press the **talk/flash** key. “Connecting” appears.

2) After the display changes from “Connecting” to “Talk”, press the **mem** key.

3) Press the **vol/ring/↑** or **vol/ring/↓** key, or enter a number (01 - 20) to select the memory location of the desired phone number. Then press the **select/channel** key. The number is dialed.

4) To hang up, press the **end** key.

www.uniden.com
Chain Dialing

The memory locations on the handset are not limited to phone numbers. You can also store a group of numbers (up to 20 digits) that you need to enter once your call connects. This is referred to as Chain Dialing.

An example of this is a bank account number. Once you have called your bank, and are prompted to enter the account number, press the \textit{mem} key and select the location number where the special number has been stored, then press \textit{select/channel}.

Store your special number with an identifying name. (Refer to "Storing Phone Numbers and Names" on page 22.)
Editing a Stored Name and/or Phone Number

1) Press the mem key, “Select Memory” is displayed.

2) Press the vol/ring/↑ or vol/ring/↓ key, or enter a number (01 - 20) to select the memory location you would like to edit, and press the mem or select/channel key.

3) Press the mem or select/channel key. The following screen appears with the memory location number that you have selected in the display.

4) Press the vol/ring/↑ or vol/ring/↓ key to select “Edit Memory”, then press the mem or select/channel key. The following screen appears. The cursor flashes indicating that the display is ready for the name to be edited. When a name has not been stored, the cursor appears at the beginning of the second line.

5) Use the number keys, * /tone/＜, ＃/＞, or delete/transfer to edit the name. (See page 22.) To edit only the phone number, skip this step.

6) Press the mem or select/channel key. The following screen appears. The cursor flashes indicating that the display is ready for the number to be edited.
7) Use the number key, \*, #, \#, /tone, /., redial/pause or delete/transfer to edit the phone number. The phone number cannot exceed 20 digits (see page 23). If you don't want to change the phone number, skip this step.

8) Press the \textit{mem} or \textit{select/channel} key. If you changed either name or phone number, a confirmation display shows up. If it is correct, press the \textit{vol/ring/} key to move the pointer to "Yes" and press the \textit{select/channel} key again. You hear a confirmation tone, and the following screen appears. The memory storage is complete.

For example, if you store a name and number into memory location number 01, the display shows "Memory01 Stored". After about 2 seconds, "Select Memory" is displayed.

9) Press the \textit{end} key to return to the standby mode.
Erasing a Stored Name and Phone Number

1) Press the "mem" key, "Select Memory" is displayed.

2) Press the "vol/ring/\A" or "vol/ring/\V" key, or enter a number (01 - 20) to select the memory location you would like to erase.

3) Press the "mem" or "select/channel" key.

4) Press the "mem" or "select/channel" key.
The following screen appears with the memory location number that you have selected in the display.

5) Press the "vol/ring/\V" key to move the pointer down to "Delete Memory".

6) Press the "mem" or "select/channel" key. The following confirmation screen appears.

7) Press the "vol/ring/\A" key to move the pointer to "Yes".

8) Press the "select/channel" or "delete/transfer" key.
You hear a confirmation tone, and the following screen appears.

9) After about 2 seconds, the display returns to the Select Memory screen. You may delete the information in another memory location (return to step 2) or press the "end" key to return to the standby mode.

www.uniden.com
RocketDial

You can store your most frequently dialed number in the RocketDial in each handset. The RocketDial allows you to dial a number with one key press. (There is no need to press the talk/flash key. The phone will automatically dial the number stored.)

Storing and Editing the RocketDial

1) When the phone is in the standby mode, press and hold the RocketDial key. Following display appears.

   If this screen appears, there is a number already stored. Press the vol/ring/ or vol/ring/ key to select “Edit Number”, then press the select/channel key.

2) Store the number by following step 7 under "Storing Phone Numbers and Names" on page 23.

3) Press the select/channel key. You hear a confirmation tone and displays the following screen. Memory storage is complete.

Making calls with the RocketDial

When the phone is in the standby mode, simply press the RocketDial key. The number stored in the RocketDial is instantly dialed.
Deleting the RocketDial

1) When the phone is in the standby mode, press and hold the RocketDial key. Following display appears.

2) Press the vol/ring/ or vol/ring/ key to select "Delete Number".

3) Press the select/channel key. Following display appears.

4) Press the vol/ring/ key to move the pointer to "Yes".

5) Press the select/channel or delete/transfer key. You hear a confirmation tone and the following display appears. After about 2 seconds, the handset returns to standby mode.
Caller ID

You must subscribe to Caller ID service to use this feature.

When the telephone rings, the Caller ID feature allows you to view the caller's name and phone number on the display before you answer the phone.

The handset displays the phone number of the incoming call, the name, and time. Additionally, you can dial the displayed number and store the information for memory dialing. Make sure you have turned on the Caller ID/Call Waiting feature. (See page 15.)

When the Telephone Rings

1) When the Caller ID message is received, the display shows the caller's phone number along with the date and time. The incoming call information is stored in the Caller ID record. If the Caller ID service includes the caller's name, the caller's name appears on the display (up to 15 letters).

You may receive any one of the following messages:
- When invalid data is received: "Incomplete Data"
- When a private name is received: "Private Name"
- When a private number is received: "Private Number"
- When a unknown name is received: "Unknown Name"
- When a unknown number is received: "Unknown Number"

- If you answer a call before the Caller ID message is received (Example: before the second ring), the Caller ID message will not appear.

- When the call is received via a telephone company that does not offer Caller ID service, the caller's phone number and name do not appear. (This includes international calls.)

- When the call is via a private branch exchange (PBX), the caller's phone number and name may not appear.
2) When you pick up the phone, the display changes to “Connecting”. (AutoTalk feature is set to on.)

Data errors appear as “#”.

Viewing the Caller ID Message List
The Caller ID list stores information for up to 30 incoming calls in each handset - even unanswered calls.

1) Press the cid/menu key.
The summary screen appears. This screen shows the number of new messages and total messages.

2) Press the vol/ring/↑ or vol/ring/↓ key to display the latest or oldest Caller ID message.

3) Press the vol/ring/↑ key to see the next message. Or press the vol/ring/↓ key to see previous message.

4) Press the end key to return to standby mode.

In Caller ID operation, if no key is pressed for more than 30 seconds, an error tone sounds and the telephone returns to the standby mode.

If a call comes in via a telephone system that does not offer Caller ID service, no information is stored.

Each message can be up to 15 characters for the phone number and the name.

The number of calls from the same Caller ID appears next to the received time. Once you read the new message, the number will be cleared and disappear.
Deleting Information from the Caller ID List

The cordless phone stores up to 30 messages in each handset. If the phone receives the 31st message, the oldest one in the list is automatically deleted. Caller ID data can also be deleted manually.

Deleting a Caller ID message

1) Press the cid/menu key. Display the message to be deleted from the Caller ID list by pressing the vol/ring/ or vol/ring/ key.

2) Press the delete/transfer key.

3) Press the vol/ring/ or key to select “Yes” or “No”.

4) Press the select/channel or delete/transfer key.

   When the pointer is at “Yes”:
   You hear a confirmation tone and the Caller ID message is deleted. The next Caller ID message is then displayed.

   When the pointer is at “No”:
   The display returns to the Caller ID message.

Deleting all Caller ID names/numbers

1) Press the cid/menu key.

2) Press the delete/transfer key.
Using the Caller ID List

Calling a party from the Caller ID list
You can place a call from the Caller ID list. The cordless phone stores up to 30 messages.

1) Press the cid/menu key. Select the phone number that you want to dial by pressing the vol/ring/  or vol/ring/ key.

2) Press the talk/flash key. The displayed phone number dials automatically.

You can place a call from Talk Mode. Press the talk/flash key, then press the cid/menu key. Select the phone number that you want to dial by pressing the vol/ring/  or vol/ring/ key. Press select/channel. The displayed phone number will be dialed.

Long Distance calls and Area Code Setting/Cancellation
While the incoming Caller ID information is displayed (in step 1), pressing 1 will place or remove the prefix "1" in the display to set up for a long distance call or cancel. Pressing 3 will set or cancel an area code setting.

www.uniden.com

note
• You cannot make a call from the Caller ID list if your cordless phone is connected to a private branch exchange (PBX).
• When a long distance call has been set, "1" appears in the display.
Storing Caller ID messages in Memory dialing

Messages shown in the Caller ID list can be stored in memory dialing. Using the incoming call information (i.e., Caller ID list), the phone number of the party on the Caller ID list can be stored in memory.

1) Press the cid/menu key.
   Select the phone number to be stored from the Caller ID list by pressing the vol/ring/ or vol/ring/ key.

2) Press the mem key.

3) Press the vol/ring/ and vol/ring/ key or enter a number (01 - 20) to select the memory location to be stored.

4) Press the select/channel key.
   You hear a confirmation tone and the number is stored in memory. The display returns to the Caller ID list.
   If a message has already been stored in the selected memory number location, a confirmation screen is displayed. Press the vol/ring/ key to select “Yes”. Press the select/channel key to overwrite. The display returns to the Caller ID list.

You cannot store a Caller ID message if a phone number does not appear in the message.
The Integrated Answering Device

The cordless phone has a built-in answering system that answers and records incoming calls. You can also use your answering system to record a conversation, leave a voice memo message, or to announce a special outgoing message to callers when you’re away from your phone.

Features

- Digital Tapeless Recording
- 11 Minutes of Recording Time
- Call Screening
- Selectable Outgoing Messages
- Voice Prompts for Guidance (Bi-lingual Announcement Option)
- Time and Day Announcement
- Remote Message Retrieval
- Toll Saver
- Conversation Recording
- Voice Memo

Digital Tapeless Recording allows you to quickly review, save, or delete the messages you choose. You will never have to worry about a tape wearing out, jamming, or resetting improperly.

The Integrated Answering System is easy and convenient to use, but please read through all of the instructions carefully.
Turning the Answering System On/Off

1) To turn the answering system on, press the answer on/off/ key. “Answering system is on” and the current greeting message will be played and you will hear a confirmation tone. The message counter displays the number of messages stored in memory. If the display flashes, then there are new messages waiting for you.

2) To turn the answering system off, press the answer on/off/ key again. After the announcement, “Answering system is off” the message counter display will no longer be illuminated.
Setting up Your Answering System

Using the Menu Mode

The Menu mode allows you to set the following Answering System functions.

- To scroll through the menu options, repeatedly press the clock/menu key. The system returns to standby after the last menu option. You hear a confirmation tone to indicate standby mode.

- If any of the following occurs during menu setup, the operation is canceled. Start over with the menu function prior to the interruption.
  - Press the talk/flash key
  - Press the vol key
  - 10 second lapse of time
  - Receive a call

- The idle time default setting is 10 seconds. If the base remains idle for 10 seconds, an error tone sounds and the system returns to standby.

- For your convenience, voice prompts will guide you through the menu mode.

- After the setting, press the vol key to exit the menu mode, or the clock/menu key to move to the next menu option. Or the system automatically returns to standby in 10 seconds after the setting.

- You have 5 seconds of idle time just after the 1st and last guidance of each menu setting.

www.uniden.com
Setting the Time

The clock on the cordless phone’s answering system starts when power is supplied to the base. Follow these steps to set the clock to the correct time.

1) Press the *clock/menu* key. The system announces “Time”, the current time and the guidance for setting the time.

2) Press the *select/volume* \( \wedge \) or \( \vee \) key until the correct day is announced. The numbers \([/
]\) through \([?
]\) are displayed on the base.

3) Press the *set* key to select the day.

4) Press the *select/volume* \( \wedge \) or \( \vee \) key until you hear the correct hour setting. The numbers \([?
]\) through \([?
]\) are displayed on the base as each hour is announced.

5) Press the *set* key to select the hour.

6) Press the *select/volume* \( \wedge \) or \( \vee \) key until you hear the correct minute setting. The numbers \([00]\) through \([59]\) are displayed on the base as each minute is announced.

**note**

- Normally the idle time for the menu mode is 10 seconds before the system returns to standby. However for setting the time, the idle time is extended to two minutes.

- Press and hold the *select/volume* \( \wedge \) or \( \vee \) key to quickly scroll through the numbers on the display.
7) Press the **set** key to select the minute.

8) Press the **select/volume ▲** or **▼** key until you hear the correct AM or PM setting. The message counter displays [A] or [P].

9) Press the **set** key to select the AM/PM setting.

You hear a confirmation tone, then the announcement “Time” and the time and day are announced for your review. After a few seconds, the system announces “To set security code, press menu key again”.

### Setting a Personal Security Code (PIN)

To play your messages from a remote location, you need to enter a two-digit Personal Identification Number (PIN) code (01-99). To select a PIN, perform the following steps:

1) Press the **clock/menu** key twice in standby mode. “Security code” and the current PIN code is announced as it is displayed on the base. Then the system announces the guidance for setting the PIN Code.

2) Press the **select/volume ▲** or **▼** key until the desired number appears.

3) Press the **set** key to select the PIN code. You hear a confirmation tone, then the announcement “Security code” and the new PIN code is announced. After a few seconds, the system announces “To set ring time, press menu again”.

---

**note**

The PIN code is set to “80” when you purchase the cordless phone.
Setting the Ring Time

The ring time setting allows you to set the number of rings the caller hears before your answering system plays the outgoing message. You can set the ring time to answer after two, four, or six rings. Setting \( \text{Toll Saver} \), the answering system picks up after two rings if you have new messages, and after four rings if there are none. This way, if you make a long distance call to check your messages, you can hang up after the second ring to avoid billing charges.

1) Press the \text{clock/menu} key three times in standby mode. You hear “Ring time”, the current ring time ([2], [4], [6], [Toll saver]) is displayed on the base. Then you hear the guidance for setting the ring time.

2) Press the \text{select/volume} key until the desired ring time appears.

3) Press the \text{set} key to select the new ring time. You hear a confirmation tone, then the announcement “Ring time” and the new ring time is announced. After a few seconds, the system announces “To set record time, press menu again.”
Selecting the Message Record Time

You have three record time options. The options "1 minute" or "4 minutes" sets the duration for recording the incoming messages. "Announce only" answers the call with the preset greeting or your personal greeting but prevents the caller from leaving a message.

1) Press the clock/menu key four times in standby mode.
   You hear "Record time" and the current recording time ([ ] 1 minute, [ ] 4 minutes, [ ] Announce only, No recording), and it is displayed on the base. Then you hear the guidance for setting the record time.

2) Press the select/volume ▲ or ▼ key until the desired time appears.

3) Press the set key to select the new recording time. You hear a confirmation tone, then the announcement "Record time" and the new recording time is announced. After a few seconds, the system announces "To set message alert, press menu again".

▼Announce only feature

The announce only feature plays a prerecorded outgoing message "Hello, no one is available to take your call. Please call again.", and it will not allow the caller to leave a message. To set "Announce only", follow the steps above.

To scroll between the prerecorded message or your own personal greeting, press the greeting key when the outgoing message is played. If you want to use your own greeting, or want to omit the prompt “to leave a message from your greeting”. Refer to "Recording a personal outgoing message" (Greeting) on page 45.
Setting the Message Alert tone

Message Alert feature lets you know you have new messages by sounding a short beeping tone. If you set the Message Alert to On and when a new message is received, the alert tone will sound every 15 seconds.

1) Press the clock/menu key five times in standby mode.
   You hear "Message alert" and the current setting ([ ] Off or [ ] On), and it is displayed on the base. Then you hear the guidance for setting the message alert.

2) Press the select/volume \( \wedge \) or \( \vee \) key to make your selection.
3) Press the set key to select the new setting. You hear a confirmation tone, then the announcement “Message alert” and the current setting you have selected is announced. After a few seconds, the system announces “To set language, press menu again”. When the first new message is received, the alert tone will begin to sound.

Turning the Message Alert tone Off by pressing any key.

1) To quickly turn Message Alert tone off, press any key on the base unit and the tone will automatically deactivate. To reset, go back into the menu setup mode (steps 1 - 3 above.)

Turning Message Alert tone Off when you’re away from your phone.

1) When all new messages are played back using the remote playback feature (see page 51) the Message Alert tone will automatically deactivate. The tone will not deactivate until all messages are played back.
Selecting the Language
The answering system voice announcements can be heard in English or French. To choose the language of the answering system voice announcements:

1) Press the clock/menu key six times in standby mode. You hear the announcement “Language, English” followed by the guidance for setting the language. The current setting (“E” or “F”) appears on the base.

2) Press the select/volume or key to select the desired language.

3) Press the set key. A confirmation tone is heard along with the setting in the language selected.

Setting Your Outgoing Message (Greeting)
When you receive a call, the answering system automatically plays either a preset message or your own greeting.

▼Preset message
The following message is prerecorded: “Hello, no one is available to take your call. Please leave a message after the tone.”

See “Selecting the Message Record Time”, page 43 on how to set the announce only feature.

▼Recording a personal outgoing message (Greeting)
1) Press and hold the greeting key. You hear the announcement “Record greeting” and a confirmation tone. [- -] flashes on the message counter.

3) When you are finished recording your greeting, press the greeting, or set key. You hear a confirmation tone, and then your greeting plays back for you.

• You can record a greeting up to 30 seconds long.

• Position yourself as near to the base as possible and speak clearly when recording your outgoing message.
Choosing between the two outgoing messages
Press the greeting key. Then press the greeting key again when the outgoing message is played. This switches between the prerecorded greeting and the personal greeting. After finishing playing back the message, a confirmation tone is heard.

Note: To delete the personal Greeting, press the delete/g key during the announcement and the system announces “Greeting has been deleted.”

Setting the base ringer volume
You have three ringer options. One allows you to turn the ringer off. The other two are volume levels.

1) Press the ringer key.
You hear the ringer at the current volume level ([H] High, [L] Low, [OF] off) (if you set the base ringer volume to off, “Ringer off” is announced) and it is displayed on the base.

2) Press the ringer key until the desired ringer option appears.

3) The system displays the new ringer volume.

Temporarily mute the base ringer
Press the m key to temporarily mute the incoming ring. The ringer will sound with the next incoming call.

Adjusting the speaker volume level
You can adjust the volume of the base speaker by pressing the select/volume ▲ or ▼ key on the base. Press the ▲ key for louder or the ▼ key for softer while the base speaker is being used, except in menu mode. The numbers 1 - 9 are displayed on the base indicating the volume levels, 1 being the softest and 9 being the loudest.
Using Your Answering System

The message counter displays the number of messages stored in memory. If the display flashes, then there are new messages waiting for you. The flashing number represents the number of new messages, not total messages. The cordless phone is designed to play your new messages first. After you play all your new messages, you can then play your old messages.

When the answering system is full, is displayed on the base, and the system announces "No remaining time". You should delete some messages so that the system can record new messages. (Refer to "Deleting a message" on page 49.)

Playing your messages

1) Press the key.
The system announces the number of new and old messages. The LED displays the number of new messages, and the number flashes. The day and time that each message was received is announced after the message is played. The message counter displays the number of current messages stored.

When all new messages have been played, you hear a confirmation tone and an announcement "End of messages". The system returns to standby.

2) After you have reviewed your new messages, you can play your old messages by again pressing the key. Once you have listened to a new message, it becomes an old message. The old messages will be played in the order in which they were received.

To stop playing your messages, press the key again at any time.
Repeating a message
1) Press the \( \text{ASA} \) key to review your messages. The number of stored messages are announced.

2) After a message has played for a few seconds, press the \( \text{REC} \) key to replay the message. If you have several messages, press the \( \text{REC} \) key repeatedly until you return to the message you want to replay.

3) Press the \( \text{ASA} \) key at any time to stop reviewing messages and return to standby. The message counter shows the number of messages stored in memory.

*To quickly scroll backward through a message, press and hold the \( \text{REC} \) key.*

Skipping a message
1) Press the \( \text{ASA} \) key to review your messages. The number of messages is announced.

2) Press the \( \gg \) key at anytime to skip to the next message. Each time the \( \gg \) key is pressed, the system scans forward one message. If you have several messages, press the \( \gg \) key repeatedly to find the message you want to play.

3) Press the \( \text{ASA} \) key at any time to stop reviewing your messages and return to standby. The message counter shows the number of messages stored in memory.

*To quickly scroll forward through a message, press and hold the \( \gg \) key.*
Deleting a message

To maintain maximum record time, delete the old messages.

1) Press the voicemail key to review your messages.

2) Press the delete/ hang up key anytime during the message to delete.

3) You hear a confirmation tone and the message is deleted.

You can also delete all the messages.

1) Press the delete/ hang up key in standby mode.
   You hear an announcement “To delete all messages, press delete again”.

2) Press the delete/ hang up key again.
   You hear a confirmation tone and the base display shows that all messages are deleted.

When you try to delete all messages without first listening to your new messages, you hear several short beeps followed by an announcement “Please playback all messages”. This protects you from accidentally erasing messages you have not yet reviewed.

When you press the delete/ hang up key, you are permanently deleting the message. Once deleted, the message cannot be replayed.
Voice memo

The voice memo function allows you to record messages (up to 4 minutes).

1) Press and hold the memo rec key. You hear an announcement “Record memo message” and a tone. [- -] flashes on the message counter.

2) Start your recording.

3) When you have finished, press the w/o, memo rec or set key to stop recording. You hear a confirmation tone and the system returns to standby.

Recording a conversation

You can record up to 10 minutes of conversation while you are using your phone.

1) During a conversation from the handset, press and hold the memo rec key. The unit begins recording with a confirmation tone and [- -] flashes on the message counter. A beep that can be heard by both parties, sounds during recording.

2) To stop recording, press the w/o or memo rec key. You hear a confirmation tone.
Remote access away from home

You can operate your answering system from a remote location using any touch-tone telephone. Use this function to check for recorded messages, to play or delete messages, even to record a new greeting message.

1) Call your telephone number.
2) During the greeting message, press the 0 key and enter your PIN code. (See "Setting a Personal Security Code", page 41).
3) The answering system announces the current time and the number of messages stored in memory. Then you hear "To play incoming messages, press zero two. For help, press one zero".
4) You may continue to listen to the Help Guidance, or you may select a command from the following chart:

<table>
<thead>
<tr>
<th>Command</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 then 1</td>
<td>Repeat a Message</td>
</tr>
<tr>
<td>0 then 2</td>
<td>Playing Incoming Messages</td>
</tr>
<tr>
<td>0 then 3</td>
<td>Skipping a Message</td>
</tr>
<tr>
<td>0 then 4</td>
<td>Deleting a Message</td>
</tr>
<tr>
<td>0 then 5</td>
<td>Stop Operation</td>
</tr>
<tr>
<td>0 then 6</td>
<td>Answering System On</td>
</tr>
<tr>
<td>0 then 7</td>
<td>Memo Record/Stop*</td>
</tr>
<tr>
<td>0 then 8</td>
<td>Greeting Message Record/Stop*</td>
</tr>
<tr>
<td>0 then 9</td>
<td>Answer System Off</td>
</tr>
<tr>
<td>1 then 0</td>
<td>Help Guidance</td>
</tr>
</tbody>
</table>

For your convenience remote operation cards are provided for you to use while away from home (located towards the back of this manual).

You must enter a command within 15 seconds of entering command waiting mode or the answering system automatically hangs up and returns to standby.
* For Memo Record and Greeting Message Record function, the first time you enter the corresponding command, it starts the Recording function. If you want to stop the recording, enter the command again.

5) After all of the Help Guidance prompts have played, you hear intermittent beeps indicating that the system is in the command waiting mode. You may enter another command at this time from the chart.

6) When you are finished, hang up to exit the system. The answering system automatically returns to standby.

**Turn on the answering system remotely**
If you have forgotten to turn on your answering system, you can turn it on remotely from any touch-tone telephone.

1) Call your telephone number.
2) Wait ten rings until the system answers. You hear a beep.
3) Press 0 and then enter your PIN code. The answering system announces the number of messages stored in memory. You hear "To play incoming messages, press zero two. For help, press one zero".
4) Press 0 then 6 to turn the answering system On. You hear the outgoing message and a confirmation tone.
5) Hang up the phone and subsequent calls will be answered by the system.
Changing the Digital Security Code

The digital security code is an identification code used to connect each handset and the base unit. Normally, setting the code is not necessary. The first time you charge each handset in the base, the security code is automatically set. In the rare situation that you suspect another cordless telephone is using the same security code, you can change the code.

1) Remove the handset from the base unit. Press and hold the find hs key on the base.
2) While the handset is emitting the paging sound, place the handset on the base unit holding the find hs key. The paging sound stops. Leave the handset on the base for more than 3 seconds. A new random security code is set.

You can change the phone's digital security code on either handset. However, you must re-register the other handset (not used to change the digital security code) back to the main base unit. See registration on page 11.

Installing the Beltclip

To attach the beltclip
Insert the beltclip into the holes on each side of the handset. Press down until it clicks.

To remove the beltclip
Pull both sides of the beltclip to release the tabs from the holes.

Headset Installation

Your phone may be used with an optional headset, the Uniden HS910. To use this feature, insert the headset plug into the headset jack. Your phone is ready for hands-free conversations. (Headset may be purchased by calling the Uniden Parts Department or visiting the web site. See Quick Reference Guide on page 1.)

www.uniden.com
Note on Power Sources

Battery replacement and handling
When the operating time becomes short, even after a battery is recharged, please replace the battery. With normal usage, your battery should last about one year. Please contact your place of purchase or the Uniden Parts Department for a replacement battery.

Warning: To avoid the risk of personal injury or property damage from fire or electrical shock, only use the Uniden battery model and Uniden adapter model specifically designated for this product.

Power Failure
During the period that the power is off, you will not be able to make or receive calls with the telephone.

Caution
- Use only the specified Uniden battery pack (BT-905).
- Do not remove the battery from each handset to charge it.
- Never throw the battery into a fire, disassemble it, or heat it.
- Do not remove or damage the battery casing.

Maintenance

When the handset, charging cradle, or base unit becomes slightly dirty
Wipe with a soft, dry cloth.

When the handset, charging cradle, or base unit becomes very dirty
Wipe with a soft cloth that has been dampened with diluted, neutral detergent. Dry with a dry cloth.

When the charging contacts become very dirty on the handset, charging cradle, and base unit
Using water only, dampen a cloth to clean the charging contacts. Then make sure to go back over the charging contacts with a dry cloth before returning the handset to the base unit or charging cradle to charge.

Caution
Do not use paint thinner, benzene, alcohol, or other chemical products. Doing so may discolor the surface of the telephone and damage the finish.
### Troubleshooting

If your phone is not performing to your expectations, please try these simple steps first.

<table>

**Liquid Damage**

Moisture and liquid can damage your cordless phone. In case of accidental submersion, please read the following steps.

<table>
<thead>
<tr>
<th>Case</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>If the handset or base is exposed to moisture or liquid, but only affects the exterior plastic housing.</td>
<td>Wipe off the liquid and use as normal.</td>
</tr>
</tbody>
</table>
| If moisture or liquid has entered the plastic housing (i.e., liquid can be heard in the phone or liquid has entered the handset battery compartment or vent openings on the base). | **Handset:**  
1. Remove the battery cover and leave it off for ventilation  
2. Remove the battery pack by disconnecting  
3. Leave the battery cover off and the battery pack disconnected for at least 3 days  
4. Once completely dry, reconnect the battery pack and the battery cover.  
5. Recharge the handset’s battery pack for 20 hours in the base unit before using the phone.  
**Base:**  
1. Disconnect the AC adapter from the base unit, cutting off electrical power  
2. Disconnect the telephone cord from the base unit.  
3. Let dry for at least 3 days  
**IMPORTANT:** You must **unplug the telephone line while recharging the battery pack** to avoid charging interruption.  
**CAUTION:** DO **NOT** use a microwave oven to speed up the drying process. This will cause permanent damage to the handset, base and the microwave oven.  
After following these steps, if your cordless telephone does not work, please send to:

- To avoid damage to the phone use only Uniden AD-314, AD-310 and BT905 with your phone.
- If each handset is left off of the base or charging cradle, the actual Talk mode duration will be reduced respective to the amount of time each handset is off the base or charging cradle.

Recharge your phone on a regular basis by returning the handset to the base or charging cradle after each phone call. When the operating time becomes short, even after the battery is recharged, please replace the battery. With normal usage, the battery should last about one year.

A replacement Uniden adapter and battery may be purchased at your local Uniden dealer or by contacting the Uniden Parts Department (800) 554-3988. Hours are from 8:00 a.m. to 5:00 p.m. Central Time, Monday through Friday. We can also be reached on the web at www.uniden.com.

Specifications, features, and availability of optional accessories are all subject to change without prior notice.
Precautions!

Before you read anything else, please observe the following:

Warning!

Uniden America Corporation DOES NOT represent this unit to be waterproof. To reduce the risk of fire, electrical shock, or damage to the unit, DO NOT expose this unit to rain or moisture.

Rechargeable Nickel-Cadmium Battery Warning

• This equipment contains a rechargeable nickel-cadmium battery.

• Cadmium is a chemical known to the State of California to cause cancer.

• The rechargeable nickel-cadmium battery contained in this equipment may explode if disposed of in a fire.

• Do not short-circuit the battery.

• Do not charge the rechargeable nickel-cadmium battery used in this equipment in any charger other than the one designed to charge this battery as specified in the owner’s manual. Using another charger may damage the battery or cause the battery to explode.

Rechargeable Nickel-Cadmium Batteries Must Be Recycled or Disposed of Properly

• Uniden voluntarily participates in an RBRC® industry program to collect and recycle nickel-cadmium batteries at the end of their useful life, when taken out of service within the United States. The RBRC® program provides a convenient alternative to placing used nickel-cadmium batteries into the trash or municipal waste stream, which is illegal in some areas.

• Through the RBRC® program, Uniden makes it easy for you to drop off the used battery at local retailers of replacement nickel-cadmium batteries. You may also contact your local recycling center for information on where to return the used battery. Please call 1-800-8-BATTERY for information on Ni-Cd battery recycling in your area. Uniden’s involvement in this program is part of its commitment to protecting our environment and conserving natural resources.

• RBRC® is a registered trademark of the Rechargeable Battery Recycling Corporation.

Important Safety Instructions

When using your telephone equipment, these basic safety precautions should always be followed to reduce the risk of fire, electrical shock, or personal injury.

1. Read and understand all instructions.

2. Follow all warnings and instructions marked on the product.

3. Unplug this product from the wall outlet before cleaning. Use a dry cloth for cleaning; do not use liquid or aerosol cleansers.

4. Do not use this product near water; for example, near a bathtub, wash bowl, kitchen sink or laundry tub, in a wet basement, or near a swimming pool.

5. Charge the battery pack provided with or identified for use with this product only in accordance with the instructions and limitations specified in the owner’s manual provided for this product.

6. Do not use the telephone to report a gas leak in the vicinity of the leak.

7. Do not disassemble this product.

8. Do not allow anything to rest on the power cord. Do not locate this product where the cord will be damaged by persons walking on it.

9. Do not overload wall outlets and extension cords, as this can result in the risk of fire or electrical shock.

10. Never push objects of any kind into this product through cabinet slots and openings as this could result in a risk of fire or electric shock.

11. To reduce the risk of electric shock, do not disassemble this product. Take it to qualified service personnel when service or repair work is required. Opening or removing covers may expose you to dangerous voltages or other risks.

12. Unplug this product from the wall outlet and refer servicing to qualified service personnel when the telephone equipment has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the telephone, the telephone has been exposed to rain or moisture, does not operate normally, or has been dropped.

13. Do not use the telephone in a wet area.

Important Electrical Considerations

Unplug all electrical appliances when you know an electrical storm is approaching. Lightning can pass through your household wiring and damage any device connected to it. This phone is no exception.

Range

Your new phone is designed to achieve the maximum possible range by using the latest technology. However, range is affected by your home’s environment.

1. Use only the Uniden battery pack specified in the owner’s manual.

2. Do not dispose of the battery pack in a fire. The cell may explode. Check the nickel-cadmium battery disposal package insert for disposal instructions.

3. Do not open or mutilate the battery pack. Released electrolyte is corrosive and may cause damage to the eyes or skin. It may be toxic if swallowed.

4. Exercise care in handling the battery in order not to short the battery with conductive materials such as rings, bracelets, and keys. The battery or conductor may overheat and cause burns.

5. Charge the battery pack provided with the product or a compatible battery pack with this product only in accordance with the instructions and limitations specified in the owner’s manual provided for this product.

SAVE THESE INSTRUCTIONS!

Additional Battery Safety Precautions

Caution!

1. To reduce the risk of fire or injury to persons by the battery, read and follow these instructions:

2. Do not use this battery pack in a freezer. The cell may explode. Check the nickel-cadmium battery disposal package insert for disposal instructions.

3. Do not open or mutilate the battery pack. Released electrolyte is corrosive and may cause damage to the eyes or skin. It may be toxic if swallowed.

4. Exercise care in handling the battery in order not to short the battery with conductive materials such as rings, bracelets, and keys. The battery or conductor may overheat and cause burns.

5. Charge the battery pack provided with the product or a compatible battery pack with this product only in accordance with the instructions and limitations specified in the owner’s manual provided for this product.

6. Observe proper polarity orientation between the battery pack and battery charger.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

Additional Information [59]
Telephone Line Problems

The FCC has granted the telephone company the right to disconnect service in the event that your phone causes problems on the telephone line. Also, the telephone company may make changes in facilities and services which may affect the operation of your unit. However, your telephone company must give adequate notice in writing prior to such actions to allow you time for making necessary arrangements to continue uninterrupted service.

If you are having trouble with your telephone service, you must first disconnect your phone to determine if it is the cause of your problem. If you determine that it is the cause, you must leave it disconnected until the trouble has been corrected.

Radio Interference

Radio interference may occasionally cause buzzing and humming in your cordless handset, or clicking noises in the base. These noises are caused by electrical storms or other radio frequency interference. Moving the cordless telephone farther away from the TV or VCR will often reduce or eliminate the interference.

More Than One Cordless Telephone

If you want to use more than one cordless telephone in your home, they must operate on different channels. Press the channel key to select a channel that provides the clearest communication.

Cordless Telephone Privacy

Cordless telephones are radio devices. Communications between the handset and base of your cordless telephone are encrypted. This encryption makes the information exchanged on the radio links between the telephone units private. Consequently, any communications using your cordless telephone may not be private.

Installation Considerations

Selecting a Location

Before choosing a location for your new phone, there are some important guidelines you should consider:

- The location should be close to both a phone jack and a continuous power outlet (a continuous power outlet is an AC outlet which does not have a switch to interrupt its power). The base can be placed on a desk or tabletop or mounted on a standard telephone wall plate.
- You should charge your new phone for 15-20 hours before completing the installation or using the handset.

Telephone Line Outlets

There are two types of phone outlets:

- Modular Jack

Most phone equipment available now uses modular jacks. Phone cords are fitted with a molded plastic connector which plugs into this type of jack. If you do not have modular phone jacks, contact your local telephone company for information about their installation.

- Hardwired Jack

Some equipment is wired directly to a phone jack, and these types of installations require a modular jack converter. This type of installation is not difficult; however, you should contact your Uniden telephone dealer or a telephone supply store for advice about the proper adapter or converter for your particular situation.

Connecting the Telephone Cords

Consider these safety guidelines before connecting the telephone cords:

Caution!

- Never install telephone wiring during a lightning storm.
- Never touch uninsulated telephone wires or terminals unless the telephone line has been disconnected.
- Use caution when installing or modifying telephone lines.

Applying Power to the Base

This phone requires an AC outlet, without a switch to interrupt power, and the included AC adapter. To relieve strain on the DC plug when the phone is placed on a desk or table, wrap the power cord around the strain relief notch on the back of the base.

NOTE: Placing the power cord so that it does not create a trip hazard, or where it could become chafed and create a fire or other electrical hazards.

One Year Limited Warranty

Important:

Evidence of original purchase is required for warranty service.

WARRANTOR: UNIDEN AMERICA CORPORATION ("Uniden")

ELEMENTS OF WARRANTY: Uniden warrants, for one year, to the original retail owner, this Uniden Product to be free from defects in materials and craftsmanship with only the limitations or exclusions set out below.

WARRANTY DURATION: This warranty to the original user shall terminate and be of no further effect 12 months after the date of original retail sale. The warranty is invalid if the Product is (A) damaged or not maintained as reasonable or necessary, (B) modified, altered, or used as part of any conversion kit, subassembly, or any configurations not sold by Uniden, (C) improperly installed, (D) serviced or repaired by someone other than an authorized Uniden service center for a defect or malfunction covered by this warranty, (E) used in any conjunction with equipment or parts or as part of any system not manufactured by Uniden unless it is noted in (B) installed or programmed by anyone other than as detailed by the owner’s manual for this product.

STATEMENT OF REMEDY: In the event that the product does not conform to this warranty at any time while this warranty is in effect, warrantor will either, at its option, repair or replace the Product. In the event that the product is returned to warrantor, warrantor will, at its option, repair or replace the Product, or refund the purchase price of the Product. If the Product is repaired or replaced pursuant to this warranty, the repaired or replaced Product will be warranted for the remainder of the original warranty period. In the event the Product is not returned to warrantor, warrantor will refund the purchase price of the Product. If the Product is returned to warrantor, warranty repairs or replacement will be made at warrantor’s discretion, provided that warrantor determines, in its sole discretion, that the Product is defective and covered by this warranty.

Exclusions: This warranty is void if the Product is damaged by accident, misuse, or as a result of abnormal use or condition. Warrantor is not liable for any consequential or incidental damages, losses, or expenses incurred by the buyer or any other user arising out of the use of sale or inability to use the Product. Some states do not allow exclusion or limitation of incidental or consequential damages so the above limitation or exclusion may not apply to you.

LEGAL REMEDIES: This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. This warranty is void outside the United States of America and Canada.

PROCEDURE FOR OBTAINING PERFORMANCE OF WARRANTY: If, after following the instructions in the owner’s manual you are certain that the Product is defective, pack the Product carefully (preferably in its original packaging). The Product should include all parts and accessories originally packaged with the Product. Include evidence of original purchase and a note describing the defect that has caused you to return it. The Product should be shipped freight prepaid, by traceable means, to warrantor at:

I.C. Notice

TERMINAL EQUIPMENT

NOTICE: This equipment meets the applicable Industry Canada Terminal Equipment Technical Specifications. This is confirmed by the registration number. The abbreviation, IC, before the registration number signifies that registration was performed based on a Declaration of Conformity indicating that Industry Canada technical specifications were met. It does not imply that Industry Canada approved the equipment.

NOTICE: The Ringer Equivalence Number (REN) for this terminal equipment is marked on the equipment itself. The REN assigned to each terminal equipment provides an indication of the maximum number of terminals allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the Ringer Equivalence Numbers of all the devices does not exceed five.

RADIO EQUIPMENT

The term "IC:" before the radio certification number only signifies that Industry Canada technical specifications were met.

Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device. “Privacy of communications may not be ensured when using this telephone".
Remote Operation Card

Remote access away from home
1. Call your phone number from a touch-tone phone.
2. During the outgoing message, press 0 and enter your PIN code. The answering system announces the number of messages stored in memory and the help guidance. The phone stands by for you to enter a command.
3. To quit, hang up the phone.

Turn on the answering system remotely
1. Call your phone and let it ring 10 times until it answers.
2. Press 0 and enter your PIN code.
3. Press 0 then 5 to stop the announcement.
4. Press 0 then 6 to turn the answering system on.
