Step 1 Checking the Package Contents

Make sure you have received the following items in the package. If any of these items are missing or damaged, contact the Uniden Parts Department.

- Base unit (1)
- AC adapter (2)
- Telephone cord (1)
- Charging cradle (1)
- This owner’s manual
- Other printed materials

Uniden Parts Department at (800) 554-3988 Hours: M-F 8:00 a.m. to 5:00 p.m. CST. We can also be reached on the web at www.uniden.com

Step 2 Install and Charge the Handset Batteries

TO INSTALL THE HANDSET BATTERIES

A Remove the cover.
B Connect the battery pack connector with the correct polarity.
C Replace the cover.

D Plug the AC adapter cord into the base unit and charging cradle and then into a 120V AC outlet.
E Place the handset in the base and place the other handset in the charging cradle. It does not matter which handset is placed in the base and charging cradle.

Step 3 Connect to Phone Line

When the handset battery pack is fully charged, after 15-20 hours of charging, plug the telephone cord into the base unit and then into a telephone wall jack.

Your phone is set for tone dialing. If your local network requires pulse dialing, please see “Choosing the dialing mode” on page 18.

Step 4 Before Using, Register Second Handset to Base

After fully charging the handsets, remove the handset from the charging cradle and place it in the base. (Base LED light will begin to flash indicating registration is occurring.)

Wait for at least 5 seconds before removing the second handset from the base.

Congratulations, the registration has been completed, and your dual handset cordless phone is ready for use!

Step 5 Setting Display Options

Note: Three Caller ID options are available: AutoTalk, Caller ID on Call Waiting (CIDCW), and Area Code.

TO SET CALLER ID, LANGUAGE AND DIALING OPTIONS

A Press and hold the cid/menu key in the standby mode.
B Press the vol/ring/ or vol/ring/ key to move the pointer to an option.
C Press the select/channel key to change the option setting.
D Press the end key to exit, and return the handset to the base.

OPTIONS INCLUDE

A Auto Talk On/Off
B CIDCW On/Off (Caller ID on call waiting)
C Area Code Enter/Remove
D Dial Pulse/Tone
E Language English/French/Spanish

Welcome

Congratulations on your purchase of the Uniden Cordless Telephone. This cordless phone is designed and engineered to exacting standards for reliability, long life, and outstanding performance.

Note: Some illustrations in this manual may differ from the actual unit for explanation purposes. The color of your cordless telephone may vary.

Features

• Dual Handsets
• 2.4GHz Extended Range Technology
• 3 Line Backlit Display
• Caller ID and Call Waiting Caller ID (each handset)
• RocketDial (each handset)
• 20 Number Memory Dialing (each handset)
• 32 Digit Redial
• Flash and Pause
• English, French or Spanish Display Option
• The Keypad Facing Forward Charging

• Tone/Pulse Dialing
• Page/Find handset
• Earpiece Volume Control
• Ringer Volume Control (High-Low-Off)
• Hearing Aid Compatible
• 20 Channel Autoscan
• Call Transfer

Be sure to visit our web site: www.uniden.com

28. DC IN 9V jack
Setting up the Phone

Do the following steps:
A. Choose the best location
B. Install the rechargeable battery packs into both handsets
C. Connect the base unit and charging cradle

A. Choose the best location
Before choosing a location for your new phone, read the INSTALLATION CONSIDERATIONS included in the PRECAUTIONS. Here are some important guidelines you should consider:

- Avoid heat sources, such as radiators, air ducts, and sunlight
- Avoid television sets and other electronic equipment
- Choose a central location
- Avoid noise sources such as a window by a street with heavy traffic
- Avoid microwave ovens
- Avoid excessive moisture, extremely low temperatures, dust, mechanical vibration, or shock
- Avoid personal computers
- Avoid other cordless telephones
- Choose a central location

• The location should be close to both a phone jack and a continuous power outlet which is not switchable.
• Keep the base and each handset away from sources of electrical noise such as motors, microwave ovens, and fluorescent lighting.
• Be sure there is sufficient space to raise the base antenna to a vertical position.
• The base can be placed on a desk, tabletop, or mounted on a standard wall plate.
B. Install the rechargeable battery packs into both handsets

Both handsets are powered by rechargeable battery packs. The battery recharges automatically when the handset is placed in the base unit or charging cradle.

Charge the handset battery packs for at least 15-20 hours before using your new cordless telephone for the first time! To maximize the charge capacity of your battery pack, DO NOT plug the telephone cord into the base unit and wall jack until the battery is fully charged.

1) Press down on the handset battery case cover (use the finger indentation for a better grip) and slide the cover downward to remove.

2) Plug the battery pack connector (red & black wires) into the small jack inside the battery compartment. (The connector notches fit into the grooves of the jack only one-way.) Match the wire colors to the polarity label in the battery compartment, connect the battery and listen for a click to insure connection.

3) Make sure you have a good connection by slightly pulling on the battery wires. If the connection is secure, the battery jack will remain in place.

• Use only the Uniden (BT-905) rechargeable battery pack supplied with your cordless telephone.

• Replacement batteries are also available through the Uniden Parts Department at (800) 554-3988, Monday through Friday from 8:00 a.m. to 5:00 p.m. or on line at www.uniden.com

• Place the second handset in the charger with the keypad facing forward for 15-20 hours before use.
4) Place the battery case cover back on the handset by sliding it upwards until it clicks into place.

5) Place one handset in the base unit and one handset in the charging cradle for 15-20 hours without interruption. The base or charging cradle unit’s LED light (labeled charge/in use or charge) illuminates once the handset is placed in the base or charging cradle. The LED light will illuminate whether the battery pack is connected or not.

If the base or charging cradle (charge/in use or charge) LED light does not illuminate:
• Check to see if the AC adapter is plugged into each charging cradle and the electrical wall outlet properly. (Use only the supplied AC adapter. Do not use any other AC adapter.)
• Check to see if each handset is sitting correctly in each charging cradle and making good contact with each charging contacts.
**Low battery alert**

When the battery pack is very low and needs to be charged, the phone is programmed to eliminate functions in order to save power. If the phone is not in use, “Low Battery” appears on the LCD and none of the keys will operate. If the phone is in use, “Low Battery” flashes and the handset beeps. Complete your conversation as quickly as possible and return the handset to either charging cradle for charging.

The last number dialed in the redial memory and the numbers stored in the memory locations are retained for up to 30 minutes while you replace the battery pack.

**Cleaning the battery charging contacts**

To maintain a good charge, it is important to clean the charging contacts on the handsets, base unit and charging cradle once a month. Using water only, dampen a cloth to clean the charging contacts. Then make sure to go back over the charging contacts with a dry cloth before returning the handset to the base to charge. **Caution:** Do not use paint thinner, benzene, alcohol, or other chemical products. Doing so may discolor the surface of the telephone and damage the finish.

**note**

Even when the battery pack is not being used, it will gradually discharge over a long period of time. For optimum performance, be sure to return the handset to either charging cradle after a telephone call.

**Talk Mode** - The handset is off either charging cradle and the *talk/flash* key has been pressed enabling a dial tone.

**Standby Mode** - The handset is not in use, off either charging cradle, and the *talk/flash* key has not been pressed. A dial tone is not present.

www.uniden.com
C. Connect the base unit and charging cradle

1) Connect each AC adapter to the **DC IN 9V** jack and to each standard 120V AC wall outlet.

2) Set the base and charging cradle on a desk or tabletop, and place one handset in the base unit and one in the charging cradle.

3) Raise the base antenna to a vertical position.

4) Make sure that the **charge/in use** and **charge** LED illuminate. If the LED does not illuminate, check to see that the AC adapter is plugged in and that the handset makes good contact with the cradle’s charging contacts.

5) Once the handset battery packs are fully charged, connect the telephone line cord to the **TEL LINE** jack and to a telephone outlet.

- **tip** If your telephone outlet isn't modular, contact your telephone company for assistance.

- **note** Connect the AC adapter to a continuous power supply.
- **note** Place the base unit and charging cradle close to the AC outlets so that you can unplug the AC adapters easily.

After installing the battery packs in the handsets, charge your handsets at least **15-20 hours before plugging into the phone line**.

- **note** Use only the supplied AD-0001 AC adapter. Do not use any other AC adapter.
- **note** Place the power cord so that it does not create a trip hazard or where it could become chafed and create a fire or electrical hazard.

- **tip** If your telephone outlet isn't modular, contact your telephone company for assistance.
Before Using, Register Second Handset to the Base Unit

When the dual handsets are removed from the packaging, the handset that is placed in the base unit first (to charge battery for 15-20 hours), will automatically be registered to the base unit. (It does not matter which handset you choose to place in the base unit first.)

You will also need to register the second handset by placing it in the base cradle. The second handset WILL NOT operate properly until the registration has been completed. Once the handset is registered, it is ready for use.

Follow these simple steps to register:

1) First, install the battery packs in both handsets. Place either handset in the base, then place the second handset in the charging cradle. Charge both handsets for 15-20 hours.

2) After fully charging both handsets, remove the handset in the charging cradle, and place it in the base. The charge/in use LED light on the base will begin to flash, indicating that the registration is taking place between the second handset and the base.

3) Wait for at least 5 seconds before removing the handset from the base.

Congratulations, the registration has been completed, and your dual handset cordless phone is ready for use!

• When you charge the handset, Caller ID summary screen and the name of the handset, HS1 appears. If HS2 appears, you are charging the handset No. 2.

• The charging cradle can be used to charge either handset.
When to Re-register Handsets

1) You’ll need to re-register the second handset (follow steps on page 13) each time the
digital security code is changed. Refer to page 41 for details regarding the Digital
Security Code.

2) When there is a power failure for more than one hour:
   If power failure occurs (e.g. due to electrical storm or if the unit is unplugged during
   a move), both handsets will need to be re-registered. To re-register, follow the same
   registration process on page 13.

Call Transfer Feature

Conveniently, your cordless phone allows you to transfer outside calls from handset to
handset, simply by pressing the delete/transfer key. Not to worry, conversations will
not be interrupted; only one handset at a time can talk with an outside caller.
The second handset cannot go off hook to listen to conversations or make an outgoing
call while the other handset is in use.

To transfer a call (to the second handset)
1) Press the delete/transfer key during a call. The call will
   automatically be placed on hold and the transfer tone sounds.
2) When the other handset receives the call, the transfer tone
   stops. To cancel the transfer, press delete/transfer or talk/flash
   on the handset.

To receive a transfer call (from the second handset)
Pick up the handset (when AutoTalk is set to On), or pick up the
handset and press the talk/flash key to answer the transferred
call. Additionally, you can answer the transferred call by pressing
any number key, the */tone/<, or #/> key (when AutoTalk is set to On).

• If the second handset’s battery becomes very low, the handset must be
  recharged for 15-20 hours and re-registered to the base unit.
• Make sure to return the handsets to the charging cradles after
  each phone call.
• Call transfer allows you to transfer outside calls from handset to
  handset, only one handset at a time can talk with an outside caller.
• If you transfer the call and it is not picked up after 5 minutes, the call will
  be disconnected.

[14] GETTING STARTED
Mounting the Base Unit on a Wall

**Standard wall plate mounting**
This phone can be mounted on any standard wall plate.

1) Plug the AC adapter into the **DC IN 9V** jack.

2) Wrap the AC adapter cord inside the molded wiring channel as shown.

3) Plug the AC adapter into a standard 120V AC wall outlet.

4) Plug the telephone line cord into the **TEL LINE** jack. Wrap the cord inside the molded wiring channel as shown.

5) Plug the telephone line cord into the telephone outlet.

6) Raise the antenna to a vertical position.

7) Align the mounting slots on the base with the mounting posts on the wall. Then push in and down until the phone is firmly seated.

DO NOT use an AC outlet controlled by a wall switch.
Direct wall mounting
If you don’t have a standard wall plate, you can mount your phone directly to the wall. Before doing this, consider the following:
• Avoid electrical cables, pipes, or other items behind the mounting location that could cause a hazard when inserting screws into the wall.
• Try to mount your phone within 5 feet of a working phone jack to avoid excessive lengths.
• Make sure the wall material is capable of supporting the weight of the base and handset.
• Use #10 screws (minimum length of 1-3/8 inches) with anchoring devices suitable for the wall material where the base unit will be placed.

1) Insert two mounting screws into the wall, (with their appropriate anchoring device), 3-15/16 inches apart. Allow about 1/8 of an inch between the wall and screw heads for mounting the phone.

2) Refer to steps 1 through 7 on page 15 to mount the telephone.
Setting Menu Options

There are five setup options available. They are Caller ID options [AutoTalk, CIDCW (Caller ID on Call Waiting), Area Code], Dial Mode and Language.

AutoTalk allows you to answer the phone without pressing the talk/flash key. If the phone rings when AutoTalk is On, simply remove the handset from the base or charging cradle and the phone automatically answers the call. If the phone rings when AutoTalk is Off, you must press the talk/flash key to answer the call.

CIDCW and Dial Mode options can only be set by using Handset 1. If you try to set by using Handset 2, you will not see these options listed on the LCD screen. To confirm which handset is HS1, refer to the display indicating “HS1” or “HS2”.

AutoTalk, Area Code and Language options can be set by using either Handset 1 or Handset 2.

Caller ID options

To change your AutoTalk and CIDCW:

1) Press and hold the cid/menu key. The following screen appears.

2) Use the vol/ring/^ or vol/ring/^ key to move the pointer to the selection that you would like to change.
   Press the select/channel key to toggle between “On” and “Off” for each setting.

3) Press the end key and return the handset to the base unit to complete the setting. The handset returns to standby mode.

www.uniden.com
To enter your Area Code
If you enter a 3-digit area code number in the Area Code option, your local area code does not appear in Caller ID messages. Do not program this option, if your calling area requires 10-digit dialing. When reviewing Caller ID messages, you will see only the local seven digit number. For calls received from outside your local area code, you will see a full 10-digit number.

1) When the phone is in standby mode, press and hold the cid/menu key. The Caller ID setting screen appears.
2) Press the vol/ring/ key to move the pointer to “Area Code”.
3) Press the select/channel key.
4) Use the number keys (0 - 9), or the delete/transfer key to enter the 3-digit area code.
5) Press the select/channel key. A confirmation tone sounds and the displayed area code is entered.
6) Press the end key or return the handset to the base unit or charging cradle to complete the setting. The handset returns to the standby mode.

When the area code has already been stored in memory, the stored area code will be displayed. To change it, use the delete/transfer key and number keys to enter the new area code. Then press the select/channel key. A confirmation tone sounds. To complete the setting, press the end key or return the handset to the base unit or charging cradle.

Choosing the dialing mode
Most phone systems use tone dialing which sends DTMF tones through the phone lines. However, some phone systems (such as those in rural areas) still use pulse dialing. The default setting is tone dialing. Depending on your dialing system, set the mode as follows:
1) When the phone is in the standby mode, press and hold the `cid/menu` key. The following screen appears.

2) Press the `vol/ring/ ✓` key to select “Dial”.

3) Press the `select/channel` key to toggle between “Tone” and “Pulse”.

4) Press the `end` key and return the handset to the base unit to complete the setting. The handset returns to standby mode.

**Setting the language**

1) When the phone is in standby mode, press and hold the `cid/menu` key. The following screen appears.

2) Press the `vol/ring/ ✓` key to select “Language”.

3) Press the `select/channel` key to toggle between “Eng”, “Fr.” and “Esp”.

4) Press the `end` key or return the handset to the base unit or charging cradle to complete the setting. The handset returns to standby mode.

---

**Note**

- Dialing mode can only be changed from handset 1. To confirm which handset is HS1, look at the display indicating “HS1” or “HS2”.
- If you are not sure of your dialing system, set for tone dialing. Make a trial call. If the call connects, leave the setting as is, otherwise set for pulse dialing.
- If your phone system requires pulse dialing and you need to send the DTMF tones for certain situations during a call, you may "switch over" to tone dialing. (Refer to "Tone Dialing Switch over" on page 22.)

Adjusting the Handset Ringer and Earpiece Volume

**Handset ringer tone and volume**
Press the volume up key or volume down key (labeled as *vol/ring/ ▲* or *vol/ring/ ▼*) in standby mode to select one of five ringer tones and volume combinations.

**Earpiece volume**
Pressing the *vol/ring/ ▲* or *vol/ring/ ▼* key during a call will change the earpiece volume of the handset. This setting will remain in effect after the telephone call has ended.

*note*
When you press the *vol/ring/ ▲* key in Maximum mode or the *vol/ring/ ▼* key in Low mode, an error tone sounds.

**Temporarily Mute Ringer**
If one handset is off the base or charging cradle, simply press the *end* key to temporarily mute the incoming ring only for that handset. The ringer will sound with the next incoming call.

If you select “Ringer Off”, “<Ringer Off>” appears on the display when you make or receive calls, or when charging the handset.
Redial

The *redial/pause* key redials the last number dialed. The redialed number can be up to 32 digits long.

Tone Dialing Switch over

Some telephone companies use equipment that requires pulse dialing (sometimes referred to as rotary dialing). If you need to enter tone dialing digits, you can switch over to tone dialing during the call. This feature is useful when you need tone dialing to use automated systems, for example, entering your bank account number after you have called your bank.

Initially make your call with the pulse dialing mode. Once your call connects, press the */tone/ < key. Enter the desired number. These digits will be sent as tone dialing. Once the call ends, the tone mode is canceled and pulse dialing mode resumes.

Traveling Out-of-Range

During a call, as you begin to move your handset too far from your base unit, noise increases. If you pass the range limits of the base unit, your call will terminate within 1 minute.

• The tone feature only applies when the dial mode is set to pulse.

• This special number can be stored in a memory location. This is referred to as Chain Dialing. (See page 29.)
Selecting a Different Channel

If you encounter interference while using your phone, you can manually change the phone's channel for clear operation. This function works only when the phone is in use. Press the **select/channel** key. “Scanning” appears on the display, indicating the phone is changing to another channel. For more information on interference, refer to "precautions" on page 47.

Find Handsets

To locate the handsets, press the **find handset** key on the base. Both handsets beep for 60 seconds. Paging of both handsets is canceled when pressing any key on either handset or pressing the **find handset** key again.

Flash and Call Waiting

If you have "Call Waiting" service and a call waiting tone sounds while you are on a call, press the **talk/flash** key to accept the waiting call. There is a short pause, then you will hear the new caller. To return to the original caller, press the **talk/flash** key again.

- The *UltraClear Plus*™ true compander circuitry virtually eliminates background noise. This innovative technology, together with 20 different channels, provides you with the best possible reception during all your conversations.
- You can change the phone’s channel by pressing the **select/channel** key on either handset.
- Paging is also canceled when the phone receives an incoming call.

You must subscribe through your local telephone company to receive Call Waiting service.
Voice Mail Waiting Indicator

If you subscribe to voice mail service, you can use your cordless telephone to access your voice mailbox. The **charge/in use** LED light on the base of your phone flashes whenever you have messages waiting in your voice mailbox. Just program the **RocketDial** key with your access number and you can get your messages at the touch of a button. (The voice mail service provider will supply you with the access number. This number may be simply a phone number. Refer to the provider’s literature.)

You may need to occasionally reset the indicator if it remains On after you have retrieved your messages. To reset the indicator, press and hold the **find handset** key for 5 seconds.

---

**note**

You must subscribe to voice mail service from your telephone company in order to use this feature. The voice mail company will provide you with the access number.
Storing Phone Numbers and Names

Memory Dialing allows you to dial a number using just a few key presses. Your cordless telephone stores up to 20 names/numbers in each handset.

1) Press the **mem** key in standby mode. “Select Memory” is displayed.

2) Press the **vol/ring/↑** or **vol/ring/↓** key, or enter a number (01 - 20) to select the memory location where you would like to store the number.

3) Press the **mem** or **select/channel** key.

4) Press the **mem** or **select/channel** key. The following screen appears and a cursor flashes indicating that the display is ready for the name to be entered.

If the Edit screen appears, the selected memory location is already stored. Then you must either edit the entry in this location, delete the entry in this location, or select “Go Back” to choose another location.

5) To enter a name (up to 13 characters), use the number keys.
   - See the "Steps for Entering Names and Special Characters". (See page 27.)
   - Use the #/> and */tone/< key to move the cursor to the desired location.
   - Use the delete/transfer key to delete characters as needed.
   - Press and hold the delete/transfer key to delete all the characters.
   - If a name is not required, go to step 6.

---

**note**

- In memory dialing operation, you must press a key within 30 seconds or the phone will return to the standby mode. If you return the handset to the base, the phone will return to the standby mode also.

- You have 30 seconds after pressing the **mem** or **select/channel** key to enter the number you wish to store. Otherwise, an error tone will sound and the phone will return to standby mode.

---

www.uniden.com
6) Press the mem or select/channel key. “Store Number” is displayed. The cursor flashes indicating that the display is ready for the number to be entered.

7) Use the number keys to enter the phone number. The phone number cannot exceed 20 digits. Use the redial/pause key to enter a pause in the dialing sequence. The display shows a “P”. Each pause counts as one digit and represents a two second delay of time between the digits. Use the delete/transfer key to delete digits as needed.

8) Press the mem or select/channel key. You will hear a confirmation tone, and the following screen appears. Memory storage is complete. For example, if you store a name and number into memory location number 01, the display shows “Memory01 Stored”. After about 2 seconds, the following screen is displayed. Repeat steps 2 - 8 to store more numbers.

9) Press the end key to return to standby mode.
Steps for Entering Names and Special Characters

Refer to the letters on the number keys to select the desired characters. With each press of a numeric key, the displayed character appears in the following order: upper case letters first, lower case letters next and finally the number corresponding to the key.

If you make a mistake while entering a name

Use the */tone/ < or *//> key to move the cursor to the incorrect character. Press the delete/transfer key to erase the wrong character, then enter the correct character.

To delete all characters, press and hold the delete/transfer key.

For example, to enter Movies.
1) Pick up the handset. Press the *mem* key.
2) Enter a number or press the vol/ring/\^ or vol/ring/\v key to select a memory location.
3) Press the *mem* or select/channel key.
4) Press the *mem* or select/channel key. (When there is information already stored in the selected memory location, “Edit MemoryXX” is displayed. See page 30 for information on “Editing a Stored Name and/or Phone Number”)
5) Press 6 then press the *//> key to move the cursor to the right.
6) Press 6 six times.
7) Press 8 six times.
8) Press 4 six times.
9) Press 3 five times.
10) Press 7 eight times.
11) When finished, press the *mem* or select/channel key.

To continue to store the telephone number, proceed to step 7 on page 26.

www.uniden.com
Making Calls with Memory Dialing

**Memory dialing from Standby Mode**

1) Press the **mem** key. The handset displays your programmed memory locations.

2) Press the **vol/ring/▼** or **vol/ring/▲** key, or enter the number (01 - 20) to select the memory location you would like to dial.

3) Press the **talk/flash** key. “Connecting” and the number you would like to dial appear on the display. Then the displayed number is dialed.

To exit the memory function without dialing, press the **end** key. The handset returns to standby mode.

**note** To exit the memory function without dialing, press the **end** key. The handset returns to standby mode.

**Memory dialing from Talk Mode**

1) Press the **talk/flash** key. “Connecting” appears.

2) After the display changes from “Connecting” to “Talk”, press the **mem** key.

3) Press the **vol/ring/▲** or **vol/ring/▼** key, or enter a number (01 - 20) to select the memory location of the desired phone number. If you press the **select/channel** key, the number is dialed.

4) To hang up, press the **end** key.
Chain Dialing

The memory locations on the handset are not limited to phone numbers. You can also store a group of numbers (up to 20 digits) that you need to enter once your call connects. This is referred to as Chain Dialing.

An example of this is a bank account number. Once you have called your bank, and are prompted to enter the account number, press the mem key and select the location number where the special number has been stored, then press the select/channel key.

Store your special number with an identifying name. (Refer to "Storing Phone Numbers and Names" on page 25.)
Editing a Stored Name and/or Phone Number

1) Press the **mem** key in standby mode. “Select Memory” is displayed.

2) Press the **vol/ring/▲** or **vol/ring/▼** key, or enter a number (01 - 20) to select the memory location you would like to edit, and press the **mem** or **select/channel** key.

3) Press the **mem** or **select/channel** key. The following screen appears with the memory location number that you have selected in the display.

4) Press the **vol/ring/▲** or **vol/ring/▼** key to select “Edit MemoryXX”, then press the **mem** or **select/channel** key. The following screen appears. The cursor flashes indicating that the display is ready for the name to be edited. When a name has not been stored, the cursor appears at the beginning of the second line.

5) Use the number keys, ***/*tone/ <, #/>**, or **delete/transfer** key to edit the name. (See page 27.) To edit only the phone number, skip this step.

6) Press the **mem** or **select/channel** key. The following screen appears. The cursor flashes indicating that the display is ready for the number to be edited.
7) Use the number key, **redial/pause** or **delete/transfer** key to edit the phone number. The phone number cannot exceed 20 digits. (See page 26.)
   If you don’t want to change the phone number, skip this step.

8) Press the **mem** or **select/channel** key. If you changed either name or phone number, a confirmation display shows up. If it is correct, press the **vol/ring/»** key to move the pointer to “Yes” and press the **select/channel** key again. You hear a confirmation tone, and the following screen appears. The memory storage is complete.
   For example, if you store a name and number into memory location number 01, the display shows “Memory01 Stored”. After about 2 seconds, Select memory is displayed.

9) Press the **end** key to return to standby mode.
Erasing a Stored Name and Phone Number

1) Press the mem key in standby mode. “Select Memory” is displayed.

2) Press the vol/ring/↑ or vol/ring/↓ key, or enter a number (01 - 20) to select the memory location you would like to erase.

3) Press the mem or select/channel key.

4) Press the mem or select/channel key. The following screen appears with the memory location number that you have selected in the display.

5) Press the vol/ring/↑ key to move the pointer down to “Delete MemoryXX”.

6) Press the mem or select/channel key. The following confirmation screen appears.

7) Press the vol/ring/↑ key to move the pointer to “Yes”.

8) Press the select/channel or delete/transfer key. You hear a confirmation tone, and “MemoryXX Deleted” screen appears.

9) After about 2 seconds, the display returns to the Select memory screen. You may delete the information in another memory location (return to step 2) or press the end key to return to standby mode.
RocketDial

You can store your most frequently dialed number in the RocketDial location in each handset. The RocketDial allows you to dial a number with one key press. (There is no need to press the talk/flash key. The phone will automatically dial the number stored.) If you subscribe to voice mail service, store your access number in this location.

Storing and Editing the RocketDial

1) When the phone is in standby mode, press and hold the RocketDial key. The following display appears.

If this screen appears, there is a number already stored. Press the vol/ring/ or vol/ring/ key to select “Edit Number”. Then press the select/channel key.

2) Store the number by following step 7 under "Storing Phone Numbers and Names" on page 26.

3) Press the select/channel key. You hear a confirmation tone, and the “Number Stored” appears. Memory storage is complete.

Making Calls with the RocketDial

When the phone is in standby mode, simply press the RocketDial key. The number stored in the RocketDial memory location is instantly dialed.
Deleting the RocketDial

1) When the phone is in standby mode, press and hold the **RocketDial** key. Following display appears.

2) Press the **vol/ring/ ‹** or **vol/ring/ ›** key to select “Delete Number”.

3) Press the **select/channel** key. The following display appears.

4) Press the **vol/ring/ ‹** key to move the pointer to “Yes”.

5) Press the **select/channel** or **delete/transfer** key. You hear a confirmation tone, and the following display appears. After about 2 seconds, the handset returns to standby mode.
Caller ID

You must subscribe to Caller ID service to use this feature.
When the telephone rings, the Caller ID feature allows you to view the caller’s name and phone number on the display before you answer the phone. The handset displays the phone number of the incoming call, the name, and time. Additionally, you can dial the displayed number and store the information for memory dialing. Make sure you have turned on the Caller ID/Call Waiting feature. (See page 17.)

When the Telephone Rings

1) When the Caller ID message is received, the display shows the caller’s phone number along with the date and time. The incoming call information is stored in the Caller ID record. If the Caller ID service includes the caller’s name, the caller’s name appears on the display (up to 15 letters).

<table>
<thead>
<tr>
<th>The date and time received</th>
<th>5/11 12:30PM</th>
</tr>
</thead>
<tbody>
<tr>
<td>Caller’s name</td>
<td>Jane Smith</td>
</tr>
<tr>
<td>Caller’s phone number</td>
<td>214-555-1234</td>
</tr>
</tbody>
</table>

You may receive any one of the following messages:

- When invalid data is received: "Incomplete Data"
- When a private name is received: "Private Name"
- When a private number is received: "Private Number"
- When a unknown name is received: "Unknown Name"
- When a unknown number is received: "Unknown Number"

Note:

- If you answer a call before the Caller ID message is received (for example, before the second ring), the Caller ID message will not appear.
- When the call is received via a telephone company that does not offer Caller ID service, the caller’s phone number and name do not appear. (This includes international calls.)
- When the call is via a private branch exchange (PBX), the caller’s phone number and name may not appear.
Viewing the Caller ID Message List

The Caller ID list stores information for up to 30 incoming calls in each handset - even unanswered calls.

1) Press the **cid/menu** key.
   The summary screen appears. The screen shows the number of new messages and total messages.

2) Press the **vol/ring/▼** or **vol/ring/▲** key to display the latest or oldest Caller ID message.

3) Press the **vol/ring/▼** key to see the next message.
   Or press the **vol/ring/▲** key to see the previous message.

4) Press the **end** key to return to standby mode.

---

- **In Caller ID operation**, if no key is pressed for more than 30 seconds, an error tone sounds and the telephone returns to the standby mode.
- **If a call comes in via a telephone system that does not offer Caller ID service**, no information is stored.
- **Each message can be up to 15 characters for the phone number and the name.**
- **The number of calls from the same Caller ID appears next to the received time**. Once you view the new message, the number will be cleared and disappear.

---

<table>
<thead>
<tr>

</table>

| 5/17 12:30PM | 03 Jane Smith |
| 214-555-1234 |           |

- **Data errors appear as “ ■ “.**

**note**

- **When you pick up the phone**, the display changes to “Connecting”.
  *(AutoTalk feature is set to on.)*
Deleting Information from the Caller ID List

The cordless phone stores up to 30 messages in each handset. If the phone receives the 31st message, the oldest one in the list is automatically deleted. Caller ID data can also be deleted manually.

Deleting a Caller ID message

1) Press the **cid/menu** key in standby mode. Display the message to be deleted from the Caller ID list by pressing the **vol/ring/▲** or **vol/ring/▼** key.

2) Press the **delete/transfer** key.

3) Press the **vol/ring/▲** or **vol/ring/▼** key to select "Yes" or "No".

4) Press the **select/channel** or **delete/transfer** key.
   
   **When the pointer is at "Yes":**
   You hear a confirmation tone and the Caller ID message is deleted. The next Caller ID message is then displayed.

   **When the pointer is at "No":**
   The display returns to the Caller ID message.

Deleting all Caller ID names/numbers

1) Press the **cid/menu** key in standby mode.

2) Press the **delete/transfer** key.

---

**note**

- While using the “Delete All?” or “Delete Message?” screen if no key is pressed for more than 30 seconds, an error tone sounds and the telephone returns to the standby mode.

- If you get an incoming call, a transferring call or page, the deleting operation is canceled and you can answer the call or page.
3) Press the `vol/ring/` or `vol/ring/` key to select “Yes” or “No”.

4) Press the `select/channel` or `delete/transfer` key.

When the pointer is at “Yes”:
You hear a confirmation tone and all stored Caller ID messages are deleted.

When the pointer is at “No”:
The display returns to the summary screen.
Using the Caller ID List

**Calling a party from the Caller ID list**
You can place a call from the Caller ID list. The cordless phone stores up to 30 messages.

1) Press the `cid/menu` key. Select the phone number that you want to dial by pressing the `vol/ring/↑` or `vol/ring/↓` key.

2) Press the `talk/flash` key. The displayed phone number dials automatically.

---

**Long Distance calls and Area Code Setting/Cancellation**
Pressing `1` while the incoming Caller ID information is displayed (in step 1) will place the prefix “1” in the display to set up for a long distance call. Pressing `3` will set or cancel an area code setting.

---

**note**
- You cannot make a call from the Caller ID list if your cordless telephone is connected to a private branch exchange (PBX).
- When a long distance call has been set, “1” appears in the display.
Storing Caller ID messages in Memory dialing
Messages (Caller ID names/numbers) shown in the Caller ID list can be stored in memory dialing.

1) Press the **cid/menu** key.
   Select the phone number to be stored from the Caller ID list by pressing the **vol/ring/↑** or **vol/ring/↓** key.

2) Press the **mem** key.

3) Press the **vol/ring/↑** or **vol/ring/↓** key or enter a number (01 - 20) to select the memory location to be stored.

4) Press the **select/channel** key.
   You hear a confirmation tone, and the number is stored in memory. The display returns to the Caller ID list.

If a message has already been stored in the selected memory number location, a confirmation screen is displayed.
Press the **vol/ring/↑** key to select “Yes”. Press the **select/channel** key to overwrite. The display returns to the Caller ID list.

You cannot store a Caller ID message if no phone number appears in the message.
Changing the Digital Security Code

The digital security code is an identification code used to connect each handset and the base unit. Normally, setting the code is not necessary. The first time you charge each handset in the base, the security code is automatically set. In the rare situation that you suspect another cordless telephone is using the same security code, you can change the code.

1) Remove the handset from the base unit. Press and hold *find handset* on the base.

2) While holding *find handset*, place the handset in the base unit, and leave the handset on the base for more than 3 seconds. A new random security code is set.

You can change the phone’s digital security code on either handset. However, you must re-register the other handset (not used to change the digital security code) back to the base unit. See registration on page 13.

Installing the Beltclip

**To attach the beltclip**
Insert the beltclip into the holes on each side of the handset. Press down until it clicks.

**To remove the beltclip**
Pull both sides of the beltclip to release the tabs from the holes.

Headset Installation

Your phone may be used with an optional headset, the Uniden HS910. To use this feature, insert the headset plug into the headset jack. Your phone is ready for hands-free conversations.

(Headset may be purchased by calling the Uniden Parts Department or visiting the web site, see QUICK REFERENCE GUIDE on page 3.)
Note on Power Sources

Battery replacement and handling
When the operating time becomes short even after a battery is recharged, please replace the battery. With normal usage, your battery should last about one year. Please contact your place of purchase or the Uniden Parts Department for a replacement battery.

Warning: To avoid the risk of personal injury or property damage from fire or electrical shock, only use the Uniden battery model and Uniden adapter model specifically designated for this product.

Power Failure
During the period that the power is off, you will not be able to make or receive calls with the telephone.

Caution
- Use only the specified Uniden battery pack (BT-905).
- Do not remove the battery from each handset to charge it.
- Never throw the battery into a fire, disassemble it, or heat it.
- Do not remove or damage the battery casing.

Maintenance
To maintain a good charge, it is important to clean the charging contacts on both the handset and base unit once a month. Using water only, dampen a cloth to clean the charging contacts. Then make sure to go back over the charging contacts with a dry cloth.

Caution
Do not use paint thinner, benzene, alcohol, or other chemical products. Doing so may discolor the surface of the telephone and damage the finish.
## Troubleshooting

If your phone is not performing to your expectations, please try these simple steps first.

### Liquid Damage
Moisture and liquid can damage your cordless phone. In case of accidental submersion, please read the following steps.

<table>
<thead>
<tr>
<th>Case</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>If the handset or base is exposed to moisture or liquid, but liquid only affects the exterior plastic housing.</td>
<td>Wipe off the liquid, and use as normal.</td>
</tr>
</tbody>
</table>
| If moisture or liquid has entered the plastic-housing (i.e. liquid can be heard in the phone or liquid has entered the handset battery compartment or vent openings on the base). | **Handset:**  
1. Remove the battery cover and leave it off for ventilation.  
2. Remove the battery pack by disconnecting.  
3. Leave the battery cover off and the battery pack disconnected for at least 3 days.  
4. Once the phone is completely dry, reconnect the battery pack and the battery cover.  
5. Recharge the handset’s battery pack for 20 hours in the base unit before using the phone.  
**Base:**  
1. Disconnect the AC adapter from the base unit, cutting off electrical power.  
2. Disconnect the telephone cord from the base unit.  
3. Let dry for at least 3 days.  
**IMPORTANT:** You must **unplug the telephone line while recharging the battery pack** to avoid charge interruption.  
**CAUTION:**  
DO NOT use a microwave oven to speed up the drying process. This will cause permanent damage to the handset, base and the microwave oven.  
After following these steps, if your cordless telephone does not work, please send to:  
Uniden America Corporation  
Parts and Service Division  
4700 Amon Carter Blvd.  
Ft. Worth TX 76155  
1-800-554-3988. Monday through Friday  
8 a.m. to 5 p.m. CST |
General Information

The phone complies with FCC Parts 15 and 68.
Operating temperature: -10°C to 50°C (+14°F to +122°F)

AC Adapter Information
  AC Adapter part number: AD-0001
  Input Voltage: 120V AC 60Hz
  Output Voltage: 9V DC 210 mA

Battery Information
  Battery part number: BT-905
  Capacity: 600 mAH, 3.6V

Frequency
  924.715789-926.704425 MHz
  2,407.542305-2,413.508213 MHz

Note
- To avoid damage to the phone use only Uniden AD-0001 and BT-905 with your phone.
- If each handset is left off of the base or charging cradle, the actual Talk mode duration will be reduced respective to the amount of time each handset is off the base or charging cradle.

Recharge your phone on a regular basis by returning the handset to the base or charging cradle after each phone call. When the operating time becomes short, even after the battery is recharged, please replace the battery. With normal usage, the battery should last about one year.

A replacement Uniden adapter and battery may be purchased at your local Uniden dealer or by contacting the Uniden Parts Department (800) 554-3988. Hours are from 8:00 a.m. to 5:00 p.m. Central Time, Monday through Friday. We can also be reached on the web at www.uniden.com.

Specifications, features, and availability of optional accessories are all subject to change without prior notice.
Precautions!

Before you read anything else, please observe the following:

Warning!

Uniden America Corporation DOES NOT represent this unit to be waterproof. To reduce the risk of fire, electrical shock, or damage to the unit, DO NOT expose this unit to rain or moisture.

Rechargeable Nickel-Cadmium Battery Warning

- This equipment contains a rechargeable nickel-cadmium battery.
- Cadmium is a chemical known to the State of California to cause cancer.
- The rechargeable nickel-cadmium battery contained in this equipment may explode if disposed of in a fire.
- Do not short-circuit the battery.
- Do not charge the rechargeable nickel-cadmium battery used in this equipment in any charger other than the one designed to charge this battery as specified in the owner’s manual. Using another charger may damage the battery or cause the battery to explode.

Rechargeable Nickel-Cadmium Batteries Must Be Recycled or Disposed of Properly

- Uniden voluntarily participates in an RBRC® industry program to collect and recycle nickel-cadmium batteries at the end of their useful life, when taken out of service within the United States. The RBRC® program provides a convenient alternative to placing used nickel-cadmium batteries into the trash or municipal waste stream, which is illegal in some areas.
- Through the RBRC® program, Uniden makes it easy for you to drop off the used battery at local retailers of replacement nickel-cadmium batteries. You may also contact your local recycling center for information on where to return the used battery. Please call 1-800-BATTERY for information on Ni-Cd battery recycling in your area. Uniden’s involvement in this program is part of its commitment to protecting our environment and conserving natural resources.
- RBRC® is a registered trademark of the Rechargeable Battery Recycling Corporation.

Important Safety Instructions

When using your telephone equipment, these basic safety precautions should always be followed to reduce the risk of fire, electrical shock, and injury to persons:

1. Read and understand all instructions.
2. Follow all warnings and instructions marked on the product.
3. Unplug this product from the wall outlet before cleaning. Use a dry cloth for cleaning without liquid or aerosol cleaners.
4. Do not use this product near water; for example, near a bathtub, wash bowl, kitchen sink or laundry tub, in a wet basement, or near a swimming pool.
5. Do not place this product on an unstable cart, stand, or table.
6. Slots and openings in the cabinet and the back or bottom are provided for ventilation. The openings must not be blocked or covered. This product should not be placed in a built-in installation unless proper ventilation is provided.
7. This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply to your home, consult your dealer or local power company.
8. Do not allow anything to rest on the power cord. Do not locate this product where the cord will be damaged by persons walking on it.
9. Do not overload wall outlets and extension cords, as this can result in a risk of fire or electrical shock.
10. Never push objects of any kind into this product through cabinet slots, as they may touch dangerous voltage points or short out parts that could result in a risk of fire or electric shock. Never spill liquid of any kind on the product.
11. To reduce the risk of electric shock, do not disassemble this product. Take it to qualified service personnel when service or repair work is required. Opening or removing covers may expose you to dangerous voltages or other risks. Incorrect reassembly can cause electric shock when the appliance is subsequently used.
12. Unplug this product from the wall outlet and refer servicing to qualified service personnel under the following conditions:
   A. When the power supply cord is damaged or frayed.
   B. If liquid has been spilled into the product.
   C. If the product has been exposed to rain or water.
   D. If the product does not operate normally when following the operating instructions. (Adjust only those controls that are covered by the operating instructions. Improper adjustment of other controls may result in damage and will often require extensive repair work by a qualified technician.)
   E. If the product has been dropped or the cabinet has been damaged.
   F. If the product exhibits a distinct change in performance.
   G. If the product is used near a swimming pool.
13. Do not use the telephone to report a gas leak in the vicinity of the leak.

Additional Battery Safety Precautions

Caution! To reduce the risk of fire or injury to persons by the battery, read and follow these instructions:

1. Use only the Uniden battery pack specified in the owner’s manual.
2. Do not dispose of the battery pack in a fire. The cell may explode. Check the nickel-cadmium battery disposal package insert for disposal instructions.
3. Do not open or mutilate the battery pack. Released electrolyte is corrosive and may cause damage to the eyes or skin. It may be toxic if swallowed.
4. Exercise care in handling the battery in order not to short the battery with conducting materials such as rings, bracelets, and keys. The battery or conductor may overheat and cause burns.
5. Charge the battery pack provided with or identified for use with this product only in accordance with the instructions and limitations specified in the owner’s manual provided with the product.
6. Observe proper polarity orientation between the battery pack and battery charger.

SAVE THESE INSTRUCTIONS!

Important Electrical Considerations

Unplug all electrical appliances when you know an electrical storm is approaching. Lightning can pass through your household wiring and damage any device connected to it. This phone is no exception.

The FCC Wants You To Know

Changes or modifications to this product not expressly approved by Uniden, or operation of this product in any way other than as detailed in your owner’s manual, could void your authority to operate this product. Your telephone complies with Part 68 of FCC Rules. You must, upon request, provide the FCC registration number and the REN to your telephone company. Both numbers are on the base unit.

NOTE: You must not connect your phone to:
- coin-operated systems
- most electronic key telephone systems

Range

Your new phone is designed to achieve the maximum possible range by transmitting and receiving according to the highest specifications set forth by the FCC. We have rated this phone to operate at a maximum distance with the qualification that the range depends upon the environment in which the telephone is used. Many factors limit range, and it would be impossible to include all the variables in our rating. The Maximum Range rating of this phone is meant to be used as a means of comparison against other range claims.

ADDITIONAL INFORMATION [47]
Telephone Line Problems
The FCC has granted the telephone company the right to disconnect service in the event that your phone causes problems on the telephone line. Also, the telephone company may make changes in facilities and services which may affect the operation of your unit. However, your telephone company must give adequate notice in writing prior to such actions to allow you time for making necessary arrangements to continue uninterrupted service. If you are having trouble with your telephone service, you must first disconnect your phone to determine if it is the cause of your problem. If you determine that it is the cause, you must leave it disconnected until the trouble has been corrected.

Radio Interference
Radio interference may occasionally cause buzzing and humming in your cordless handset, or clicking noises in the base. This interference is caused by external sources such as TV, refrigerator, vacuum cleaner, fluorescent lighting, or electrical storm. Your unit is NOT DEFECTIVE. If these noises continue and are too distracting, please check around your home to see what appliances may be causing the problem. In addition, we recommend that the base not be plugged into a circuit that also powers a major appliance because of the potential for interference. Be certain that antenna on the unit is fully extended. In the unlikely event that you consistently hear other voices or distracting transmissions on your phone, you may be receiving radio signals from another cordless telephone. Cordless telephones operate in the same frequency range as cordless keyless entry systems, security systems, and some industrial devices. In the unlikely event that you consistently hear other voices or distracting transmissions, please try the following:

1. Reorient or relocate the receiving base unit.
2. Relocate the cordless telephone, ensuring at least 3 feet (1 meter) separation between the telephone and other appliances.
3. Plug the cordless telephone into a different wall outlet from the one to which the appliance is connected.
4. Reduce the number of retransmissions by setting the cordless telephone to a single ring setting. See section “Ringer Selection” for details.

If these noises continue and are too distracting, please call Uniden Technical Support for assistance.

More Than One Cordless Telephone
If interference is experienced, moving the cordless telephone farther away from the other appliance will frequently eliminate the interference. If you cannot eliminate this type of interference, you need to change the channel that provides the clearest communication. If you want to use more than one cordless telephone in your home, there are two types of phone outlets:

- Modular Jack
- Hardwired Jack

Modular Jack
Most phone equipment available now uses modular jacks. Phone cords are fitted with a molded plastic connector which plugs into this type of jack. If you do not have modular jacks, contact your local telephone company for information about their installation.

Hardwired Jack
Some equipment is wired directly to a phone jack, and these types of installations require a modular jack converter. This type of installation is not difficult; however, you should contact your Uniden telephone dealer or a telephone supply store for advice about the proper adapter or converter for your particular situation.

Connecting the Telephone Cords
Consider these safety guidelines before connecting the telephone cords:

- Caution! Never install telephone wiring during a lightning storm.
- Never touch uninsulated telephone wires or terminals unless the telephone company has disconnected the line.
- Use caution when installing or modifying telephone lines.

Applying Power to the Base
This phone requires an AC outlet, without a switch to interrupt power, and the included AC adapter. To relieve strain on the DC plug when the phone is placed on a desk or table, wrap the power cord around the base of the phone. To use the phone without the base, remove the battery from the base by opening the battery cover and pulling out the battery. Always replace the battery when using the phone without the base. The base can be placed on a desk or tabletop or mounted on a standard telephone wall plate.

Telephone Line Outlets
There are two types of phone outlets:

- Modular Jack
- Hardwired Jack

Cordless Telephone Privacy
Cordless telephones are radio devices. Communications between the handset and your cordless telephone are accomplished by means of radio waves, which travel in straight lines, much like light waves. Because of the inherent physical properties of radio waves, your communications can be received by radio receiving devices other than your own cordless telephone unit. Consequently, any communications using your cordless telephone may not be private.
I.C. Notice

TERMINAL EQUIPMENT

NOTICE: This equipment meets the applicable Industry Canada Terminal Equipment Technical Specifications. This is confirmed by the registration number. The abbreviation, IC, before the registration number signifies that registration was performed based on a Declaration of Conformity indicating that Industry Canada technical specifications were met. It does not imply that Industry Canada approved the equipment.

NOTICE: The Ringer Equivalence Number (REN) for this terminal equipment is marked on the equipment itself. The REN assigned to each terminal equipment provides an indication of the maximum number of terminals allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the Ringer Equivalence Numbers of all the devices does not exceed five.

RADIO EQUIPMENT

The term “IC:” before the radio certification number only signifies that Industry Canada technical specifications were met.

Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device. “Privacy of communications may not be ensured when using this telephone”.
