Welcome

Congratulations on your purchase of the Uniden dual handset cordless telephone. This cordless phone is designed and engineered to exacting standards for reliability, long life, and outstanding performance.

Note: Some illustrations in this manual may differ from the actual unit for explanation purposes. The color of your cordless telephone may vary.

Features

- 5.8 GHz Extended Range Technology
- Dual Handset System
  (Extra Handset & Charger Included)
- 3 Line Backlit Display
- Caller ID/Caller ID on Call Waiting
- 30 Caller ID Memory Locations
- 10 Speed Dial Memory
- One-Touch RocketDial
- Call Transfer from Handset to Handset
- Find handset Locator
- Earpiece Volume Control
- Ringer Levels (High-Low-Off)
- Hearing Aid Compatible
- Desk or Wall Mountable

Be sure to visit our web site: www.uniden.com

28. Charge LED
29. DC IN 9V jack
Installing the Phone

Do the following steps:
A. Choose the best location
B. Install the rechargeable battery packs into both handsets
C. Connect the main base unit and charging cradle

A. Choose the best location
When choosing a location for your new phone, here are some important guidelines you should consider:

- Avoid heat sources, such as radiators, air ducts, and sunlight
- Avoid television sets and other electronic equipment
- Avoid a location by a street with heavy traffic
- Avoid microwave ovens
- Avoid excessive moisture, extremely low temperatures, dust, mechanical vibration, or shock
- Avoid personal computers
- Avoid other cordless telephones

Choose a central location

- The location should be close to both a phone jack and a continuous power outlet (one which is not connected to a switch).
- The handsets and the main base should be kept away from sources of electrical noise such as motors, microwave ovens, and fluorescent lighting.
- The base can be placed on a desk, tabletop, or mounted on a standard wall plate.

www.uniden.com

Note

If your home has specially wired alarm equipment connected to the telephone line, be sure that installing the system does not disable your alarm equipment.

If you have questions about what will disable your alarm equipment, contact your telephone company or a qualified installer.
B. Install the rechargeable battery packs into both handsets

Both handsets are powered by a rechargeable battery packs. The battery recharges automatically when the handset is placed in the main base unit or charging cradle.

Charge the handset battery pack for at least 15-20 hours before using your new cordless telephone for the first time! To maximize the charge capacity of your battery pack, DO NOT plug the telephone cord into the main base unit and wall jack until the battery is fully charged.

1) Press down on the handset battery case cover (use the finger indentation for a better grip) and slide the cover downward to remove.

2) Plug the battery pack connector (red & black wires) into the jack inside the battery compartment. (The connector notches fit into the grooves of the jack only one way.) Match the wire colors to the polarity label in the battery compartment, connect the battery, and listen for a click to insure connection.

3) Make sure you have a good connection by slightly pulling on the battery wires. If the connection is secure, the battery jack will remain in place.
4) Place the battery case cover back on the handset by sliding it upwards until it clicks into place.

5) Place the handset in the main base unit and one handset in the charging cradle for 15-20 hours without interruption. The main base or charging cradle unit’s LED light (labeled charge/in use or charge) illuminates once the handset is placed in the main base or charging cradle. The LED light will illuminate whether the battery pack is connected or not.

If the main base charge/in use or charging cradle charge LED light does not illuminate:
• Check to see if the AC adapter is plugged into both cradles and the electrical wall outlet properly. (Use only the supplied AC adapters. Do not use any other AC adapters.)
• Check to see if both handsets are sitting correctly in each cradle and making good contact with each cradles charging contacts.

• Replacement batteries are also available through the Uniden Parts Department at (800) 554-3988, Monday through Friday from 8:00 a.m. to 5:00 p.m. or online at www.uniden.com

• Place the handsets in the main base and charging cradle with the keypad facing forward for charging.
Low battery alert

When the battery pack is very low and needs to be charged, the phone is programmed to eliminate functions in order to save power. If the phone is not in use, Low Battery flashes on the LCD and none of the keys will operate. If the phone is in use, Low Battery flashes and the handset beeps. Complete your conversation as quickly as possible and return the handset to either cradle for charging.

The last number dialed in the redial memory, the Menu display options, the names and the numbers stored in the memory locations or CID list are retained for up to 30 minutes while you replace the battery pack.

Cleaning the battery charging contacts

To maintain a good charge, it is important to clean the charging contacts on the handsets, main base unit and charging cradle once a month. Using water only, dampen a cloth to clean the charging contacts. Then make sure to go back over the charging contacts with a dry cloth before returning the handsets to the main base unit or charging cradle to charge.

Note: Do not use paint thinner, benzene, alcohol, or other chemical products. Doing so may discolor the surface of the telephone and damage the finish.
C. Connect the main base unit and charging cradle

1) Connect each AC adapter to the **DC IN 9V** jack and to each standard 120V AC wall outlet.

2) Place one handset in the main base unit and the other in the charging cradle.

3) Make sure that the **charge/in use** and **charge** LED illuminate. If the LED does not illuminate, check to see that the AC adapter is plugged in and that the handset makes good contact with the cradle’s charging contacts.

- **Note**
  - Connect each AC adapter to a continuous power supply.
  - Place the main base unit and charging cradle close to the AC outlets so that you can unplug the AC adapters easily.

- **Charge your handsets at least 15-20 hours before plugging into the phone line.**

4) Once the handset battery pack is fully charged, connect the telephone line cord to the **TEL LINE** jack and to a telephone outlet.

- **Tip**
  - If your telephone outlet isn’t modular, contact your telephone company for assistance.
  - **Modular**

---

**Use only the supplied AD-314 AC adapter for the main base and AD-310 for the charging cradle. Do not use any other AC adapter.**

---

**Place the power cord where it does not create a trip hazard or where it could become chafed and create a fire or electrical hazard.**
Mounting the Main Base Unit on a Wall

Standard wall plate mounting
This phone can be mounted on any standard wall plate.

1) Plug the AC adapter into the DC IN 9V jack.

2) Wrap the AC adapter cord inside the molded wiring channel as shown.

3) Plug the AC adapter into a standard 120V AC wall outlet.

4) Plug the telephone line cord into the TEL LINE jack. Wrap the cord inside the molded wiring channel as shown.

5) Plug the telephone line cord into the telephone outlet.

6) Align the mounting slots on the base with the mounting posts on the wall. Then push in and down until the phone is firmly seated.
Direct wall mounting

If you don’t have a standard wall plate, you can mount your phone directly to the wall. Before doing this, consider the following:

• Avoid electrical cables, pipes, or other items behind the mounting location that could cause a hazard when inserting screws into the wall.
• Try to mount your phone within 5 feet of a working phone jack to avoid excessive lengths.
• Make sure the wall material is capable of supporting the weight of the base and handset.
• Use #10 screws (minimum length of 1-3/8 inches) with anchoring devices suitable for the wall material where the main base unit will be placed.

1) Insert two mounting screws into the wall (with their appropriate anchoring device), 3-15/16 inches apart. Allow about 1/8 of an inch between the wall and screw heads for mounting the phone.

2) Refer to steps 1 through 6 on page 12 to mount the telephone.
Register Handsets to the Main Base Before Using!

Whichever handset you choose to charge in the main base will automatically register to the base.

The second handset (charging in the extra charging cradle) MUST also be registered to the main base before use. Follow the steps below to register the second handset.

1) Be sure both handsets are fully charged.

2) Remove the handset from the charging cradle, and place it in the main base. The **charge/in use** LED light on the main base will begin to flash, indicating that the registration is taking place.

3) Wait for at least 5 seconds before removing the handset from the main base.

4) Once both handsets are registered, it doesn’t matter which handset is placed in the main base or the charger.
When to Re-register Handsets

1) You’ll need to re-register the second handset (follow steps on page 14) each time the digital security code is changed. Refer to page 40 for details regarding the Digital Security Code.

2) When there is a power failure for more than one hour:
   If power failure occurs (e.g. due to electrical storm or if the unit is unplugged during a move), both handsets will need to be re-registered. To re-register, follow the same registration process on page 14.

3) If the second handset’s battery becomes very low, the handset must be recharged for 15-20 hours and re-registered to the main base unit.

Call Transfer Feature

Your cordless phone allows you to transfer outside calls from handset to handset, only one handset at a time can talk with an outside caller. The second handset cannot go off hook to listen to conversations or make an outgoing call while the other handset is in use.

To transfer a call

1) During a call, press delete/transfer. The call will automatically be placed on hold and the transfer tone sounds.

2) When the other handset receives the call, the transfer tone stops. To cancel the transfer and return to the caller, press delete/transfer or talk/flash on the handset.

To receive a transfer call (from the second handset)
Pick up the handset from the base (when AutoTalk is set to on), or pick up the handset and press talk/flash to answer the transferred call. Additionally, you can answer the transferred call by pressing any number key, */tone/< or */> (when AutoTalk is set to on).

Note

- Make sure to return the handsets to the charging cradles after each phone call.
- If you transfer the call and it is not picked up after 5 minutes, the call will be disconnected.
Setting Menu Display Options

There are five setup options, AutoTalk, CIDCW (Caller ID on Call Waiting), Area Code, Dial Mode and Language.

CIDCW and Dial Mode options can only be set by using Handset 1. If you try to set by using Handset 2, you will not see these options listed on the LCD screen. To confirm which handset is HS1, refer to the display indicating HS1 or HS2.

AutoTalk, Area Code and Language options can be set by using either Handset 1 or Handset 2.

Setting AutoTalk and CIDCW
1) Press and hold call id/menu. The following screen appears.
2) Use vol/△/▽ or vol/△/▽ to move the pointer to the selection that you would like to change.
   Press select/channel to toggle between On and Off.
3) Press end and return the handset to the main base unit to complete the setting.
   The handset returns to standby mode.

AutoTalk allows you to answer the phone without pressing the talk/flash key. If the phone rings when AutoTalk is on, simply remove the handset from either charging cradle and the phone automatically answers the call. If the phone rings when AutoTalk is off, you must press talk/flash to answer the call.

Entering your Area Code
If you enter a 3-digit area code number in the Area Code option, your local area code does not appear in Caller ID messages. Do not program this option if your calling area requires 10-digit dialing. When reviewing Caller ID messages, you will see only the local seven digit number. For calls received from outside your local area code, you will see a full 10-digit number.
1) When the phone is in standby mode, press and hold call id/menu. The following screen appears.

2) Press vol/△/✓ to move the pointer to Area Code.

3) Press select/channel. If an area code has been already stored, the phone displays it.

4) Use the number keys (0 - 9) to enter a 3-digit area code. To change a previously-entered area code, use the delete/transfer to backspace.

5) Press select/channel. A confirmation tone sounds and the displayed area code is entered.

6) Press end to complete the setting. The handset returns to standby mode.

**Choosing the dialing mode**

Most phone systems use tone dialing. However, some phone systems (such as those in rural areas) still use pulse dialing. Your Uniden phone supports both tone and pulse dialing. The default setting is tone dialing. If your dialing system uses pulse dialing, follow the steps below to change the dialing mode:
1) Be sure you are using handset 1. Handset 1 shows HS1 in its display.

2) When the phone is in standby mode, press and hold \textit{call id/menu}. The following screen appears.

3) Press \textit{vol/ \( \Delta \/ \nu \)} three times to select \textit{Dial}.

4) Press \textit{select/channel} to set the phone to \textit{Pulse} dialing.

5) Press \textit{end} and return the handset to the main base unit to complete the setting. The handset returns to standby mode.

\textbf{Setting the language}

There are three languages to choose from; English, French and Spanish.

1) When the phone is in standby mode, press and hold \textit{call id/menu}. The following screen appears.

2) Use \textit{vol/ \( \Delta \/ \nu \)} to move the pointer to \textit{Language}.

3) Press \textit{select/channel} to select \textit{Eng}, \textit{Fr}., or \textit{Esp}.

4) Press \textit{end} to complete the setting. The handset returns to standby mode.
## Making and Receiving Calls

| 1) Remove the handset. 2) Press *redial/pause*, then press *talk/flash*. | 

Refer to page 16 "Setting Menu Display Options" to turn On the AutoTalk feature if desired.
Adjusting the Handset Ringer and Earpiece Volume

**Handset ringer tone and volume**
Press the volume up key or volume down key (labeled as \(\text{vol/ } \Delta / \wedge\) or \(\text{vol/ } \Delta / \vee\)) in standby mode to select one of five ringer tones and volume combinations.

**Earpiece volume**
To change the earpiece volume, press \(\text{vol/ } \Delta / \wedge\) or \(\text{vol/ } \Delta / \vee\) keys during a call. This setting will remain in effect after the telephone call has ended.

**Temporarily Mute Ringer**
If the handset is off the base, simply press \(\text{end}\) to temporarily mute the incoming ring. The ringer will sound with the next incoming call.
Tone Dialing Switch Over

If your telephone company requires pulse dialing, you can switch-over to tone dialing after the call connects. This feature is useful when you need tone dialing to use automated systems, such as telephone bank tellers, telephone prescription refills, customer support menus, etc.

If your phone is set to pulse dialing mode, make your call normally. Once your call connects, press the */tone/*. Enter the desired number. These digits will be sent as tone dialing. Once the call ends, the tone mode is canceled and pulse dialing mode resumes.

Traveling Out-of-Range

During a call, as you begin to move your handset too far from your main base unit, noise increases. If you pass the range limits of the main base unit, your call will terminate within 1 minute.
Selecting a Different Channel

If you encounter interference while using your phone, you can manually change the phone’s channel for clear operation. This function works only when the phone is in use. Press **select/channel**. **Scanning** appears on the display, indicating the phone is changing to another channel. For more information on interference, refer to page 48 under "Precautions".

Find Handsets

To locate the handsets, press **find handset** on the main base. The handset beeps for 60 seconds.

The paging tone stops when you press any key on either handset, when you press **find handset** on the base, or when you receive an incoming call.

Using Call Waiting

If you have Call Waiting service, you can receive calls while on the line.

1) If a call comes in while you are on the phone, you will hear a call waiting tone. If you have CIDCW activated, you will see the name and number of the incoming caller.

2) Press **talk/flash** to accept the waiting call. After a short pause, you will hear the new caller.

3) To return to the original caller, press **talk/flash** again.
Voice Mail Waiting Indicator

If you subscribe to voice mail service, you can use your cordless telephone to access your voice mailbox. The **charge/in use** LED on the main base of your phone flashes whenever you have messages waiting in your voice mailbox. Just dial the access number supplied by your voice mail provider to enter your mailbox. You can program your voice mail access number to a speed dial number or to the Rocketdial number.

If the voice mail waiting indicator remains on after you have retrieved your messages, press and hold **find handset** for 5 seconds. This will reset the indicator.

**note**

You must subscribe to voice mail service from your telephone company in order to use this feature. The voice mail company will provide you with the access number.
Storing Phone Numbers and Names in Speed Dial Memory

Memory Dialing allows you to dial a number using just a few key presses. Your cordless telephone stores up to 10 names/numbers in each handset.

1) With the phone in standby mode, press memory. Select Memory is displayed.

2) Enter (0 - 9) to select the speed dial number where you would like to store this entry. You can also scroll through the list with vol/△/▽ and vol/△/▽.

3) Press memory or select/channel.

4) Press memory or select/channel. The Store Name screen appears and a cursor flashes indicating that the display is ready for the name to be entered.

   If the selected speed dial number is already assigned, the Edit screen appears. You can select Edit to edit this entry, select Delete to delete this this entry, or select Go Back to choose another speed dial number.

5) Enter a name according to the instructions below. If no name is required, go to step 6.
   - The name can be up to 13 characters.
   - See the "Steps for Entering Names and Special Characters" (see page 26).
   - Use #/> and */tone/< to move the cursor to the desired location.
   - Use delete/transfer to delete characters as needed.
   - Press and hold delete/transfer to delete all the characters.
6) Press **memory** or **select/channel**. Store Number is displayed.
The cursor flashes indicating that the display is ready for the number to be entered.

7) Use the keypad to enter the phone number; each number can be up to 20 digits.
If you need the phone to pause during the dialing sequence, press **redial/pause** to insert a two-second delay between the numbers. You can enter multiple pauses to increase the delay. Each pause counts as a digit. The display shows a P for every pause.

8) Press **memory** or **select/channel**. You will hear a confirmation tone, and the following screen appears.
Memory storage is complete.
After about 2 seconds, the screen displays the list of the entries in Speed Dial Memory.

9) Press **end** to exit memory setup mode. The phone returns to standby.
Steps for Entering Names and Special Characters

Refer to the letters on the number keys to select the desired characters. With each press of a numeric key, the displayed character appears in the following order: Upper case letters first, lower case letters next and finally the number corresponding to the key.

If you make a mistake while entering a name

Use * (tone) or # to move the cursor to the incorrect character. Press delete/transfer to erase the wrong character, then enter the correct character. To delete all characters, press and hold delete/transfer.

For example, to enter Movies.
1) Press 6 then press # to move the cursor to the right.
2) Press 6 six times.
3) Press 8 six times.
4) Press 4 six times.
5) Press 3 five times.
6) Press 7 eight times.

Making Calls from Speed Dial Memory

**Memory dialing from Standby Mode**

1) Press *memory*. The handset displays your programmed speed dial memory.

2) Enter the number (0 - 9), or press *vol/ Δ/ ∨* or *vol/ Δ/ ∧* to select the speed dial number you would like to dial.

3) Press *talk/flash*. Connecting changes to Talk, and the volume setting appears on the display. Then the displayed number is dialed.

To cancel speed dialing, press *end*. The handset returns to standby mode.
Speed dialing from Talk Mode
1) Press \textit{talk/flash}. Connecting appears.

2) After the display changes from Connecting to Talk, press \textit{memory}.

3) Enter a number (0 - 9), or press \textit{vol/\(\Delta\)/\(\wedge\)} or \textit{vol/\(\Delta\)/\(\vee\)} to select the memory location of the desired phone number. If you press \textit{select/channel}, the number is dialed.

4) To hang up, press \textit{end}.

Chain Dialing

The memory locations on the handset are not limited to phone numbers. You can also store a group of numbers (up to 20 digits) that you need to enter once your call connects. This is referred to as Chain Dialing.

An example of this is a bank account number. Once you have called your bank and are prompted to enter the account number, press \textit{memory} and select the location number where the special number has been stored. Then press \textit{select/channel}.

Store your special number with an identifying name. (Refer to "Storing Phone Numbers and Names in Speed Dial Memory" on page 24.)
Editing a Stored Name and/or Phone Number

1) With the phone in standby mode, press **memory**. Select Memory is displayed.

2) Enter (0 - 9) to select the speed dial number where you would like to edit this entry. You can also scroll through the list with the **vol/△/▲** and **vol/△/▼**. Press **memory** or **select/channel**.

3) Press **memory** or **select/channel** again. The following screen appears with the memory location number that you have selected.

4) Press **vol/△/▲** or **vol/△/▼** to select **Edit MemoryXX**, then press **memory** or **select/channel**. The following screen appears. The cursor flashes indicating that the display is ready for the name to be edited. When a name has not been stored, the cursor appears at the beginning of the second line.

5) Use the number keys, */tone/ <, #/ >, or delete/transfer* to edit the name. (See page 26.) To edit only the phone number, skip this step.

6) Press **memory** or **select/channel**. The following screen appears. The cursor flashes indicating that the display is ready for the number to be edited.
7) Use the number key, * /tone/ <, #/> , redial/pause or delete/transfer to edit the phone number. The phone number cannot exceed 20 digits (see page 24). If you don´t want to change the phone number, skip this step.

8) Press memory or select/channel. If you changed either name or phone number, a confirmation display shows up. If it is correct, press vol/Δ/∧ and press select/channel. You hear a confirmation tone, and the following screen appears. The memory storage is complete.
   For example, if you edit a name and number into memory location number 01, the display shows Memory01 Stored. After about 2 seconds, the screen displays the list of the entries in Speed Dial Memory.

9) Press end to return to standby mode.
Erasing a Stored Name and Phone Number

1) With the phone in standby mode, press memory in standby mode. Select Memory is displayed.

2) Enter a number (0 - 9), or press vol/△/▿ or vol/△/∨ to select the memory location you would like to erase.

3) Press memory or select/channel.

4) Press memory or select/channel again. The Edit screen appears with the memory location number that you have selected in the display.

5) Press vol/△/∨ to move the pointer down to Delete MemoryXX.

6) Press memory or select/channel. The Delete MemoryXX? screen appears.

7) Press vol/△/∧ to move the pointer to Yes.

8) Press select/channel or delete/transfer. You hear a confirmation tone, and the MemoryXX Deleted screen appears.

9) After about 2 seconds, the display returns to the Select Memory screen. You may delete the information in another memory location (return to step 2) or press end to return to standby mode.
You can store your most frequently dialed number in the RocketDial location. The RocketDial allows you to dial a number with one key press. (There is no need to press talk/flash. The phone will automatically dial the number stored.) If you subscribe to voice mail service, you can store your access number in this location.

**Storing and Editing the RocketDial**

1) When the phone is in standby mode, press and hold RocketDial. The following display appears.

If the Edit screen appears, there is a number already stored. Press vol/Δ/ scrambler or vol/ Δ/ scrambler to select Edit Number, then press select/channel.

2) Store the number by following step 7 under "Storing Phone Numbers and Names in Speed Dial Memory" on page 24.

3) Press select/channel.

You hear a confirmation tone, and the Number Stored screen appears. Memory storage is complete.

**Making Calls with the RocketDial**

When the phone is in standby mode, simply press RocketDial. The number stored in the RocketDial memory location is instantly dialed.
Deleting the RocketDial

1) When the phone is in standby mode, press and hold **RocketDial**. The following display appears.

2) Press *vol/ △/▼* or *vol/ △/▼* to select *Delete Number*.

3) Press **select/channel**. The following display appears.

4) Press *vol/ △/▼* to move the pointer to *Yes*.

5) Press **select/channel** or **delete/transfer**. You hear a confirmation tone, and the following display appears. After about 2 seconds, the handset returns to standby mode.
Caller ID and CIDCW (Caller ID on Call Waiting)

You must subscribe to Caller ID services through your local telephone provider to use these features.

When the telephone rings, the Caller ID feature allows you to view the caller’s name, phone number, date and time of call. With CIDCW (Caller ID on Call Waiting), you will hear a Call Waiting tone while you are on a call, and the Caller ID data is displayed. To accept the waiting call, press talk/flash (see page 22). Additionally, you can dial a number stored in the Caller ID list or save data to your Memory dial list.

When the Telephone Rings

1) When the Caller ID message is received, the display shows the caller’s phone number along with the date and time. The incoming call information is stored in the Caller ID record. If the Caller ID service includes the caller’s name, the caller’s name appears on the display (up to 15 letters).

| The date and time received | 5/11 12:30PM |
| Caller's name | Jane Smith |
| Caller's phone number | 214-555-1234 |

You may receive any one of the following messages:

- When invalid data is received: Incomplete Data
- When a private name is received: Private Name
- When a private number is received: Private Number
- When a unknown name is received: Unknown Name
- When a unknown number is received: Unknown Number

• If you answer a call before the Caller ID message is received (for example, before the second ring), the Caller ID message will not appear.

• When the call is received via a telephone company that does not offer Caller ID service, the caller’s phone number and name do not appear. (This includes international calls.)

• When the call is via a private branch exchange (PBX), the caller’s phone number and name may not appear.
2) When you pick up the phone, the display changes to Talk. (AutoTalk feature is set to on.)

note Data errors appear as .

Viewing the Caller ID Message List

The Caller ID list stores information for up to 30 messages (Caller ID names/numbers) - even unanswered calls.

1) Press call id/menu. The summary screen appears. The screen shows the number of new messages and total messages.

2) Press vol/△/▽ to display the latest Caller ID message.

3) Press vol/△/▽ to see the next message. Or press vol/△/▽ key to see the previous message.

4) Press end to return to standby mode.

When you pick up the phone, the display changes to Talk. (AutoTalk feature is set to on.)

note Data errors appear as .

Viewing the Caller ID Message List

The Caller ID list stores information for up to 30 messages (Caller ID names/numbers) - even unanswered calls.

1) Press call id/menu. The summary screen appears. The screen shows the number of new messages and total messages.

2) Press vol/△/▽ to display the latest Caller ID message.

3) Press vol/△/▽ to see the next message. Or press vol/△/▽ key to see the previous message.

4) Press end to return to standby mode.

www.uniden.com
Deleting Information from the Caller ID List

The cordless phone stores up to 30 messages (Caller ID names/numbers) in each handset. If the phone receives the 31st message, the oldest one in the list is automatically deleted. Caller ID data can also be deleted manually.

Deleting a Caller ID message

1) Press *CALL ID/Menu*. Display the message to be deleted from the Caller ID list by pressing *Vol/△/▲* or *Vol/△/▼*.

2) Press *Delete/Transfer*.

3) Press *Vol/△/▲* or *Vol/△/▼* to select *Yes* or *No*.

4) Press *Select/Channel* or *Delete/Transfer*.

   When the pointer is at *Yes*:
   You hear a confirmation tone and the Caller ID message is deleted. The next Caller ID message is then displayed.

   When the pointer is at *No*:
   The display returns to the Caller ID message.

Deleting all Caller ID names/numbers

1) With the phone in standby mode, press *CALL ID/Menu*.

2) Press *Delete/Transfer*.

• While using the *Delete All? or Delete Message?* screen, if no key is pressed for more than 30 seconds, an error tone sounds, and the telephone returns to standby mode.

• If you get an incoming call or page, the deleting operation is canceled, and you can answer the call or page.
3) Press \textit{vol/} $\uparrow$ $\downarrow$ or \textit{vol/} $\Delta$ $\triangledown$ to select \textit{Yes} or \textit{No}.

4) Press \textit{select/channel} or \textit{delete/transfer}.

\textbf{When the pointer is at Yes:}
You hear a confirmation tone and all stored Caller ID messages are deleted.

\textbf{When the pointer is at No:}
The display returns to the summary screen.
Making a Call from the Caller ID List

You can place a call from the Caller ID list.

1) Press call id/menu. Select the phone number that you want to dial by pressing vol/Δ/∧ or vol/Δ/∨.

2) To add a "1" to the front of the displayed Caller ID number, press 1. To delete a "1" from the front of the displayed caller ID number, press 1 again.

3) Press talk/flash. The displayed phone number dials automatically.

You can place a call from Talk Mode. Press talk/flash, then press call id/menu. Select the phone number that you want to dial by pressing vol/Δ/∧ or vol/Δ/∨, then press select/channel. The displayed phone number will be dialed.

note

• You cannot make a call from the Caller ID list if your cordless telephone is connected to a private branch exchange (PBX).

• When a long distance call has been set, 1 appears in the display.
Storing Caller ID messages in Memory dialing

Messages (Caller ID names/numbers) shown in the Caller ID list can be stored in memory dialing.

1) Press **call id/menu**. Select the phone number to be stored from the Caller ID list by pressing **vol/ ▲/▼** or **vol/ ▲/▼**.

2) Press **memory**.

3) Enter a number (0-9), or press **vol/ ▲/▼** or **vol/ ▲/▼** to select the memory location to be stored.

4) Press **select/channel**. You hear a confirmation tone, and the number is stored in memory. The display returns to the Caller ID list.

If a message has already been stored in the selected memory number location, a confirmation screen is displayed. Press **vol/ ▲/▼** to select **Yes**. Press **select/channel** to overwrite. The display returns to the Caller ID list.
Changing the Digital Security Code

To protect you against misbilled calls which might result from your phone being activated by other equipment, the cordless phone provides AutoSecure™ (which electronically locks your phone when each handset is in the main base or charging cradle) and Random Code™ digital security (which automatically selects one of over 262,000 digital security codes for each handset and main base).

If the handset battery pack is completely discharged or the battery pack is removed, the digital security code will be lost. If this happens, a new security code is set automatically the next time the battery pack is charged.

In the rare situation that you suspect another cordless telephone is using the same security code, you can change the code.

1) Remove the handset from the main base unit or charging cradle. Press and hold find handset on the main base.
2) While holding find handset, place the handset in the main base unit, and leave the handset in the main base for more than 3 seconds.
3) Remove the handset from the main base. Then place the second handset in the main base unit and wait for more than 3 seconds. No need to holding find handset this time.
4) Press talk/flash on one handset. Once you make sure talk appears on the display, press end. Then, try with the second handset. If each handset displays talk, a new security code is set. Otherwise, return to step 1 and try again.

Installing the Beltclip

To attach the beltclip
Insert the beltclip into the holes on each side of the handset. Press down until it clicks.

To remove the beltclip
Pull both sides of the beltclip to release the tabs from the holes.
Headset Installation
Your phone may be used with an optional headset, the Uniden HS910. To use this feature, insert the headset plug into the headset jack. Your phone is ready for hands-free conversations. (Headset may be purchased by calling the Uniden Parts Department or visiting the web site, see QUICK REFERENCE GUIDE included in your package.)

Note on Power Sources
Battery replacement and handling
When the operating time becomes short, even after a battery is recharged, please replace the battery. With normal usage, your battery should last about one year. Please contact your place of purchase or the Uniden Parts Department for a replacement battery.

Warning: To avoid the risk of personal injury or property damage from fire or electrical shock, only use the Uniden battery model and Uniden adapter model specifically designated for this product.

Caution
- Use only the specified Uniden battery packs.
- Do not remove the battery from the handset to charge it.
- Never throw the battery into a fire, disassemble it, or heat it.
- Do not remove or damage the battery casing.

Power Failure
During the period that the power is off, you will not be able to make or receive calls with the telephone.

Caution
- Do not use paint thinner, benzene, alcohol, or other chemical products. Doing so may discolor the surface of the telephone and damage the finish.

Maintenance
To maintain a good charge, it is important to clean the charging contacts on the handsets, main base unit and charging cradle once a month. Using water only, dampen a cloth to clean the charging contacts. Then, make sure to go back over the charging contacts with a dry cloth.

www.uniden.com
## Troubleshooting
If your phone is not performing to your expectations, please try these simple steps first.

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Suggestion</th>
</tr>
</thead>
</table>
| The charge/in use or charge LED won't illuminate when the handset is placed in the main base or charging cradle. | • Make sure the AC adapters are plugged into each charging cradle and wall outlet.  
• Make sure both handsets are properly seated in each charging cradle.  
• Make sure the charging contacts on the handsets, main base and charging cradle are clean. |
| The audio sounds weak and/or scratchy.                                   | • Move the handset and/or main base to a different location away from metal objects or appliances and try again.  
• Press *select/channel* to help eliminate background noise.  
• Make sure that the handset is not too far from the main base. |
| Can't make or receive calls.                                            | • Re-register both handsets (see page 14).  
• Check both ends of the base telephone line cord.  
• Make sure the AC adapter is plugged into the main base and wall outlet.  
• Disconnect the AC adapter for a few minutes, then reconnect it.  
• Make sure that you are not too far from the main base.  
• Check the dialing mode. |

Frequency

- 925.181-927.451 MHz
- 5739.320-5746.130 MHz

note• To avoid damage to the phone use only Uniden AD-314, AD-310 and BT-800 (or BT-905 having less usage time) with your phone.
• If the handset is left off of the base, the actual Talk mode duration will be reduced respective to the amount of time the handset is off the base.

Recharge your phone on a regular basis by returning the handset to the base after each phone call.
When the operating time becomes short, even after the battery is recharged, please replace the battery.
With normal usage, the battery should last about one year.

A replacement Uniden adapter and battery may be purchased at your local Uniden dealer or by contacting the Uniden Parts Department (800) 554-3988. Hours are from 8:00 a.m. to 5:00 p.m. Central Time, Monday through Friday. We can also be reached on the web at www.uniden.com.

Specifications, features, and availability of optional accessories are all subject to change without prior notice.
Precautions!

Before you read anything else, please observe the following:

Warning!

Uniden America Corporation DOES NOT represent this unit to be waterproof. To reduce the risk of fire, electrical shock, or damage to the unit, DO NOT expose this unit to rain or moisture.

Rechargeable Nickel-Cadmium Battery Warning

- This equipment contains a rechargeable nickel-cadmium battery.
- Cadmium is a chemical known to the State of California to cause cancer.
- The rechargeable nickel-cadmium battery contained in this equipment may explode if disposed of in a fire.
- Do not short-circuit the battery.
- Do not charge the rechargeable nickel-cadmium battery used in this equipment in any charger other than the one designed to charge this battery as specified in the owner’s manual. Using another charger may damage the battery or cause the battery to explode.

Rechargeable Nickel-Cadmium Batteries Must Be Recycled or Disposed of Properly

- Uniden voluntarily participates in an RBRC® industry program to collect and recycle nickel-cadmium batteries at the end of their useful life, when taken out of service within the United States. The RBRC® program provides a convenient alternative to placing used nickel-cadmium batteries into the trash or municipal waste stream, which is illegal in some areas.
- Through the RBRC® program, Uniden makes it easy for you to drop off the used battery at local retailers of replacement nickel-cadmium batteries. You may also contact your local recycling center for information on where to return the used battery. Please call 1-800-8-BATTERY for information on Ni-Cd battery recycling in your area.
- Uniden’s involvement in this program is part of its commitment to protecting our environment and conserving natural resources.
- RBRC® is a registered trademark of the Rechargeable Battery Recycling Corporation.

Important Safety Instructions

When using your telephone equipment, these basic safety precautions should always be followed to reduce the risk of fire, electrical shock, and injury to persons:

1. Read and understand all instructions.
2. Follow all warnings and instructions marked on the product.
3. Unplug this product from the wall outlet before cleaning. Use a dry cloth for cleaning without liquid or aerosol cleaners.
4. Do not use this product near water; for example, near a bathtub, wash bowl, kitchen sink or laundry tub, in a wet basement, or near a swimming pool.
5. Do not place this product on an unstable cart, stand, or table.
6. Slots and openings in the cabinet and the back or bottom are provided for ventilation. To protect the product from overheating, these openings must not be blocked or covered. This product should never be placed near or over a radiator or heat register. This product should not be placed in a built-in installation unless proper ventilation is provided.
7. This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply to your home, consult your dealer or local power company.
8. Do not allow anything to rest on the power cord. Do not locate this product where the cord will be damaged by persons walking on it.
9. Do not overload wall outlets and extension cords, as this can result in the risk of fire or electrical shock.
10. Never push objects of any kind into this product through cabinet slots, as they may touch dangerous voltage points or short out parts that could result in a risk of fire or electric shock. Never spill liquid of any kind on the product.
11. To reduce the risk of electric shock, do not disassemble this product. Take it to qualified service personnel when service or repair work is required. Opening or removing covers may expose you to dangerous voltages or other risks. Incorrect reassembly can cause electric shock when the appliance is subsequently used.
12. Unplug this product from the wall outlet and refer servicing to qualified service personnel under the following conditions:
   A. When the power supply cord is damaged or frayed.
   B. If liquid has been spilled into the product.
   C. If the product has been exposed to rain or water.
   D. If the product does not operate normally when following the operating instructions. (Adjust only those controls that are covered by the operating instructions. Improper adjustment of other controls may result in damage and will often require extensive repair work by a qualified technician.)

Warning!

The cords on this products and/or accessories contain lead, a chemical known to the State of California to cause birth defects or other reproductive harm. Wash hands after handling.

Additional Battery Safety Precautions

Caution! To reduce the risk of fire or injury to persons by the battery, read and follow these instructions:

1. Use only the Uniden battery pack specified in the owner’s manual.
2. Do not dispose of the battery pack in a fire. The cell may explode.
3. Check the nickel-cadmium battery disposal package insert for disposal instructions.
4. Do not open or mutilate the battery pack. Released electrolyte is corrosive and may cause damage to the eyes or skin. It may be toxic if swallowed.
5. Exercise care in handling the battery in order not to short the battery with conducting materials such as rings, bracelets, and keys.
6. The battery or conductor may overheat and cause burns.
7. Charge the battery pack provided with or identified for use with this product only in accordance with the instructions and limitations specified in the owner’s manual provided for this product.
8. Observe proper polarity orientation between the battery pack and battery charger.

SAVE THESE INSTRUCTIONS!

Important Electrical Considerations

Unplug all electrical appliances when you know an electrical storm is approaching. Lightning can pass through your household wiring and damage any device connected to it. This phone is no exception.

The FCC Wants You To Know

Changes or modifications to this product not expressly approved by
Uniden, or operation of this product in any way other than as detailed by the owner’s manual, could void your authority to operate this product. Your telephone complies with Part 68 of FCC Rules. You must, upon request, provide the FCC registration number and the REN to your telephone company. Both numbers are on the main base unit.

NOTE: You must not connect your phone to:
- coin-operated systems
- most electronic key telephone systems

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired Operation. Privacy Of Communications May Not Be Ensured When Using This Phone.

www.uniden.com
Range
Your new phone is designed to achieve the maximum possible range by transmitting and receiving according to the highest specifications set forth by the FCC. We have rated this phone to operate at a maximum distance with the qualification that the range depends upon the environment in which the telephone is used. Many factors limit range, and it would be impossible to include all the variables in our rating. The Maximum Range rating of this phone is meant to be used as a means of comparison against other range claims.

Cordless Telephone Privacy
Your cordless telephone is designed to provide private communications in your home. It is recommended that you observe the following to maintain the privacy of your telephone conversations:

**Warning:** This telephone has been designed to minimize the chance of unauthorized access to your telephone conversations. The inherent physical properties of radio waves, your communications can be received by radio receiving devices other than your cordless telephone unit. Consequently, any communications using your cordless telephone may not be private.

Installation Considerations
**Selecting a Location**
Before choosing a location for your new phone, there are some important guidelines you should consider:
- The location should be close to both a phone jack and continuous power outlet. (A continuous power outlet is an AC outlet which does not have a switch to interrupt its power.)
- Keep the base and handset away from sources of electrical noise such as motors or fluorescent lighting.
- Be sure there is sufficient space to fully extend the base antenna.
- The base can be placed on a desk or tabletop or mounted on a standard telephone wall plate.
- You should charge your new phone for 15-20 hours before completing the installation or using the handset.

**Telephone Line Outlets**
There are two types of phone outlets:

- **Modular Jack**
  - Most phone equipment available now uses modular jacks. Phone cords are fitted with a molded plastic connector which plugs into this type of jack. If you do not have modular phone jacks, contact your local telephone company for information about their installation.

- **Hardwired Jack**
  - Some equipment is wired directly to a phone jack, and these types of connections require a modular jack converter. This type of installation is not difficult; however, you should contact your Uniden telephone dealer or a telephone supply store for advice about the proper adapter or converter for your particular situation.

Connecting the Telephone Cords
Consider these safety guidelines before connecting the telephone cords:

**Caution:**
- Never install telephone wiring during a lightning storm.
- Never touch uninsulated telephone wires or terminals unless the telephone line has been disconnected at the network interface.
- Use caution when installing or modifying telephone lines.

Applying Power to the Base
This phone requires an AC outlet, without a switch to interrupt power, and the included AC adapter. To relieve strain on the DC plug when the phone is placed on a desk or table, wrap the power cord around the strain relief notch on the back of the base.

**NOTE:** Place the power cord so that it does not create a trip hazard, or where it could become chafed and create a fire or other electrical hazards.

One Year Limited Warranty
**Important:** Evidence of original purchase is required for warranty service. WARRANTOR: UNIDEN AMERICA CORPORATION (“Uniden”)

**ELEMENTS OF WARRANTY:** Uniden warrants, for one year, to the original retail owner, this Uniden Product to be free from defects in materials and craftsmanship with only the limitations or exclusions set out below.

**WARRANTY DURATION:** This warranty to the original user shall terminate and be of no further effect 12 months after the date of original retail sale. The warranty is invalid if the Product is (A) damaged or not maintained as reasonable or necessary, (B) modified, altered, or used as part of any conversion kits, subassemblies, or any configurations not sold by Uniden, (C) improperly installed, (D) serviced or repaired by someone other than an authorized Uniden service center for a defect or malfunction covered by this warranty, (E) used in any conjunction with equipment or parts or as part of any system not manufactured by Uniden, or (F) installed or programmed by anyone other than as detailed by the owner’s manual provided with the Product.

**STATEMENT OF REMEDY:** In the event that the product does not conform to this warranty at any time while this warranty is in effect, warrantor will either, at its option, repair or replace the defective unit and return it to you without charge for parts, service, or any other cost (except shipping and handling) incurred by warrantor or its representatives in connection with the performance of this warranty. Warrantor, at its option, may replace the unit with a new or refurbished unit. THE LIMITED WARRANTY SET FORTH ABOVE IS THE SOLE AND ENTIRE WARRANTY PERTAINING TO THE PRODUCT AND IS IN LIEU OF AND EXCLUDES ALL OTHER WARRANTIES OF ANY NATURE WHATSOEVER, WHETHER EXPRESS, IMPLIED OR ARISING BY OPERATION OF LAW, INCLUDING, BUT NOT LIMITED TO ANY IMPLIED WARRANTIES OF MERCHANTABILITY FOR A PARTICULAR PURPOSE. THIS WARRANTY DOES NOT COVER OR PROVIDE FOR THE REIMBURSEMENT OR PAYMENT OF INCIDENTAL OR CONSEQUENTIAL DAMAGES. Some states do not allow this exclusion or limitation of incidental or consequential damages so the above limitation or exclusion may not apply to you.

**LEGAL REMEDIES:** This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. This warranty is void outside the United States of America and Canada.

**PROCEDURE FOR OBTAINING PERFORMANCE OF WARRANTY:** If, after following the instructions in the owner’s manual you are certain that the Product is defective, pack the Product carefully (preferably in its original packaging). The Product should include all parts and accessories originally packaged with the Product. Include evidence of original purchase and a note describing the defect that has caused you to return it. The Product should be shipped freight prepaid, by traceable means, to warrantor at:

I.C. Notice

**TERMINAL EQUIPMENT**

**NOTICE:** This equipment meets the applicable Industry Canada Terminal Equipment Technical Specifications. This is confirmed by the registration number. The abbreviation, IC, before the registration number signifies that registration was performed based on a Declaration of Conformity indicating that Industry Canada technical specifications were met. It does not imply that Industry Canada approved the equipment.

**NOTICE:** The Ringer Equivalence Number (REN) for this terminal equipment is marked on the equipment itself. The REN assigned to each terminal equipment provides an indication of the maximum number of terminals allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the Ringer Equivalence Numbers of all the devices does not exceed five.

**RADIO EQUIPMENT**

The term “IC:” before the radio certification number only signifies that Industry Canada technical specifications were met.

Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device. “Privacy of communications may not be ensured when using this telephone”.
