Congratulations on your purchase of the Uniden dual handset cordless telephone. This phone is designed and engineered to exacting standards for reliability, long life, and outstanding performance.

**Features**

- 2.4GHz Extended Range Technology
- Dual Handset System
  (Extra Handset & Charger Included)
- Call Transfer from Handset to Handset
- 3 Line Backlit Displays
- Caller ID and Caller ID on Call Waiting
- 10 Speed Dial Memory
- One touch RocketDial®
- Last Number Redial
- Voice Mail Waiting Indicator
- English, French, or Spanish Support
- Pulse/Tone Dialing
- Find Handset
- Earpiece Volume Control
- Ringer Volume Control
- Hearing Aid Compatible
- 20 Channel Autoscan

Be sure to visit our web site: www.uniden.com

Terms Used in this Manual

- Standby Mode - The handset may be sitting in or off the cradle, but is NOT in use. The talk/flash key has not been pressed and there is no dial tone.
- Talk Mode - The handset is off the cradle and the talk/flash key has been pressed, enabling a dial tone.
- CID - Caller ID
- CIDCW - Caller ID on Call Waiting
- RocketDial - One touch speed dial

www.uniden.com
Installing the Phone

Do the following steps:
A. Choose the Best Location
B. Install the Rechargeable Battery Packs into the Handsets
C. Connect the Main Base and Charging Cradle, and Charge the Handsets
D. Mount the Main Base on a Wall

A. Choose the Best Location
When choosing a location for your new phone, here are some important guidelines you should consider:

- Avoid heat sources, such as radiators, air ducts, and sunlight.
- Avoid noise sources such as a window by a street with heavy traffic.
- Avoid microwave ovens.
- Avoid excessive moisture, extremely low temperatures, dust, mechanical vibration, or shock.
- Avoid television sets and other electronic equipment.
- Avoid personal computers.
- Avoid other cordless telephones.
- Choose a central location.
- The location should be close to both a phone jack and a continuous power outlet (one which is not connected to a switch).
- The main base and each handset should be kept away from sources of electrical noise such as motors, microwave ovens, and fluorescent lighting.
- The cradle can be placed on a desk, tabletop, or mounted on a standard wall plate.
- There should be enough space to fully extend the antenna.
B. Install the Rechargeable Battery Packs into the Handsets

Both handsets are powered by rechargeable battery packs. The battery recharges automatically when the handset is placed in the main base unit or charging cradle.

1) Press down on the handset battery case cover (use the finger indentation for a better grip) and slide the cover downward to remove.

2) Plug the battery pack connector (red & black wires) into the jack inside the battery compartment. (The connector notches fit into the grooves of the jack only one way.) Match the wire colors to the polarity label in the battery compartment, connect the battery and listen for a click to insure connection.

3) Make sure you have a good connection by slightly pulling on the battery wires. If the connection is secure, the battery jack will remain in place.

4) Place the battery case cover back in the handset by sliding it upwards until it clicks into place.

*Use only the Uniden (BT-905) rechargeable battery pack supplied with your cordless telephone.
*Replacement batteries are also available through the Uniden Parts Department at (800) 554-3988, Monday through Friday from 8:00 a.m. to 5:00 p.m. or online at www.uniden.com
C. Connect the Main Base and Charging Cradle, and Charge the Handsets

1) Connect each AC adapter to the DC IN 9V jack and to each standard 120V AC wall outlet.

2) Place one handset in the main base unit and the other in the charging cradle with the keypad facing forward.

3) Make sure the charge/in use LED and charge LED illuminate. If the LED does not illuminate, check to see that the AC adapter is plugged in and the handset makes good contact with the cradle's charging contacts.

   - Connect each AC adapter to a continuous power supply.
   - Place each cradle close to the AC outlet so that you can unplug the AC adapter easily.

4) Charge your handsets at least 15-20 hours before plugging into the phone line.

5) Once the handset battery packs are fully charged, connect the telephone line cord to the TEL LINE jack and a telephone outlet. If your telephone outlet isn't modular, contact your telephone company for assistance.
D. Mount the Main Base on a Wall

Standard wall plate mounting

This phone can be mounted on any standard wall plate.

1) Locate the main base unit on the wall mount adapter as shown and slide the wall mount adapter into the notches on the main base bottom with the tab pressed.

2) Plug the AC adapter to the **DC IN 9V** jack.

3) Route the AC adapter cord through the molded wiring channel as shown.

4) Plug the AC adapter into a standard 120V AC wall outlet.

5) Plug the telephone line cord into the **TEL LINE** jack. Route the cord through the molded wiring channel as shown.

6) Plug the telephone line cord into the telephone outlet.

7) Align the mounting slots on the main base with the mounting posts on the wall. Then push in and down until the phone is firmly seated.
Direct wall mounting
If you don't have a standard wall plate, you can mount your phone directly to the wall. Before doing this, consider the following:

- Avoid electrical cables, pipes, or other items behind the mounting location that could cause a hazard when inserting screws into the wall.
- Try to mount your phone within 5 feet of a working phone jack to avoid excessive cord lengths.
- Make sure the wall material is capable of supporting the weight of the main base and handset.
- Use #10 screws (minimum length of 1-3/8 inches) with anchoring devices suitable for the wall material where the main base will be placed.

1) Insert two mounting screws into the wall, (with their appropriate anchoring device), 3-15/16 inches apart. Allow about 1/8 of an inch between the wall and screw heads for mounting the phone.
2) Refer to steps 1 through 7 on page 8 to mount the telephone.

Installing the Beltclip
To attach the beltclip
Insert the beltclip into the holes on each side of the handset. Press down until it clicks.

To remove the beltclip
Pull both sides of the beltclip to release the tabs from the holes.
Headset Installation

Your phone may be used with an optional headset, the Uniden HS910. To use this feature, insert the headset plug into the headset jack. Your phone is ready for hands-free conversations.

(Headset may be purchased by calling the Uniden Parts Department or visiting the web site. See page 35.)
Register Handsets to the Main Base before Using!

Whichever handset you choose to charge in the main base will automatically register to the main base.

The second handset (charging in the extra charging cradle) MUST also be registered to the main base before use. Follow the steps below to register the second handset.

1) Be sure both handsets are fully charged.

2) Remove the handset from the charging cradle, and place it in the main base. The charge/in use LED light on the main base will begin to flash, indicating that the registration is taking place.

3) Wait for at least 5 seconds, then remove the handset from the main base.

4) Press the find handset key on the main base. If both handset beep, registration is complete. If one handset does not beep, re-register that handset.

5) Once both handsets are registered, it doesn't matter which handset is placed in the main base or the charger.
When to Re-register Handsets

1) You’ll need to re-register the second handset (follow steps on page 11) each time the digital security code is changed. Refer to page 32 for details regarding the Digital Security Code.
2) When there is a power failure for more than one hour:
   If power failure occurs (e.g. due to electrical storm or if the unit is unplugged during a move), both handsets will need to be re-registered. To re-register, follow the same registration process on page 11.
3) If the second handset’s battery becomes very low, the handset must be recharged for 15-20 hours and re-registered to the main base.

Call Transfer Feature

Your cordless phone allows you to transfer outside calls from handset to handset; only one handset at a time can talk with an outside caller. The second handset cannot go off hook to listen to conversations or make an outgoing call while the other handset is in use.

To transfer a call

1) During a call, press the delete/transfer key. The call will automatically be placed on hold and the transfer tone sounds.
2) When the other handset receives the call, the transfer tone stops. To cancel the transfer and return to the caller, press the delete/transfer or talk/flash key on the handset.

To receive a transfer call

Pick up the handset from the cradle (when AutoTalk is set to on), or pick up the handset and press the talk/flash key to answer the transferred call. Additionally, you can answer the transferred call by pressing any number key (when AutoTalk is set to on).
Basic Setup

There are five basic options that you will need to set up: AutoTalk, CIDCW (Caller ID on Call Waiting), Area Code, Dial Mode and Language.

CIDCW and Dial Mode options can only be set by using Handset 1. If you try to set by using Handset 2, you will not see these options listed on the LCD screen.

(Handset 1 shows HS1 in the display while the phone is charging.)

AutoTalk, Area Code and Language options can be set by using either Handset 1 or Handset 2.

Activating AutoTalk

AutoTalk allows you to answer the phone simply by removing the handset from the cradle. You do not have to press any keys.

1) When the phone is in standby mode, press and hold the caller id/menu key. The following screen appears.
2) Press the select/channel key to turn AutoTalk on.
3) Press the end key to complete the setting. The handset returns to standby mode.

Activating Caller ID on Call Waiting

Caller ID allows you to see the name and number of the calling party before you answer the phone. Caller ID on Call Waiting (CIDCW) lets you see the name and number of a call that comes in when you are on the line.
You must subscribe to Caller ID service through your local telephone provider to use this feature.

1) When the phone is in standby mode, press and hold the *caller id/menu* key. The following screen appears.
2) Press the \( \sqrt[4]{vol/\Delta} \) key to select CIDCW.
3) Press the *select/channel* key to toggle and turn on Caller ID on Call Waiting.
4) Press the *end* key and return the handset to the main base to complete the setting. The handset returns to standby mode.

**Entering Your Area Code**

If you enter a 3-digit area code number in the *Area Code* option, your local area code does not appear in Caller ID messages. Do not program this option if your calling area requires 10-digit dialing. When reviewing Caller ID messages, you will see only the local seven digit number. For calls received from outside your local area code, you will see a full 10-digit number.

1) When the phone is in standby mode, press and hold the *caller id/menu* key. The following screen appears.
2) Press the \( \sqrt[4]{vol/\Delta} \) key twice to select *Area Code*.
3) Press the *select/channel* key. If an area code was already stored, the phone will display it.
4) Use the number keys (0 - 9) to enter the 3-digit area code. If you make an error, use the delete/transfer key to backspace.

5) Press the select/channel key. A confirmation tone sounds.

6) Press the end key to complete the setting. The handset returns to standby mode.

Choosing the Dialing Mode

Most phone systems use tone dialing. However some phone systems (such as in rural areas) still use pulse dialing. Your Uniden phone supports both tone and pulse dialing. The default setting is tone dialing. If your phone system uses pulse dialing, follow the steps below to change the dialing mode:

1) When the phone is in standby mode, press and hold the caller id/menu key. The following screen appears.

2) Press the √/vol/ Δ key three times to select Dial.

3) Press the select/channel key to set the phone to pulse dialing.

4) Press the end key and return the handset to main base to complete the setting. The handset returns to standby mode.

note

• If you are not sure of your dialing system, make a trial call. If the call connects, leave the setting as is. Otherwise, set for pulse dialing.

• If your phone system requires pulse dialing and you need to send DTMF tones during a call, you can temporarily switch over to tone dialing. (Refer to "Tone Dialing Switch-over" on page 19.)
Setting the Language
There are three languages to choose from: English, French and Spanish.

1) When the phone is in standby mode, press and hold the caller id/menu key. The following screen appears.
2) Press the \>/vol/\ key four times to select Language.
3) Press the select/channel key to select Eng, Fr, or Esp.
4) Press the end key to complete the setting. The handset returns to standby mode.

Selecting the Ring Tone and Volume
Your phone has five different ringer tone/volume combinations you can choose from.

1) With the phone in standby mode, press the \>/vol/\ or \>/vol/\ key.
2) The phone will sound the different ring tones at different volumes.
3) When the phone sounds the ring tone and volume you wish to use, press the end key.
Using Your Phone

Making and Receiving Calls

Making a call
1) Remove the handset from the cradle.
2) Press the talk/flash key.
3) Listen for the dial tone.
4) Dial the number.
OR
1) Remove the handset from the cradle.
2) Dial the number.
3) Press the talk/flash key.

Receiving a call
1) Remove the handset from the cradle. (If AutoTalk is on, the phone will automatically answer the call when you pick it up.)
2) Press the talk/flash key.
OR
1) If the handset is off the cradle, press the talk/flash key or any number key. (AutoTalk is on.)

Hanging up
Press the end key or return the handset to the cradle.

note
Refer to page 13 "Basic Setup" to turn on the AutoTalk feature if desired.
Redialing the last dialed number
1) Remove the handset from the cradle.
2) Press the talk/flash key.
3) Listen for the dial tone.
4) Press the redial/pause key.
OR
1) Remove the handset from the cradle.
2) Press the redial/pause key.
3) Press the talk/flash key.

Adjusting the Earpiece Volume
To change the earpiece volume, press the $\wedge$/vol/$\wedge$ or $\vee$/vol/$\vee$ key during a call.

Temporarily Mute Ringer
If the handset is off the cradle while an incoming call is ringing, simply press the end key to temporarily mute the incoming ring. The ringer will sound with the next incoming call.
The UltraClear Plus™ true compander circuitry virtually eliminates background noise. This innovative technology, together with 20 different channels, provides you with the best possible reception during all your conversations.

**Note**

**Tone Dialing Switch-over**

If your telephone company requires pulse dialing, you can switch-over to tone dialing after the call connects. This feature is useful when you need tone dialing to use any automated menu systems, such as telephone bank tellers, telephone prescriptions refills, customer support menus, etc.

If your phone is set to pulse dialing mode, make your call normally. Once your call connects, press the 
key. Any digits you enter from then on will be sent as tone digits. When this particular call ends, the phone automatically returns to pulse dialing mode.

**Traveling Out-of-Range**

During a call, as you begin to move your handset too far from your main base, noise increases. If you pass the range limits of the main base, your call will terminate within one minute.

**Selecting a Different Channel**

If you encounter interference while using your phone, you can manually change the phone’s channel for clear operation. While using your phone, press the key. Scanning appears on the display, indicating the phone is changing to another channel. For more information on interference, refer to “Precautions” on page 41.
Find Handset
To locate the handset, press the *find handset* key on the main base. The handset beeps for 60 seconds. Paging is canceled when pressing any key on either handset, the *find handset* key on the main base. Paging is also canceled when the phone receives an incoming call.

Using Call Waiting
If you have Call Waiting service, you can receive calls while on the line.
1) If a call comes in while you are on the phone, you will hear a call waiting tone. If you have CIDCW activated, you will see the name and number of the incoming caller.
2) Press the *talk/flash* key to accept the waiting call. After a short pause, you will hear the new caller.
3) To return to the original caller, press the *talk/flash* key again.

*note* You must subscribe through your local telephone company to receive Call Waiting service.
Voice Mail Waiting Indicator

If you subscribe to voice mail service, you can use your cordless telephone to access your voice mailbox. The charge in use LED on the main base of your phone flashes whenever you have messages waiting in your voice mailbox.

Just dial the access number supplied by your voice mail provider to enter your mailbox. You can program your voice mail access number to a speed dial number. If the voice mail waiting indicator remains on after you have retrieved your messages, press and hold the find handset key for 5 seconds. This will reset the indicator.
RocketDial

RocketDial is a one-touch speed dial key. Store your most important or most frequently called number as your RocketDial number. Then, simply press the RocketDial key, and your phone will automatically dial the number.

Storing the RocketDial

1) When the phone is in standby mode, press and hold the RocketDial key. The following display appears.

   If the Rocketdial number is already programmed, the Edit screen appears. You can select Edit to edit this entry, select Delete to erase this entry or select Go Back to return to standby mode.

2) Store the number by following step 6 under “Storing Names and Numbers in Speed Dial Memory” on page 25.

3) Press the select/channel key. You hear a confirmation tone, and Number Stored appears. Memory storage is complete.
Using the Speed Dial Memory

The speed dial memory allows you to store up to 10 names and numbers in each handset. You can dial these numbers with just a few key presses.

The speed dial memory is not limited to phone numbers. You can store any number (up to 20 digits) that you need to enter once your call connects. This is referred to as Chain Dialing. For example, you can save your bank account number to speed dial memory. When you call your bank’s telephone teller service and are prompted to enter your account number, simply press the memory key and the speed dial number where you stored your account number. Then press the select/channel key.

Storing Names and Numbers in Speed Dial Memory

1) With the phone in standby mode, press the memory key.

2) Enter 0-9 to select the speed dial number where you would like to store this entry. You can also scroll through the list with the \( \Delta \) and \( \nabla \) keys. Press the select/channel key twice.

3) Store Name appears and a cursor flashes indicating that the display is ready for the name to be entered.

If the selected speed dial number is already assigned, the Edit screen appears. You can select Edit to edit this entry, select Delete to erase this entry, or select Go Back to choose another speed dial number.
4) Enter a name according to the instructions below, then press the select/channel key. If no name is required, go to step 5.
   - The name can be up to 13 characters.
   - Use the #/→ and */tone ← keys to move the cursor to the desired location.
   - Use the delete/transfer key to delete characters as needed.
   - Press and hold the delete/transfer key to delete all the characters.

Refer to the letters on the number keys to select the desired characters. With each press of a numeric key, the displayed character appears in the following order: Upper case letters first, lower case letters next and finally the number corresponding to the key.

If you make a mistake while entering a name
Use the */tone ← or #/→ key to move the cursor to the incorrect character. Press the delete/transfer key to erase the wrong character. Then enter the correct character. To delete all characters, press and hold the delete/transfer key.

For example, to enter Movies.
1) Press 6. Then press the #/→ key to move the cursor to the right.
2) Press 6 six times.
3) Press 8 six times.
4) Press 4 six times.
5) Press 3 five times.
6) Press 7 eight times.
5) **Store Number** is displayed. The cursor flashes indicating that the display is ready for the number to be entered.

6) Use the keypad to enter the phone number; each number can be up to 20 digits. If you need the phone to pause during the dialing sequence, press the redial/pause key to insert a two-second delay between the numbers. You can enter multiple pauses to increase the delay. Each pause counts as a digit. The display shows a P for every pause.

**Note:** When storing numbers into memory, if the handset is idle (i.e., no key is pressed) for more than 30 seconds, it will beep rapidly, and the phone will return to standby mode.

7) Press the **memory** key. You will hear a confirmation tone, and the following screen appears.

- **Memory01 Stored**
- **Movies**
- **02 JOHN DOE**
- **03 MOM AND DAD**

Memory storage is complete. After about 2 seconds, the following screen displays all the speed dial memory entries.

8) Press the **end** key to exit memory setup mode. The phone returns to standby.
Storing Caller ID Messages in Speed Memory Locations

Messages (Caller ID names/numbers) shown in the Caller ID list can be stored in memory dialing. For way of viewing the Caller ID Message list, see page 29.

1) Press the *caller id/menu* key. Select the phone number to be stored from the Caller ID list by pressing the \(\uparrow/\downarrow\) or \(\lor\) key.

2) Press the *memory* key.

3) Enter a number (0 - 9) or press the \(\uparrow/\downarrow\) or \(\lor\) key to select the memory location to be stored.

4) Press the *select/channel* key. You hear a confirmation tone, and the number is stored in memory. The display returns to the Caller ID list.

If a message has already been stored in the selected memory number location, a confirmation screen is displayed. Press the \(\uparrow/\downarrow\) key to select \(\text{Yes}\). Press the *select/channel* key to overwrite. The display returns to the Caller ID list.

You cannot store a Caller ID message if no phone number appears in the message.
Making Calls from Speed Dial Memory

1) Press the memory key. The handset displays your programmed speed dial number.

2) Enter the number (0 - 9), or press the \( 
\) or \( 
\) key to select the speed dial number you would like to dial.

3) Press the talk/flash key. Connecting changes to Talk, and the volume setting and the number selected appear on the display. Then the displayed number is dialed.

To cancel speed dialing

To cancel speed dialing, press the end key; the handset returns to standby mode. The handset will also return to standby mode if the handset is idle (i.e., no key is pressed) for 30 seconds.
 Caller ID and CIDCW (Caller ID on Call Waiting)

You must subscribe to Caller ID service through your local telephone provider to use this feature. When the telephone rings, the Caller ID feature allows you to view the caller's name, phone number, date and time of call. With CIDCW (Caller ID on Call Waiting), you will hear a Call Waiting tone while you are on a call, and the Caller ID data is displayed. To accept the waiting call, press the talk/flash key (see page 20). Additionally, you can dial a number stored in the Caller ID list or save data to your Memory dial list.

When the Telephone Rings

When the Caller ID message is received, the display shows the caller’s phone number along with the date and time. The incoming call information is stored in the Caller ID record. If the Caller ID service includes the caller’s name, the caller’s name appears on the display (up to 15 letters).

The data and time received: 5/11 12:30PM
Caller’s name: Jane Smith
Caller’s phone number: 214-600-1234

You may receive any of the following messages:
- When invalid data is received: Incomplete Data
- When a private name is received: Private Name
- When a private number is received: Private Number
- When a unknown name is received: Unknown Name
- When a unknown number is received: Unknown Number

Data errors appear as “”。

www.uniden.com
Viewing the Caller ID Message List

The Caller ID list stores information for up to 30 incoming calls - even unanswered calls.

1) With the phone in standby mode, press the caller id/menu key. The summary screen appears. The screen shows the number of new messages and total messages.

2) To view the Caller ID messages in historical order (from new to old or from old to new), repeatedly press the \+/vol/ key to scroll through the messages from the latest to the earliest, or the \-/vol/ key to scroll back through the messages.

3) Press the end key to return to standby mode.
Deleting Information from the Caller ID List
The cordless phone stores up to 30 Caller ID names/numbers in each handset. If the phone receives the 31st Caller ID, the oldest one in the list is automatically deleted. Caller ID data can also be deleted manually.

Deleting a Caller ID message
1) Press the caller id/menu key in standby mode. Find the message to be deleted from the Caller ID list by pressing the \( \lor \) vol/\( \downarrow \) or \( \lor \) vol/\( \downarrow \) key.
2) Press the delete/transfer key.
3) Press the \( \lor \) vol/\( \downarrow \) or \( \lor \) vol/\( \downarrow \) key to select Yes, and then press the select/channel key.

Deleting all Caller ID names/numbers
1) With the phone in standby mode, press the caller id/menu key.
2) Press the delete/transfer key.
3) Press the \( \lor \) vol/\( \downarrow \) or \( \lor \) vol/\( \downarrow \) key to select Yes, and then press the select/channel key.
You hear a confirmation tone and all stored Caller ID messages are deleted.

www.uniden.com
Making a Call from the Caller ID List

You can place a call from the Caller ID list.

1) Press the caller id/menu key in standby mode. Select the phone number that you want to dial by pressing the \(\text{/vol/}\) or \(\text{\textbf{vol/}}\) key.

2) To have the phone dial a "1" before the displayed Caller ID number, press 1. To have the phone dial the stored area code before the displayed Caller ID number, press 3.

3) Press the talk/flash key. The displayed phone number dials automatically.
Changing the Digital Security Code

To protect you against misbilled calls which might result from your phone being activated by other equipment, the cordless phone provides AutoSecure™ (which electrically locks your phone when each handset is in the cradle) and Random Code™ digital security which automatically selects one of over 262,000 digital security codes for each handset and the main base. If the handset battery pack is completely discharged or the battery pack is removed, the digital security code will be lost. If this happens, a new security code is set automatically the next time the battery pack is charged. In the rare situation that you suspect another cordless telephone is using the same security code, you can change the code.

1) Remove the handset from the cradle. Press and hold the find handset key on the main base.
2) While holding the find handset key, place the handset in the main base, and leave the handset in the main base for more than three seconds.
3) Remove the handset from the main base. Then place the second handset in the main base and wait for more than three seconds. No need to holding the find handset key this time.
4) Press the talk/flash key on one handset. Once you make sure Talk appears on the display, press the end key. Then, try with the second handset. If each handset displays Talk, a new security code is set. Otherwise, return to step 1 and try again.
Note on Power Sources

**Low battery alert**

When the battery pack is very low and needs to be charged, the phone is programmed to eliminate functions in order to save power. If the phone is not in use, Low Battery appears on the LCD and none of the keys will operate. If the phone is in use, Low Battery flashes and the handset beeps. Complete your conversation as quickly as possible and return the handset to the cradle for charging.

Information stored in the phone's memory will be retained for 30 minutes after the battery pack is removed. This includes all setup information, last number dialed, speed dial memory, Rocketdial programming, and the CID list.

Even when the battery pack is not being used, it will gradually discharge over a long period of time. For optimum performance, be sure to return the handset to the cradle after a telephone call.

**Battery replacement and handling**

When the operating time becomes short even after a battery is recharged, please replace the battery.

With normal usage, your battery should last about one year. Please contact your place of purchase or the Uniden Parts Department for a replacement battery.

**Warning:** To avoid the risk of personal injury or property damage from fire or electrical shock, only use the Uniden battery model and Uniden adapter model specifically designated for this product.

**Power Failure**

During the period that the power is off, you will not be able to make or receive calls with the telephone.

**Caution**

- Use only the specified Uniden battery pack (BT-905).
- Do not remove the battery from the handset to charge it.
- Never throw the battery into a fire, disassemble it, or heat it.
- Do not remove or damage the battery casing.
Cleaning the battery charging contacts
To maintain a good charge, clean the charging contacts on the handset once a month.
Dampen a cloth with plain water. Gently rub the damp cloth over the charging contacts until all visible dirt is removed. Dry the contacts thoroughly before returning the handset to the base.

Caution
Do not use paint thinner, benzene, alcohol, or other chemical products. Doing so may discolor the surface of the telephone and damage the finish.
General Information
The phone complies with FCC Parts 15 and 68.
Operating temperature: -10°C to +50°C (+14°F to +122°F)

AC Adapter Information
AC Adapter part number: AD-0001
Input Voltage: 120V AC 60Hz
Output Voltage: 9V DC 210mA

Battery Information
Battery part number: BT-905
Capacity: 600 mAh, 3.6V
Frequency
924.516925 - 926.704425 MHz
2,405.155942 - 2,411.718441 MHz

To avoid damage to the phone use only Uniden AD-0001 and BT-905 with your phone.
If the handset is left off of the cradle, the actual talk mode duration will be reduced respective to the amount of
time the handset is off the cradle.

Recharge your phone on a regular basis by returning the handset to either cradle after each phone call.
When the operating time becomes short, even after the battery is recharged, please replace the battery.
With normal usage, the battery should last about one year.

A replacement Uniden adapter and battery may be purchased at your local Uniden dealer or by contacting the Uniden
Parts Department (800) 554-3988. Hours are from 8:00 a.m. to 5:00 p.m. Central Time, Monday through Friday. We
can also be reached on the web at www.uniden.com. Specifications, features, and availability of optional accessories
are all subject to change without prior notice.
**Troubleshooting**

If your phone is not performing to your expectations, please try these simple steps first.

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Suggestion</th>

</thead>
</table>
| The *charge/in use* LED or *charge* LED won't illuminate when the handset is placed in the cradle. | • Make sure the AC adapter is plugged into the cradle and wall outlet.  
• Make sure the handset is properly seated in the cradle.  
• Make sure the charging contacts on the handsets are clean. |
| The audio sounds weak and/or scratchy. | • Move the handset and/or main base away from metal objects or appliances and try again.  
• Press the select/channel key in the Talk mode to help eliminate background noise.  
• Make sure that the handset is not too far from the main base. |
| Can’t make or receive calls. | • Re-register both handsets (see page 12).  
• Check both ends of the telephone line cord.  
• Make sure the AC adapter is plugged into the main base and wall outlet.  
• Disconnect the AC adapter for a few minutes. Then reconnect it.  
• Make sure that the handset is not too far from the main base.  
• Check the dialing mode used by your telephone company. |

Liquid Damage

Moisture and liquid can damage your cordless phone. In case of accidental submersion, please follow these steps.

<table>
<thead>
<tr>
<th>Case</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>If the handset or base is exposed to moisture or liquid, but it only affects the exterior plastic housing.</td>
<td>Wipe off the liquid, and use as normal.</td>
</tr>
</tbody>
</table>
| If moisture or liquid has entered the plastic housing (i.e., liquid can be heard in the phone or liquid has entered the handset battery compartment or vent openings on the base). | **Handset:**  
1. Remove the battery cover and leave it off for ventilation  
2. Remove the battery pack by disconnecting  
3. Leave the battery cover off and the battery pack disconnected for at least 3 days  
4. Once the handset is completely dry, reconnect the battery pack and the battery cover.  
5. Recharge the handset’s battery pack for 20 hours before using again.  
**Base:**  
1. Disconnect the AC adapter from the base unit, cutting off electrical power.  
2. Disconnect the telephone cord from the base unit.  
3. Let dry for at least 3 days.  
**IMPORTANT:** You must unplug the telephone line while recharging the battery pack to avoid charge interruption.  
**CAUTION:**  
DO NOT use a microwave oven to speed up the drying process. This will cause permanent damage to the handset, base and the microwave oven.  
After following these steps, if your cordless telephone does not work, please send to:  
Uniden America Corporation  
Parts and Service Division  
4700 Amon Carter Blvd.  
Ft. Worth, TX 76155  
1-800-554-3988, Monday through Friday  
8 a.m. to 5 p.m. CST |
1. Use only the Uniden battery pack specified in the owner's manual.
2. Do not dispose of the battery pack in a fire. The cell may explode.
3. Do not open or mutilate the battery pack. Released electrolyte is corrosive and may cause damage to the eyes or skin. It may be toxic if swallowed.
4. Exercise care in handling the battery in order not to short the battery with conducting materials such as rings, bracelets, and keys. The battery or conductor may overheat and cause burns.
5. Charge the battery pack provided with or identified for use with this product in the manner described in the operating instructions.

Uniden America Corporation DOES NOT represent this unit to be waterproof. To reduce the risk of fire, electrical shock, or damage to the unit, DO NOT expose this unit to rain or moisture.

Warning!

1. Read and understand all instructions.
2. Follow all warnings and instructions marked on the product.
3. Do not use this telephone near water; for example, near a bathtub, washbowl, kitchen sink or laundry tub, in a wet basement, or near a swimming pool.
4. Slots and openings in the cabinet and the back or bottom are provided for ventilation. To protect the product from overheating, these openings must not be blocked or covered. The openings should never be blocked by placing the product on a bed, sofa, rug, or other similar surface. This product should not be placed in a built-in installation unless proper ventilation is provided.

Caution!

1. Do not plug the telephone line cord into the telephone jack of any electrical coin-operated systems, including most electronic key telephone systems and coin-operated machines.
2. Do not connect your phone to coin-operated systems or coin-telephones.
3. Do not connect your phone to multi-line systems without permission of the system administrator.

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Privacy of communications may not be ensured when using this phone.

Uniden works to reduce lead content in our PVC coated cords in our products. While extensive repair work by a qualified technician is required, this product contains a lead glass component.

Uniden voluntarily participates in an RBRC® battery recycling program. Uniden collects and recycles nickel-cadmium batteries at the end of their useful life, when taken out of service within the United States. RBRC® is a registered trademark of the Rechargeable Battery Recycling Corporation.

Additional Battery Safety Precautions

WARNING: The port is live at all times and should be treated as such. Always follow polarity orientation of the battery pack when connecting it to the phone.

WARNING: Do not short-circuit the battery. Improper use of the battery may cause damage to the battery or battery pack.

Warning!

1. Use only the Uniden battery pack specified in the owner's manual.
2. Do not dispose of the battery pack in a fire. The cell may explode.
3. Do not open or mutilate the battery pack. Released electrolyte is corrosive and may cause damage to the eyes or skin. It may be toxic if swallowed.
4. Exercise care in handling the battery to prevent shorting the battery with conducting materials such as rings, bracelets, and keys. The battery or conductor may overheat and cause burns.
5. Charge the battery pack provided with or identified for use with this product in the manner described in the operating instructions.

SAVE THESE INSTRUCTIONS!
The FCC has granted the telephone company the right to disconnect service in the event that your phone causes problems on the telephone line. Also, the telephone company may make changes in facilities and services which may affect the operation of your unit. However, your telephone company must give adequate notice in writing prior to such changes. If you have a problem, or if you feel the service you are receiving is unsatisfactory, try to resolve the problem directly with your telephone company. If satisfactory arrangements cannot be made, you should write to the appropriate office of the Federal Communications Commission.

Radio Interference
Radio interference may occasionally cause buzzing and humming in your cordless handset, or clicking noises in the base. This interference is caused by external sources such as TV, refrigerators, vacuum cleaners, fluorescent lighting, or electrical storms. Your unit is designed to minimize interference from external sources but is not guaranteed to be interference-free. Keep the telephone away from sources of electrical noise. Be certain that antenna on the unit is fully extended.

Telephone Line Outlets
Most phone equipment available now uses modular jacks. Phone cords are fitted with a molded plastic connector which plugs into this type of jack. This type of outlet is a telephone company orderable item. If your outlet is not a modular jack, you may need to have the telephone company install a modular jack. This is a simple procedure which may involve a service charge. If the phone cord supplied with your equipment is too short, you may purchase a longer modular cord from Uniden.

Connecting the Telephone Cords
Before connecting your new phone, there are some important guidelines you should consider:

- The location should be close to both a phone jack and continuous power outlet. (A continuous power outlet is an AC outlet which does not have a switch to interrupt its power.)
- The base can be placed on a desk or tabletop, or mounted on a standard wall outlet.
- The unit should be charged for 15-20 hours before completing the installation. Use only the AC adapter supplied with the unit.
- The base can be placed on a desk or tabletop or mounted on a standard wall outlet.

WARRANTY DURATION: This warranty to the original user shall terminate and be of no further effect 12 months after the date of original sale. The warranty is invalid if the Product is (A) damaged or not maintained as reasonable or necessary, (B) modified, altered, or used as part of any system not manufactured by Uniden, (C) improperly installed, (D) serviced or repaired by someone other than an authorized Uniden service center for a defect or malfunction covered by this warranty, (E) used in any conjunction with equipment or parts or as part of any system not manufactured by Uniden, or (F) installed or programmed by anyone other than as detailed by the owner's manual for this product.

STATEMENT OF REMEDY: In the event that the product does not conform to this warranty at any time while this warranty is in effect, warrantor will either, at its option, repair or replace the defective unit and return it to you without charge for parts, service, or any other cost (except shipping and handling) incurred by you or its representatives in connection with the performance of this warranty. Warranty will be void if the unit is (A) damaged or not maintained as reasonable or necessary, or improperly installed, or used in conjunction with equipment or parts not manufactured by Uniden, (B) modified, altered, or used as part of any system not manufactured by Uniden, or (C) improperly installed, or used in conjunction with equipment or parts or as part of any system not manufactured by Uniden, or (D) serviced or repaired by someone other than an authorized Uniden service center for a defect or malfunction covered by this warranty, (E) used in conjunction with equipment or parts or as part of any system not manufactured by Uniden, or (F) installed or programmed by anyone other than as detailed by the owner's manual for this product.

LEGAL REMEDIES: This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. Some states do not allow this exclusion or limitation of incidental or consequential damages so the above limitation or exclusion may not apply to you. This warranty is void outside the United States of America and Canada.

PROCEDURE FOR OBTAINING PERFORMANCE OF WARRANTY: If, after following the instructions in the owner's manual, you are unable to resolve the problem, you should contact your Uniden telephone dealer. You may also contact Uniden America Corporation at the address provided for warranty information. You must be able to show proof of purchase to obtain warranty service. The warranty card must be filled out accurately and timely or it will not be accepted as proof of purchase. For a list of Uniden telephone dealers, contact your local Bell company or the telephone directory. When you contact a Uniden dealer, you must also provide the model number of your cordless telephone. The model number is located on the underside of the base unit. If you do not have the model number, you must provide the serial number located on the side of the base unit.

ADDITIONAL INFORMATION
I.C. Notice

TERMINAL EQUIPMENT
NOTICE: This equipment meets the applicable Industry Canada Terminal Equipment Technical Specifications. This is confirmed by the registration number. The abbreviation, IC, before the registration number signifies that registration was performed based on a Declaration of Conformity indicating that Industry Canada technical specifications were met. It does not imply that Industry Canada approved the equipment.

NOTICE: The Ringer Equivalence Number (REN) for this terminal equipment is marked on the equipment itself. The REN assigned to each terminal equipment provides an indication of the maximum number of terminals allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the Ringer Equivalence Numbers of all the devices does not exceed five.

RADIO EQUIPMENT
The term “IC:” before the radio certification number only signifies that Industry Canada technical specifications were met.

Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device. “Privacy of communications may not be ensured when using this telephone.”
