Congratulations on your purchase of the Uniden cordless telephone and answering system. This phone is designed and engineered to exacting standards for reliability, long life, and outstanding performance.

Note: Illustrations in this manual are used for explanation purposes. Some illustrations in this manual may differ from the actual unit. The color of your cordless phone may vary.

As an Energy Star® Partner, Uniden has determined that this product or product models meets the Energy Star® guidelines for energy efficiency. Energy Star® is a U.S. registered mark.

Welcome

Features

• 2.4GHz Extended Range Technology
• Integrated Telephone Answering Device (ITAD)
• Trilingual Voice Prompts (English, French or Spanish Support)
• 10 Number Memory Dialing
• One touch RocketDial®
• Last Number Redial
• Flash and Pause
• Tone/Pulse Dialing
• Find Handset Locator
• Earpiece Volume Control
• Ringer Volume Control
• Hearing Aid Compatible
• 20 Channel Autoscan

Be sure to visit our web site: www.uniden.com

Controls & Functions

1. Handset antenna
2. Handset battery compartment
3. Handset earpiece
4. talk/batt low LED
5. remote key (pages 9 and 35)
6. vol (volume)/△ key (page 11)
7. */tone key (page 12)
8. redial/pause key (pages 10 and 15)
9. memory key (page 14)
10. Rocketdial key (page 14)
11. talk/flash key (pages 10 and 13)
12. end key (pages 10 and 11)
13. channel key (page 13)
14. Handset microphone
15. Handset charging contacts
Terms Used in this Manual

- **Standby Mode** - The handset may be sitting in or off the base, but is NOT in use. The *talk/flash* key has not been pressed and there is no dial tone.
- **Talk Mode** - The handset is off the base and the *talk/flash* key has been pressed, enabling a dial tone.
- **RocketDial** - One touch speed dial

**CONTROLS & FUNCTIONS**
Installing the Phone

Do the following steps:
A. Choose the Best Location
B. Install the Rechargeable Battery Pack into the Handset
C. Connect the Base Unit and Charge the Handset
D. Mount the Base Unit on a Wall
E. Choose the Dialing Mode

A. Choose the Best Location
When choosing a location for your new phone, here are some important guidelines you should consider:
- Avoid heat sources, such as radiators, air ducts, and sunlight
- Avoid noise sources such as a window by a street with heavy traffic
- Choose a central location
- Avoid television sets and other electronic equipment
- Avoid microwave ovens
- Avoid excessive moisture, extremely low temperatures, dust, mechanical vibration, or shock
- Avoid personal computers
- Avoid other cordless telephones
- The location should be close to both a phone jack and a continuous power outlet (one which is not connected to a switch).
- The base and handset should be kept away from sources of electrical noise such as motors, microwave ovens, and fluorescent lighting.
- The base can be placed on a desk, tabletop, or mounted on a standard wall plate.
- There should be enough space to fully extend the antenna.

note
If your home has specially wired alarm equipment connected to the telephone line, be sure that installing the system does not disable your alarm equipment. If you have questions about what will disable your alarm equipment, contact your telephone company or a qualified installer.
B. Install the Rechargeable Battery Pack into the Handset

The handset is powered by a rechargeable battery pack. The battery recharges automatically when the handset is placed in the base unit.

1) Press down on the handset battery case cover (use the finger indentation for a better grip) and slide the cover downward to remove.

2) Plug the battery pack connector (red & black wires) into the jack inside the battery compartment. (The connector notches fit into the grooves of the jack only one way.) Match the wire colors to the polarity label in the battery compartment, connect the battery and listen for a click to insure connection.

3) Make sure you have a good connection by slightly pulling on the battery wires. If the connection is secure, the battery jack will remain in place.

4) Place the battery case cover back on the handset by sliding it upwards until it clicks into place.

*Use only the Uniden (BT-905) rechargeable battery pack supplied with your cordless telephone.

*Replacement batteries are also available through the Uniden Parts Department at (800) 554-3988, Monday through Friday from 8:00 a.m. to 5:00 p.m. or online at www.uniden.com
C. Connect the Base Unit and Charge the Handset

1) Connect the AC adapter to the DC IN 9V jack and to a standard 120V AC wall outlet.

2) Place the handset in the base unit with the keypad facing forward.

3) Make sure the charge in use LED illuminates.
   If the LED does not illuminate, check to see that the AC adapter is plugged in and the handset makes good contact with the base charging contacts.
   - Connect the AC adapter to a continuous power supply.
   - Place the base unit close to the AC outlet so that you can unplug the AC adapter easily.

4) Charge your handset at least 15-20 hours before plugging into the phone line.

5) Once the handset battery pack is fully charged, connect the telephone line cord to the TEL LINE jack and a telephone outlet. If your telephone outlet isn't modular, contact your telephone company for assistance.
D. Mount the Base Unit on a Wall

Standard wall plate mounting

This phone can be mounted on any standard wall plate.

1) Locate the base unit on the wall mount adapter as shown and slide the wall mount adapter into the notches on the base bottom.

2) Plug the AC adapter to the DC IN 9V jack.

3) Route the AC adapter cord through the molded wiring channel as shown.

4) Plug the AC adapter into a standard 120V AC wall outlet.

5) Plug the telephone line cord into the TEL LINE jack. Route the cord through the molded wiring channel as shown.

6) Plug the telephone line cord into the telephone outlet.

7) Align the mounting slots on the base with the mounting posts on the wall. Then push in and down until the phone is firmly seated.

To remove, push up a tab on the wall mount adapter as shown.
Direct wall mounting

If you don't have a standard wall plate, you can mount your phone directly to the wall. Before doing this, consider the following:

- Avoid electrical cables, pipes, or other items behind the mounting location that could cause a hazard when inserting screws into the wall.
- Try to mount your phone within 5 feet of a working phone jack to avoid excessive cord lengths.
- Make sure the wall material is capable of supporting the weight of the base and handset.
- Use #10 screws (minimum length of 1-3/8 inches) with anchoring devices suitable for the wall material where the base unit will be placed.

1) Insert two mounting screws into the wall, (with their appropriate anchoring device), 3-15/16 inches apart. Allow about 1/8 of an inch between the wall and screw heads for mounting the phone.
2) Refer to steps 1 through 8 on page 8 to mount the telephone.

E. Choose the Dialing Mode

Most phone systems use tone dialing. However some phone systems (such as in rural areas) still use pulse dialing. Your Uniden phone supports both tone and pulse dialing. The default setting is tone dialing. If your phone system uses pulse dialing, follow the steps below to change the dialing mode:

1) In standby mode, press and hold the remote key until you hear a confirmation tone.
2) Press the # key to set your phone for pulse dialing. You will hear a confirmation tone.
Using Your Phone

Making and Receiving Calls

Making a call
1) Remove the handset from the base.
2) Press the talk/flash key. The talk/batt low LED flashes and turns on.
3) Listen for the dial tone.
4) Dial the number.

Receiving a call
If the handset is in the base, simply remove the handset from the base. AutoTalk will automatically answer the call.
If the handset is off the base, press the talk/flash key or any number key.

Hanging up
Press the end key or return the handset to the base.

Redialing the last dialed number
1) Remove the handset from the base.
2) Press the talk/flash key. The talk/batt low LED flashes and turns on.
3) Listen for the dial tone.
4) Press the redial/pause key.
Adjusting the Ringer and Earpiece Volume

Ringer tone and volume
When the phone is in standby mode, press the **vol/ ▲** key repeatedly to listen to the four ringer tones and volume combinations. The last ringer tone heard will be selected as the phone’s ring tone setting.

Earpiece volume
The handset earpiece volume settings can only be adjusted during a call. Press the **vol/ ▼** key repeatedly to scroll between and select the volume level that works best for you. When you hang up, the phone keeps the volume setting.

Temporarily Mute Ringer
If the handset is off the base, simply press the **end** key to temporarily mute the incoming ring. The ringer will sound with the next incoming call.
Tone Dialing Switch-over

If your telephone company requires pulse dialing, you can switch-over to tone dialing after the call connects. This feature is useful when you need tone dialing to use any automated menu systems, such as telephone bank tellers, telephone prescription refills, customer support menus, etc.

If your phone is set to pulse dialing mode, make your call normally. Once your call connects, press the */tone key. Any digits you enter from then on will be sent as tone digits. When this particular call ends, the phone automatically returns to pulse dialing mode.

Traveling Out-of-Range

During a call, as you begin to move your handset too far from your base unit, noise increases. If you pass the range limits of the base unit, your call will terminate within one minute.
Selecting a Different Channel
If you encounter interference while using your phone, you can manually change the phone's channel for clear operation. While using your phone, press the channel key. The talk/batt low LED flashes, indicating the phone is changing to another channel. For more information on interference, refer to "Precautions" on page 46.

Find Handset
To locate the handset (while it's off the base), press the find hs key on the base. The handset beeps for 60 seconds.
Paging is canceled when pressing any handset key, the find hs key on the base or the handset is returned to the base.
Paging is also canceled when the phone receives an incoming call.

Using Call Waiting
If you have Call Waiting service, you can receive calls while on the line.
1) If you have "Call Waiting" service and a call comes in while you are on the phone, you will hear a call waiting tone.
2) Press the talk/flash key to accept the waiting call. After a short pause, you will hear the new caller.
3) To return to the original caller, press the talk/flash key again.

You must subscribe through your local telephone company to receive Call Waiting service.
RocketDial

RocketDial is a one-touch speed dial key. Store your most important or most frequently called number as your RocketDial number. Then, simply press the RocketDial key, and your phone will automatically dial the number.

Storing the RocketDial
1) With the phone in standby mode, press the memory key.
   The talk/batt low LED flashes.
2) Enter the phone number, up to 20 digits.
3) Press the memory key again.
4) To actually store a number, press the Rocketdial key. A tone indicates that the number is stored. If there is a number already stored, the new number will be overwritten without warning.

If RocketDial or Speed Dial Memory does not have a stored number, an error tone will sound and the phone will not dial.
Using the Speed Dial Memory

Storing Numbers in Speed Dial Memory

The speed dial memory allows you to store up to 10 numbers in the handset. You can dial these numbers with just a few key presses.

The speed dial memory is not limited to phone numbers. You can store any number (up to 20 digits) that you need to enter once your call connects. This is referred to as Chain Dialing. For example, you can save your bank account number to speed dial memory. When you call your bank's telephone teller service and are prompted to enter your account number, simply press the memory key and the speed dial number where you stored your account number.

Memory Dialing allows you to dial a number using just a few key presses. Your cordless phone stores up to 10 numbers in the handset.

1) With the phone in standby mode, press the memory key. The talk/batt low LED flashes.
2) Use the keypad to enter the phone number; each number can be up to 20 digits.
3) If you need the phone to pause during the dialing sequence, press the redial/pause key to insert a two-second delay between the numbers. You can enter multiple pauses to increase the delay. Each pause counts as a digit.
4) Press the memory key again.
5) To store this number as one of the ten speed dial numbers, enter a digit from 0 to 9. If there is already a number in that speed dial setting, it will overwrite the previously stored number without warning. You will hear a confirmation tone indicates that the number has been stored.

When storing numbers into memory, if the handset is idle (i.e., no key is pressed) for more than 30 seconds, it will beep rapidly, and the phone will return to standby mode.

Making Calls from Speed Dial Memory

1) With the phone in standby mode, press the talk/flash key. Then press the memory key.
2) Enter the memory location on the keypad. The stored number automatically dials.

To exit the memory function without dialing, press the end key. The handset returns to standby.
The Integrated Answering Device

The cordless phone has a built-in answering system that answers and records incoming calls. You can also use your answering system to record a conversation, leave a voice memo message, or to announce a special outgoing message to callers when you’re away from your phone.

Features

- Digital Tapeless Recording
- Retrieve Messages Using Handset
- Up to 13 Minutes of Recording Time
- Call Screening
- Personal or Pre-recorded Outgoing Message
- Voice Prompts
  (English, French or Spanish)
- Time and Day Announcement
- Remote Message Retrieval
- Toll Saver
- Conversation Recording
- Voice Memo
- Selectable Ringer Options
  (High, Low or Off)

Digital Tapeless Recording allows you to quickly review, save, or delete any messages you choose. You will never have to worry about a tape wearing out, jamming, or resetting improperly.

The Integrated Answering System is easy and convenient to use, but please read through all of the instructions carefully.
Turning the Answering System On/Off

1) To turn the answering system on, press the *answer on/off* key. The system will announce “Answering system is on.” The current greeting message will be played, and you hear a confirmation tone. The message counter displays the number of messages stored in memory. If the display flashes, there are new messages waiting for you.

2) To turn the answering system off, press the *answer on/off* key again. After the announcement “Answering system is off,” the message counter display will no longer be illuminated. To turn the answering system back on, press the *answer on/off* key.
Setting Up Your Answering System

Answering System Settings
To set the following six functions you must enter the menu mode.

- To scroll through the menu options, repeatedly press the menu/clock key in standby mode. The system returns to standby after the last menu option. You hear a confirmation tone to indicate standby mode.
- If any of the following occurs during menu setup, the system returns to standby; you will have to start over with the procedure you were performing.
  - The talk/flash key is pressed
  - The (play/stop) key is pressed
  - 10 seconds elapse without a key press
  - An incoming call is received
- If the system remains idle for about five seconds after the announcement, the system returns to standby. Once the or \( /\) volume/select key is pressed, the idle time is extended to 10 seconds.

For your convenience, voice prompts will guide you through the menu mode.

After the setting, press the (play/stop) key to exit the menu mode, or the menu/clock key to move to the next menu option.
Setting the Time
The clock on the cordless phone’s answering system starts when power is supplied to the base. Follow these steps to set the clock to the correct time.

1) With the phone in standby mode, press the menu/clock key.
   The system announces “Time,” the current time and the guidance for setting the time.

2) Press the ▲ or ▼/volume/select key until the correct day is announced. The numbers [ ] through [ ] are displayed on the base.

3) Press the set key to select the day.

4) Press the ▲ or ▼/volume/select key until you hear the correct hour setting. The numbers [ ] through [ ] are displayed on the base.

5) Press the set key to select the hour.

6) Press the ▲ or ▼/volume/select key until you hear the correct minute setting.
   The numbers [ ] through [ ] are displayed on the base.

7) Press the set key to select the minute.

Note
Normally, the system will return to standby if it remains idle for 10 seconds after the ▲ or ▼/volume/select key is pressed. For setting the time, however, the idle time is extended to two minutes.
Press and hold the ▲ or ▼/volume/select key to quickly scroll through the numbers on the display.
8) Press the $\wedge$ or $\text{\textit{volume/select}}$ key until you hear the correct AM or PM setting. The message counter displays $[R]$ or $[P]$.

9) Press the $\text{set}$ key to select the AM/PM setting.

You hear a confirmation tone. Then the announcement "Time" and the day and time are announced for your review. After a few seconds, the system announces "To set security code, press menu again."

**Setting a Personal Security Code (PIN)**

To play your messages from a remote location, you need to enter a two-digit Personal Identification Number (PIN) code (01-99). To select a PIN, perform the following steps:

1) With the phone in standby mode, press the $\text{menu/clock}$ key twice. The system announces "Security code," and the current PIN code is announced as it is displayed on the base. Then the system announces the guidance for setting the PIN code.

2) Press the $\wedge$ or $\text{\textit{volume/select}}$ key until the desired number appears.

3) Press the $\text{set}$ key to select the PIN code. You hear a confirmation tone, then the announcement "Security code" followed by the new PIN code. After a few seconds, the system announces "To set ring time, press menu again."

The PIN code is set to "80" when you purchase the cordless phone.
Setting the Ring Time

The ring time setting allows you to set the number of rings the caller hears before your answering system plays the outgoing message. You can set the ring time to answer after two, four, or six rings. Setting [2] (Toll Saver), the answering system picks up after two rings if you have new messages, and after four rings if there are none. This way, if you make a long distance call to check your messages, you can hang up after the second ring to avoid billing charges.

1) With the phone in standby mode, press the menu/clock key three times. You hear "Ring time" and the current ring time ([2] 2, [4] 4, [6] 6, [5] Toll saver), and it is displayed on the base. Then you hear the guidance for setting the ring time.

2) Press the ▲ or ▼/volume/select key until the desired ring time appears.

3) Press the set key to select the new ring time. You hear a confirmation tone, then the announcement "Ring time" followed by the new ring time. After a few seconds, the system announces "To set record time, press menu again."
Selecting the Message Record Time

You have three record time options. The options “One minute” or “Four minutes” set the duration for recording the incoming messages. “Announce only” answers the call with the preset greeting or your personal greeting but prevents the caller from leaving a message.

1) With the phone in standby mode, press the menu/clock key four times.
   You hear “Record time” and the current recording time ( [ ] one minute, [ ] four minutes, [ A ] Announce only, No recording), and it is displayed on the base.
   Then you hear the guidance for setting the record time.

2) Press the \ or \volume/select key until the desired time appears.

3) Press the set key to select the new recording time. You hear a confirmation tone, then the announcement “Record time” followed by the new recording time. After a few seconds, the system announces “To set message alert, press menu again.”

▼ Announce only feature

The announce only feature plays a prerecorded outgoing message, and will not allow the caller to leave a message. To set “Announce only,” follow the steps above.

Your system comes with a prerecorded announce only greeting: “Hello, no one is available to take your call. Please call again.”

To scroll between the prerecorded message or your own personal greeting, press the greeting key when the outgoing message is played. If you want to use your own greeting or want to omit the prompt “to leave a message” from your greeting, refer to “Recording a personal outgoing message (Greeting)” on page 25.
Setting the Message Alert Tone
Message Alert feature lets you know you have new messages by sounding a short beeping tone. If you set the Message Alert to on when a new message is received, the alert tone will sound every 15 seconds.

1) With the phone in standby mode, press the **menu/clock** key five times. You hear "Message alert" and the current setting ([ ] Off or [ ] On), and it is displayed on the base. Then you hear the guidance for setting the Message Alert Tone.

2) Press the ▲ or **volume/select** key to make your selection.

3) Press the **set** key to select the new setting. You hear a confirmation tone, then the announcement "Message alert" followed by the current setting you have selected. After a few seconds, the system announces "To set language, press menu again."

When the first new message is received, the alert tone will begin to sound.

You can also turn off the Message Alert tone by pressing any key on the base unit. The tone will deactivate until another new message is received.

Turning Message Alert tone off when you’re away from your phone:

When all new messages are played back using the remote playback feature (see page 32,) the Message Alert tone will automatically deactivate. The tone will not deactivate until all messages are played back.
Selecting the Language
The answering system voice announcements can be heard in English, French or Spanish.
To choose the language of the answering system voice announcements:

1) With the phone in standby mode, press the menu/clock key six times.
   You hear the announcement "Language, English" followed by the voice prompts for setting
   the language. The current setting ([E], [F] or [S]) appears on the base.

2) Press the ▲ or ▼/volume/select key to select the desired language.

3) Press the set key. A confirmation tone is heard along with the setting in the language
   selected.

Setting Your Outgoing Message (Greeting)
When you receive a call, the answering system automatically plays either a preset message
or your own greeting.

▼Preset message
The following message is prerecorded:
"Hello, no one is available to take your call. Please leave a message after the tone."

note See “Selecting the Message Record Time” on page 22, on how to set the announce only
feature.
Recoding a personal outgoing message (Greeting)
1) Press and hold the greeting key in standby mode.
   You hear the announcement "Record greeting" and a confirmation tone.
   [ - - ] flashes on the message counter.
2) Start recording your message. You have 30 seconds, and the message counter starts to
3) When you are finished recording your greeting, press the greeting, play/stop or set
   key. You hear a confirmation tone, and then your greeting plays back for you.

Choosing between the two outgoing messages
With the phone in standby mode, press the greeting key. Then press the greeting key again
while the outgoing message is played. This switches between the prerecorded greeting and
the personal greeting. After finishing playing back the message, a confirmation tone is
heard.

To delete the personal Greeting, press the delete key during the announcement and
the system announces "Greeting has been deleted."

- Your greeting must be more than 2 seconds and less than 30 seconds to record.
- Position yourself as near to the base's microphone as possible and speak clearly when
  recording your outgoing message.
Setting the Base Ringer Volume
You will hear three ringer options. One allows you to turn the ringer off. The other two are volume levels. You can change the ringer volume while in standby mode or the incoming call is ringing.

1) Press the **ringer** key.
You hear the ringer at the current volume level ([H] high, [L] low, [OF] off) (if you set the base ringer volume to off, "Ringer off" is announced) and it is displayed on the base.

2) Press the **ringer** key repeatedly until the desired ringer option appears.

3) The system displays the new ringer volume.

Temporarily Mute the Base Ringer and Call Screen
Press the **play/stop** key to temporarily mute the incoming ring and call screen. The ringer will sound with the next incoming call. To turn the ringer back on for this call, press the **ringer** key. To hear the answering machine and screen this call, press the **/volume/select** key.

Adjusting the Speaker Volume Level
You can adjust the volume of the base speaker by pressing the **/volume/select** key on the base. Press the **/volume/select** key for louder or the **/volume/select** key for softer while the base speaker is being used except for menu mode. The numbers [0] - [9] are displayed on the base indicating the volume levels, [0] being the softest and [9] being the loudest.
Using Your Answering System

The message counter displays the number of messages stored in memory. If the display flashes, new messages are waiting for you. The flashing number represents the number of new messages, not total messages. The cordless phone plays the new messages first; after all the new messages are played, you can play the old messages.

When the answering system is full, \[ \text{[}] \] is displayed on the base, and the system announces "No remaining time." You should delete some messages so that the system can record new messages. (Refer to "Deleting a Message" on page 30.)

Playing Your Messages

1) With the phone in standby mode, press the \( \text{[} \) (play/stop) key. The system announces the number of new and old messages. The LED displays the number of new messages, and the number flashes. The day and time that each message was received is announced after the message is played. The message counter displays the number of current messages stored.

2) When all new messages have been played, you hear a confirmation tone and an announcement “End of messages.” The system returns to standby.

3) After you have reviewed your new messages, you can play your old messages by pressing the \( \text{[} \) (play/stop) key again. Once you have listened to a new message, it becomes an old message. The old messages will be played in the order in which they were received.
Reviewing Messages using Handset

1) With the phone in standby mode, press the remote key on the handset. The talk/batt low LED flashes and turns on. The answering system announces the current time and the number of messages stored in the memory.

2) You hear "To play incoming message, press two. For help, press zero." You hear intermittent beeps.

3) Press the $\triangleright/2$ key and you can review your messages. When you are finished, hang up to exit the system.

Repeating a Message

1) With the phone in standby mode, press the $\triangleright/\triangleright$ (play/stop) key to review your messages. The number of stored messages are announced.

2) To repeat the current message, press the $\triangleright/\triangleright$ (repeat/rew) key after a few seconds of beginning the message. To quickly scroll backwards through a message, press and hold the $\triangleright/\triangleright$ (repeat/rew) key. To repeat the previous message, press the $\triangleright/\triangleright$ (repeat/rew) key within a few seconds (about 4 seconds during remote operation) after a message begins playing. If you have several messages, press the $\triangleright/\triangleright$ (repeat/rew) key repeatedly until you return to the message you want to replay. If the current message is the first new message, the system plays back from the beginning of the current message (it does not go back into the old message group).

3) Press the $\triangleright/\triangleright$ (play/stop) key at any time to stop reviewing messages and return to standby.
**Skipping a Message**

1) With the phone in standby mode, press the \(\text{\texttt{<}}\) (play/stop) key to review your messages. The number of messages is announced.

2) Press the \(\text{\texttt{>>}}\) (skip/ff) key at anytime to skip to the next message. Each time the \(\text{\texttt{>>}}\) (skip/ff) key is pressed, the system scans forward one message. If you have several messages, press the \(\text{\texttt{>>}}\) (skip/ff) key repeatedly to find the message you want to play. To quickly scroll forward through a message, press and hold the \(\text{\texttt{>>}}\) (skip/ff) key.

3) Press the \(\text{\texttt{>>}}\) (play/stop) key at any time to stop reviewing your messages and return to standby. The message counter shows the number of messages stored in memory.
Deleting a Message

To maintain maximum record time, delete the old messages. When you press the Ø (delete) key, you are permanently deleting the message. Once deleted, the message cannot be replayed.

1) Press the Ⓗ (play/stop) key to review your messages.

2) Press the Ø (delete) key anytime during the message to delete.

3) You hear a confirmation tone and the message is deleted.

You can also delete all the messages.

1) With the phone in standby mode, press the Ø (delete) key. You hear an announcement “To delete all messages, press delete again.”

2) Press the Ø (delete) key again.

You hear a confirmation tone and [Q] is displayed on the base. All the messages are deleted.

When you try to delete all messages without first listening to your new messages, you hear several short beeps followed by an announcement “Please playback all messages.” This protects you from accidentally erasing messages you have not yet reviewed.
Voice Memo

The voice memo function allows you to record messages as short as two seconds and as long as four minutes.

1) With the phone in standby mode, press and hold the memo rec key.
You hear an announcement “Record memo message” and a tone. [— -] flashes on the message counter.

2) Start your recording.

3) When you have finished, press the (play/stop), memo rec or set key to stop recording. You hear a confirmation tone, and the system returns to standby.

Recording a Conversation

You can record up to 10 minutes of conversation while you are using your phone. Any conversation that lasts less than two seconds will not be recorded.

1) During a conversation from the handset, press and hold the memo rec key.
The unit begins recording with a confirmation tone and [— -] flashes on the message counter.
A beep that can be heard by both parties sounds during recording.

2) To stop recording, press the (play/stop) or memo rec key.
You hear a confirmation tone.

- The voice memo recorded is completely independent of the greeting message.
- The voice memo messages are recorded as incoming messages.
- When the answering system is full, [ ] appears on the message counter, and recording is terminated.
- A recorded conversation is treated as an incoming message and will be added to the stored messages.
- When recording a conversation, all dialing features except for using call waiting (see page 13) are disabled.
Stop recording if you need to enable any other handset keys.
Remote Operation

You can operate your answering system from a remote location (when you are away from home, or from another room using a handset). Use this function to check for recorded messages, to play or delete message. When using any touch-tone telephone, you can even record a new greeting message.

Remote Access away from Home

You can operate your answering system from a remote location using any touch-tone telephone.

1) Call your telephone number.

2) During the greeting message, press 0 and enter your PIN code (see page 20).

3) The answering system announces the current time and the number of messages stored in memory. Then you hear "To play incoming messages, press zero two. For help, press one zero."

4) You may continue to listen to the voice prompts, or you may select a command from the following chart:
5) After all of the voice prompts have been played, you hear intermittent beeps indicating that the system is in the command waiting mode. You may enter another command at this time from the chart.

6) When you are finished, hang up to exit the system. The answering system automatically returns to standby.

*For Memo Record and Greeting Message Record function, the first time you enter the corresponding command, it starts the Recording function. If you want to stop the recording, enter the command again.
Turn on the Answering System Remotely

If you have forgotten to turn on your answering system, you can turn it on remotely from any touch-tone telephone.

1) Call your telephone number.

2) Wait ten rings until the system answers. You hear intermittent beeps.

3) Press 0 and then enter your PIN code. The answering system announces the number of messages stored in memory. You hear "To play incoming messages, press zero two. For help, press one zero."

4) Press 0 then 6 to turn the answering system on. You hear the outgoing message and a confirmation tone.

5) Hang up the phone; subsequent calls will be answered by the system.
Remote Access with the Handset

You can operate your answering system from another room using a handset.

- If you press the end key before the answering system answers, the phone will return to standby.
- If the answering system does not answer within five seconds, you hear beeps and the phone will return to standby.
- The base's keypad is disabled during remote operation.
- If you receive a call, the remote operation is canceled.
- During the remote operation [-->] appears on the base.
- If you have new messages and old messages, only the new messages will be played. After you have reviewed your new messages, you can play your old messages by pressing the D/2 key again.

1) With the phone in standby mode, press the remote key on the handset. The talk/batt low LED flashes and turns on. The answering system announces the current time and the number of messages stored in the memory.

2) You hear "To play incoming message, press two. For help, press zero."
   You hear intermittent beeps.

3) Enter a command within 15 seconds. You may select a command from the following chart:

<table>
<thead>
<tr>

<td>Voice Prompts</td>
</tr>
</tbody>
</table>
4) After the command has finished, you hear intermittent beeps indicating that the system is in the command waiting mode. You may enter another command at this time from the chart on the previous page.

5) When you are finished, hang up to exit the system. The answering system automatically returns to standby.
Changing the Digital Security Code

To protect you against misbilled calls which might result from your phone being activated by other equipment, the cordless phone provides AutoSecure™ (which electrically locks your phone when the handset is on the base) and Random Code™ digital security which automatically selects one of over 262,000 digital security codes for the handset and base.

If the handset battery pack is completely discharged or the battery pack is removed, the digital security code will be lost. If this happens, a new security code is set automatically the next time the battery pack is charged.

In the rare situation that you suspect another cordless telephone is using the same security code, you can change the code.

1) Remove the handset from the base unit. Press and hold the find hs key on the base.

2) While holding the find hs key, place the handset on the base unit and leave the handset on the base for more than 3 seconds. A new random security code is set.
Note on Power Sources

Low battery alert
When the battery pack is very low and needs to be charged, the phone is programmed to eliminate functions in order to save power.
If the phone is in use, the talk/batt low LED flashes and the handset beeps.
Complete your conversation as quickly as possible and return the handset to the base unit for charging.

- Dial mode setting, last number dialed and numbers stored in memory locations (including RocketDial), are retained for up to one minute while you replace the battery pack.
- Even when the battery pack is not being used, it will gradually discharge over a long period of time. For optimum performance, be sure to return the handset to the base unit after a telephone call.

Battery replacement and handling
When the operating time becomes short even after a battery is recharged, please replace the battery.
With normal usage, your battery should last about one year. Please contact your place of purchase or the Uniden Parts Department for a replacement battery.

Warning: To avoid the risk of personal injury or property damage from fire or electrical shock, only use the Uniden battery model and Uniden adapter model specifically designated for this product.

Caution
- Use only the specified Uniden battery pack (BT-905).
- Do not remove the battery from the handset to charge it.
- Never throw the battery into a fire, disassemble it, or heat it.
- Do not remove or damage the battery casing.

Power Failure
During the period that the power is off, you will not be able to make or receive calls with the telephone.
Cleaning the battery charging contacts

To maintain a good charge, clean the charging contacts on the handset once a month.
Dampen a cloth with plain water. Gently rub the damp cloth over the charging contacts until all visible dirt is removed. Dry the contacts thoroughly before returning the handset to the base.

**Caution**
Do not use paint thinner, benzene, alcohol, or other chemical products. Doing so may discolor the surface of the telephone and damage the finish.
General Information

The phone complies with FCC Parts 15 and 68.
Operating temperature: -10°C to +50°C (+14°F to +122°F)

AC Adapter Information
AC Adapter part number: AD-314
Input Voltage: 120V AC 60Hz
Output Voltage: 9V AC 350 mA

Battery Information
Battery part number: BT-905
Capacity: 600 mAh, 3.6V
Frequency
924.516925 - 926.704425 MHz
2,405.155942 - 2,411.718441 MHz

To avoid damage to the phone use only Uniden AD-314 and BT-905 with your phone.
If the handset is left off of the base, the actual Talk mode duration will be reduced respective to the amount of time the handset is off the base.

Recharge your phone on a regular basis by returning the handset to the base after each phone call.
When the operating time becomes short, even after the battery is recharged, please replace the battery.
With normal usage, the battery should last about one year.

A replacement Uniden adapter and battery may be purchased at your local Uniden dealer or by contacting the Uniden Parts Department (800) 554-3988. Hours are from 8:00 a.m. to 5:00 p.m. Central Time, Monday through Friday. We can also be reached on the web at www.uniden.com. Specifications, features, and availability of optional accessories are all subject to change without prior notice.
Troubleshooting

If your phone is not performing to your expectations, please try these simple steps first.

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Suggestion</th>
</tr>
</thead>
</table>
| The charge in use LED won’t illuminate when the handset is placed in the base. | • Make sure the AC adapter is plugged into the base and wall outlet.  
• Make sure the handset is properly seated in the base.  
• Make sure the charging contacts on the handset are clean. |
| The audio sounds weak and/or scratchy.                                   | • Move the handset and/or base away from metal objects or appliances and try again.  
• Press the channel key in the Talk mode to help eliminate background noise.  
• Make sure that the handset is not too far from the base.        |
| Can’t make or receive calls.                                             | • Check both ends of the telephone line cord.  
• Make sure the AC adapter is plugged into the base and wall outlet.  
• Disconnect the AC adapter for a few minutes. Then reconnect it.  
• Change the digital security code (see page 37).  
• Make sure that the handset is not too far from the base.  
• Check the dialing mode used by your telephone company. |
### Symptom

The handset doesn't ring or receive a page.

- The battery pack may be weak. Charge the battery for 15-20 hours.
- The handset may be too far from the base unit.
- Place the base unit away from appliances or metal objects.
- Change the digital security code (see page 37).
- Check the battery pack to ensure there is a secure connection.
- Make sure ringer volume isn't set to "off".

Severe noise interference.

- Keep the handset away from microwave ovens, computers, remote control toys, wireless microphones, alarm systems, intercoms, room monitors, fluorescent lights, and electrical appliances.
- Move the base to another location or turn off the source of interference.

The answering system does not work.

- Make sure the AC adapter is plugged into wall outlet.
- Make sure the answering system is turned on.

The answering system does not record any messages.

- Set the record time to either the one minute or four minute option.
- The memory may be full. Delete some or all of the saved messages.

Messages are incomplete.

- The incoming messages may be too long. Remind callers to leave a brief message.
- The memory may be full. Delete some or all of the saved messages.

After a power failure, the outgoing message is deleted.

- Record your personal outgoing message again. The default message should remain.

## Liquid Damage

Moisture and liquid can damage your cordless phone. In case of accidental submersion, please follow these steps.

<table>
<thead>
<tr>
<th>Case</th>
</tr>
</thead>
<tbody>
<tr>
<td>If the handset or base is exposed to moisture or liquid, but it only affects the exterior plastic housing.</td>
</tr>
<tr>
<td>Wipe off the liquid, and use as normal.</td>
</tr>
<tr>
<td>If moisture or liquid has entered the plastic housing (i.e., liquid can be heard in the phone or liquid has entered the handset battery compartment or vent openings on the base).</td>
</tr>
</tbody>
</table>
| **Handset:**
| 1. Remove the battery cover and leave it off for ventilation       |
| 2. Remove the battery pack by disconnecting                         |
| 3. Leave the battery cover off and the battery pack disconnected for at least 3 days |
| 4. Once the handset is completely dry, reconnect the battery pack and the battery cover. |
| 5. Recharge the handset’s battery pack for 20 hours before using again.|
| **Base:**
| 1. Disconnect the AC adapter from the base unit, cutting off electrical power. |
| 2. Disconnect the telephone cord from the base unit.               |
| 3. Let dry for at least 3 days.                                     |
| **IMPORTANT:** You must unplug the telephone line while recharging the battery pack to avoid charge interruption. |
| **CAUTION:** DO NOT use a microwave oven to speed up the drying process. This will cause permanent damage to the handset, base and the microwave oven. |

After following these steps, if your cordless telephone does not work, please send to:

Uniden America Corporation
Parts and Service Division
4700 Amon Carter Blvd.
Ft. Worth, TX 76155
1-800-554-3988, Monday through Friday
8 a.m. to 5 p.m. CST
Precautions!
Before you read anything else, please observe the following:

Warning! Uniden America Corporation DOES NOT represent this unit to be waterproof. To reduce the risk of fire, electrical shock, or damage to the unit, DO NOT expose this unit to rain or moisture.

Rechargeable Nickel-Metal-Hydride Battery Warning:

1. This equipment contains a rechargeable nickel-cadmium battery.
2. Cadmium is a chemical known to the State of California to cause cancer.
3. The rechargeable nickel-cadmium battery contained in this equipment may explode if disposed of in a fire.
4. Do not short-circuit the battery in any charger other than the one designed to charge this battery.
5. Exercise care in handling the battery in order not to short the battery terminals. Shorting the battery can cause personal injury, fires, and property damage.

Warning! Rechargeable Nickel-Cadmium Batteries Must Be Recycled or Disposed Of Properly:

- Uniden voluntarily participates in an RBRC® industry program to collect and recycle nickel-cadmium batteries at the end of their useful life.
- Through the RBRC® program, Uniden makes it easy for you to drop off the used battery at local retailers of replacement nickel-cadmium batteries. You may also contact your local recycling center for information on where to return the used battery. Please call 1-800-8-BATTERY for information on Ni-Cd battery recycling in your area.

Important Safety Instructions:

When using your telephone equipment, these basic safety precautions should always be followed to reduce the risk of fire, electrical shock, and injury to persons:

1. Read and understand all instructions.
2. Follow all warnings and instructions marked on the product.
3. Unplug this product from the wall outlet before cleaning. Use a dry cloth for cleaning without liquid or aerosol cleaners.
4. Do not use this product near water; for example, near a bathtub, wash bowl, kitchen sink or laundry tub, in a wet basement, or near a swimming pool.
5. Do not place this product on an unstable cart, stand, or table.
6. Slots and openings in the cabinet and the bottom are provided for ventilation. To protect the product from overheating, these openings must not be blocked or covered. This product should not be placed in a built-in installation unless proper ventilation is provided.
7. This product is associated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply in your home, consult your dealer or local power company.
8. Do not allow anything to rest on the power cord. Do not locate this product where the cord will be damaged by heat or sharp edges or corners, or where it will be in the reach of children.
9. Do not overload wall outlets and extension cords, as this can result in the risk of fire or electrical shock.
10. Never push objects of any kind into this product through cabinet slots, as they may touch dangerous voltage points or short out parts, which could result in a risk of fire or electric shock. Never spill liquid of any kind into this product.
11. To reduce the risk of electric shock, do not disassemble this product. Take it to qualified service personnel when service or repair work is required. Opening or removing covers may expose you to dangerous voltages or other risks. Incorrect reassembly can cause electric shock when the appliance is subsequently used.

Additional Battery Safety Precautions:

Caution! To reduce the risk of fire or injury to persons by the battery, read and follow these instructions:

1. Use only the Uniden battery pack specified in the owner’s manual.
2. Do not dispose of the battery pack in a fire. The cell may explode.
3. Do not open or mutilate the battery pack. Released electrolyte is corrosive and may cause damage to the eyes or skin. It may be toxic if swallowed.
4. Exercise care in handling the battery in order not to short the battery with conducting materials such as rings, bracelets, and keys. The battery or conductor may overheat and cause burns.
5. Change the battery pack provided with or identified for use with this product only in accordance with the instructions and limitations specified in the owner’s manual provided for this product.
6. Observe proper polarity orientation between the battery pack and charger.

SAVE THESE INSTRUCTIONS!

Important Electrical Considerations:

Unplug all electrical appliances when you know an electrical storm is approaching. Lightning can pass through your household wiring and damage any device connected to it. This phone is no exception.

The FCC Wants You To Know:

Changes or modifications to this product not expressly approved by Uniden, or operation of this product in any way other than as detailed by the owner’s manual, could void your authority to operate this product.

Note: You must not connect your phone to:

- coin-operated systems
- public-switched telephone networks
- party lines

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Range:

Your new phone is designed to achieve the maximum possible range by transmitting and receiving according to the highest specifications set forth by the FCC. We have rated this phone to operate at a maximum distance with the qualification that the range depends upon the environment in which the telephone is used. Many factors limit range, and it would be impossible to include all the variables in our rating. The Maximum Range rating of this phone is meant to be used as a means of comparison against other range claims.

ADDITIONAL INFORMATION

Additional Information

1. Charge the battery pack provided for ventilation. To protect the product from overheating, these openings must not be blocked or covered. This product should not be placed in a built-in installation unless proper ventilation is provided.
2. Be sure the battery is charged and replaced properly. Improper connections may cause damage to the battery or charger.
3. Do not place this product on an unstable cart, stand, or table.
4. If liquid has been spilled into the product, consult your local dealer.
5. Do not place this product near water; for example, near a bathtub, wash bowl, kitchen sink or laundry tub, in a wet basement, or near a swimming pool.
6. Slots and openings in the cabinet are provided for ventilation. To protect the product from overheating, these openings must not be blocked or covered. This product should not be placed in a built-in installation unless proper ventilation is provided.
7. This product is associated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply in your home, consult your dealer or local power company.
8. Do not allow anything to rest on the power cord. Do not overload wall outlets and extension cords, as this can result in the risk of fire or electrical shock.
9. Never touch the power cord or phone while you are standing on a wet floor. Do not use the phone during an electrical storm. There is a remote risk of electric shock from lightning.
11. To reduce the risk of electric shock, do not disassemble this product. Take it to qualified service personnel when service or repair work is required. Opening or removing covers may expose you to dangerous voltages or other risks. Incorrect reassembly can cause electric shock when the appliance is subsequently used.
12. Unplug this product from the wall outlet before cleaning. Use a dry cloth for cleaning without liquid or aerosol cleaners.
13. Do not use the telephone to report a gas leak in the vicinity of the leak.
Telephone Line Problems
The FCC has granted the telephone company the right to disconnect service in the event that your phone causes problems on the telephone line. Also, the telephone company may make changes in facilities and services which may affect the operation of your unit. However, your telephone company must give adequate notice in writing prior to such actions to allow you time for making necessary arrangements to continue uninterrupted service.

If you are having trouble with your telephone service, you must first disconnect your phone to determine if it is the cause of your problem. If you determine that it is the cause, you must leave it disconnected until the trouble has been corrected.

Radio Interference
Radio interference may occasionally cause buzzing and humming in your cordless handset, or clicking noises in the base. This interference is caused by electrical storms or power surges, and is beyond the control of your telephone company. In addition, we recommend that the base not be plugged into a modular jack located in an outside wall; these Jacks often are not properly grounded.

Selecting a Location
Before choosing a location for your new phone, there are some important guidelines you should consider: The location should be close to both a phone jack and continuous uninterrupted service. If you are having trouble with your telephone service, you must first disconnect your phone to determine if it is the cause of your problem. If you determine that it is the cause, you must leave it disconnected until the trouble has been corrected.

Installation Considerations
One Year Limited Warranty
The FCC has granted the telephone company the right to disconnect service in the event that your phone causes problems on the telephone line. Also, the telephone company may make changes in facilities and services which may affect the operation of your unit. Installation Considerations
Choosing a Location
Before choosing a location for your new phone, there are some important guidelines you should consider: The location should be close to both a phone jack and continuous uninterrupted service. If you are having trouble with your telephone service, you must first disconnect your phone to determine if it is the cause of your problem. If you determine that it is the cause, you must leave it disconnected until the trouble has been corrected.

Telephone Line Outlets
There are two types of phone outlets:

- Modular Jack
- Hardwired Jack

Modular Jack
New phone equipment available now uses modular jacks. Phone cords are fitted with a molded plastic connector which plugs into this type of jack. If you do not have modular phone jacks, contact your local telephone company for information about their installations.

Hardwired Jack
Some equipment is wired directly to a phone jack, and these types of installations require a modular jack converter. This type of installation is not difficult; however, you should contact your Uniden telephone dealer or a telephone supply store for advice about the proper adapter or converter for your particular situation.

Connecting the Telephone Cords
Consider these safety guidelines before connecting the telephone cords:

Caution:
- Make sure telephone wiring is de-energized before touching any telephone jack.
- Never install telephone wiring during a lightning storm.
- Never touch uninsulated telephone wires or terminals unless the telephone line has been disconnected at the network interface.
- Care should be exercised to assure that the telephone cord is not subject to damage.

Applying Power to the Base
This phone requires an AC outlet, without a switch to interrupt power, and the included AC adapter. To release stress on the DC plug when the phone is placed on a desk or table, wrap the power cord around the stand's relief switch on the back of the base.

NOTE: Place the power cord so that it does not create a trip hazard, or where it could become chafed and create a fire or other electrical hazards.

One Year Limited Warranty
WARRANTY: UNIDEN AMERICA CORPORATION (“Uniden”) warrants, for one year, to the original retail owner, this Uniden Product to be free from defects in materials and craftsmanship with only the limitations or exclusions set out below.

ELEMENTS OF WARRANTY: Uniden warrants, for one year, to the original retail owner, this Uniden Product to be free from defects in materials and craftsmanship with only the limitations or exclusions set out below.

WARRANTY DURATION: This warranty to the original user shall terminate and be of no further effect, 12 months after the date of original retail sale. The warranty is invalid if the Product is (A) damaged or not maintained as reasonable or necessary, (B) modified, altered, or used as part of any conversion kits, subassemblies, or any configurations not sold by Uniden, (C) improperly installed, (D) serviced by someone other than an authorized Uniden service center for a defect or modifications covered by this warranty, (E) used in any conjunction with equipment or parts or as part of any system not manufactured by Uniden, or (F) installed or programmed by anyone other than as detailed by the owner's manual for this product.

STATEMENT OF REMEDY: In the event that the product does not conform to this warranty at any time while this warranty is in effect, warrantor will either, at its option, repair or replace the defective unit and return it to you.

WARRANTOR: UNIDEN AMERICA CORPORATION
Parts and Service Division
4700 Amon Carter Blvd. Fort Worth, TX 76155

INFORMATION
ADDITIONAL INFORMATION [46]
I.C. Notice

TERMINAL EQUIPMENT

NOTICE: This equipment meets the applicable Industry Canada Terminal Equipment Technical Specifications. This is confirmed by the registration number. The abbreviation, IC, before the registration number signifies that registration was performed based on a Declaration of Conformity indicating that Industry Canada technical specifications were met. It does not imply that Industry Canada approved the equipment.

NOTICE: The Ringer Equivalence Number (REN) for this terminal equipment is marked on the equipment itself. The REN assigned to each terminal equipment provides an indication of the maximum number of terminals allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the Ringer Equivalence Numbers of all the devices does not exceed five.

RADIO EQUIPMENT

The term "IC:" before the radio certification number only signifies that Industry Canada technical specifications were met.

Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device. "Privacy of communications may not be ensured when using this telephone".

Remote Operation Card

Remote operation away from home:
1. Call your phone number from a touch-tone phone.
2. During the outgoing message, press 0 and enter your PIN code. The answering system announces the number of messages stored in memory and the voice prompts. The phone stands by for you to enter a command.
3. To quit, hang up the phone.

Turn on the answering system remotely:
1. Call your phone and let it ring 10 times until it answers.
2. Press 0 and enter your PIN code.
3. Press 0 then 5 to stop the announcement.
4. Press 0 then 6 to turn the answering system on.
