Important Safety Instructions

When using your telephone equipment, these basic safety precautions should always be followed to reduce the risk of fire, electrical shock, and injury to persons:

1. Read and understand all instructions.
2. Follow all warnings and instructions marked on the product.
3. Unplug this product from the wall outlet before cleaning, and use a dry cloth, without liquid or aerosol cleaners.
4. Do not use this product near water; for example, near a bath tub, wash bowl, kitchen sink or laundry tub, in a wet basement, or near a swimming pool.
5. Do not place this product on an unstable cart, stand, or table. The telephone may fall, causing serious damage to the unit.
6. Slots and openings in the cabinet and the back or bottom are provided for ventilation. To protect the product from overheating, these openings must not be blocked or covered. This product should never be placed near or over a radiator or heat register. This product should not be placed in a built-in installation unless proper ventilation is provided.
7. This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply to your home, consult your dealer or local power company.
8. Do not allow anything to rest on the power cord. Do not locate this product where the cord will be damaged by persons walking on it.
9. Do not overload wall outlets and extension cords, as this can result in the risk of fire or electrical shock.
10. Never push objects of any kind into this product through cabinet slots, as they may touch dangerous voltage points or short out parts that could result in a risk of fire or electric shock. Never spill liquid of any kind on the product.
11. To reduce the risk of electric shock, do not disassemble this product. Take it to qualified service personnel when service or repair work is required. Opening or removing covers may expose you to dangerous voltages or other risks. Incorrect reassembly can cause electric shock when the appliance is subsequently used.
12. Unplug this product from the wall outlet and refer servicing to qualified service personnel under the following conditions:
   A. When the power supply cord is damaged or frayed.
   B. If liquid has been spilled into the product.
   C. If the product has been exposed to rain or water.
   D. If the product does not operate normally when following the operating instructions. (Adjust only those controls that are covered by the operating instructions. Improper adjustment of other controls may result in damage and will often require extensive repair work by a qualified technician.)
   E. If the product has been dropped or the cabinet has been damaged.
   F. If the product exhibits a distinct change in performance.
13. Do not use the telephone to report a gas leak in the vicinity of the leak.
Battery Safety Precautions

Caution: To reduce the risk of fire or injury to persons by the battery, read and follow these instructions:

1. Use only the appropriate type and size Battery Pack specified in this Operating Guide.
2. Do not dispose of the Battery Pack in a fire. The cell may explode. Check the Nickel-Cadmium Battery Disposal package insert for disposal instructions.
3. Do not open or mutilate the Battery Pack. Released electrolyte is corrosive and may cause damage to the eyes or skin. It may be toxic if swallowed.
4. Exercise care in handling the battery in order not to short the battery with conducting materials such as rings, bracelets, and keys. The battery or conductor may overheat and cause burns.
5. Charge the Battery Pack provided with or identified for use with this product only in accordance with the instructions and limitations specified in the instruction manual provided for this product.
6. Observe proper polarity orientation between the Battery Pack and battery charger.

SAVE THESE INSTRUCTIONS
Introduction

Congratulations on your purchase of the Uniden **EXA915** Cordless Telephone. These phones are designed to exacting standards which provide reliability, long life, and outstanding performance.

**Features**

- 40 Channel 900 MHz operation
- Random Code™ Digital Security
- AutoTalk™
- UltraClear Plus
- AutoStandby™
- AutoSecure™
- Speakerphone
- Page/Find
- Pulse/Tone Dialing
- Base/Handset Volume Controls*
- 10-Number Memory
- Talk/Battery Low Indicator
- Redial/Flash
- 14 Day Battery Life
- Conference Mode

AutoTalk™ allows you to answer a call by just removing the Handset from the Base so you don’t have to waste time pushing buttons or flipping switches. AutoStandby™ allows you to hang up by simply returning the Handset to the Base.

The UltraClear Plus innovative technology, together with 40 different channels, virtually eliminates background noise and provides you with the best possible reception during all of your conversations.

To protect you against misbilled calls which might result from your phone being activated by other equipment, Random Code™ digital security automatically selects one of over 65 thousand digital security codes for the Handset and Base Units. Also, the AutoSecure™ feature electronically locks your phone when the Handset is in the Base.

To get the most from your phone, please read this Operating Guide thoroughly. Also be sure to complete the Product Registration form and mail it in.

Be sure to visit our Internet site at [http://www.uniden.com](http://www.uniden.com)!

*Handset Volume control not available on all models.
Included with the EXA915

If any of these items are missing or damaged, contact Uniden Customer Service at: (800) 297-1023, 8:00 am to 5:00 p.m. Central, Monday through Friday.

Important Electrical Considerations

Unplug all electrical appliances when you know an electrical storm is approaching. Lightning can pass through your household wiring and damage any device connected to it. This phone is no exception.

**Warning:** Please do not attempt to unplug any appliance during an electrical storm.

**Caution:** Changes or modifications to this product not expressly approved by Uniden, or operation of this product in any way other than as detailed by this Operating Guide, could void your authority to operate this product.

**Range**
Your new phone is designed to achieve the maximum possible range by transmitting and receiving according to the highest specifications set forth by the FCC. We have rated this phone to operate at a maximum distance with the qualification that the range depends upon the environment in which the telephone is used. Many factors limit range, and it would be impossible to include all the variables in our rating. The Maximum Range rating of this phone is meant to be used as a means of comparison against other range claims.

**Telephone Line Problems**
The FCC has granted the telephone company the right to disconnect service in the event that your phone causes problems on the telephone line. Also, the telephone company may make changes in facilities and services that may affect the operation of your unit. However, your telephone company must give adequate notice in writing prior to such actions to allow you time for making necessary arrangements to continue uninterrupted service.

If you are having trouble with your telephone service, you must first disconnect your phone to determine if it is the cause of your problem. If you determine that it is the cause, you must leave it disconnected until the trouble has been corrected.

**Radio Interference**
Radio interference may occasionally cause buzzing and humming in your cordless Handset, or clicking noises in the Base Unit. This interference is caused by external sources such as TV, refrigerator, vacuum cleaner, fluorescent lighting, or electrical storm. Your unit is NOT DEFECTIVE. If these noises continue and are too distracting, please check around your home to see what appliances may be causing the problem. In addition, we recommend that the Base not be plugged into a circuit that also powers a major appliance because of the potential for interference. Be certain that the antenna on the unit is fully extended when needed.

In the unlikely event that you consistently hear other voices or distracting transmissions on your phone, you may be receiving radio signals from another cordless telephone or other source of interference. If you cannot eliminate this type of interference, you need to change to a different channel.

Finally, it should be noted that some cordless telephones operate at frequencies that may cause interference to nearby TVs and VCRs. To minimize or prevent such interference, the base of the cordless telephone should not be placed near or on top of a TV or VCR. If interference is experienced, moving the cordless telephone farther away from the TV or VCR will often reduce or eliminate the interference.

**More Than One Cordless Telephone**
If you want to use more than one cordless telephone in your home, they must operate on different channels. Press the channel key to select a channel that provides the clearest communication.
Cordless Telephone Privacy

Cordless telephones are radio devices. Communications between the handset and base of your cordless telephone are accomplished by means of radio waves which are broadcast over the open airways. Because of the inherent physical properties of radio waves, your communications can be received by radio receiving devices other than your own cordless telephone unit. Consequently, any communications using your cordless telephone may not be private.
Installation

Selecting a Location
Before choosing a location for your new phone, there are some important guidelines you should consider:
➲ The location should be close to both a phone jack and continuous power outlet.

✽ A continuous power outlet is an AC outlet which does not have a switch to interrupt its power.
➲ Keep the Base Unit and Handset away from sources of electrical noise such as motors or fluorescent lighting.
➲ Be sure there is sufficient space to fully raise the Base Unit antenna.
➲ The Base Unit can be placed on a desk or tabletop or mounted on a standard AT&T or GTE wall plate.
➲ If you decide to mount your phone on the wall, make sure to change the Handset Retainer so that the tab which holds the Handset faces up. (See page 12 for more information.)
➲ You should charge your new phone for 15-20 hours before completing the installation or using the Handset.

Telephone Line Outlets
There are two types of phone outlets:

Modular Jack
Most phone equipment available now uses modular jacks. Phone cords are fitted with a molded plastic connector which plugs into this type of jack. If you do not have modular phone jacks, contact your local telephone company for information about their installation.

Hard-wired Jack
Some equipment is wired directly to a phone jack, and these types of installations require a modular jack converter. This type of installation is not difficult; however, you should contact your Uniden telephone dealer or a telephone supply store for advice about the proper adapter or converter for your particular situation.

Connecting the Telephone Cords
Consider these safety guidelines before connecting the telephone cords:
Caution!
➲ Never install telephone wiring during a lightning storm.
➲ Never touch uninsulated telephone wires or terminals unless the telephone line has been disconnected.
➲ Use caution when installing or modifying telephone lines.

Applying Power to the Base Unit
The EXA915 phone requires an AC outlet, without a switch to interrupt power, and the included AC Adapter. To relieve strain on the DC plug when the phone is placed on a desk or table, wrap the power cord around the convenient notch below.

 Asterisk: Place the power cord so that it does not create a trip hazard, or where it could become chafed and create a fire or other electrical hazards.

When power is applied for the first time, or after pushing the RESET button, a P may appear in the LED display. Press ➔ on the base to clear the display.
Desk or Table top Installation

1. Plug the AC Adapter cord into the 9V DC input jack on the Base Unit.

2. Place the AC Adapter cord around the strain relief.

3. Plug one end of the long telephone cord into the TEL LINE jack on the Base Unit.

4. Plug the other end of the cord into the telephone jack on the wall.

5. Plug the AC Adapter into a standard 120V AC wall outlet.

* Do not use an outlet controlled by a wall switch.

Use only the Uniden AC Adapter supplied with this phone.
Wall Installation

Standard Wall Plate Mounting

These phones are designed to be mounted on a standard AT&T or GTE wall plate.

1. Slide the wall mount stand into the notches at the top of the Base Unit.

Rotate the wall mount stand down and snap it into place.

2. Plug the AC Adapter into the Base Unit.

3. Wrap the AC Adapter cord around the strain relief on the Base Unit and place the AC Adapter cord inside the molded channel.

4. Plug one end of the telephone cord into the TEL LINE jack on the Base Unit.

5. Place the telephone cord inside the molded channel on the bottom of the Base Unit.

6. Then, plug the other end of the telephone cord into the modular jack on the wall.

7. Place the Base Unit on the posts of the wall plate and push down until it’s firmly seated.

8. Plug the AC Adapter into a standard 120V AC wall outlet.

9. Plug the AC Adapter into a standard 120V AC wall outlet.

* Do not use an outlet controlled by a wall switch.

⚠️ Use only the Uniden AC Adapter supplied with this phone.
Direct Wall Mounting

If you do not have a standard wall plate, you can mount your phone directly on a wall. Before mounting your phone, consider the following:

➲ Select a location away from electrical cables, pipes, or other items behind the mounting location that could cause a hazard when inserting screws into the wall.
➲ Make sure the wall material is capable of supporting the weight of the Base Unit and Handset.
➲ Use the supplied screws with anchoring devices suitable for the wall material where the Base Unit will be placed.

1. Insert two mounting screws 3-15/16 inches apart. Allow about 3/16 of an inch between the wall and screw heads for mounting the phone.

2. Plug the AC Adapter into the Base Unit.

3. Wrap the AC Adapter cord around the strain relief on the Base Unit and place the AC Adapter cord inside the molded channel.

4. Plug one end of the long telephone cord into the TEL LINE jack on the Base Unit.

5. Place the cord inside the molded channel on the bottom of the Base Unit.

6. Place the Base Unit on the screws and push down until it is firmly seated.

7. Plug the other end of the telephone line cord into the wall jack.
9. Plug the AC Adapter into a standard 120V AC wall outlet.
   ✴ Do not use an outlet controlled by a wall switch.

![Warning]

Use only the Uniden AC Adapter supplied with this phone.

### Setting the Handset Retainer

The Handset Retainer holds the Handset in place if your phone is mounted on a wall. The steps below describe removing and replacing the retainer so that the tab faces up.

1. Push up on the Handset Retainer on the Base Unit, and slide the tab out.

2. Flip the retainer over so the tab faces up.

3. Put the retainer back into its slot on the Base Unit. Push down on the Handset Retainer until it snaps into place.
Setting Up Your Phone

Raising the Antenna

Before using your phone, be sure to raise the antenna to the vertical position.

Installing the Handset Battery Pack

1. Press in on the battery cover release.

2. Slide the battery compartment cover down.

3. Align the plastic connector of the Nickel-Cadmium battery pack with its socket and plug it in.

   ✽ The black lead will be on the left when the plug is properly aligned.

4. Place the battery pack inside the battery compartment and slide the battery cover back on.

   ✽ The built-in Memory Backup feature allows up to 3 minutes to disconnect the old battery pack and install a new one without losing any numbers stored in memory.
The instructions for **Installing the Handset Battery Pack** are incorrect in your Operating Guide. Use ONLY the following instructions to install or replace the Handset Battery Pack in your EXA 915.

**Installing the Handset Battery Pack**

1. Press in on the Battery Cover release. Slide the battery compartment cover down.

2. Align the plastic connector of the Nickel-Cadmium battery pack with its socket and plug it in.
   
   **Note:** *The black lead will be on the right when the plug is properly aligned.*

3. Place the battery pack inside the battery compartment, and slide the battery cover back on.

   **Note:** *The built-in Memory Backup feature allows up to 3 minutes to disconnect the old battery pack and install a new one without losing any numbers stored in memory.*
**Cleaning the Battery Contacts**

To maintain a good charge, it is important to clean all charging contacts on the Handset and Base Unit about once a month. Use a pencil eraser or other contact cleaner. **Do not** use any liquids or solvents.
Charging the Battery Pack

Initial Battery Charging
The rechargeable Nickel-Cadmium battery pack must be fully charged before using your phone for the first time. We recommend that the battery pack charge for approximately 15-20 hours, without interruption, before plugging the phone line into your new phone.

1. Place the Handset on the Base Unit.
   — or —
   Hang the handset on the cradle when the phone is mounted on a wall.
   * Make sure to change the Handset Retainer before hanging up the phone.

2. Make sure the status LED lights. If the LED doesn’t light, check to see that the AC Adapter is plugged in, and that the Handset is making good contact with the Base Unit charging contacts.

Continuous Battery Charging
For the best battery performance, return the Handset to the Base Unit at the end of the day. This keeps the battery fully charged and avoids the battery “memory effect.”

Low Battery Indicator
When the Battery Pack in the Handset is very low and needs to be charged, the talk/batt low LED flashes.

If the talk/batt low LED begins to flash, the phone is programmed to limit its functions to save power. The table below describes what to do to return your phone to normal operation.

<table>
<thead>
<tr>
<th>DURING A CALL</th>
<th>IN STANDBY MODE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Only the talk button operates.</td>
<td>None of the buttons will operate.</td>
</tr>
<tr>
<td>The Handset beeps and the talk/batt low LED</td>
<td>The Handset talk/batt low LED flashes</td>
</tr>
<tr>
<td>flashes once every 3 seconds.</td>
<td>once every 3 seconds.</td>
</tr>
<tr>
<td>Complete your call as quickly as possible.</td>
<td>You will not be able to make a call.</td>
</tr>
<tr>
<td>Return the Handset to the Base Unit for charging.</td>
<td>Return the Handset to the Base Unit for</td>
</tr>
<tr>
<td></td>
<td>charging.</td>
</tr>
</tbody>
</table>

* Allow 15 to 20 hours without any interruption for the Handset to fully recharge.
**Battery Memory Effect**

Rechargeable batteries can develop a “memory effect” (reduced charge capacity) caused by repeated charge and discharge cycles. The battery life will seem to be shorter every time you use the unit.

**To Avoid Memory Effect**

At least once a month, operate the unit until the “Battery Low” indicator appears. Avoid “topping off” the charge after using the phone for a short time. Also, do not charge the Rechargeable Battery for extended periods of time.

**Setting the Pulse/Tone Switch**

Be sure the PULSE/TONE switch is in the **TONE** position.

*Most phone systems are Tone dialing. Check with your local phone company if you are not sure whether your system is Tone or Pulse dialing.*
Adjusting Ringer/Volume Controls

Handset Ringer Control
You can also select one of two different ringer tones for the Handset.

Press \[ \text{select} \] to select a different ringer tone when the phone is not in use.

Handset Volume Control
\* Not available on all models.
You can select one of two Handset volumes from the Handset.

Press \[ \text{vol} \].
Press \[ \text{vol}/\text{volume} \].
The earpiece volume changes from low to high, or high to low.

Base Volume Controls
To adjust the Base Unit ringer volume, move the \text{RING VOL-OFF LO HI} switch to the desired setting.

To adjust the Base speaker volume, press the \text{volume} control switch to achieve the desired setting.
**Automatic Digital Code Security**

To avoid unauthorized calls on your phone, a Digital Code feature was added to all EXA915 phones. This Digital Code is shared only between the Handset and Base Unit. The code is set automatically when you first use the phone.

**Changing the digital security code**

To change the Digital Code, be sure the Handset is on the Base, then:

1. Press `page/find` on the Base Unit.

2. After the Handset stops beeping, remove it from the Base Unit.

3. Wait 5 seconds then place the Handset on the Base Unit.

   The **status** LED will blink quickly, indicating that the code has changed.

**Restoring the digital security code**

If the Base Unit loses power while the Handset is off the Base, the Digital Code may be erased. When this happens, the Handset will not function. To reestablish communication between the Handset and Base Unit:

1. Restore power to the Base Unit.

2. Place the Handset back on the Base Unit.

3. The **status** LED will blink quickly, indicating that the Digital Code has been reset.
## Using Your Phone

### Making and Receiving Calls
The following features of the **EXA915** phone are different depending on the Handset's location when you make or receive a call.

<table>
<thead>
<tr>
<th><strong>HANDSET</strong></th>
<th><strong>BASE UNIT</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>ANSWER CALL</strong></td>
<td>Press <code>speaker</code> on the Base Unit.</td>
</tr>
<tr>
<td>Pick up Handset (AutoTalk)</td>
<td>If the Handset is off the Base:</td>
</tr>
<tr>
<td>- OR -</td>
<td>1) Pick up Handset.</td>
</tr>
<tr>
<td>If the Handset is off the Base:</td>
<td>2) Press <code>on</code></td>
</tr>
<tr>
<td>1) Pick up Handset.</td>
<td>3) Listen for dial tone.</td>
</tr>
<tr>
<td>2) Press <code>on</code></td>
<td>4) Dial the number.</td>
</tr>
</tbody>
</table>

### MAKE CALL
1) Pick up Handset.  
2) Press `on`.  
3) Listen for dial tone.  
4) Dial the number.  

**Note:** You must use the Handset to make a call.

### HANG UP
Press `on`.  
- OR -  
Return Handset to Base (AutoStandby).  

### REDIAL
1) Pickup Handset  
2) Press `on`.  
3) Listen for dial tone.  
4) Press `on`.  

**Note:** You must use the Handset to make a call.

* Sometimes when you press `on` to hang up the phone, you may get an error tone and the phone will not disconnect. If this happens, place the Handset on the Base Unit or press `on` again while holding the Handset close to the Base Unit.

### Changing Channels, Flash, and Page/Find
To change channels or access call waiting while the phone is in use, or to use the one-way page to locate the Handset, follow these steps:

<table>
<thead>
<tr>
<th><strong>HANDSET</strong></th>
<th><strong>BASE UNIT</strong></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>CHANGING CHANNELS</strong></td>
<td><strong>Note:</strong> You must use the Handset to change channels.</td>
</tr>
<tr>
<td>Press <code>chng</code></td>
<td><strong>Note:</strong> Change channels to help eliminate background noise.</td>
</tr>
<tr>
<td><strong>FLASH</strong></td>
<td><strong>Note:</strong> The Base Unit does not have <code>chng</code>. You must use the Handset for call waiting and to make a call.</td>
</tr>
<tr>
<td>If the call waiting tone sounds, press <code>chng</code> to accept the waiting call.</td>
<td></td>
</tr>
<tr>
<td>- OR -</td>
<td></td>
</tr>
<tr>
<td>If you have finished a call and want to make another call, press <code>chng</code> to hang up and get a dial tone.</td>
<td></td>
</tr>
<tr>
<td><strong>PAGE/FIND</strong></td>
<td><strong>Note:</strong> When <code>page/find</code> is pressed on the Base Unit, the Handset beeps.</td>
</tr>
<tr>
<td>Press <code>page/find</code> on the Base Unit to locate the Handset.</td>
<td></td>
</tr>
</tbody>
</table>
Conference Mode

Three way conversations can be held between the Handset, Base Unit, and another phone. Below is a chart showing how the third person can be added to your conversation, whether you are making the call, or answering the call.

<table>
<thead>
<tr>
<th></th>
<th>HANDSET</th>

</tr>
</tbody>
</table>
Programming Your Phone

For convenience, the Handset has ten memory locations so you can store the numbers you use most often in either place. Just remember that all programming functions must be completed when your phone is in the standby mode, since the programming keys do not function while you are on the phone.

Storing a Number in Memory

Use these keys to store a number in memory with the Handset.

** An error tone will sound and the programming procedure will be canceled if more than 20 seconds elapse between each keystroke entry or step.

1. Remove the Handset from the Base Unit.

2. Press "m".

   The talk/batt low LED blinks.

3. Enter the number you want to store (up to 16 digits).

4. If a pause is needed during dialing to access a long distance service, press "g".

   The "g" button counts as one digit and lasts four seconds. Pressing "g" more than once increases the length of the pause between numbers.

5. Press "m" again.

6. Enter the memory location (0-9).

   A tone indicates that the number is stored.
Storing a Mixed Number

If your phone is set up for Pulse dialing, you can store a mixed mode number so that you can easily access long distance services.

1. Remove Handset from the Base Unit.

2. Press \[\text{m}\].
   The \text{talk/batt low} LED blinks.

3. Enter the number to be dialed in pulse mode.

4. Press \[\text{m}\] on the Handset.

5. Enter the number to be dialed in tone mode.

6. If a pause is needed during dialing to access a long distance service, press \[\text{g}\].
   \* The \[\text{g}\] button counts as one digit and lasts four seconds. Pressing \[\text{g}\] more than once increases the length of the pause between numbers.

7. Press \[\text{m}\] again.

8. Enter the memory location (0-9).
   A tone indicates that the number is stored.
Dialing a Stored Number

To dial a number previously stored in memory, follow these steps:

1. Remove the Handset from the Base Unit.
2. Press \text{t}.
3. Press \text{m}.
4. Press the memory location number (0-9).

Chain Dialing

On certain occasions, after dialing a number, you may be requested by the party or service you are calling to enter a special access code, such as when performing a banking transaction. To do this, simply:

1. Store the access code into one of the memory numbers.
2. Dial the main number.
3. At the appropriate time, press \text{m} followed by the memory location where the access code is saved.
Erasing a Stored Number
To erase a number previously stored in a memory location (0-9), follow these steps:

1. Remove the Handset from the Base Unit.

2. Press twice.

3. Press the memory location number (0-9).

   A tone indicates the number is erased.

   An error tone will sound and the erase procedure will be canceled if more than 20 seconds elapse between each keystroke entry or step.
The Integrated Answering System

The **EXA915** has a built-in Answering System which answers incoming calls and records your messages. You can also use your new Answering System to record a conversation, leave a memo message for someone else who will use the phone, or to announce a special message when you’ll be away from your phone.

**Features**
- Digital Tapeless Recording
- About 20 Minutes Record Time
- Remote Operation from Handset
- Call Screening
- Selectable Outgoing Messages
- Automatic Calling Party Control
- Voice-Guided Help Menu
- Built in Flash Memory Backup
- Time and Day Stamp
- Toll Saver

Digital Tapeless Recording allows you to quickly review your messages, saving or deleting the messages you choose. You’ll never have to worry about a tape wearing out or resetting properly.

There is also a Voice-Guided Help Menu available when operating the remote keys from the Handset. By simply pressing one button, you can review all of the function keys on the Handset. You won’t have to worry about finding a quick reference card because help is really at your fingertips.

Your **EXA915** is an advanced, integrated system which offers you maximum flexibility, but **please read** through the sections that explain all of the features before using your Answering System.
Answering System Setup

Turning the Answering System On/Off

**Handset Operation**

1. To turn the Answering System on, press **remote**.
   
   The talk/batt low LED lights green. The current Time and Day Stamp and number of new messages recorded is announced in the Handset receiver.

2. Press **remote**.
   
   You will hear a tone in the Handset followed by the announcement: “Answering System on.”

3. Press **remote** again to return to Standby.
   
   The talk/batt low LED turns off.

4. To turn the Answering System off, press **remote**.
   
   The talk/batt low LED lights green. The current Time and Day Stamp and number of new messages recorded is announced on the Handset receiver.

5. Press **remote**.
   
   You will hear a tone in the Handset followed by the announcement: “Answering System off.”

6. Press **remote** again to return to Standby.
   
   The talk/batt low LED turns off.

**Base Operation**

1. To turn the Answering System on, press **answer**.
   
   A tone sounds, and the current outgoing message plays on the Base Unit speaker. A second tone sounds to indicate the unit is ready to answer calls, and the Message Counter LED turns on.

2. To turn the Answering System off, press **answer** again.
   
   A tone sounds and the Message Counter LED turns off.
Setting the Clock

The clock in your EXA915 Answering System starts when power is applied to the Base Unit. Follow these steps to set the clock to the correct time.

1. Press remote on the Handset.

   The talk/batt low LED lights green.

2. Press ☑.

   Then enter the number which corresponds to the day.

3. Enter the two-digit number for the hour (01-12) and the minute (00-59).

4. To set AM, press ☑.

   To set PM, press ☑.

   * A beep indicates the new time is programmed, and the new Time and Day Stamp is announced in the Handset receiver.

5. Press remote to return to Standby.

6. For example, to set Tuesday at 3:20 PM, press remote followed by these keys.

    * 3 20 3 20 0 0 0

   * Remember to press remote again to return to Standby.

Reviewing Time and Day Stamp

Handset Operation

1. Press \textit{remote} to hear the current Time and Day Stamp.

The Handset beeps and the Time and Day Stamp is announced, followed by the number of new messages stored in memory. The \textit{talk/batt low} LED lights green and the Handset beeps.

3. Press \textit{remote} again to return to Standby.
Setting Your Outgoing Message (OGM)

When you receive a call, the Answering System answers and automatically plays either a preset message or your personal Outgoing Message.

Preset Messages

The EXA915 has two messages programmed in its memory. If the REC TIME/ANN/4/1 switch is in either the four or one position, the first preset message below plays. Incoming messages are limited to four or one minute respectively. If the switch is set in the left position, (i.e., the “Announce Only” position) the second message below plays, and no incoming messages are recorded.

➲ Hello. No one is available to take your call. Please leave a message after the tone.
➲ Hello. No one is available to take your call.

If the REC TIME/ANN/4/1 switch is in the “Announce Only” position, the Message Counter LED displays an A when the system is in Standby. See number 21 on foldout.

Recording Your Personal OGM

Handset Operation

1. Press remote.
   The talk/batt low LED lights green.

2. Press .
   You can leave up to a 60-second outgoing message.

3. Press to stop recording.
   The message replays in the Handset receiver.

4. Press again to return to Standby.
   The talk/batt low LED turns off.

Base Operation

1. To record an outgoing message, press and hold ogm.
   Start recording your message after you hear the long tone and the Message Counter LED begins to count up.

2. Do not get closer than twelve inches from the microphone, and speak clearly while recording your message. When you are finished recording, release ogm.
   You hear a tone, and your message is played on the Base Unit speaker.

   You can leave up to a 60-second outgoing message.

EXA915 29
Selecting a Preset OGM

After you have recorded an outgoing message, you can set your Answering System to play either a preset message or your outgoing message.

1. Press ogm.

   Your recorded outgoing message will begin to play.

2. While your recorded outgoing message is playing, press ogm again.

   A tone will sound, and you hear the preset message “Hello. No one is available to take your call, please leave a message after the tone” on the Base Unit speaker. A second tone sounds after the preset message plays, and the Answering System automatically returns to Standby.

   If the REC TIME/ANN/4/1 switch is set to Announce Only, then the preset message “Hello. No one is available to take your call” is played.

3. To select your recorded message again, press ogm.

   The preset message will begin to play on the Base Unit speaker.

4. While the preset message is playing, press ogm again.

   A tone will sound, and your recorded message will play on the Base Unit speaker. A second tone sounds after your message plays, and the Answering System automatically returns to Standby.
VOX/Calling Party Control Feature

The Calling Party Control (CPC) feature automatically sets your Answering System to disconnect and reset if the caller hangs up before leaving a message. This prevents your Answering System from using recording time to record a hang up/dial tone message.

Setting the Toll Saver Switch

The Ring Number/Toll Saver switch allows you to set the number of rings the caller hears before your Answering System answers. You can set the switch to answer after 2 rings or after 4 rings. In the TS (Toll Saver) position, the Answering System answers after two rings if you have new messages recorded, and it answers after four rings if there are no new messages. So if you call long distance to check your messages, you can hang up after the second ring and not be billed.

Using the Reset Button

The **RESET** button is used to erase all recorded outgoing messages and any messages which are saved in memory. Pressing **RESET** does not erase your PIN (Personal Identification Number) code or the security code between the Handset and Base Unit.

When **RESET** is pressed, the Message Counter begins to flash. See “Applying Power to the Base Unit,” for instructions on returning the system to Standby.

The **RESET** button may also be used in the unlikely event that an AC power line disturbance causes the answering system to malfunction and become inoperative.
Using Your Answering System

Playing New Messages

Handset Operation

1. Press remote.
   The current Time
   and Day Stamp
   and number of
   new messages is
   announced.

2. Press .
   The time and day
   each message was
   received is
   announced after
   the message
   is played.
   ✽ If you want to
   stop reviewing your
   messages, press .

3. When all
   messages have
   played, a long tone
   sounds followed
   by the announcement
   “End of
   messages.”

4. Press remote to
   return to Standby.
   The talk/batt low LED
   goes off.

Base Operation

1. Press .
   The time and day
   each message was
   received is
   announced after
   the message is
   played, and the
   Message Counter
   LED displays the
   number of the
   message playing.
   ✽ If you want to stop reviewing your
   messages, press .

2. When all
   messages have
   played, a long
   tone sounds
   followed by the
   announcement
   “End of
   messages” plays.
   The message counter LED stops flashing,
   indicating that all of the new
   messages have been reviewed and
   stored.
Playing a Stored Message

Handset Operation

1. Press \texttt{remote}.

   The current Time and Day Stamp and number of new messages is announced.

2. Press \texttt{\textgreater}.

   The number of stored messages is announced, and the first message stored begins playing.

   The time and day each message was received is announced after the message is played.

   \textbullet{} If you want to stop reviewing your messages, press \texttt{\textgreater}.

3. When all messages have played, a long tone sounds followed by the announcement “End of messages” plays.

4. Press \texttt{remote} to return to Standby.

   The \texttt{talk/batt} low LED goes off.

Base Operation

1. Press \texttt{\textgreater}.

   The number of stored messages is announced.

2. When all messages have played, a long tone sounds followed by the announcement “End of messages” plays.

   \textbullet{} If you want to stop reviewing your messages, press \texttt{\textgreater}.
Repeating a Message

Handset Operation
1. Press remote.
   The current Time and Day Stamp and number of new messages is announced.

2. Press ▶ to review your messages.

3. Press ◀ at anytime to replay a message.

   * Pressing ◀ during a message returns the system to the beginning of that message.

   NOTE: You must wait at least one and a half seconds after the message begins to play to return to the beginning of that message. Pressing ◀ again before the message replays for at least one and a half seconds causes the system to scan back one message. If you have several messages, press ◀ until you return to the message you want replayed.

4. To return to Standby, press remote.
   The talk/batt low LED goes off.

Base Operation
1. Press ◄► to review your messages.
   The number of stored messages is announced.

2. Press ◀ after the message has played one and a half seconds to replay a message.

   * Pressing ◀ again before one and a half seconds of the message has played causes the system to scan back one message.

   If you have several messages, press ◀ until you return to the message you want replayed.

3. Press ◄► at anytime to stop reviewing messages and return to Standby.

   The Message Counter LED shows the total number of messages.

   * The system automatically returns to Standby when all messages play.
** Skipping a Message **

**Handset Operation**

1. Press remote.

   The current Time and Day Stamp and number of
   new messages is announced.

2. Press ▶ to review your messages.

3. Press ▶ at anytime to skip to the next message.

   ✽ Each time you press ▶, the system scans forward one
   message. If you have several messages, press ▶ until you get to
   the message you want to play.

4. To return to Standby, press remote.

   The talk/batt low LED goes off.

**Base Operation**

1. Press ◄► to review your messages.

   The number of stored messages is announced.

2. Press ▶ at anytime to skip to the next message.

   ✽ Each time ▶ is pressed, the system scans forward one message.
   If you have several messages, press ▶ until you get to the
   message you want to play.

3. Press ◄► at anytime to stop reviewing messages and return to
   Standby.

   The Message Counter LED shows the total number of messages.

   ✽ The system automatically returns to Standby when all messages play.
Deleting a Message

Handset Operation

1. Press \textit{remote}.

   The current Time and Day Stamp and number of new messages is announced.

2. Press \textit{\textgreater} to review your messages.

   \textbullet You can press \textit{\texthyphen} when you have received new messages.

3. If you decide to delete a message, press \textit{0} during the message.
   The system beeps and immediately goes to the next message.

   \textbullet When you press \textit{0}, you are deleting the message. Once deleted, the message cannot be replayed.

4. You will hear a long tone in the Handset, followed by the “End of messages” announcement.

   \textbullet The deletion announcement above depends on how many messages you delete during message replay.

Base Operation

1. Press \textit{\textbullet} to review your messages.

   \textbullet You can press \textit{\texthyphen} when you receive new messages.

2. If you decide to delete a message, press and release \textit{0} anytime during the message.

   The system beeps and immediately goes to the next message.

   \textbullet When you press \textit{0}, you are deleting the message. Once deleted, the message cannot be replayed.

3. You will hear a long tone on the Base speaker, followed by the “End of messages” announcement.
Deleting All Messages
You can delete all your messages without deleting each separate message. To delete all the messages, you must use the delete button on the Base Unit.

1. Press and hold 0.
   ✽ You must review all messages before using the “Delete All Messages” function.

2. You will hear three short tones, followed by a longer tone.
   ✽ If you release the delete button before all three short tones sound, the messages are not erased.

3. You hear an announcement such as “Two messages deleted” plays.
   ✽ The deletion announcement above depends on how many messages are stored in memory.

Message Full Indication
The EXA915 has a maximum record time of 25 minutes or up to 40 incoming messages. When the memory is full, the Answering System will not record incoming calls. To return the system to normal operation, follow these steps.

1. When the memory is full, the phone will ring 10 times before the announcement “No remaining time for incoming messages” plays.

2. You must review your messages and then delete some or all of the stored messages.
Voice-Guided Help Menu

If you are unsure of the commands available while using the Handset, you can use the Voice-Guided Help Menu. The Handset commands are reviewed for you on the Handset Receiver. To access the Help Menu, follow these steps.

1. Press remote.

   The current Time and Day Stamp and number of new messages is announced.

   The talk/batt low LED lights green.

2. Press ?.

   A tone sounds, and the Voice-Guided Menu begins to play.

3. There are two ways to exit the Help Menu — press ■ anytime during the review, - or - listen to all the options and wait for the system to automatically exit.

4. When you exit Help, you will hear a short tone every three seconds, indicating the system is in the Command Waiting Mode. Press another command, or press remote to return to Standby.

   You have 20 seconds to enter another command while in the Command Waiting Mode before the system automatically returns to Standby. When you return to Standby, the talk/batt low LED goes off.

Screening Incoming Calls

If you receive a call while your Answering System is on, you can listen to the incoming message on the Base Unit speaker. If you are away from the Base, you can use your Handset to screen incoming calls.

1. Press remote after the phone begins to ring and the talk/batt low LED lights green.

2. You can now listen to the outgoing message and incoming message on the Handset receiver. If you decide to answer the call, press talk.

3. When you finish the call, press talk to hang up.

   The talk/batt low LED goes off.
Leaving a Memo Message

You can use the **EXA915** to leave a Memo Message for someone else who uses your Answering System.

1. To record your Memo Message, press and hold **memo** until you hear a long tone and the Message Counter LED begins to count up.

   ![Image of a person pressing the memo button](image1)

2. Speak into the microphone. When you are finished recording, release the **memo** Button.

   ![Image of a person speaking into a microphone](image2)

   There is a tone, and the Message Counter begins to flash. The Message Counter LED shows the total number of messages stored in memory.

3. After you have recorded your message, the system returns to Standby.

   ![Image of a phone with a message counter LED](image3)

   ✽ If you have new or unplayed messages, the Message Counter LED on the Base Unit continues to flash.

   If all the messages have been reviewed, the Message Counter LED shows the number of messages stored but does not flash.

Recording a Telephone Conversation

To record a conversation during a call:

1. Press **remote**.

   ![Image of a remote control](image4)

   The **talk/batt low** LED changes from red to green, and the telephone sounds warning beeps to let the other party know that the call is being recorded.

2. To stop recording, press **remote** again.

   ![Image of a phone with a talk/batt low LED](image5)

   The **talk/batt low** LED changes from green back to red.

   ✽ A recorded call is like a message — if you use all of the available record time, the Recording function cancels automatically.
Remote Operation

You can operate your EXA915 while you’re away from home by calling from any touch-tone phone. When using this feature, remember these important guidelines.

➲ You should change your Personal Identification Number (PIN) before using your Handset.
   When you first apply power, the code is set to 00.
➲ The dialing keys on a touch-tone phone work the same as the function keys on your phone’s Handset except you must press # before selecting a command.
➲ You cannot change the Time and Day Stamp or your PIN code from a touch-tone phone.

Setting Your PIN Code

Using the Handset, you can set a personal two-digit code (00 to 99) for your PIN code. You must use your PIN code to access your Answering System from a touch-tone telephone.

1. Press remote.
   The current Time and Day Stamp and number of new messages is announced.
   The talk/batt low LED lights green.

2. Press On.

3. Press your two-digit code.
   For example, use 22 as the new PIN number.

4. Press on again.
   You will hear a long tone which indicates that the new code is saved.

5. Press remote again to return to Standby.
Using a Touch-Tone Phone

You can operate your Answering System using any touch-tone telephone. Use this function to check for recorded messages, play or delete messages, or even record a new outgoing message.

1. Call your telephone number.

2. During the outgoing message playback, press # followed by your PIN number.

   For example, use 22 as the new PIN number.

3. The Answering System announces the Time and Day Stamp followed by the number of new messages stored in memory.

4. You then hear intermittent beeps indicating that the system is in the Command Waiting Mode.

   You must enter a command within 20 seconds or the Answering System hangs up and returns to Standby.

5. Use this chart to select the function you want to use.

# Specifications

**General** – The EXA915 complies with FCC Rules, Parts 15 and 68.
- **Frequency Control**: Phase Locked Loop (PLL) Synthesizer
- **Modulation**: FM
- **Operating Temperature**: -10° to 50°C

### Base Unit
- **Transmit Frequency**: 925.994 to 927.952 MHz (40 channels)
- **Power Requirements**: 120V AC 60 Hz
- **Size**: 178 mm. (W) x 53.8 mm. (D) x 201 mm. (H)
- **Weight**: Approx. 558g.

### Handset
- **Transmit Frequency**: 902.078 to 904.030 MHz (40 channels)
- **Power Requirements**: Rechargeable Ni-Cd Battery Pack
- **Size (w/ antenna)**: 55 mm. (W) x 41 mm. (D) x 222 mm. (H)
- **Weight**: Approx. 209g (including battery)
- **Battery**
  - **Capacity**: 600 mAh, 3.6V
  - **Talk Mode**: 7 hours
  - **Standby Mode**: 14 days

### Answering System
- **Memory Type**: Digital Tapeless Recording
- **Memory Capacity**: Approx. 20 min. (40 messages)
- **Message Length**
  - 1 min. or 4 min. Incoming Message (max.)
  - 1 min. outgoing message (max.)

Specifications, Features, and availability of Optional Accessories are all subject to change without prior notice.
Precautions!
Before you read anything else, please observe the following:

WARNING!
Uniden America Corporation DOES NOT represent this unit to be waterproof. To reduce the risk of fire, electrical shock, or damage to the unit, DO NOT expose this unit to rain or moisture.

Rechargeable Nickel-Cadmium Battery Warning

- This equipment contains a Rechargeable Nickel-Cadmium Battery.
- Cadmium is a chemical known to the State of California to cause cancer.
- The Rechargeable Nickel-Cadmium Battery contained in this equipment may explode if disposed of in a fire.
- Do not short circuit the battery.
- Do not charge the Rechargeable Nickel-Cadmium Battery used in this equipment in any charger other than the one designed to charge this battery as specified in this Guide. Using another charger may damage the battery, or cause the battery to explode.

Rechargeable Nickel-Cadmium Batteries Must Be Recycled or Disposed of Properly

- Residents Of Minnesota should contact 1-800-225-PRBA for information concerning reclamation and disposal of Rechargeable Nickel-Cadmium batteries.
- Residents outside of Minnesota should contact their local authorities for information concerning reclamation and disposal of Rechargeable Nickel-Cadmium batteries.

**Important:** Evidence of original purchase is required for warranty service.

**WARRANTOR:** UNIDEN AMERICA CORPORATION ("Uniden")

**ELEMENTS OF WARRANTY:** Uniden warrants, for one year, to the original retail owner, this Uniden Product to be free from defects in materials and craftsmanship with only the limitations or exclusions set out below.

**WARRANTY DURATION:** This warranty to the original user shall terminate and be of no further effect 12 months after the date of original retail sale. The warranty is invalid if the Product is (A) damaged or not maintained as reasonable or necessary, (B) modified, altered, or used as part of any conversion kits, subassemblies, or any configurations not sold by Uniden, (C) improperly installed, (D) serviced or repaired by someone other than an authorized Uniden service center for a defect or malfunction covered by this warranty, (E) used in any conjunction with equipment or parts or as part of any system not manufactured by Uniden, or (F) installed or programmed by anyone other than as detailed by the Operating Guide for this product.

**STATEMENT OF REMEDY:** In the event that the product does not conform to this warranty at any time while this warranty is in effect, warrantor will repair the defect and return it to you without charge for parts, service, or any other cost (except shipping and handling) incurred by warrantor or its representatives in connection with the performance of this warranty. THE LIMITED WARRANTY SET FORTH ABOVE IS THE SOLE AND ENTIRE WARRANTY PERTAINING TO THE PRODUCT AND IS IN LIEU OF AND EXCLUDES ALL OTHER WARRANTIES OF ANY NATURE WHATSOEVER, WHETHER EXPRESS, IMPLIED OR ARISING BY OPERATION OF LAW, INCLUDING, BUT NOT LIMITED TO ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. THIS WARRANTY DOES NOT COVER OR PROVIDE FOR THE REIMBURSEMENT OR PAYMENT OF INCIDENTAL OR CONSEQUENTIAL DAMAGES. Some states do not allow this exclusion or limitation of incidental or consequential damages so the above limitation or exclusion may not apply to you.

**LEGAL REMEDIES:** This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. This warranty is void outside the United States of America.

**PROCEDURE FOR OBTAINING PERFORMANCE OF WARRANTY:** If, after following the instructions in this Operating Guide you are certain that the Product is defective, pack the Product carefully (preferably in its original packaging). Include evidence of original purchase and a note describing the defect that has caused you to return it. The Product should be shipped freight prepaid, by traceable means, or delivered, to warrantor at:

Uniden America Corporation  
Parts and Service Division  
4700 Amon Carter Boulevard  
Fort Worth, TX 76155
