To activate the Caller ID features, you must subscribe through your telephone company.

900 MHz CORDLESS

with digital answering system
caller id/call waiting

owner’s manual
Welcome

Congratulations on your purchase of the Uniden EXAI2980 series cordless telephone and answering system. This phone is designed and engineered to exacting standards for reliability, long life, and outstanding performance.

Note: Some illustrations in this manual may differ from the actual unit for explanation purpose.

Features

- 900 MHz Extended Range Technology
- 16 Digit, 3-line Backlit Display
- Integrated Telephone Answering Device (ITAD)
- Voice Prompted Guidance through ITAD Setup Menu
- 10 Number Memory Dialing
- Caller ID and Call Waiting Caller ID
- 30 Number Caller ID Memory
- 32 Digit Redial

The EXAI2980 series features include AutoTalk™ and AutoStandby™. AutoTalk allows you to answer a call by just removing the handset from the base so you don’t have to waste time pushing buttons or flipping switches. AutoStandby allows you to hang up by simply returning the handset to the base.

The UltraClear Plus™ true compander circuitry virtually eliminates background noise. This innovative technology, together with 40 different channels, provides you with the best possible reception during all your conversations.

To protect you against misbilled calls which might result from your phone being activated by other equipment, the EXAI2980 series has Random Code™ digital security which automatically selects one of over 65,000 digital security codes for the handset and base.

Also, the AutoSecure™ feature electronically locks your phone when the handset is in the base.

Be sure to visit our web site: www.uniden.com

Read this First

This cordless telephone must be set up before use. Follow these steps:

**Step 1 (page 5)**
Unpack the telephone and accessories.

**Step 2 (page 6 to 8)**
Next, choose the best location to set up the base unit.

**Step 3 (page 9 to 10)**
Then, insert the battery pack into the handset. Connect the base unit. You must charge the battery pack for **15-20 hours before plugging into telephone line and using the phone**.

**Step 4 (page 13 to 14)**
Finally, set the Caller ID options and store your area code in the memory to use the Caller ID service.

**Note:** Skip the area code setting if your calling area requires 10-digit dialing.

**About the digital security code**
This cordless telephone uses a digital security code to prevent unauthorized access to your base unit. This security code prevents other cordless handsets from making calls through your base unit. A random security code will be assigned automatically between your base unit and handset when you charge the battery pack for the first time. If you want to reset the security code, see page 47.
Checking the Package Contents

Make sure you have received the following items in the package. If any of these items are missing or damaged, contact the Uniden Parts Department.

- Base unit
- Handset
- AC adapter
- Rechargeable battery
- Telephone cord
- Wall Mount Adapter
- Belt clip

Also included:
- This Owner’s Manual
- Quick Reference Guide
- Precautions and Important Safety Instructions/Warranty Information
- Other printed Material

Uniden Parts Department at (800) 554-3988
Hours: M-F 7:00 a.m. to 5:00 p.m. CST. We can also be reached on the web at www.uniden.com
Setting up the Phone

**Do the following steps:**

A. Choose the best location  
B. Install the battery pack  
C. Connect the base unit  
D. Choose the dial mode

**A. Choose the best location**

Before choosing a location for your new phone, read the INSTALLATION CONSIDERATIONS included in the PRECAUTIONS AND IMPORTANT SAFETY INSTRUCTIONS brochure. Here are some important guidelines you should consider:

- Avoid heat sources, such as radiators, air ducts, and sunlight.
- Avoid noise sources such as a window by a street with heavy traffic.
- Avoid microwave ovens.
- Avoid excessive moisture, extremely low temperatures, dust, mechanical vibration, or shock.
- Avoid personal computers.
- Avoid other cordless telephones.
- Choose a central location.

- The location should be close to both a phone jack and a continuous power outlet which is not switchable.
- Keep the base and handset away from sources of electrical noise such as motors, microwave ovens, and fluorescent lighting.
- Be sure there is sufficient space to raise the base antenna to a vertical position.
- The base can be placed on a desk, tabletop, or mounted on a standard wall plate.
B. Install the battery pack

Charge the battery pack for at least 15-20 hours before plugging the telephone jack and start using your phone.

1) Press in on the battery cover release and slide the cover down until it comes off.

2) Connect the battery pack connector observing correct polarity (black and red wires) to the jack inside the battery compartment.

   Do not exert any force on this connection. It could cause damage to the battery or handset. Once you are certain that you have made a good connection, then insert the battery pack into the battery compartment. Do not pinch the wires.

3) Securely close the battery compartment cover by sliding it up until it snaps into place.

4) Place the handset on the base. Remove the beltclip, if attached, for face up charging.

---

**Note**

Use only the Uniden battery (BT-905) supplied with your phone. Replacement batteries are also available through the Uniden Parts Department (see page 5).
Battery use time (per charge)

From fully charged
- Seven hours continuous use.
- Fourteen days when the handset is in the standby mode.

Low battery alert

When the battery pack is very low and needs to be charged, the phone is programmed to eliminate functions in order to save power. If the phone is not in use, “Low Battery” appears on the LCD and none of the keys will operate.

If the phone is in use, “Low Battery” flashes and the handset beeps. Complete your conversation as quickly as possible and return the handset to the base unit for charging.

Cleaning the battery charging contacts

To maintain a good charge, it is important to clean the battery contacts on the handset and base unit with a dry cloth or a pencil eraser about once a month. Do not use any liquids or solvents.

**Note**

Even when the battery pack is not being used, it will gradually discharge over a long period of time. For optimum performance, be sure to return the handset to the base unit after each telephone call for charging the battery.

If you must replace the battery pack during a telephone call, complete the replacement within 30 seconds, and you may return to the caller.

**Note**

The last number dialed in the redial memory and the numbers stored in the memory locations are retained for up to 30 minutes while you replace the battery pack.
C. Connect the base unit

1) Connect the AC adapter to the **DC IN 9V** jack and a standard 120V AC wall outlet.

2) Set the base on a desk or tabletop, and place the handset on the base unit as shown. Remove the beltclip, if attached, for face up charging. (For wall mounting, see "Mounting the Base Unit on a Wall", on page 11.)

3) Raise the antenna to a vertical position.

4) Make sure the **status** LED lights. If the LED does not light, check to see that the AC adapter is plugged in and the handset makes good contact with the base charging contacts.

- Use only the supplied AD-420 AC adapter. Do not use any other AC adapter.
- Connect the AC adapter to a continuous power supply.
- Place the base unit close to the AC outlet so that you can unplug the AC adapter easily.
• After installing the battery pack in the handset, charge your handset at least 15-20 hours before plugging into the phone line. Once the handset battery pack is fully charged, connect the telephone line cord to the base and telephone wall outlet.

5) Connect the telephone line cord to the **TEL LINE** jack and a telephone outlet once the handset is fully charged.

- If your telephone outlet isn’t modular, contact your telephone company for assistance.

### D. Choose the dial mode
Most phone systems use tone dialing which sends DTMF tones through the phone line. However, some phone systems still use pulse dialing such as in rural areas. The default setting is tone dialing. Depending on your dialing system, set the mode as follows:

1) Press and hold **flash** until you hear a confirmation tone. The current setting appears next to Dial Mode.

2) To set the dial mode for pulse dialing, press **#**. Or to set the dial mode for tone dialing, press ** */tone**. A confirmation tone sounds to indicate the setting is complete.

- If you are not sure of your dialing system, set for tone dialing. Make a trial call. If the call connects, leave the setting as is, otherwise set for pulse dialing.
- If your phone system requires pulse dialing and you need to send DTMF tones for certain situations during a call, you may "switch-over" to tone dialing. (Refer to "Tone Dialing Switch-over" on page 17.)
Mounting the Base Unit on a Wall

**Setting the handset retainer clip for wall mounting**

1) On the base unit, pull the handset retainer clip out of the slot and rotate it clockwise 180 degrees.

2) Flip the retainer clip from front to back. Slide it back into the slot so that the lip of the retainer is up and the ▼ is down. The retainer holds the handset in place.

**Standard wall plate mounting**

This phone can be mounted on any standard wall plate.

1) Snap the wall mount adapter into the notches on the base.

2) Plug the AC adapter to the **DC IN 9V** jack.

3) Wrap the AC adapter cord inside the molded wiring channel as shown.

4) Plug the AC adapter into a standard 120V AC wall outlet.

5) Place the handset on the base and charge for 15-20 hours.

6) Plug the telephone line cord into the **TEL LINE** jack. Wrap the cord inside the molded wiring channel as shown.

7) Plug the telephone line cord into the telephone outlet.

---

**Note**

If you have wall mounted the base, you have to remove the beltclip to hang the handset with the display facing forward.

**DO NOT** use an outlet controlled by a wall switch.
8) Raise the antenna to a vertical position.

9) Align the mounting slots on the base with the mounting posts on the wall. Then push in and down until the phone is firmly seated.

**Direct wall mounting**

If you don’t have a standard wall plate, you can mount your phone directly to the wall. Before doing this, consider the following:

* Avoid electrical cables, pipes, or other items behind the mounting location that could cause a hazard when inserting screws into the wall.

* Try to mount your phone within 5 feet of a working phone jack to avoid excessive cord lengths.

* Make sure the wall material is capable of supporting the weight of the base and handset.

* Use #10 screws (minimum length of 1-3/8 inches) with anchoring devices suitable for the wall material where the base unit will be placed.

1) Insert two mounting screws into the wall, (with their appropriate anchoring device), 3-15/16 inches apart. Allow about 1/8 of an inch between the wall and screw heads for mounting the phone.

2) Set the retainer clip if necessary.

3) Refer to steps 1 through 9 on page 11 and 12 to mount the telephone.
Setting Caller ID Options

There are three Caller ID setup options available. They are AutoTalk, CIDCW (Caller ID on Call Waiting), and Area Code. See page 14 for Area Code setup instructions.

AutoTalk allows you to answer the phone without pressing the talk button. If the phone rings when AutoTalk is on, simply remove the handset from the base and the phone automatically answers the call. Or if the handset is not on the base, press any key to answer the call. If the phone rings when AutoTalk is off, you must press talk to answer the call.

To change your Caller ID options:

1) Press and hold call id. The following screen appears.

2) Use ▲ and ▼ or a number key (1-3) to move the pointer to the selection that you would like to change. Press select to toggle between “On” and “Off” for each setting.

3) After you have made your Caller ID selections, press call id and return the handset to the base.
Entering Your Area Code

If you enter a 3-digit area code number in the Area Code option, your local area code does not appear in Caller ID messages. Do not program this option, if your calling area requires 10-digit dialing.

When reviewing Caller ID messages, you will see only the local seven digit number. For calls received from outside your local area code, you will see a full 10-digit number.

1) When the phone is in the standby mode, press and hold call id. The Caller ID setting screen appears.

2) Press 3 to select “Area Code” or press ▼ twice.

3) Press select.

4) Use the number keys (0 to 9) to enter the 3-digit area code.

5) Press select. A tone sounds and the displayed area code is entered.

6) Press call id to complete the setting. Or return the handset to the base unit to complete the setting. The handset returns to the standby mode.

When the area code has already been stored in memory, the stored area code will be displayed. To change it, use the delete and number keys to enter the new area code. Then press select. A confirmation tone sounds. To complete the setting, press call id or return the handset to the base unit.

                        | 3) Press **redial/p**.                                               |

---

**Note:**
Refer to page 13 "Setting Caller ID Options" to turn on the AutoTalk feature if desired.
Adjusting the Handset Ringer and Earpiece Volume

Ringer tone and volume
When the phone is in standby mode, pressing the vol ▲ or ▼ key on the handset selects the handset ringer volume and tone. There are two ringer tones each with two volume levels. Continue pressing the volume keys to listen to all tones and volume levels. The phone keeps the last ringer tone and volume setting selected.

Earpiece volume
The handset earpiece volume settings (Low, Medium, High and Maximum) can only be adjusted during a call. (Talk Mode) Press vol ▲ or ▼ repeatedly to select Low, Medium, High, or Maximum. When you hang up, the phone keeps the last volume setting selected. As you increase or decrease the volume, your selection appears on the display.

Terminology
Throughout this manual, terms such as Standby and Talk Mode are used. Below is the terminology explanation.

- **Standby Mode** - The handset is not in use, off the base and talk has not been pressed. A dial tone is not present.
- **Talk Mode** - The handset is off the base and talk has been pressed enabling a dial tone.
Redial
The `redial/p` key redials the last number dialed. The redialed number can be up to 32 digits long.

Tone Dialing Switch-over
Some telephone companies use equipment that require pulse dialing (sometimes referred to as rotary dialing). If you need to enter tone dialing digits, you can switch-over to tone dialing during the call. An example of this could be entering your bank account number after you have called your bank. The digits of your bank account can be entered using DTMF tones.

Initially make your call with the pulse dialing mode. Once your call connects, press `*`/`tone` ▸. Enter the desired number (like in the example above, the bank account number). These digits will be sent as tone dialing. This special number can be stored in a memory location. This is referred to as Chain Dialing (See page 24). Once the call ends, the tone mode is canceled and pulse dialing resumes.

Traveling Out-of-Range
During a call, as you begin to move your handset too far from your base unit, noise increases. If you pass the range limits of the base unit, your call will terminate within 30 seconds.
Selecting a Different Channel

If you encounter interference while using your phone, you can manually change the phone’s channel for clear operation. Interference can come from appliances or other phones in your home. This function works only when the phone is in use.

During the course of a conversation, if you hear static or noise which makes it difficult to hear, press chan. "Scanning" appears on the display, indicating the phone is changing to another channel. For more information on interference, refer to "Technical Information" on page 54.

Page

To locate the handset (while it’s off the base), press page on the base. The handset beeps for 60 seconds.

Paging is canceled when pressing any handset key, page on when the base or the handset is returned to the base.

Flash and Call Waiting

If you have "Call Waiting" service and a call waiting tone sounds while you are on a call, press flash to accept the waiting call. There is a short pause, then you will hear the new caller. To return to the original caller, press flash again.

You must subscribe through your local telephone company to receive Call Waiting Service.
Storing Phone Numbers and Names

Memory Dialing allows you to dial a number using just a few key strokes. Your EXAI2980 series stores up to 10 names/numbers in the handset.

1) Press and hold \textit{m} until “Memory Store” is displayed.

2) Press $\uparrow$ and $\downarrow$ or enter a number (0 - 9) to select the memory location where you would like to store the number.

3) Press \textbf{select}. The following screen appears and a cursor flashes indicating that the display is ready for the name to be entered.

   If this screen appears, the selected memory location is already stored. Then you must either change the entry in this location, clear the entry in this location, or select “Go Back” to choose another location.

4) To enter a name (up to 14 characters), use number keys.
   - See the “Steps for Entering Names and Special Characters”.
     (See pages 21-22)
   - Use \# $\uparrow$ and */tone $\downarrow$ to move the cursor to the desired location.
   - Use \textbf{delete} to delete characters as needed.
   - Press and hold \textbf{delete} to delete all the characters.
   - If a name is not required, go to step 5.
5) Press **select**. "Store Number" is displayed. The cursor flashes indicating that the display is ready for the number to be entered.

6) Use the number keys to enter the phone number. The phone number cannot exceed 20 digits.
   - Use **redial/p** to enter pause in the dialing sequence. The display shows a "P". Each pause counts as one digit and represents a two second delay of time between the digits as they are sent.
   - Use **delete** to delete digits as needed.

7) Press **select**. The handset beeps and displays the confirmation screen. Memory storage is complete. For example, if you store a name and number into memory location number 7, the display shows "Memory 7 Stored". After about 2 seconds, "Memory Store" is displayed. Repeat steps 2 - 7 to store more numbers.

8) Press **m** to return to standby mode.
Steps for Entering Names and Special Characters

Refer to the letters on the number keys to select the desired characters. With each press of a numeric key, the displayed character appears in the following order: upper case letters first, lower case letters next, and finally the number corresponding to the key.

If you make a mistake while entering a name

Use */tone ← or #→ to move the cursor to the incorrect character, press delete to erase up to the wrong entry, then enter the correct character. To delete all characters, press and hold delete.
For example, to enter Uniden ;

1) Pick up the handset. Press and hold m.
2) Enter a number or press ▲, ▼ to select a memory location number.
3) Press select.
4) Press 8 twice.
5) Press 6 five times.
6) Press 4 six times.
7) Press 3 four times, then press #► to move the cursor to the right.

Note: If the next character uses the same number key, you must press #► to move the cursor over. Otherwise, the next time you press the number key, it changes the character that was previously set.

8) Press 3 five times.
9) Press 6 five times.
10) When finished, press select.

To continue to store the telephone number, proceed to step 6 on page 20.
Making Calls with Memory Dialing

Memory dialing from Standby Mode

1) Press \textit{m}.
   The handset displays your programmed memory locations.

2) Press \textup{▲} and \textup{▼} or enter a number (0 - 9) to select the memory location you would like to dial.

3) Press \textit{talk}. “Talk” and the volume setting appear on the display. Then the displayed number is dialed.

Display a programmed number

Use \#\,\textup{►} and \textasterisk��\textsl{tone} \,\textup{◄} to toggle between the names display and the numbers display.

<table>
<thead>
<tr>
<th>Program name</th>
<th>Program number</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 UNIDEN CORP</td>
<td>1 8002371023</td>
</tr>
<tr>
<td>2 JOHN DOE</td>
<td>2 5452930</td>
</tr>
<tr>
<td>3 MOM AND DAD</td>
<td>3 8175551212</td>
</tr>
</tbody>
</table>

When the stored phone number has 15 or more digits, “\textup{►}” is displayed next to the 13th digit. Press \#\,\textup{►} to see the extra digits and \textasterisk��\textsl{tone} \,\textup{◄} to return.

\begin{itemize}
  \item If you press \textit{select} before \textit{talk}, you can confirm the name and the number stored in the selected memory location.
  \item To exit the memory function without dialing, press \textit{m}. The handset returns to standby.
  \item Whenever you are using a menu screen, you must press a key within 20 seconds or the phone will return to standby.
\end{itemize}
Memory dialing from Talk Mode

1) Press *talk*. “Talk” and the volume setting appears.

2) Press *m*.

3) Enter a number (0 - 9) to select the memory location of the desired phone number. The selected phone number is displayed. Then the number is dialed.

4) To hang up, press *talk*.

Chain Dialing

The 10 memory locations on the handset are not limited to phone numbers. You may want to store in memory a group of numbers (up to 20 digits) that you need to enter once your call connects. This is referred to as Chain Dialing.

An example of this is a bank account number. Once you have called your bank, when you are prompted to enter the account number, simply press *m* and then the location where the special number has been stored.

Store your special number with identifying name in memory as you would a phone number. (Refer to "Storing Phone Numbers and Names" on page 19.) Enter a pause as necessary in the sequence.
A pause counts as one digit and represents a two second delay in time between digits as they are sent.
Editing a Stored Name and/or Phone Number

1) Press and hold \textit{m} until “Memory Store” is displayed.

2) Press ▲ and ▼ or enter a number (0 - 9) to select the memory location you would like to edit.

3) Press \textit{select}.
   The following screen appears with the memory location number that you have selected in the display.

4) Press ▲ or ▼ to select “Edit Memory”, then press \textit{select}.
   The following screen appears.
   The cursor flashes indicating that the display is ready for the name to be edited. When a name has not been stored, the cursor appears at the beginning of the second line.

5) Use the number keys, \textit{*tone} ◄, \textit{#} ►, or \textit{delete} to edit the name. (See page 19.)
   To edit only the phone number, skip this step.

6) Press \textit{select}. The following screen appears.
   The cursor flashes indicating that the display is ready for the number to be edited.

7) Use the number keys, \textit{redial/p} or \textit{delete} to edit the phone number.
   The phone number cannot exceed 20 digits. (See page 20.)
   If you don’t want to change the phone number, skip this step.
8) Press **select**. The handset beeps and displays the confirmation screen. The memory storage is complete. For example, if you store a name and number into memory location number 1, the display shows “**Memory 1 Stored**”. After about 2 seconds, “**Memory Store**” is displayed.

9) Press **m** to return to standby mode.
**Erasing a Stored Name and Phone Number**

1) Press and hold `m` until “Memory Store” is displayed.

2) Press ▲ and ▼ or enter a number (0 - 9) to select the memory location you would like to edit.

3) Press **select**.
   The following screen appears with the memory location number that you have selected in the display.

4) Press ▼ to move the pointer down to “Delete Memory”.

5) Press **select**. The following confirmation screen appears.

6) Press ▲ to move the pointer to “Yes”.

7) Press **select** or **delete**.
   The following screen appears.

8) After a few seconds the display returns to the “Memory Store” screen.
   You may delete the information in another memory location (return to step 2) or press `m` to return to standby.
Caller ID

You must subscribe to Caller ID service to use this feature.
When the telephone rings, the Caller ID feature allows you to view the caller’s name and phone number on the display before you answer the phone. The handset displays the phone number of the incoming call, the name, time, and the number of calls. Additionally, you can dial the displayed number and store the information for memory dialing.
Make sure you have turned on the Caller ID/Call Waiting feature. (See page 13.)

When the Telephone Rings

1) When the Caller ID message is received, the display shows the caller’s phone number along with the date and time. The incoming call information is stored in the Caller ID record. If the Caller ID service includes the caller’s name, the caller’s name appears on the display (up to 15 letters).

Here are some typical displays;

When the telephone number and name data are received

<table>
<thead>
<tr>
<th>Date and Time</th>
<th>Name</th>
<th>Phone Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>5/11 12:30PM 01</td>
<td>UNIDEN CORP</td>
<td>800-297-1023</td>
</tr>
</tbody>
</table>

When invalid data is received

<table>
<thead>
<tr>
<th>Date and Time</th>
<th>Information</th>
</tr>
</thead>
<tbody>
<tr>
<td>5/11 12:30PM 01</td>
<td>Incomplete Data</td>
</tr>
</tbody>
</table>

When a private name is received

<table>
<thead>
<tr>
<th>Date and Time</th>
<th>Name</th>
<th>Phone Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>5/11 12:30PM 01</td>
<td>Private Name</td>
<td>800-297-1023</td>
</tr>
</tbody>
</table>

When a private number is received

<table>
<thead>
<tr>
<th>Date and Time</th>
<th>Name</th>
<th>Phone Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>5/11 12:30PM 01</td>
<td>UNIDEN CORP</td>
<td>800-297-1023</td>
</tr>
</tbody>
</table>

- If you answer a call before the Caller ID message is received (Example: before the second ring), the Caller ID message will not appear.
- When the call is received via a telephone company that does not offer Caller ID service, the caller’s phone number and name do not appear. (This includes international calls.)
- When the call is via a private branch exchange (PBX), the caller’s phone number and name may not appear.
CALLER ID FEATURES

In Caller ID operation, if no key is pressed for more than 20 seconds, an error tone sounds and the telephone returns to the standby mode.

If a call comes in via a telephone system that does not offer Caller ID service, no information is stored.

Each message can be up to 15 characters for the phone number and the name.

**Calling the Caller ID Message List**

The Caller ID list stores information for up to 30 incoming calls - even unanswered calls.

1) Press **call id**.
   The summary screen appears.
   The screen shows the number of new messages and total messages.

2) Press ▼ to display the latest Caller ID message.

3) Press ▼ to see the next message. Or press ▲ to see previous message.

4) Press **call id** to return to standby.

**note**

- Data errors appear as “■”.

When an unknown name is received

<table>
<thead>
<tr>
<th>Date</th>
<th>Time</th>
<th>Name</th>
<th>Phone Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>5/11</td>
<td>12:30PM</td>
<td>Unknown Name</td>
<td>800-297-1023</td>
</tr>
</tbody>
</table>

When an unknown number is received

<table>
<thead>
<tr>
<th>Date</th>
<th>Time</th>
<th>Unknown Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>5/11</td>
<td>12:30PM</td>
<td>800-297-1023</td>
</tr>
</tbody>
</table>

2) When you pick up the phone, the display changes to “Talk”. (AutoTalk feature is set to on.)

**note**

- Call errors appear as “■”.

**Viewing the Caller ID Message List**

When an unknown name is received

<table>
<thead>
<tr>
<th>Date</th>
<th>Time</th>
<th>Name</th>
<th>Phone Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>5/11</td>
<td>12:30PM</td>
<td>Unknown Name</td>
<td>800-297-1023</td>
</tr>
</tbody>
</table>

When an unknown number is received

<table>
<thead>
<tr>
<th>Date</th>
<th>Time</th>
<th>Unknown Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>5/11</td>
<td>12:30PM</td>
<td>800-297-1023</td>
</tr>
</tbody>
</table>
Deleting Information from the Caller ID List

The EXAI2980 series stores up to 30 messages. If the phone receives the 31st message, the oldest one in the list is automatically deleted. Caller ID data can also be deleted manually.

Deleting a Caller ID message

1) Press **call id**. Display the message to be deleted from the Caller ID list by pressing ▲ or ▼.

2) Press **delete**.

3) Press ▲ or ▼ to select “**Yes**” or “**No**”.

4) Press **select** or **delete**.

   **When the pointer is at “**Yes**”:**
   A tone sounds and the Caller ID message is deleted.
   The next Caller ID message is then displayed.

   **When the pointer is at “**No”**: The display returns to the Caller ID message.

Deleting all Caller ID names/numbers

1) Press **call id**.

2) Press **delete**.
3) Press ▲ or ▼ to select “Yes” or “No”.

4) Press select or delete.

   When the pointer is at “Yes”:
   A tone sounds and all stored Caller ID messages are deleted.

   When the pointer is at “No”:
   The display returns to the summary screen.

Using the Caller ID List
Calling a party from the Caller ID list

You can place a call from the Caller ID list. The EXAI2980 series stores up to 30 messages.

1) Press call id. Select the phone number that you want to dial by pressing ▲ or ▼.

2) Press talk. The displayed phone number dials automatically.

Long Distance calls and Area Code Setting/Cancellation

Pressing 1 while the incoming Caller ID information is displayed (in step 1) will place the prefix “1” in the display to set up for a long distance call. Pressing 3 will set or cancel an area code setting.

Dial edit

You can temporarily edit the Caller ID number that is displayed by pressing select. A cursor appears in the display. Press delete to move the cursor left, make your changes, and then press talk. This will not change the number in the Caller ID list memory. If you want to save this new number, store the information in memory. (See page 32).

- You cannot make a call from the Caller ID list if your EXAI2980 series is connected to private branch exchange (PBX).

- When a long distance call has been set, “1” appears in the display.
Storing Caller ID messages in Memory dialing

Messages shown in the Caller ID list can be stored in memory dialing. Using the incoming call information (i.e., Caller ID list), the phone number of the party on the Caller ID list can be stored in memory.

1) Press **call id**.
   Select the phone number to be stored from the Caller ID list by pressing ▲ or ▼.

2) Press **m**.

3) Press ▲ and ▼ or enter a number (0 - 9) to select the memory location to be stored.

4) Press **select**.
   The number is stored in memory, and the display returns to the Caller ID list.

If a message has already been stored in the selected memory number location, a confirmation screen is displayed. Press ▲ to select “Yes”. Press **select** to overwrite. The display returns to the Caller ID list.
The Integrated Answering Device

The EXAI2980 series has a built-in answering system that answers and records incoming calls. You can also use your answering system to record a conversation, leave a voice memo message for others who use the phone, or to announce a special message to callers when you’re away from your phone.

Features

- Digital Tapeless Recording
- 15-20 minutes of Recording Time
- Call Screening
- Selectable Outgoing Messages
- Voice Prompt for Guidance
- Time and Day Announcement
- Remote Message Retrieval
- Toll Saver
- Conversation Recording
- Voice Memo

Digital Tapeless Recording allows you to quickly review, save, or delete the messages you choose. You will never have to worry about a tape wearing out, jamming, or resetting improperly.

The Integrated Answering System is easy and convenient to use, but please read through all of the instructions carefully.
Turning the Answering System On/Off

1) To turn the answering system on, press **ans on/off**. The current greeting message will be played and you will hear a tone. The message counter displays the number of messages stored in memory. If the display flashes, then there are new messages waiting for you.

2) To turn the answering system off, press **ans on/off** again. After the announcement "Answer off" the message counter display goes out.

Setting up Your Answering System

**Using the Menu Mode**

The Menu mode allows you to set the following Answering System functions.

- To scroll through the menu option, repeatedly press **menu**. The system returns to standby after the last menu option. A confirmation tone sounds to indicate Standby Mode.
- If any of the following occurs during menu setup, the handset returns to standby. Start over with menu function prior to the interruption.
  - Press **talk**
  - Press **play/stop**
  - 20 seconds lapse of time
- The idle time default setting is 20 seconds. If the handset remains idle for 20 seconds, a tone sounds and the system returns to standby.
- You can use volume ▲/▼ to adjust the announcement volume level during a voice prompt/guidance.
Setting Your Outgoing Message (Greeting)

When you receive a call, the answering system automatically plays either a preset message or your own greeting.

▼Preset message
The following message is prerecorded:
"Hello, no one is available to take your call. Please leave a message after the tone."

Note See "Selecting the message record time", page 40 how to set the announce only feature.

▼Recording a personal outgoing message (Greeting)
1) Press menu.
   You hear the announcement "Greeting message", and the message counter displays [---]. The current greeting message will be played on the base speaker.
2) Press voice memo/rec to start recording your message. Start your recording after the announcement "Record your greeting after the tone".
3) When you are finished recording your greeting, press voice memo/rec or play/stop.
   You hear a tone after your greeting plays back on the base speaker.

▼Choosing between the two outgoing messages
Press menu. Then press skip/ff or repeat/rew when the outgoing message is played. This switches between the two options. Press set to select the greeting of your choice. A confirmation tone is heard.

Note To delete the personal Greeting, press delete during the announcement and the system announces "Your greeting has been deleted".
**Setting the Time**

The clock on the EXAI2980 series answering system starts when power is applied to the base. Follow these steps to set the clock to the correct time.

1) Press **menu** twice.
   The system announces the current time. The message counter displays [--].

2) Press **set** to select the day.
   You hear the current day and the numbers [0] through [6] are displayed on the base.

3) Press **skip/ff** or **repeat/rew** until the correct day is announced.

4) Press **set** to select the day.

5) Press **skip/ff** or **repeat/rew** until you hear the correct hour setting. The numbers [1] through [12] are displayed on the base as each hour is announced.

---

**note**

- Normally the idle time for the menu mode is 20 seconds before the system returns to standby. However for setting the time, the idle time is extended to two minutes.

- Press and hold **skip/ff** or **repeat/rew** to quickly scroll through numbers on the display.
6) Press **set** to select the hour.

7) Press **skip/ff** or **repeat/rew** until you hear the correct minute setting. The numbers [00] through [59] are displayed on the base as each minute is announced.

8) Press **set** to select the minute.

9) Press **skip/ff** or **repeat/rew** until you hear the correct AM or PM setting.

   The message counter displays [A] or [P].

10) Press **set** to select the AM/PM.

The EXAI2980 series announces the time that you have set and the base LED displays [- - -]. To exit the menu mode, press **play/stop** if desired.

**Setting a Personal Security Code (PIN)**

To play your messages from a remote location, you will need to enter a two-digit Personal Identification Number (PIN) code (00-99). To select a PIN, perform the following steps:

1) Press **menu** three times. The current PIN code is announced as it is displayed on the base.

2) Press **set** to change the PIN code. The system announces current PIN code.

3) Press **skip/ff** or **repeat/rew** until the desired number appears.

4) Press **set** to select the PIN code. The system announces the new PIN code.

To exit the menu mode, press **play/stop** if desired.
Setting the base ringer volume

You have three ringer options. One allows you to turn the ringer off. The other two are volume levels.

1) Press **menu** four times.
   You hear the current ringer option ([**H**], High, [**L**o], Low, [**D**F], off), and it is displayed on the base.

2) Press **set**.

3) Press **skip/ff** or **repeat/rew** until the desired ringer option appears.

4) Press **set** to select the ringer option. The system announces new ringer volume.

To exit the menu mode, press **play/stop** if desired.

Adjusting the speaker volume level

Adjust the volume of the base speaker by pressing the **volume** keys on the base. Press ▲ for louder or ▼ for softer.

The numbers 0-9 are displayed on the base indicating the volume levels. 0 being the softest and 9 being the loudest.
Setting the ring time

The ring time setting allows you to set the number of rings the caller hears before your answering system plays the outgoing message. You can set the ring time to answer after two, four, or six rings. Setting **2S** (Toll Saver), the answering system picks up after two rings if you have new messages, and after four rings if there are none. This way, if you make a long distance call to check your messages, you can hang up after the second ring to avoid billing charges.

1) Press **menu** five times.

2) Press **set** to change the ring time.

3) Press **repeat/rew** or **skip/ff** until the desired ring time appears.

4) Press **set** to select the new ring time. The system announces the new ring time.
Selecting the message record time

You have three record time options. The options "1 minute", or "4 minutes" set the duration for recording the incoming messages. "Announce only" answers the call with the preset greeting or your personal greeting but prevents the caller from leaving a message.

1) Press menu six times.
   You hear the current recording time ([ ] 1 minute, [4] 4 minutes, [R] Announce only), and it is displayed on the base.

2) Press set to change the recording time.

3) Press repeat/rew or skip/ff until the desired time appears.

4) Press set to select the new recording time. The system announces new recording time.

▼Announce only feature

The announce only feature plays a prerecorded outgoing message or the previously set personal outgoing message, but it will not allow the caller to leave a message. To set "Announce only", follow the steps above.

To choose between the prerecorded message or your own personal greeting, press skip/ff or repeat/rew when the outgoing message is played. Press set to select the greeting of your choice. A confirmation tone sounds. If you want to use your own greeting, you may want to change your greeting to omit the prompt to leave a message. Refer to "Recording a personal outgoing message" (Greeting) on page 35.

The following message is prerecorded:
"Hello, no one is available to take your call. Please call again."
Using Your Answering System

The message counter displays the number of messages stored in memory. If the display flashes, then there are new messages waiting for you. The flashing number represents the number of new messages, not total messages. The EXAI2980 series is designed to play your new messages first. After you play all your new messages, you can then play your old messages.

When the answering system is full, FL is displayed on the base, and the system announces "No remaining time". You should delete some messages so that the system can record new messages.
(Refer to "Deleting a message" on page 43.)

Playing your messages

1) Press **play/stop**.
   The system announces the number of new and old messages and the LED displays the number of messages. The time and day that each message was received is announced after the message is played, and the message counter displays the number of the current messages.
   When all new messages have been played, you hear a beep. The system returns to standby.

2) After you have reviewed your new messages, you can play your old messages by again pressing **play/stop**. Once you have listened to a new message, it then becomes an old message. The old messages will then be played in the order in which they were received.
Repeating a Message

1) Press **play/stop** to review your messages. The number of stored messages are announced.

2) After a message has played for a few seconds, press **repeat/rew** to replay the message. If you have several messages, press **repeat/rew** repeatedly until you return to the message you want to replay.

3) Press **play/stop** at any time to stop reviewing your messages and return to standby. The message counter shows the number of messages stored in memory.

To scroll backward through the message more quickly, press and hold **repeat/rew**.

Skipping a message

1) Press **play/stop** to review your messages. The number of messages is announced.

2) Press **skip/ff** at anytime to skip to the next message. Each time **skip/ff** is pressed, the system scans forward one message. If you have several messages, press **skip/ff** to find the message you want to play.

3) Press **play/stop** at any time to stop reviewing your messages and return to standby. The message counter shows the number of messages stored in memory.

To scroll forward through the message more quickly, press and hold **skip/ff**.
Deleting a message

To maintain maximum record time, it is a good idea to delete the old messages.

1) Press **play/stop** to review your messages.

2) Press **delete** anytime during the message to delete the message.

3) You hear a beep and the message is deleted.
   To delete all messages, press **delete** after reviewing your messages. You hear a beep and the message is deleted followed by the announcement "Messages have been deleted".

When you try to delete all messages without first listening to your new messages, you hear several short beeps followed by an announcement "Please playback all messages". This protects you from accidentally erasing messages you have not heard yet.

Voice memo

The voice memo function allows the user to record messages (up to 10 minutes).

1) Press and hold **voice memo/rec**.
   You hear a beep. The message counter displays [ -- ].

2) Start your recording after the announcement "Record your message after the tone".

3) When you have finished, press **play/stop** or **voice memo/rec** to stop recording. The system returns to standby.
Recording a conversation

You can record up to 10 minutes of conversation while you are using your phone.

1) During a conversation from the handset, press and hold voice memo/rec. The unit begins recording and the message counter displays [ -- ].
   A beep that can be heard by both parties, sounds during recording.

   If you receive a call waiting tone while recording a conversation, press flash to accept the waiting call. The recording feature continues recording the new call. The original call is put on hold.

2) To stop recording, press play/stop or voice memo/rec.

Remote access away from home

You can operate your answering system from a remote location using any touch-tone telephone. Use this function to check for recorded messages, to play or delete messages, even to record a new greeting message.

1) Call your telephone number.

2) During the greeting message playbacks, press # and enter your PIN code. (See "Setting a Personal Security Code", page 37).

3) The answering system announces the number of messages stored in memory. You hear "To play incoming messages, press pound two. For help, press pound zero".

A recorded conversation is treated as a typical message and will be added to the stored messages.

When recording a conversation, all handset keys, except flash, are disabled. Stop recording if you need to enable any other handset keys.

For your convenience a remote operation cards are provided for you to use while away from home (located towards the back of this manual).
4) You may continue to listen to the Help Guidance, or you may select a command from the following chart:

<table>
<thead>
<tr>
<th>Command</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td># then 1</td>
<td>Repeat a Message</td>
</tr>
<tr>
<td># then 2</td>
<td>Playing your Messages</td>
</tr>
<tr>
<td># then 3</td>
<td>Skipping a Message</td>
</tr>
<tr>
<td># then 4</td>
<td>Deleting a Message</td>
</tr>
<tr>
<td># then 5</td>
<td>Stop Message Playback</td>
</tr>
<tr>
<td># then 6</td>
<td>Answering System On</td>
</tr>
<tr>
<td># then 7</td>
<td>Memo Record/Stop</td>
</tr>
<tr>
<td># then 8</td>
<td>Greeting Message Record/Stop</td>
</tr>
<tr>
<td># then 9</td>
<td>Answer System Off</td>
</tr>
<tr>
<td># then 0</td>
<td>Help Guidance</td>
</tr>
</tbody>
</table>

* For Memo Record and Greeting Message Record function, the first time you enter the corresponding command, it starts the Recording function. If you want to stop the recording, enter the command again.

5) After all of the Help Guidance menu has played, you hear intermittent beeps indicating that the system is in the command waiting mode. You may enter another command at this time from the chart above.

6) When you are finished, hang up to exit the system. The answering system automatically returns to standby.

**Note**

- You must enter a command within 15 seconds of entering command waiting mode or the answering system automatically hangs up and returns to standby.
- The system will only playback messages for four minutes and then it returns to command waiting mode. To continue playing your messages, press # then 2 again within 15 seconds.

---

THE INTEGRATED ANSWERING DEVICE  [ 45 ]
Turn on the answering system remotely

If you have forgotten to turn on your answering system, you can turn it on remotely from any touch-tone telephone.

1) Call your telephone number.

2) Wait ten rings until the system answers. You hear a beep.

3) Press # and then enter your PIN code. The answering system announces the number of messages stored in memory. You hear "To play incoming messages, press pound two. For help, press pound zero".

4) Press # then 6 to turn the answering system on.

5) Hang up the phone and subsequent calls will be answered by the system.
Changing the Digital Security Code

The digital security code is an identification code used to connect the handset and the base unit. Normally, setting the code is not necessary. The first time you charge your handset, the security code is automatically set. (See "About the digital security code", page 4.) In the rare situation that you suspect another cordless telephone is using the same security code, you can change the code.

1) Remove the handset from the base unit. Press and hold page on the base.

2) While the handset is emitting the paging sound, place the handset on the base unit holding page. The paging sound stops. Leave the handset on the base for more than 5 seconds or until flashing stops. A new random security code is set.

note

If the handset battery pack is completely discharged or the battery pack is removed, the digital security code will be lost. If this happens, a new security code is set automatically next time the battery pack is charged.
Installing the Beltclip

To attach the beltclip
Insert the beltclip into the holes on each side of the handset. Press down until it clicks.

To remove the beltclip
Pull both sides of the beltclip to release the tabs from the holes.

Headset Installation

Your phone may be used with an optional headset, the Uniden HS910. To use this feature, insert headset plug into the headset jack. Your phone is ready for hands-free conversations. (Headset may be purchased by calling the Uniden Parts Department or visiting the web site. See Page 5.)
Note on Power Sources

Battery replacement and handling
When the operating time becomes short, even after a battery is recharged, please replace the battery.
With normal usage, your battery should last about one year.
Please contact your place of purchase or the Uniden Parts Department for a replacement battery.

Power Failure
During the period that the power is off, you will not be able to make or receive calls with the telephone.

Maintenance

When slightly dirty
Wipe with a soft, dry cloth.

When very dirty
Wipe with a soft cloth that has been dampened with diluted, neutral detergent. Dry with a dry cloth.

When the charging terminals become dirty
Wipe with a dry cloth or a pencil eraser, if necessary.

Caution
- Use the specified battery pack.
- Do not remove the battery from the handset to charge it.
- Never throw the battery into a fire, disassemble it, or heat it.
- Do not remove or damage the battery casing.

Power Failure
During the period that the power is off, you will not be able to make or receive calls with the telephone.

Caution
- Do not use paint thinner, benzene, alcohol, or other chemical products.
- Doing so may discolor the surface of the telephone and damage the finish.

RECYCLING NICKEL-CADMIUM BATTERIES

Nickel-cadmium cells are used in the battery pack. Please take your used nickel-cadmium battery packs to a store that recycles nickel-cadmium batteries.
# Troubleshooting

If your phone is not performing to your expectations, please try these simple steps first.

<table>
<thead>
<tr>

| Cannot access remote call-in features from another touch-tone phone.   | • Make sure you’re using the correct PIN code.  
• Make sure that the touch-tone phone you’re using can transmit the tone for at least two seconds. If it cannot, you may have to use another phone to access your messages. |
General Information

The phone complies with FCC Parts 15 and 68.
Operating temperature: 0° to 50°C (+32°F to +122°F)

AC Adapter Information
AC Adapter part number: AD-420
Input Voltage: 120V AC 60Hz
Output Voltage: 9V AC 350 mA

Battery Information
Battery part number: BT-905
Capacity: 600 mAH, 3.6V
Battery use time (per charge)
From fully charged
Talk mode duration: 7 hours
Standby mode duration: 14 days

Note: If the handset is left off of the base, the actual Talk mode duration will be reduced respective to the amount of time the handset is off the base.

Recharge your phone on a regular basis by returning the handset to the base after each phone call. When the operating time becomes short, even after the battery is recharged, please replace the battery. With normal usage, the battery should last about one year.

Replacement batteries may be purchased at your local Uniden dealer or by contacting the Uniden Parts Department (800) 554-3988. Hours are from 7:00 a.m. to 5:00 p.m. Central Time, Monday through Friday. We can also be reached on the web at www.uniden.com

Specifications, features, and availability of optional accessories are all subject to change without prior notice.
Technical Information

The FCC wants you to know!
Changes or modifications to this product not expressly approved by Uniden, or operation of this product in any way other than as detailed by the owner’s manual, could void your authority to operate this product. The equipment cannot be used on public coin phone service provided by the telephone company. Connection to party line service is subject to state tariffs. (Contact the state public utility commission, public service commission or corporation commission for information.)

Below is some information that might concern you while using your new phone.

Range
Your new phone is designed to achieve the maximum possible range by transmitting and receiving according to the highest specifications set forth by the FCC. We have rated this phone to operate at a maximum distance with the qualification that the range depends upon the environment in which the telephone is used. Many factors limit range, and it would be impossible to include all the variables in our rating. The Maximum Range rating of this phone is meant to be used as a means of comparison against other range claims.

Telephone Line Problems
The FCC has granted the telephone company the right to disconnect service in the event that your phone causes problems on the telephone line. Also, the telephone company may make changes in facilities and services which may affect the operation of your unit. However, your telephone company must give adequate notice in writing prior to such actions to allow you time for making necessary arrangements to continue uninterrupted service.

If you are having trouble with your telephone service, you must first disconnect your phone to determine if it is the cause of your problem. If you determine that it is the cause, you must leave it disconnected until the trouble has been corrected.

Radio Interference
Radio interference may occasionally cause buzzing and humming in your cordless handset, or clicking noises in the base. This interference is caused by external sources such as TV, refrigerator, vacuum cleaner, fluorescent lighting, or electrical storm. Your unit is NOT DEFECTIVE. If these noises continue and are too distracting, please check around your home to see what appliances may be causing the
problem. In addition, we recommend that the base not be plugged into a circuit that also powers a major appliance because of the potential for interference. Be certain that the antenna on the unit is fully extended when needed.

In the unlikely event that you consistently hear other voices or distracting transmissions on your phone, you may be receiving radio signals from another cordless telephone or other source of interference. If you cannot eliminate this type of interference, you need to change to a different channel.

Finally, it should be noted that some cordless telephones operate at frequencies that may cause interference to nearby TVs and VCRs. To minimize or prevent such interference, the base of the cordless telephone should not be placed near or on top of a TV or VCR. If interference is experienced, moving the cordless telephone farther away from the TV or VCR will often reduce or eliminate the interference.

More Than One Cordless Telephone
If you want to use more than one cordless telephone in your home, they must operate on different channels. Press the channel key to select a channel that provides the clearest communication.

Cordless Telephone Privacy
Cordless telephones are radio devices. Communications between the handset and base of your cordless telephone are accomplished by means of radio waves which are broadcasted over the open airways. Because of the inherent physical properties of radio waves, your communications can be received by radio receiving devices other than your own cordless telephone unit. Consequently, any communications using your cordless telephone may not be private.

Remote Operation Card

Remote access away from home
1. Call your phone number from a touch-tone phone.
2. During the outgoing message, press # and enter your PIN code. The answering system announces the number of messages stored in memory and the help guidance. The phone stands by for you to enter a command.

3. To quit, hang up the phone.

Turn on the answering system remotely
1. Call your phone and let it ring 10 times until it answers.
2. Enter your PIN code.
3. Press # then 5 to stop the announcement.
4. Press # then 6 to turn the answering system on.

Remote access away from home
1. Call your phone number from a touch-tone phone.
