Congratulations on your purchase of the Uniden EXI2246 series cordless telephone. This phone is designed and engineered to exacting standards for reliability, long life, and outstanding performance.

Note: Some illustrations in this manual may differ from the actual unit for explanation purpose. The color of your cordless phone may vary.

As an ENERGY STAR® Partner, Uniden has determined that this product or product models meets the ENERGY STAR® guidelines for energy efficiency. ENERGY STAR® is a U.S. registered mark.

Features

- 2.4 GHz Extended Range Technology
- 3 Line Backlit Display
- Caller ID and Call Waiting Caller ID
- RocketDial
- 10 Number Memory Dialing
- Face Up/Down Charging
- 32 Digit Redial
- Flash and Pause
- English or French Display Option
- Tone/Pulse Dialing
- Page/Find handset
- 7 Hour Talk Time/14 Day Standby Time
- Handset Earpiece and Ringer Volume Control
- Hearing Aid Compatible
- 20 Channel Autoscan

The EXI2246 series features include AutoTalk™ and AutoStandby™. AutoTalk allows you to answer a call by just removing the handset from the base so you don't have to waste time pushing buttons. AutoStandby allows you to hang up by simply returning the handset to the base.

The UltraClear Plus™ true compander circuitry virtually eliminates background noise. This innovative technology, together with 20 different channels, provides you with the best possible reception during all your conversations.

To protect you against misbilled calls which might result from your phone being activated by other equipment, the EXI2246 series has Random Code™ digital security which automatically selects one of approx. 260,000 digital security codes for the handset and base. Also, the AutoSecure™ feature electronically locks your phone when the handset is in the base.

RocketDial™ is a one touch speed dial key that automatically dials your most important or frequently called number. The number dialed, is a preset number stored by the user.

Be sure to visit our web site: www.uniden.com

Step 1  Charging the Battery

TO INSTALL THE HANDSET BATTERY

1. Remove the cover.
2. Connect the battery pack connector with the correct polarity.
3. Replace the cover.

TO PLUG INTO AC POWER

1. Plug AC adapter cord into the base unit and then into a 120V AC outlet.
2. Place the handset on the base.

Note: You must charge the battery continuously for 15 - 20 hours before using the phone.

Step 2  Connecting

CONNECT TO A PHONE LINE

When the handset battery pack is fully charged, after 15-20 hours of charging, plug the telephone cord into the base unit and then into a telephone wall jack.

Your phone is set for tone dialing. If your local network requires pulse dialing, please see “Choose the dialing mode” on page 15.

1. Press and hold call id/menu.
2. Press or to move the pointer to an option.
3. Press select to change the option setting.
4. Press end and return the handset to the base.

Step 3  Setting Up the Caller ID/Language

TO CHANGE CALLER ID OPTIONS

1. Press and hold call id/menu.
2. Press or to move the pointer to the base.
3. Press select to select En (English) or Fr (French).
4. Press end and return the handset to the base.

Note: Three Caller ID options are available: AutoTalk, Caller ID on Call Waiting (CIDCW), and Area Code.

TO CHOOSE THE LANGUAGE

1. Press and hold call id/menu.
2. Press or to move the pointer to Language.
3. Press select to select En (English) or Fr (French).
4. Press end and return the handset to the base.
Controls and Functions

1. Handset antenna
2. Beltclip holes
3. Optional headset jack
4. Handset battery compartment
5. Handset earpiece
6. LCD display
7. Caller ID/menu key
8. Talk/flash key
9. */tone/left cursor ( < ) key
10. Redial/pause ( p ) key
11. Select key
12. Handset microphone and ringer speaker
13. Volume up ( A ) key
14. RocketDial key
15. End key
16. Volume down ( V ) key
17. #/right cursor ( > ) key
18. Memory key
19. Delete/channel ( ch ) key
20. Handset charging contacts
21. Status LED
22. Find handset key
23. Base charging contacts
24. DC IN 9V jack
25. Telephone line jack
Read this First

This cordless telephone must be set up before use. Follow these steps:

**Step 1 (page 7)**
Unpack the telephone and accessories.

**Step 2 (page 8)**
Next, choose the best location to set up the base unit.

**Step 3 (page 9 to 11)**
Then, insert the battery pack into the handset. Connect the base unit. You must charge the battery pack for **15-20 hours before plugging into the telephone line and using the phone.**

**About the digital security code**
This cordless telephone uses a digital security code to prevent unauthorized access to your base unit. This security code prevents other cordless handset from making calls through your base unit.
A random security code will be assigned automatically between your base unit and handset when you charge the battery pack for the first time.
If you want to reset the security code, see page 38.
Checking the Package Contents

Make sure you have received the following items in the package. If any of these items are missing or damaged, contact the Uniden Parts Department.

- Base unit
- Handset
- AC adapter
- Rechargeable battery
- Telephone cord
- Beltclip
- This Owner’s Manual
- Other Printed Material

Uniden Parts Department at (800) 554-3988
Hours: M-F 7:00 a.m. to 5:00 p.m. CST. We can also be reached on the web at www.uniden.com
Setting up the Phone

Do the following steps:
A. Choose the best location
B. Install the battery pack
C. Connect the base unit

A. Choose the best location

Before choosing a location for your new phone, read the INSTALLATION CONSIDERATIONS included in the PRECAUTIONS AND IMPORTANT SAFETY INSTRUCTIONS brochure. Here are some important guidelines you should consider:

- The location should be close to both a phone jack and a continuous power outlet which is not switchable.
- Keep the base and handset away from sources of electrical noise such as motors, microwave ovens, and fluorescent lighting.
- Be sure there is sufficient space to raise the base antenna to a vertical position.
- The base can be placed on a desk, tabletop, or mounted on a standard wall plate.
B. Install the battery pack
Charge the battery pack for at least 15-20 hours before plugging the phone line into your phone.

1) Press in on the battery cover release and slide the cover down until it comes off.

2) Connect the battery pack connector observing correct polarity (black and red wires) to the jack inside the battery compartment.

Do not exert any force on this connection. It could cause damage to the battery or to the handset. The plastic connectors will fit together in only one way. Once you are certain that you have made a good connection, then insert the battery pack into the battery compartment. Do not pinch the wires.

3) Securely close the battery compartment cover by sliding it up until it snaps into place.

4) Place the handset on the base.
Even when the battery pack is not being used, it will gradually discharge over a long period of time. For optimum performance, be sure to return the handset to the base unit after a telephone call.

**Battery use time (per charge)**

From fully charged (15-20 hours charge time)
- Seven hours continuous use
- Fourteen days when the handset is in the standby mode

**Low Battery Alert**

When the battery pack is very low and needs to be charged, the phone is programmed to eliminate functions in order to save power. If the phone is not in use, "Low Battery" appears on the LCD and none of the keys will operate.

If the phone is in use, "Low Battery" flashes and the handset beeps. Complete your conversation as quickly as possible and return the handset to the base unit for charging.

The last number dialed in the redial memory, the names and the numbers stored in the memory locations are retained for up to 30 minutes while you replace the battery pack.

**Cleaning the Battery Charging Contacts**

To maintain a good charge, it is important to clean the battery contacts on the handset and base unit with a dry cloth or a pencil eraser about once a month. Do not use any liquids or solvents.
C. Connect the base unit

1) Connect the AC adapter to the DC IN 9V jack and to a standard 120V AC wall outlet.

2) Set the base on a desk or tabletop, and place the handset on the base unit.

3) Make sure that the status LED illuminates. If the LED does not illuminate, check to see that the AC adapter is plugged in and that the handset makes good contact with the base charging contacts.

- Use only the supplied AD-310 AC adapter. Do not use any other AC adapter.
- Connect the AC adapter to a continuous power supply.
- Place the base unit close to the AC outlet so that you can unplug the AC adapter easily.

• After installing the battery pack in the handset, charge your handset at least 15-20 hours before plugging into the phone line. Once the handset battery pack is fully charged, connect the telephone line cord to the base and telephone wall outlet.

4) Connect the telephone line cord to the TEL LINE jack and to a telephone outlet once the handset is fully charged.

- If your telephone outlet isn’t modular, contact your telephone company for assistance.

The handset can be placed face up or face down in the base for charging.
Mounting the Base Unit on a Wall

**Standard wall plate mounting**

This phone can be mounted on any standard wall plate.

1) Plug the AC adapter into the **DC IN 9V** jack.

2) Wrap the AC adapter cord inside the molded wiring channel as shown.

3) Plug the AC adapter into a standard 120V AC wall outlet.

4) Plug the telephone line cord into the **TEL LINE** jack. Wrap the cord inside the molded wiring channel as shown.

5) Plug the telephone line cord into the telephone outlet.

6) Raise the antenna to a vertical position.

7) Align the mounting slots on the base with the mounting posts on the wall. Then push in and down until the phone is firmly seated.

---

**DO NOT use an AC outlet controlled by a wall switch.**
Direct wall mounting

If you don't have a standard wall plate, you can mount your phone directly to the wall. Before doing this, consider the following:

• Avoid electrical cables, pipes, or other items behind the mounting location that could cause a hazard when inserting screws into the wall.
• Try to mount your phone within 5 feet of a working phone jack to avoid excessive lengths.
• Make sure the wall material is capable of supporting the weight of the base and handset.
• Use #10 screws (minimum length of 1-3/8 inches) with anchoring devices suitable for the wall material where the base unit will be placed.

1) Insert two mounting screws into the wall, (with their appropriate anchoring device), 3-15/16 inches apart. Allow about 1/8 of an inch between the wall and screw heads for mounting the phone.

2) Refer to steps 1 through 6 on page 12 to mount the telephone.

Terminology

Throughout this manual, terms such as Standby and Talk Mode are used. Below is the terminology explanation.

• **Standby Mode** - The handset is not in use, off the base, and talk/flash has not been pressed. A dial tone is not present.
• **Talk Mode** - The handset is off the base and talk/flash has been pressed enabling a dial tone.
Setting Menu Options

There are five setup options available. They are Caller ID options [AutoTalk, CIDCW (Caller ID on Call Waiting), Area Code], Dial Mode and Language.

AutoTalk allows you to answer the phone without pressing the talk/flash button. If the phone rings when AutoTalk is on, simply remove the handset from the base and the phone automatically answers the call. If the phone rings when AutoTalk is off, you must press talk/flash to answer the call.

**Caller ID options**

To change your AutoTalk and CIDCW:

1) Press and hold call id/menu. The following screen appears.

2) Use \ or \ or a number key (1 and 2) to move the pointer to the selection that you would like to change.

   Press select to toggle between "On" and "Off" for AutoTalk and CIDCW.

3) Press end and return the handset to the base unit to complete the setting. The handset returns to the standby mode.

To enter your Area Code

If you enter a 3-digit area code number in the Area Code option, your local area code does not appear in Caller ID messages. Do not program this option, if your calling area requires 10-digit dialing.

When reviewing Caller ID messages, you will see only the local seven digit number. For calls received from outside your local area code, you will see a full 10-digit number.

*Note: If your calling area requires 10-digit dialing, do not program this option.*
1) When the phone is in the standby mode, press and hold call id/menu. The Caller ID setting screen appears.

2) Press 3 or press V twice to select "Area Code".

3) Press select.

4) Use the number keys (0 to 9), #/>.*/tone/< or delete/ch to enter the 3-digit area code.

5) Press select. A confirmation tone sounds and the displayed area code is entered.

6) Press end or return the handset to the base unit to complete the setting. The handset returns to the standby mode.

When the area code has already been stored in memory, the stored area code will be displayed. To change it, use the delete/ch and number keys to enter the new area code. Then press select. A confirmation tone sounds.

To complete the setting, press end or return the handset to the base unit.

Choosing the dialing mode

Most phone systems use tone dialing which sends DTMF tones through the phone lines. However some phone systems still use pulse dialing such as in rural areas. The default setting is tone dialing. Depending on your dialing system, set the mode as follows:

Make sure your battery pack is fully charged before choosing the dial mode.
1) When the phone is in the standby mode, press and hold call id/menu. The following screen appears.

2) Press 4 or press V three times to select “Dial”.

3) Press select to toggle between “Tone” and “Pulse” for each setting.

4) Press end or return the handset to the base unit to complete the setting. The handset returns to the standby mode.

- If you are not sure of your dialing system, set for tone dialing. Make a trial call. If the call connects, leave the setting as is, otherwise set for pulse dialing.
- If your phone system requires pulse dialing and you need to send the DTMF tones for certain situations during a call, you may “switch-over” to tone dialing. (Refer to “Tone Dialing Switch-over” on page 19.)

Setting the language

1) When the phone is in the standby mode, press and hold call id/menu. The following screen appears.

2) Press 5 or press V four times to select “Language”.

3) Press select to toggle between “Eng” and “Fr.” for each setting.

4) Press end or return the handset to the base unit to complete the setting. The handset returns to the standby mode.

</tbody>
</table>

Refer to page 14 “Setting Menu Options” to turn on the AutoTalk feature if desired.
Adjusting the Handset Ringer and Earpiece Volume

**Handset ringer tone and volume**
Press ▲ or ▼ in standby mode to select one of five ringer tones and volume combinations.

**Earpiece volume**
Pressing ▲ or ▼ during a call will change the earpiece volume of the handset. This setting will remain in effect after the telephone call has ended.

*note* When you press ▲ in Maximum mode or ▼ in Low mode, an error tone sounds.

**Ringer Mute**
You can temporarily mute the ringer tone. When the handset is off the base and the phone is ringing, press end. The ringer tone will return to normal starting with the next incoming call.
Redial

The redial/p key redials the last number dialed. The redialed number can be up to 32 digits long.

Tone Dialing Switch-over

Some telephone companies use equipment that requires pulse dialing (sometimes referred to as rotary dialing). If you need to enter tone dialing digits, you can switch-over to tone dialing during the call. For example, entering your bank account number after you have called your bank.

Initially make your call with the pulse dialing mode. Once your call connects, press */tone/<. Enter the desired number. These digits will be sent as tone dialing. Once the call ends, the tone mode is canceled and pulse dialing mode resumes.

Traveling Out-of-Range

During a call, as you begin to move your handset too far from your base unit, noise increases. If you pass the range limits of the base unit, your call will terminate within 1 minute.
Selecting a Different Channel

If you encounter interference while using your phone, you can manually change the phone’s channel for clear operation. This function works only when the phone is in use.

Press delete/ch. “Scanning” appears on the display, indicating the phone is changing to another channel. For more information on interference, refer to “Precautions” on page 43.

Page

To locate the handset (while it’s off the base), press find handset on the base. The handset beeps for 60 seconds.

Paging is canceled when pressing any key or the handset is returned to the base.

Flash and Call Waiting

If you have “Call Waiting” service and a call waiting tone sounds while you are on a call, press talk/flash to accept the waiting call. There is a short pause, then you will hear the new caller. To return to the original caller, press talk/flash again.

You must subscribe through your local telephone company to receive Call Waiting Service.
Storing Phone Numbers and Names

Memory Dialing allows you to dial a number using just a few key presses. Your EXI2246 series stores up to 10 names/numbers in the handset.

1) Press and hold **memory** until “Memory Store” is displayed.

2) Press **A** or **V**, or enter a number (0 - 9) to select the memory location where you would like to store the number.

3) Press **select**. The following screen appears and a cursor flashes indicating that the display is ready for the name to be entered.

   If this screen appears, the selected memory location is already stored. Then you must either edit the entry in this location, delete the entry in this location, or select “Go Back” to choose another location.

4) To enter a name (up to 14 characters), use the number keys.

   • See the “Steps for entering names and special characters”. (See pages 23-24)
   • Use #/> and */tone/ < to move the cursor to the desired location.
   • Use delete/ch to delete characters as needed.
   • Press and hold delete/ch to delete all the characters.
   • If a name is not required, go to step 5.
5) Press select. “Store Number” is displayed. The cursor flashes indicating that the display is ready for the number to be entered.

6) Use the number keys to enter the phone number. The phone number cannot exceed 20 digits. Use redial/p to enter a pause in the dialing sequence. The display shows a “P”. Each pause counts as one digit and represents a two second delay of time between the digits. Use delete/ch to delete digits as needed.

7) Press select. You will hear a confirmation tone, and the following screen appears. Memory storage is complete. For example, if you store a name and number into memory location number 7, the display shows “Memory 7 Stored”. After about 2 seconds, “Memory Store” is displayed. Repeat steps 2 - 7 to store more numbers.

8) Press end to return to standby mode.
Steps for Entering Names and Special Characters

Refer to the letters on the number keys to select the desired characters. With each press of a numeric key, the displayed character appears in the following order: Upper case letters first, lower case letters next and finally the number corresponding to the key.

If you make a mistake while entering a name

Use */tone/ or */#* to move the cursor to the incorrect character. Press delete/ch to erase the wrong character, then enter the correct character. To delete all characters, press and hold delete/ch.
For example, to enter **Uniden**:

1) Pick up the handset and press and hold **memory**.
2) Enter a number or press ^, V to select a memory location number.
3) Press **select**.
4) Press **8** twice.
5) Press **6** five times.
6) Press **4** six times.
7) Press **3** four times, then press #/> to move the cursor to the right.

Note: If the next character uses the same number key, you must press #/> to move the cursor over. Otherwise, the next time you press the number key, it changes the character that was previously set.

8) Press **3** five times.
9) Press **6** five times.
10) When finished, press **select**.

To continue to store the telephone number, proceed to step 6 on page 22.
Making Calls with Memory Dialing

Memory dialing from Standby Mode

1) Press **memory**.
   The handset displays your programmed memory locations.

2) Press \^ or \_ or enter the number (0 - 9) to select the memory location you would like to dial.

3) Press **talk/flash**. "Talk" and the volume setting appear on the display. Then the displayed number is dialed.

Display a Programmed Number

Use \#/ and \*/tone/\< to toggle between the names display and the numbers display.

<table>
<thead>
<tr>
<th>Program name</th>
<th>Program number</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 UNIDEN CORP</td>

<tr>
<td>3 MOM AND DAD</td>
<td>3 8175551212</td>
</tr>
</tbody>
</table>

\* If you press **select** before **talk/flash**, you can confirm the name and the number stored in the selected memory location.

\* To exit the memory function without dialing, press **end**. The handset returns to standby.

\* Whenever you are using a memory menu screen, you must press a key within 30 seconds or the phone will return to standby.

```
  1 UNIDEN CORP
  2 JOHN DOE
  3 MOM AND DAD

  Talk: 0123456789012
```

When the stored phone number has 15 or more digits, "\" is displayed next to the 13th digit. Press \#/ to see the extra digits and \*/tone/\< to return.

```
  S 0123456789012
```

\*0118135543290\*

\*1\*

```
MEMORY DIALING [ 25 ]
```
Memory dialing from Talk Mode

2) Press memory.

3) Enter a number (0 - 9) to select the memory location of the desired phone number. The selected phone number is displayed. Then the number is dialed.

4) To hang up, press end.

Chain Dialing

The memory locations on the handset are not limited to phone numbers. You can also store a group of numbers (up to 20 digits) that you need to enter once your call connects. This is referred to as Chain Dialing.

An example of this is a bank account number. Once you have called your bank, and are prompted to enter the account number, simply press memory and the location number where the special number has been stored.

Store your special number with an identifying name. (Refer to "Storing Phone Numbers and Names" on page 21.)
Editing a Stored Name and/or Phone Number

1) Press and hold memory until “Memory Store” is displayed.

2) Press ▲ or ▼, or enter a number (0 - 9) to select the memory location you would like to edit.

3) Press select.
   The following screen appears with the memory location number that you have selected in the display.

4) Press ▲ or ▼ to select “Edit Memory”, then press select.
   The following screen appears. The cursor flashes indicating that the display is ready for the name to be edited. When a name has not been stored, the cursor appears at the beginning of the second line.

5) Use the number keys, */tone/<, #/> , or delete/ch to edit the name. (See page 23.)
   To edit only the phone number, skip this step.

6) Press select. The following screen appears.
   The cursor flashes indicating that the display is ready for the number to be edited.
7) Use the number key, *redial/p* or *delete/ch* to edit the phone number. The phone number cannot exceed 20 digits. (See page 22.) If you don’t want to change the phone number, skip this step.

8) Press *select*. You hear a confirmation tone, and the following screen appears. The memory storage is complete. For example, if you store a name and number into memory location number 1, the display shows “Memory 1 Stored”. After about 2 seconds, “Memory Store” is displayed.

9) Press *end* to return to standby mode.
Erasing a Stored Name and Phone Number

1) Press and hold memory until “Memory Store” is displayed.

2) Press ▲ or ▼, or enter a number (0 - 9) to select the memory location you would like to erase.

3) Press select.
   The following screen appears with the memory location number that you have selected in the display.

4) Press ▼ to move the pointer down to “Delete Memory”.

5) Press select. The following confirmation screen appears.

6) Press ▲ to move the pointer to “Yes”.

7) Press select or delete/ch.
   You hear a confirmation tone, and the following screen appears.

8) After about 2 seconds, the display returns to the “Memory Store” screen.
   You may delete the information in another memory location (return to step 2) or press end to return to standby mode.
RocketDial

You can store your most frequently dialed number in the RocketDial location. The RocketDial allows you to dial a number with one key press. (There is no need to press talk. The phone will automatically dial the number stored.)

Storing and Editing the RocketDial

1) When the phone is in the standby mode, press and hold RocketDial. Following display appears.
   If this screen appears, there is a number already stored.
   Press ▲ or ▼ to select “Edit Number”, then press select.

2) Store the number by following step 6 under “Storing Phone Numbers and Names” on page 22.

3) Press select.
   You hear a confirmation tone, and the following screen appears. Memory storage is complete.

Making Calls with the RocketDial

When the phone is in the standby mode, simply press RocketDial. The number stored in the RocketDial memory location is instantly dialed.

• Memory location for the RocketDial is independent from the memory location for Memory dialing.

• If the RocketDial does not have a stored number, the handset will beep rapidly and the phone will not dial.
Deleting the RocketDial

1) When the phone is in the standby mode, press and hold RocketDial. Following display appears.

2) Press ▲ or ▼ to select “Delete Number”.

3) Press select. Following display appears.

4) Press ▲ to move the pointer to “Yes”.

5) Press select or delete/ch.
   You hear a confirmation tone, and the following display appears. After about 2 seconds, the handset returns to standby mode.
Caller ID

You must subscribe to Caller ID service to use this feature.
When the telephone rings, the Caller ID feature allows you to view the caller's name and phone number on the display before you answer the phone.
The handset displays the phone number of the incoming call, the name, and time. Additionally, you can dial the displayed number and store the information for memory dialing. Make sure you have turned on the Caller ID/Call Waiting feature. (See page 14.)

When the Telephone Rings

1) When the Caller ID message is received, the display shows the caller's phone number along with the date and time. The incoming call information is stored in the Caller ID record. If the Caller ID service includes the caller's name, the caller's name appears on the display (up to 15 letters).

Here are some typical displays:

When the phone number and name data are received

<table>
<thead>
<tr>
<th>Date/Time</th>
<th>Name</th>
<th>Phone Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>5/11 12:30PM</td>
<td>UNIDEN CORP</td>
<td>800-297-1023</td>
</tr>
</tbody>
</table>

When invalid data is received

<table>
<thead>
<tr>
<th>Date/Time</th>
<th>Name</th>
<th>Phone Number</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Incomplete Data</td>
<td></td>
</tr>
</tbody>
</table>

When a private name is received

<table>
<thead>
<tr>
<th>Date/Time</th>
<th>Name</th>
<th>Phone Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>5/11 12:30PM</td>
<td>Private Name</td>
<td>800-297-1023</td>
</tr>
</tbody>
</table>

When a private number is received

<table>
<thead>
<tr>
<th>Date/Time</th>
<th>Name</th>
<th>Phone Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>5/11 12:30PM</td>
<td></td>
<td>Private Number</td>
</tr>
</tbody>
</table>

• If you answer a call before the Caller ID message is received (example: before the second ring), the Caller ID message will not appear.

• When the call is received via a telephone company that does not offer Caller ID service, the caller's phone number and name do not appear. (This includes international calls.)

• When the call is via a private branch exchange (PBX), the caller's phone number and name may not appear.
2) When you pick up the phone, the display changes to "Talk". (AutoTalk feature is set to on.)

Data errors appear as "□".

Viewing the Caller ID Message List

The Caller ID list stores information for up to 30 incoming calls - even unanswered calls.

1) Press call id/menu.
   The summary screen appears.
   The screen shows the number of new messages and total messages.

2) Press ▼ to display the latest Caller ID message.

3) Press ▼ to see the next message. Or press ▲ to see previous message.

4) Press end to return to standby mode.

When an unknown name is received

| 5/11 12:30PM |
|__________________________|
| Unknown Name |
| 800-297-1023 |

When an unknown number is received

| 5/11 12:30PM |
|__________________________|
| UNIDEN CORP |
| Unknown Number |

- In Caller ID operation, if no key is pressed for more than 30 seconds, an error tone sounds and the telephone returns to the standby mode.
- If a call comes in via a telephone system that does not offer Caller ID service, no information is stored.
- Each message can be up to 15 characters for the phone number and the name.
- The number of calls from the same Caller ID appears next to the received time. Once you read the new message, the number will disappear.
Deleting Information from the Caller ID List

The EX 2246 series stores up to 30 messages. If the phone receives the 31st message, the oldest one in the list is automatically deleted. Caller ID data can also be deleted manually.

Deleting a Caller ID message

1) Press **call id/menu**. Display the message to be deleted from the Caller ID list by pressing **A** or **V**.

2) Press **delete/ch**.

3) Press **A** or **V** to select “**Yes**” or “**No**”.

4) Press **select** or **delete/ch**.

   **When the pointer is at “Yes”**:
   
   A tone sounds and the Caller ID message is deleted.
   
   The next Caller ID message is then displayed.

   **When the pointer is at “No”**:
   
   The display returns to the Caller ID message.

Deleting all Caller ID names/numbers

1) Press **call id/menu**.

2) Press **delete/ch**.
3) Press ▲ or ▼ to select "Yes" or "No".

4) Press select or delete/ch.

When the pointer is at "Yes":
A tone sounds and all stored Caller ID messages are deleted.

When the pointer is at "No":
The display returns to the summary screen.
Using the Caller ID List

**Calling a party from the Caller ID list**
You can place a call from the Caller ID list. The EXI2246 series stores up to 30 messages.

1) Press **call id/menu**. Select the phone number that you want to dial by pressing \( \Delta \) or \( \nabla \).

2) Press **talk/flash**. The displayed phone number dials automatically.

**Long Distance calls and Area Code Setting/Cancellation**
Pressing 1 while the incoming Caller ID information is displayed (in step 1) will place the prefix “1” in the display to set up for a long distance call. Pressing 3 will set or cancel an area code setting.

**Dial edit**
You can temporarily edit the Caller ID number that is displayed by pressing **select**. A cursor appears in the display. Press **delete/ch** to move the cursor left, make your changes and then press **talk/flash**. This will not change the number in the Caller ID list memory.

If you want to save this new number, store the information in memory. (See page 37.)

- You cannot make a call from the Caller ID list if your EXI2246 series is connected to a private branch exchange (PBX).
- When a long distance call has been set, “1” appears in the display.
**Storing Caller ID messages in Memory dialing**

Messages shown in the Caller ID list can be stored in memory dialing. Using the incoming call information (i.e., Caller ID list), the phone number of the party on the Caller ID list can be stored in memory.

1) Press `call id/menu`. Select the phone number to be stored from the Caller ID list by pressing `▲` or `▼`.

2) Press `memory`.

3) Press `▲` and `▼` or enter a number (0 - 9) to select the memory location to be stored.

4) Press `select`. You hear a confirmation tone, and the number is stored in memory. The display returns to the Caller ID list.

If a message has already been stored in the selected memory number location, a confirmation screen is displayed. Press `▲` to select "Yes". Press `select` to overwrite. The display returns to the Caller ID list.

You can not store a Caller ID message if no phone number appears in the message.
Changing the Digital Security Code

The digital security code is an identification code used to connect the handset and the base unit. Normally, setting the code is not necessary. The first time you charge your handset, the security code is automatically set. (See “About the digital security code”, page 6.) In the rare situation that you suspect another cordless telephone is using the same security code, you can change the code.

1) Remove the handset from the base unit. Press and hold find handset on the base.

2) The handset begins emitting a paging sound. While holding find handset, place the handset on the base unit. The paging sound stops.

   Leave the handset on the base for more than 3 seconds. A new random security code is set.

Installing the Beltclip

To attach the beltclip
Insert the beltclip into the holes on each side of the handset. Press down until it clicks.

To remove the beltclip
Pull both sides of the beltclip to release the tabs from the holes.

Headset Installation

Your phone may be used with an optional headset, the Uniden HS910. To use this feature, insert headset plug into the headset jack.

Your phone is ready for hands-free conversations.
(Headset may be purchased by calling the Uniden Parts Department or visiting the web site. See Page 7.)
Note on Power Sources

Battery replacement and handling
When the operating time becomes short, even after a battery is recharged, please replace the battery. With normal usage, your battery should last about one year. Please contact your place of purchase or the Uniden Parts Department for a replacement battery.

Warning: To avoid the risk of personal injury or property damage from fire or electrical shock, only use the Uniden battery model and Uniden adapter model specifically designated for this product.

Power Failure
During the period that the power is off, you will not be able to make or receive calls with the telephone.

Caution
- Use only the specified Uniden battery pack (BT-905).
- Do not remove the battery from the handset to charge it.
- Never throw the battery into a fire, disassemble it, or heat it.
- Do not remove or damage the battery casing.

Maintenance

When slightly dirty
Wipe with a soft, dry cloth.

When very dirty
Wipe with a soft cloth that has been dampened with diluted, neutral detergent. Dry with a dry cloth.

When the charging terminals become dirty
Wipe with a dry cloth or a pencil eraser, if necessary. (See page 10 for the location of charging terminals.)

Caution
Do not use paint thinner, benzene, alcohol, or other chemical products. Doing so may discolor the surface of the telephone and damage the finish.
Troubleshooting

If your phone is not performing to your expectations, please try these simple steps first.

General Information

The phone complies with FCC Parts 15 and 68.
Operating temperature: -10° to 50° C (+14°F to +122°F)

AC Adapter Information
- AC Adapter part number: AD-310
- Input Voltage: 120V AC 60Hz
- Output Voltage: 9V DC 210 mA

Battery Information
- Battery part number: BT-905
- Capacity: 600 mAH, 3.6V
- Battery use time (per charge):
  - Talk mode duration: 7 hours
  - Standby mode duration: 14 days

Note: If the handset is left off of the base, the actual Talk mode duration will be reduced respective to the amount of time the handset is off the base.

Recharge your phone on a regular basis by returning the handset to the base after each phone call. When the operating time becomes short, even after the battery is recharged, please replace the battery. With normal usage, the battery should last about one year.

A replacement Uniden adapter and battery may be purchased at your local Uniden dealer or by contacting the Uniden Parts Department (800) 554-3988. Hours are from 7:00 a.m. to 5:00 p.m. Central Time, Monday through Friday. We can also be reached on the web at www.uniden.com.

Specifications, features, and availability of optional accessories are all subject to change without prior notice.
Precautions!

Before you read anything else, please observe the following warnings:

WARNING

Uniden America Corporation DOES NOT represent this unit to be water-proof. To reduce the risk of fire, electrical shock, or damage to the unit, DO NOT expose this unit to rain or moisture.

Rechargeable Nickel-Cadmium Battery Warning

1. This equipment contains a rechargeable nickel-cadmium battery.
2. Cadmium is a chemical known to the State of California to cause can-
   cer.
3. The rechargeable nickel-cadmium battery contained in this equip-
   ment may explode if disposed of in a fire.
4. Do not short-circuit the battery.
5. Do not charge the rechargeable nickel-cadmium battery used in this
   equipment by any other means than the one designed to charge this
   battery as specified in the owner’s manual. Using another charger
   may damage the battery or cause the battery to explode.

Rechargeable Nickel-Cadmium Batteries Must Be Recycled or Disposed of Properly

Uniden voluntarily participates in an RBA® industry program designed to encourage responsible recycling of batteries. You may return your used batteries to any retail outlet that stocks replacement nickel-cadmium batteries. If no retail outlet is available, contact your local recycling agency for proper disposal instructions.

Important Safety Instructions

When using your telephone equipment, these basic safety precautions should always be followed to reduce the risk of fire, electrical shock, or injury to persons:

1. Read and understand all instructions.
2. Follow all warnings and instructions marked on the product.
3. Unplug this product from the wall outlet before cleaning. Use a dry cloth for cleaning without liquid or aerosol cleaner.
4. Do not use this product near water, for example, near bathtubs, wash bowls, kitchen sinks or laundry tubs, in a wet basement, or near a swimming pool.
5. Do not place this product on an unstable cart, stand, or table. The telephone may fall, causing serious damage to the unit.
6. Do not allow anything to rest on the power cord. Do not locate this product where the cord will be damaged by persons walking on it.
7. Do not overload wall outlets and extension cords. This can result in the risk of fire or electrical shock.
8. Do not allow anything to rest on the product or block any ventilation slots, as they may touch dangerous voltage points or short out parts that could result in a risk of fire or electrical shock.
9. Do not spill liquid of any kind on the product.
10. Do not touch any objects into this product through cabinet slots, as they may touch dangerous voltage points or short out parts that could result in a risk of fire or electrical shock.
11. Do not alter this product in any way.
12. Do not remove cabinet or cover. This product is not serviceable by the user.
13. Do not use the telephone to report a gas leak in the vicinity of the
    gas leak.
14. Do not use the telephone to report a gas leak in the vicinity of the
    gas leak.
15. Do not operate this product near flammable materials or fumes.
16. If the product does not operate normally when following the
    instructions, check the battery pack or the cabinet has been
    damaged.
17. If the product exhibits a distinct change in performance.
18. If the product has been damaged or if liquid has been spilled into the

Additional Battery Safety Precautions

Caution! To reduce the risk of fire or injury to persons by the bat-

tery, read and follow these instructions.

1. Use only the Uniden battery pack specified in the owner’s manual.
2. Do not dispose of the battery pack in a fire. The cell may explode.
3. Check the nickel-cadmium battery disposal package insert for dispo-
sal instructions. Place the battery pack in a plastic bag and dispose of
   it with household trash.
4. Do not open or mutilate the battery pack. Released electrolyte is cor-
   rose and may cause damage to the eyes or skin. It may be toxic if swallowed.

SAVE THESE INSTRUCTIONS

Important Electrical Considerations

Unplug all electrical appliances when you turn a telephone storm.

Radio Interference

Radio interference may occasionally cause buzzing and humming in your
cordless telephone. This interference is caused by external sources such as TV, refrigerator, vacuum cleaner, fluorescent lighting, or electrical storms. Your unit is NOT DEFECTIVE. If these noises continue and are too distracting, please contact your home to see what appliances may be causing the problem. In addition,
ADDITIONAL INFORMATION

we recommend that the base not be plugged into a circuit that also powers a major appliance because of the potential for interference. We
certain that the antenna on the unit is fully extended when needed.
be sure that you have read the instructions in the owner’s manual for this type of interference. You need to change to a dif-
Finally, it should be noted that some cordless telephones operate at fre-
frequencies that may cause interference to nearby TV and VCRs. To min-
or prevent such interference, the base of this cordless telephone
should not be placed near or on top of a TV or VCR. If interference is
experienced, reposition the cordless telephone farther away from the
TV or VCR will often reduce or eliminate the interference.

More Than One Cordless Telephone
If you want to use more than one cordless telephone in your home, you
must operate on different channels. Press the channel key to select an
different channel.

Installation Considerations
Selecting a Location
Before choosing a location for your new phone, there are some impor-
tant guidelines you should consider:
• The location should be close to both a phone jack and continuous
power outlet. (A continuous power outlet is an AC outlet which does
not have a switch to interrupt its power.)
• Be sure there is sufficient space to fully extend the base antenna.
• The base can be placed on a desk or tabletop or mounted on a stan-
dard telephone wall plate.
• You should charge your new phone for 15-20 hours before complet-
ing the installation or using the handset.

Telephone Line Outlets
There are two types of phone outlets:

Modular Jack
Most phone equipment available now uses modular jacks. Phone cords
are fitted with a molded plastic connector which plugs into this type of
jack. If you do not have modular phone jacks, contact your local tele-
phone company for information about their installation.

Hardwired Jack
Some equipment is wired directly to a phone jack, and these types of
telephone equipment may require a modular jack converter. This type of installation is
not difficult; however, you should contact your Uniden telephone dealer
or a telephone supply store for advice about the proper adapter or con-

Connecting the Telephone Cords
Consider these safety guidelines before connecting the telephone cords:

Caution!
• Never install telephone wiring during a lightning storm.
• Never touch unshielded telephone wires or terminals unless the tele-
phone line has been disconnected.
• Use caution when installing or modifying telephone lines.

Applying Power to the Base
The phone requires an AC source, without a switch to interrupt power,
and the included AC adapter. To allow them to contact each other,
the AC plug when the phone is placed on a desk or tabletop, wrap the power cord around
the strain relief notch on the bottom of the base.

NOTE: Use the power cord so that it does not create a trip
hazard, or where it could become chafed and create a fire
or other electrical hazards.

Adaptor Safety Features
If the AC adapter furnished with this telephone has a polarized plug
(plug having one blade wider than the other), this plug will fit into the
power outlet only one way. If you are unable to insert the plug fully
into the outlet, try reversing the plug.

When using the AC adapter, the plug will fit into the power outlet
only if the outlet is a standard US AC outlet.

Use only the Uniden AC Adapter supplied with this phone.

One Year Limited Warranty

PROOF OF PURCHASE: In the event that the product does not conform

to this warranty at any time while this warranty is in effect, warrantor
will either, at its option, repair or replace the defective unit and return
it to you without charge for parts, service, or any other cost (except
shipping and handling) incurred by warrantor or its representatives
in connection with the performance of this warranty. Warrantor, at its
option, may replace the unit with a new or refurbished unit. This
WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES OF ANY KIND
WHATSOEVER, WHETHER EXPRESSED OR IMPLIED, INCLUDING
MERCHANTABILITY OR MERCHANTABILITY OR ANY IMPLIED
WARRANTY OF NON-INFRINGEMENT OF ANY INTELLECTUAL
PROPERTY OR ANY IMPLIED WARRANTY OF MERCHANTABILITY OR
ABILITY TO SATISFY ANY PARTICULAR PURPOSE. THIS
WARRANTY IS void outside the United States of America.

LEGAL REMEDIES: This warranty gives you specific legal rights, and you
may also have other rights which vary from state to state. This warranty
is void outside the United States of America.

PROCEDURE FOR OBTAINING PERFORMANCE OF WARRANTY: If, after fol-
lowing the instructions in the owner’s manual you are certain that the

product is defective, pack the Product carefully (preferably in its origi-
nal packaging). The Product should include all parts and accessories
originally packaged with the Product. Include evidence of original pur-
chase and a note describing the defect that has caused you to return it.

This phone requires an AC outlet, without a switch to interrupt power,
and the included AC adapter. To relieve strain on the AC plug when the
phone is placed on a desk or table, wrap the power cord around
the strain relief notch on the bottom of the base.

NOTE: Use the power cord so that it does not create a trip
hazard, or where it could become chafed and create a fire
or other electrical hazards.

Adapter Safety Features
If the AC adapter furnished with this telephone has a polarized plug
(plug having one blade wider than the other), this plug will fit into the
power outlet only one way. If you are unable to insert the plug fully
into the outlet, try reversing the plug.

Do not alter the shape of the blades of the polarized plug.

NOTE: If you cannot plug the AC adapter into the outlet, con-
 tact someone about replacing the outlet.

Plug the AC Adapter into a standard 120V AC wall outlet.
Do not use an outlet controlled by a wall switch.

Use only the Uniden AC Adapter supplied with this phone.

WARRANTOR: UNIDEN AMERICA CORPORATION ("Uniden")

product is defective, pack the Product carefully (preferably in its origi-
nal packaging). The Product should include all parts and accessories
originally packaged with the Product. Include evidence of original pur-
chase and a note describing the defect that has caused you to return it.

This phone requires an AC outlet, without a switch to interrupt power,
and the included AC adapter. To relieve strain on the AC plug when the
phone is placed on a desk or table, wrap the power cord around
the strain relief notch on the bottom of the base.

NOTE: Use the power cord so that it does not create a trip
hazard, or where it could become chafed and create a fire
or other electrical hazards.

Adapter Safety Features
If the AC adapter furnished with this telephone has a polarized plug
(plug having one blade wider than the other), this plug will fit into the
power outlet only one way. If you are unable to insert the plug fully
into the outlet, try reversing the plug.

Do not alter the shape of the blades of the polarized plug.

NOTE: If you cannot plug the AC adapter into the outlet, con-
 tact someone about replacing the outlet.

Plug the AC Adapter into a standard 120V AC wall outlet.
Do not use an outlet controlled by a wall switch.

Use only the Uniden AC Adapter supplied with this phone.
I.C. Notice

TERMINAL EQUIPMENT

NOTICE: This equipment meets the applicable Industry Canada Terminal Equipment Technical Specifications. This is confirmed by the registration number. The abbreviation, IC, before the registration number signifies that registration was performed based on a Declaration of Conformity indicating that Industry Canada technical specifications were met. It does not imply that Industry Canada approved the equipment.

NOTICE: The Ringer Equivalence Number (REN) for this terminal equipment is marked on the equipment itself. The REN assigned to each terminal equipment provides an indication of the maximum number of terminals allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the Ringer Equivalence Numbers of all the devices does not exceed five.

RADIO EQUIPMENT

The term “IC” before the radio certification number only signifies that Industry Canada technical specifications were met.

Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device. “Privacy of communications may not be ensured when using this telephone”.
