Step 1  Checking the Package Contents
Make sure you have received the following items in the package. If any of these items are missing or damaged, contact the Uniden Parts Department.

- Base unit
- Handset
- AC adapter
- Rechargeable battery
- Telephone cord
- Beltclip
- This Owner’s Manual
- Other Printed Material

Step 2  Install and Charge the Handset Battery

TO INSTALL THE HANDSET BATTERY

A. Remove the cover.
B. Connect the battery pack connector with the correct polarity.
C. Replace the cover.

TO SET CALLER ID, LANGUAGE AND DIALING OPTIONS

A. Press and hold cid/menu key.
B. Press vol/ring/ or vol/ring/ keys to move the pointer to an option.
C. Press select to change the option setting.
D. Press end to exit, and return the handset to the base.

OPTIONS INCLUDE

- Auto Talk On/Off
- CIDCW On/Off (Caller ID on Call Waiting)
- Area Code Enter/Remove
- Dial Pulse/Tone
- Language Eng/Fr

Step 3  Connect to Phone Line

When the handset battery pack is fully charged, after 15-20 hours of charging, plug the telephone cord into the base unit and then into a telephone wall jack.

Your phone is set for tone dialing. If your local network requires pulse dialing, please see “Choosing the dialing mode” on page 16.

Step 4  Setting Display Options

Note: Three Caller ID options are available: AutoTalk, Caller ID on Call Waiting (CIDCW), and Area Code.

TO SET CALLER ID, LANGUAGE AND DIALING OPTIONS

A. Press and hold cid/menu key.
B. Press vol/ring/ or vol/ring/ keys to move the pointer to an option.
C. Press select to change the option setting.
D. Press end to exit, and return the handset to the base.

OPTIONS INCLUDE

- Auto Talk On/Off
- CIDCW On/Off (Caller ID on Call Waiting)
- Area Code Enter/Remove
- Dial Pulse/Tone
- Language Eng/Fr

Welcome

Congratulations on your purchase of the Uniden EXI3246 series. This cordless phone is designed and engineered to exacting standards for reliability, long life, and outstanding performance.

Note: Some illustrations in this manual may differ from the actual unit for explanation purposes. The color of your cordless telephone may vary.

As an ENERGY STAR® Partner, Uniden has determined that this product or product models meets the ENERGY STAR® guidelines for energy efficiency. ENERGY STAR® is a U.S. registered mark.

Features

- 2.4 GHz Extended Range Technology
- 3 Line Backlit Display
- Caller ID and Call Waiting Caller ID
- RocketDial
- 20 Number Memory Dialing
- 32 Digit Redial
- Flash and Pause
- English or French Display Option
- Tone/Pulse Dialing
- Page/Find handset
- Up to 7 Hour Talk Time/
  14 Day Standby Time
- Handset Earpiece and
  Ringer Volume Control
- Hearing Aid Compatible
- 20 Channel Autoscan

Be sure to visit our web site: www.uniden.com

21. charge/in use LED
22. Find handset key
23. Base charging contacts
24. Telephone line jack
25. DC IN 9V jack
Setting up the Phone

Do the following steps:
A. Choose the best location  C. Connect the base unit
B. Install the rechargeable battery pack into the handset

A. Choose the best location
Before choosing a location for your new phone, read the INSTALLATION CONSIDERATIONS included in the PRECAUTIONS AND IMPORTANT SAFETY INSTRUCTIONS brochure. Here are some important guidelines you should consider:

- The location should be close to both a phone jack and a continuous power outlet which is not switchable.
- Keep the base and handset away from sources of electrical noise such as motors, microwave ovens, and fluorescent lighting.
- Be sure there is sufficient space to raise the base antenna to a vertical position.
- The base can be placed on a desk, tabletop, or mounted on a standard wall plate.

Avoid heat sources, such as radiators, air ducts, and sunlight
Avoid television sets and other electronic equipment
Avoid excessive moisture, extremely low temperatures, dust, mechanical vibration, or shock
Avoid personal computers
Avoid other cordless telephones

If your home has specially wired alarm equipment connected to the telephone line, be sure that installing the system does not disable your alarm equipment.

If you have questions about what will disable your alarm equipment, contact your telephone company or a qualified installer.

note
B. Install the rechargeable battery pack into the handset

The handset is powered by a rechargeable battery pack. The battery recharges automatically when the handset is placed in the base unit.

Charge the handset battery pack for at least 15-20 hours before using your new cordless telephone for the first time! To maximize the charge capacity of your battery pack, DO NOT plug the telephone cord into the base unit and wall jack until the battery is fully charged.

1) Press down on the handset battery case cover (use the finger indentation for a better grip) and slide the cover downward to remove.

2) Plug the battery pack connector (red & black wires) into the small, black jack inside the battery compartment. (The connector notches fit into the grooves of the jack only one-way.) Match the wire colors to the polarity label in the battery compartment, connect the battery and listen for a click to insure connection.

3) Make certain you have made a good connection by slightly pulling on the battery wires to insure that there is a secure connection. If the battery connector is not securely connected, the handset will not charge properly.

Use only the Uniden (BT-905) rechargeable battery pack supplied with your cordless telephone.
4) Place the battery case cover back on the handset by sliding it upwards until it clicks into place.

5) Place the handset in the base unit for 15-20 hours without interruption. The base unit’s LED light labeled (charge/in use) illuminates once the handset is placed in the base. The LED light will illuminate regardless if the battery pack is connected or not.

DO NOT rely on the LED light as an indicator that the battery pack is connected and the handset is charging!

If the base charge/in use LED light does not illuminate:
• Check to see if the AC adapter is plugged into the base unit and the electrical wall outlet properly. (Use only the supplied AC adapter. Do not use any other AC adapter.)
• Check to see if the handset is sitting correctly in the base and making good contact with the base unit’s charging contacts.

Replacement batteries are also available through the Uniden Parts Department at (800) 554-3988, Monday thru Friday from 8:00 a.m. to 5:00 p.m. or online at www.uniden.com.
**Battery use time (per charge)**
From fully charged (15-20 hours charge time)
- Up to seven hours continuous use during talk mode
- Up to fourteen days when the handset is in the standby mode

**Low battery alert**
When the battery pack is very low and needs to be charged, the phone is programmed to eliminate functions in order to save power. If the phone is not in use, "Low Battery" appears on the LCD and none of the keys will operate. If the phone is in use, "Low Battery" flashes and the handset beeps. Complete your conversation as quickly as possible and return the handset to the base unit for charging.

The last number dialed in the redial memory, as well as, the names and the numbers stored in the memory locations are retained for up to 30 minutes while you replace the battery pack.

**Cleaning the charging contacts**
To maintain a good charge, it is important to clean the charging contacts on both the handset and base unit once a month. Use a dry cloth or pencil eraser to clean. If the contacts become very dirty, using water only, dampen a cloth to clean the charging contacts. Then make sure to go back over the charging contacts with a dry cloth before returning the handset to the base to charge.
Place the power cord so that it does not create a trip hazard or where it could become chafed and create a fire or electrical hazard.

Use only the supplied AD-446 AC adapter. Do not use any other AC adapter.

C. Connect the base unit

1) Connect the AC adapter to the DC IN 9V jack and to a standard 120V AC wall outlet.

2) Set the base on a desk or tabletop, and place the handset on the base unit.

3) Make sure that the charge/in use LED illuminates. If the LED does not illuminate, check to see that the AC adapter is plugged in and that the handset makes good contact with the base charging contacts.

- Connect the AC adapter to a continuous power supply.
- Place the base unit close to the AC outlet so that you can unplug the AC adapter easily.

• After installing the battery pack in the handset, charge your handset at least 15-20 hours before plugging into the phone line. Once the handset battery pack is fully charged, connect the telephone line cord to the base and telephone wall outlet.

4) Connect the telephone line cord to the TEL LINE jack and to a telephone outlet once the handset is fully charged.

If your telephone outlet isn’t modular, contact your telephone company for assistance.

www.uniden.com
Mounting the Base Unit on a Wall

**Standard wall plate mounting**
This phone can be mounted on any standard wall plate.

1) Plug the AC adapter into the **DC IN 9V** jack.
2) Wrap the AC adapter cord inside the molded wiring channel as shown.
3) Plug the AC adapter into a standard 120V AC wall outlet.
4) Plug the telephone line cord into the **TEL LINE** jack. Wrap the cord inside the molded wiring channel as shown.
5) Plug the telephone line cord into the telephone outlet.
6) Raise the antenna to a vertical position.
7) Align the mounting slots on the base with the mounting posts on the wall. Then push in and down until the phone is firmly seated.

DO NOT use an AC outlet controlled by a wall switch.
Direct wall mounting

If you don't have a standard wall plate, you can mount your phone directly to the wall. Before doing this, consider the following:

• Avoid electrical cables, pipes, or other items behind the mounting location that could cause a hazard when inserting screws into the wall.
• Try to mount your phone within 5 feet of a working phone jack to avoid excessive lengths.
• Make sure the wall material is capable of supporting the weight of the base and handset.
• Use #10 screws (minimum length of 1-3/8 inches) with anchoring devices suitable for the wall material where the base unit will be placed.

1) Insert two mounting screws into the wall, (with their appropriate anchoring device). 3-15/16 inches apart. Allow about 1/8 of an inch between the wall and screw heads for mounting the phone.

2) Refer to steps 1 through 7 on page 13 to mount the telephone.
Setting Menu Options

There are five setup options available. They are Caller ID options [AutoTalk, CIDCW (Caller ID on Call Waiting), Area Code], Dial Mode and Language.

AutoTalk allows you to answer the phone without pressing the talk/flash button. If the phone rings when AutoTalk is On, simply remove the handset from the base and the phone automatically answers the call. If the phone rings when AutoTalk is Off, you must press talk/flash to answer the call.

**Caller ID options**

To change your AutoTalk and CIDCW:

1) Press and hold cid/menu. The following screen appears.

2) Use vol/ring/↑ or vol/ring/↓ keys to move the pointer to the selection that you would like to change. Press select to toggle between "On" and "Off" for AutoTalk and CIDCW.

3) Press end and return the handset to the base unit to complete the setting. The handset returns to the standby mode.

To enter your Area Code

If you enter a 3-digit area code number in the Area Code option, your local area code does not appear in Caller ID messages. Do not program this option, if your calling area requires 10-digit dialing. When reviewing Caller ID messages, you will see only the local seven digit number. For calls received from outside your local area code, you will see a full 10-digit number.
1) When the phone is in the standby mode, press and hold `cid/menu`. The Caller ID setting screen appears.

2) Press `vol/ring/ ✓` key twice to select "Area Code".

3) Press `select`.

4) Use the number keys (0-9), or `delete/ch` to enter the 3-digit area code.

5) Press `select`. A confirmation tone sounds and the displayed area code is entered.

6) Press `end` or return the handset to the base unit to complete the setting. The handset returns to the standby mode.

**Note**: When the area code has already been stored in memory, the stored area code will be displayed. To change it, use the `delete/ch` and number keys to enter the new area code. Then press `select`. A confirmation tone sounds. To complete the setting, press `end` or return the handset to the base unit.

**Choosing the dialing mode**

Most phone systems use tone dialing which sends DTMF tones through the phone lines. However some phone systems still use pulse dialing such as in rural areas. The default setting is tone dialing. Depending on your dialing system, set the mode as follows:
1) When the phone is in the standby mode, press and hold \textit{cid/menu}. The following screen appears.

2) Press \textit{vol/ring/ } key three times to select "Dial".

3) Press \textit{select} to toggle between "Tone" and "Pulse" for each setting.

4) Press \textit{end} or return the handset to the base unit to complete the setting.

The handset returns to the standby mode.

- If you are not sure of your dialing system, set for tone dialing. Make a trial call. If the call connects, leave the setting as is, otherwise set for pulse dialing.
- If your phone system requires pulse dialing and you need to send the DTMF tones for certain situations during a call, you may "switch-over" to tone dialing. (Refer to "Tone Dialing Switch-over" on page 20.)

\textbf{Setting the language}

1) When the phone is in the standby mode, Press and hold \textit{cid/menu}. The following screen appears.

2) Press \textit{vol/ring/ } key four times to select "Language".

3) Press \textit{select} to toggle between "Eng" and "Fr." for each setting.

4) Press \textit{end} or return the handset to the base unit to complete the setting. The handset returns to the standby mode.
## Making and Receiving Calls

### Handset On Base

<table>
<thead>
<tr>
<th>To answer a call</th>
<th>Handset Off Base</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pick up the handset (AutoTalk) or pick up the handset and press <code>talk/flash</code>.</td>
<td>Press <code>talk/flash</code>, any number, <code>*/tone/</code> <code>&lt;</code> or <code>&gt;</code> keys (AutoTalk).</td>
</tr>
</tbody>
</table>

### To make a call

| 1) Pick up the handset. | 1) Press `talk/flash`. |
| 2) Press `talk/flash`. | 2) Listen for the dial tone. |
| 3) Listen for the dial tone. | 3) Dial the number. |
| 4) Dial the number. | **OR** |
| **OR** | **OR** |
| 1) Pick up the handset. | Dial the number, then press `talk/flash`. |
| 2) Dial the number, then press `talk/flash`. | **OR** |

### To hang up

<table>
<thead>
<tr>
<th>Press <code>end</code> or return the handset to the base (AutoStandby).</th>
</tr>
</thead>
</table>

### To redial

| 1) Pick up the handset. | 1) Press `talk/flash`. |
| 2) Press `talk/flash`. | 2) Listen for the dial tone. |
| 3) Listen for the dial tone. | 3) Press `redial/p`. |
| 4) Press `redial/p`. | **OR** |
| **OR** | **OR** |
| 1) Pick up the handset. | Press `redial/p`, then press `talk/flash`. |
| 2) Press `redial/p`, then press `talk/flash`. | **OR** |

*Refer to page 15 “Setting Menu Options” to turn on the AutoTalk feature if desired.*
Adjusting the Handset Ringer and Earpiece Volume

**Handset ringer tone and volume**
Press the volume up key or volume down key (labeled as, \textit{vol/ring/\textasciitilde} or \textit{vol/ring/\textasciervceil} keys) in standby mode to select one of five ringer tones and volume combinations.

**Earpiece volume**
Pressing the volume up key or volume down key (labeled as, \textit{vol/ring/\textasciitilde} or \textit{vol/ring/\textasciervceil} keys) during a call will change the earpiece volume of the handset. This setting will remain in effect after the telephone call has ended.

**Temporarily Mute Ringer**
If the handset is off the base, simply press the 	extit{end} key to temporarily mute the incoming ring. The ringer will sound with the next incoming call.

www.uniden.com
Redial

The redial/p key redials the last number dialed. The redialed number can be up to 32 digits long.

Note

- The tone feature only applies when the dial mode is set to pulse.
- This special number can be stored in a memory location. This is referred to as Chain Dialing (See page 27.)

Tone Dialing Switch-over

Some telephone companies use equipment that requires pulse dialing (sometimes referred to as rotary dialing). If you need to enter tone dialing digits, you can switch-over to tone dialing during the call. For example, entering your bank account number after you have called your bank.

Initially make your call with the pulse dialing mode. Once your call connects, press the */tone/ key. Enter the desired number. These digits will be sent as tone dialing. Once the call ends, the tone mode is canceled and pulse dialing mode resumes.

Traveling Out-of-Range

During a call, as you begin to move your handset too far from your base unit, noise increases. If you pass the range limits of the base unit, your call will terminate within 1 minute.
Selecting a Different Channel

If you encounter interference while using your phone, you can manually change the phone’s channel for clear operation. This function works only when the phone is in use. Press delete/ch. “Scanning” appears on the display, indicating the phone is changing to another channel. For more information on interference, refer to “Precautions” on page 45.

Page

To locate the handset (while it’s off the base), press find handset on the base. The handset beeps for 60 seconds. Paging is canceled when pressing any key or the handset is returned to the base.

Flash and Call Waiting

If you have “Call Waiting” service and a call waiting tone sounds while you are on a call, press talk/flash to accept the waiting call. There is a short pause, then you will hear the new caller. To return to the original caller, press talk/flash again.

You must subscribe through your local telephone company to receive Call Waiting Service.
Voice Mail Waiting Indicator

If you subscribe to voice mail service, you can use your cordless telephone to access your voice mailbox. The **charge/in use** light on the base of your phone flashes whenever you have messages waiting in your voice mailbox. Just program the **RocketDial** key with your access number and you can get your messages at the touch of a button. (The voice mail service provider will supply you with the access number. This number may be simply a phone number. Refer to the provider’s literature.)

You may need to occasionally reset the indicator if it remains On after you have retrieved your messages. To reset the indicator, press and hold **find handset** for 5 seconds.
Storing Phone Numbers and Names

Memory Dialing allows you to dial a number using just a few key presses. Your cordless telephone stores up to 20 names/numbers in the handset.

1) Press mem, "Select Memory" is displayed.

2) Press vol/ring/ or vol/ring/ keys, or enter a number (01 - 20) to select the memory location where you would like to store the number.

3) Press mem or select.

4) Press mem or select. The following screen appears and a cursor flashes indicating that the display is ready for the name to be entered.

If this screen appears, the selected memory location is already stored. Then you must either edit the entry in this location, delete the entry in this location, or select "Go Back" to choose another location.

5) To enter a name (up to 13 characters), use the number keys.
   - See the "Steps for entering names and special characters". (See page 25).
   - Use #/ and */tone/ keys to move the cursor to the desired location.
   - Use delete/ch to delete characters as needed.
   - Press and hold delete/ch to delete all the characters.
   - If a name is not required, go to step 6.

• In memory dialing operation, you must press a key within 30 seconds or the phone will return to the standby mode. If you return the handset to the base, the phone will return to the standby mode also.

• You have 30 seconds after pressing mem to enter the number you wish to store. Otherwise, an error tone will sound.
6) Press **select**. “Store Number” is displayed.
   The cursor flashes indicating that the display is ready for
   the number to be entered.

7) Use the number keys to enter the phone number.
   The phone number cannot exceed 20 digits.
   Use **redial/p** to enter a pause in the dialing sequence.
   The display shows a “P”. Each pause counts as one digit and
   represents a two second delay of time between the digits.
   Use **delete/ch** to delete digits as needed.

8) Press **select**. You will hear a confirmation tone, and the
    following screen appears. Memory storage is complete.
    For example, if you store a name and number into memory
    location number 01, the display shows “Memory01 Stored”.
    After about 2 seconds, the following screen is displayed.
    Repeat steps 2 - 8 to store more numbers.

9) Press **end** to return to the standby mode.
Steps for Entering Names and Special Characters

Refer to the letters on the number keys to select the desired characters. With each press of a numeric key, the displayed character appears in the following order: Upper case letters first, lower case letters next and finally the number corresponding to the key.

**If you make a mistake while entering a name**

Use */tone/* or */#/> keys to move the cursor to the incorrect character. Press delete/ch to erase the wrong character, then enter the correct character. To delete all characters, press and hold delete/ch.

For example, to enter Movies.

1) Pick up the handset. Press mem.
2) Enter a number or press vol/ring/ or vol/ring/ keys to select a memory location.
3) Press mem or select.
4) Press mem or select. (When there is information already stored in the selected memory location, “Edit MemoryXX” is displayed. See page 28 for information on “Editing a Stored Name and/or Phone Number.”)
5) Press 6 then press */#/> to move the cursor to the right.
6) Press 6 six times.
7) Press 8 six times.
8) Press 4 six times.
9) Press 3 five times.
10) Press 7 eight times.
11) When finished, press mem or select.

To continue to store the telephone number, proceed to step 7 on page 24.

For the next character uses the same number key, you must press */#/> to move the cursor over. Otherwise the next time you press the number key, it changes the character that was previously set.
Making Calls with Memory Dialing

Memory dialing from Standby Mode

1) Press **mem**. The handset displays your programmed memory locations.

2) Press **vol/ring/▼** or **vol/ring/▲** keys, or enter the number (01 - 20) to select the memory location you would like to dial.

3) Press **talk/flash**. "Talk" and the volume setting appear on the display. Then the displayed number is dialed.

**note**

- If you press **select** before **talk/flash**, you can confirm the name and the number stored in the selected memory location.
- Whenever you are using a memory menu screen, you must press a key within 30 seconds or the phone will return to the standby mode.

**note**

To exit the memory function without dialing, press **end**. The handset returns to the standby mode.
Memory dialing from Talk Mode

2) Press mem.

3) Press vol/ring/ or vol/ring/ keys, or enter a number (01 - 20) to select the memory location of the desired phone number. The selected number and name is displayed. Then the number is dialed.

4) The phone number in the memory will be dialed when the select key is pressed.

5) To hang up, press end.

Chain Dialing

The memory locations on the handset are not limited to phone numbers. You can also store a group of numbers (up to 20 digits) that you need to enter once your call connects. This is referred to as Chain Dialing.

An example of this is a bank account number. Once you have called your bank, and are prompted to enter the account number, press mem and select the location number where the special number has been stored, then press select.

Store your special number with an identifying name. (Refer to "Storing Phone Numbers and Names" on page 23.)
Editing a Stored Name and/or Phone Number

1) Press `mem`, "Select Memory" is displayed.

2) Press `vol/ring/▼` or `vol/ring/▼` keys, or enter a number (01 - 20) to select the memory location you would like to edit, and press `mem` or `select`.

3) Press `mem` or `select`.
   The following screen appears with the memory location number that you have selected in the display.

4) Press `vol/ring/▼` or `vol/ring/▼` keys to select "Edit MemoryXX", then press `mem` or `select`. The following screen appears. The cursor flashes indicating that the display is ready for the name to be edited. When a name has not been stored, the cursor appears at the beginning of the second line.

5) Use the number keys, */tone/*, */tone/* keys, or delete/ch to edit the name. (See page 25.) To edit only the phone number, skip this step.

6) Press `mem` or `select`. The following screen appears. The cursor flashes indicating that the display is ready for the number to be edited.

---

[28] MEMORY DIALING

www.uniden.com
7) Use the number key, *redial/p or delete/ch* to edit the phone number. The phone number cannot exceed 20 digits. (See page 24.) If you don’t want to change the phone number, skip this step.

8) Press *mem* or *select*. If you changed either name or phone number, a confirmation display shows up. If it is correct, press *vol/ring/\^* key and press *select* again. You hear a confirmation tone, and the following screen appears. The memory storage is complete. For example, if you store a name and number into memory location number 01, the display shows "Memory01 Stored". After about 2 seconds, Select memory is displayed.

9) Press *end* to return to the standby mode.
Erasing a Stored Name and Phone Number

1) Press **mem**, "Select Memory" is displayed.
2) Press **vol/ring/†** or **vol/ring/ ‡** keys, or enter a number (01 - 20) to select the memory location you would like to erase.
3) Press **mem** or **select**.
4) Press **mem** or **select**.
   The following screen appears with the memory location number that you have selected in the display.
5) Press **vol/ring/ ‡** key to move the pointer down to "Delete MemoryXX".
6) Press **mem** or **select**. The following confirmation screen appears.
7) Press **vol/ring/†** key to move the pointer to "Yes".
8) Press **select** or **delete/ch**.
   You hear a confirmation tone, and the following screen appears.
9) After about 2 seconds, the display returns to the Select memory screen. You may delete the information in another memory location (return to step 2) or press **end** to return to the standby mode.
RocketDial

You can store your most frequently dialed number in the RocketDial location. The RocketDial allows you to dial a number with one key press. (There is no need to press talk/flash. The phone will automatically dial the number stored.)

Storing and Editing the RocketDial

1) When the phone is in the standby mode, press and hold RocketDial. Following display appears. If this screen appears, there is a number already stored. Press vol/ring/\ or vol/ring/\ keys to select “Edit Number”, then press select.

2) Store the number by following step 7 under “Storing Phone Numbers and Names” on page 24.

3) Press select. You hear a confirmation tone, and the following screen appears. Memory storage is complete.

Making Calls with the RocketDial

When the phone is in the standby mode, simply press RocketDial. The number stored in the RocketDial memory location is instantly dialed.

www.uniden.com
Deleting the RocketDial

1) When the phone is in the standby mode, press and hold *RocketDial*. Following display appears.

2) Press *vol/ring/^* or *vol/ring/^* keys to select "Delete Number".

3) Press *select*. Following display appears.

4) Press *vol/ring/^* key to move the pointer to "Yes".

5) Press *select* or *delete/ch*. You hear a confirmation tone, and the following display appears. After about 2 seconds, the handset returns to the standby mode.
Caller ID

You must subscribe to Caller ID service to use this feature.

When the telephone rings, the Caller ID feature allows you to view the caller’s name and phone number on the display before you answer the phone. The handset displays the phone number of the incoming call, the name, and time. Additionally, you can dial the displayed number and store the information for memory dialing. Make sure you have turned on the Caller ID/Call Waiting feature. (See page 15.)

When the Telephone Rings

1) When the Caller ID message is received, the display shows the caller’s phone number along with the date and time. The incoming call information is stored in the Caller ID record. If the Caller ID service includes the caller’s name, the caller’s name appears on the display (up to 15 letters).

You may receive any one of the following messages:
- When invalid data is received: “Incomplete Data”
- When a private name is received: “Private Name”
- When a private number is received: “Private Number”
- When an unknown name is received: “Unknown Name”
- When an unknown number is received: “Unknown Number”

www.uniden.com
Viewing the Caller ID Message List

The Caller ID list stores information for up to 30 incoming calls - even unanswered calls.

1) Press cid/menu.
   The summary screen appears. The screen shows the number of new messages and total messages.

2) Press vol/ring/\ key to display the latest Caller ID message.

3) Press vol/ring/\ key to see the next message. Or press vol/ring/\ key to see the previous message.

4) Press end to return to the standby mode.
Deleting Information from the Caller ID List

The cordless phone stores up to 30 messages. If the phone receives the 31st message, the oldest one in the list is automatically deleted. Caller ID data can also be deleted manually.

Deleting a Caller ID message

1) Press cid/menu. Display the message to be deleted from the Caller ID list by pressing vol/ring/\ or vol/ring/\ keys.
2) Press delete/ch.
3) Press vol/ring/\ or vol/ring/\ keys to select "Yes" or "No".
4) Press select or delete/ch.
   When the pointer is at "Yes":
   A tone sounds and the Caller ID message is deleted. The next Caller ID message is then displayed.
   When the pointer is at "No":
   The display returns to the Caller ID message.

Deleting all Caller ID names/numbers

1) Press cid/menu.
2) Press delete/ch.
3) Press \textit{vol/ring/\wedge} or \textit{vol/ring/\vee} keys to select "Yes" or "No".

4) Press \textit{select} or \textit{delete/ch}.

\textbf{When the pointer is at "Yes":}
A tone sounds and all stored Caller ID messages are deleted.

\textbf{When the pointer is at "No":}
The display returns to the summary screen.
Using the Caller ID List

Calling a party from the Caller ID list
You can place a call from the Caller ID list. The cordless phone stores up to 30 messages.

1) Press `cid/menu`. Select the phone number that you want to dial by pressing `vol/ring/\` or `vol/ring/\` keys.

2) Press `talk/flash`. The displayed phone number dials automatically.

You can place a call from Talk Mode. Press the `talk/flash` key, then press the `cid/menu` key. Select the phone number that you want to dial by pressing the `vol/ring/\` or `vol/ring/\` key. Press `select channel`. The displayed phone number will be dialed.

Long Distance calls and Area Code Setting/Cancellation
Pressing 1 while the incoming Caller ID information is displayed (in step 1) will place the prefix "1" in the display to set up for a long distance call. Pressing 3 will set or cancel an area code setting.

• You cannot make a call from the Caller ID list if your cordless telephone is connected to a private branch exchange (PBX).
• When a long distance call has been set, "1" appears in the display.
Storing Caller ID messages in Memory dialing
Messages shown in the Caller ID list can be stored in memory dialing. Using the incoming call information (i.e., Caller ID list), the phone number of the party on the Caller ID list can be stored in memory.

1) Press **cid/menu**.
   Select the phone number to be stored from the Caller ID list by pressing **vol/ring/↑** or **vol/ring/↓** keys.

2) Press **mem**.

3) Press **vol/ring/↑** or **vol/ring/↓** keys or enter a number (01 - 20) to select the memory location to be stored.

4) Press **select**.
   You hear a confirmation tone, and the number is stored in memory. The display returns to the Caller ID list.

   If a message has already been stored in the selected memory number location, a confirmation screen is displayed. Press **vol/ring/↑** key to select "Yes". Press **select** to overwrite. The display returns to the Caller ID list.

---

You cannot store a Caller ID message if no phone number appears in the message.
Changing the Digital Security Code

The digital security code is an identification code used to connect the handset and the base unit. Normally, setting the code is not necessary. The first time you charge your handset, the security code is automatically set. In the rare situation that you suspect another cordless telephone is using the same security code, you can change the code.

1) Remove the handset from the base unit. Press and hold find handset on the base.
2) While holding find handset, place the handset on the base unit, and leave the handset on the base for more than 3 seconds. A new random security code is set.

Installing the Beltclip

To attach the beltclip
Insert the beltclip into the holes on each side of the handset. Press down until it clicks.

To remove the beltclip
Pull both sides of the beltclip to release the tabs from the holes.

Headset Installation

Your phone may be used with an optional headset, the Uniden HS910. To use this feature, insert the headset plug into the headset jack. Your phone is ready for hands-free conversations. (Headset may be purchased by calling the Uniden Parts Department or visiting the web site, see QUICK REFERENCE GUIDE on page 3.)
Note on Power Sources

Battery replacement and handling
When the operating time becomes short, even after a battery is recharged, please replace the battery. With normal usage, your battery should last about one year. Please contact your place of purchase or the Uniden Parts Department for a replacement battery.

Warning: To avoid the risk of personal injury or property damage from fire or electrical shock, only use the Uniden battery model and Uniden adapter model specifically designated for this product.

Caution
- Use only the specified Uniden battery pack (BT-905).
- Do not remove the battery from the handset to charge it.
- Never throw the battery into a fire, disassemble it, or heat it.
- Do not remove or damage the battery casing.

Maintenance

When the handset or base unit becomes slightly dirty
Wipe with a soft, dry cloth.

When the handset or base unit becomes very dirty
Wipe with a soft cloth that has been dampened with diluted, neutral detergent. Dry with a dry cloth.

When the charging contacts become very dirty on both the handset and base unit
Using water only, dampen a cloth to clean the charging contacts. Then make sure to go back over the charging contacts with a dry cloth before returning the handset to the base unit to charge.
# Troubleshooting

If your phone is not performing to your expectations, please try these simple steps first.

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Suggestion</th>
</tr>
</thead>
</table>
| The charge/in use LED won't illuminate when the handset is placed in the base. | • Make sure the AC adapter is plugged into the base and wall outlet.  
• Make sure the handset is properly seated in the base.  
• Make sure the charging contacts on the handset and base are clean. |
| The audio sounds weak and/or scratchy.                                  | • Make sure that the base antenna is in a vertical position.  
• Move the handset and/or base to a different location away from metal objects or appliances and try again.  
• Press `delete/ch` to help eliminate background noise.  
• Make sure that you are not too far from the base. |
| Can't make or receive calls.                                            | • Check both ends of the base telephone line cord.  
• Make sure the AC adapter is plugged into the base and wall outlet.  
• Disconnect the AC adapter for a few minutes, then reconnect it.  
• Change the digital security code (see page 39).  
• Make sure that you are not too far from the base. |

[www.uniden.com](http://www.uniden.com)
<table>
<thead>
<tr>
<th>Symptom</th>
<th>Suggestion</th>
</tr>
</thead>
</table>
| The handset doesn't ring or receive a page. | • The battery pack may be weak. Charge the battery for 15-20 hours.  
• The handset may be too far away from the base unit.  
• Place the base unit away from appliances or metal objects.  
• Change the digital security code (see page 39). |
| Severe noise interference.      | • Keep the handset away from microwave ovens, computers, remote control toys, wireless microphones, alarm systems, intercoms, room monitors, fluorescent lights, and electrical appliances.  
• Move to another location or turn off the source of interference. |
| The Caller ID does not display.  | • The handset was picked up before the second ring.  
• The call was placed through a switchboard.  
• Call your local telephone company to verify your Caller ID service is current.  
• Charge the handset. |
| Voice Message Indication does not work. | • Contact your local telephone company to make sure that your telephone receives FSK message signaling. |
| If you still have a problem.    | • Call our customer hotline at 1-800-297-1023. |
## Liquid Damage

Moisture and liquid can damage your cordless phone. In case of accidental submersion, please read the following steps.

<table>
<thead>
<tr>
<th>Case</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>If the handset or base is exposed to moisture or liquid, but only affects the exterior plastic housing.</td>
<td>Wipe off the liquid and use as normal.</td>
</tr>
</tbody>
</table>
| If moisture or liquid has entered the plastic-housing (i.e. liquid can be heard in the phone or liquid has entered the handset battery compartment or vent openings on the base). | **Handset:**
  1. Remove the battery cover and leave it off for ventilation.
  2. Remove the battery pack by disconnecting.
  3. Leave the battery cover off and the battery pack disconnected for at least 3 days.
  4. Once completely dry, reconnect the battery pack and the battery cover.
  5. Recharge the handset’s battery pack for 20 hours in the base unit before using the phone.
**Base:**
  1. Disconnect the AC adapter from the base unit, cutting off electrical power.
  2. Disconnect the telephone cord from the base unit.
  3. Let dry for at least 3 days.

**IMPORTANT:** You must unplug the telephone line while recharging the battery pack to avoid charge interruption.

**CAUTION:**
Do NOT use a microwave oven to speed up the drying process. This will cause permanent damage to the handset, base, and the microwave oven.

After following these steps, if your cordless telephone does not work, please send to:
Uniden America Corporation
Parts and Service Division
4700 Amon Carter Blvd.
Ft. Worth, TX76155
1-800-554-3988. Monday through Friday
8 a.m. to 5 p.m. CST
General Information
The phone complies with FCC Parts 15 and 68.
Operating temperature: -10°C to 50°C (+14°F to +122°F)

AC Adapter Information
AC Adapter part number: AD-446
Input Voltage: 120V AC 60Hz
Output Voltage: 9V DC 210 mA

Battery Information
Battery part number: BT-905
Capacity: 600 mAH, 3.6V
Battery use time (per charge)
From fully charged
Talk mode duration: Up to 7 hours
Standby mode duration: Up to 14 days

Notes
• To avoid damage to the phone use only Uniden AD-446 and BT-905 with your phone.
• If the handset is left off of the base, the actual Talk mode duration will be reduced respective to the amount of time the handset is off the base.

Recharge your phone on a regular basis by returning the handset to the base after each phone call. When the operating time becomes short, even after the battery is recharged, please replace the battery. With normal usage, the battery should last about one year.

A replacement Uniden adapter and battery may be purchased at your local Uniden dealer or by contacting the Uniden Parts Department (800) 554-3988. Hours are from 8:00 a.m. to 5:00 p.m. Central Time, Monday through Friday. We can also be reached on the web at www.uniden.com.

Specifications, features, and availability of optional accessories are all subject to change without prior notice.
Precautions!

Before you read anything else, please observe the following:

Warning!

Uniden America Corporation DOES NOT represent this unit to be waterproof. To reduce the risk of fire, electrical shock, or damage to the unit, DO NOT expose this unit to rain or moisture.

Rechargeable Nickel-Cadmium Battery Warning

• This product contains a rechargeable nickel-cadmium battery.
• Cadmium is a chemical known to the State of California to cause cancer.
• The rechargeable nickel-cadmium battery contained in this equipment may explode if disposed of in a fire.
• Do not short-circuit the battery.
• Do not change the rechargeable nickel-cadmium battery used in this equipment in any way other than the one designed to change this battery as specified in the owner's manual. Using another charger may damage the battery or cause the battery to explode. Rechargeable Nickel-Cadmium Batteries Must Be Recycled or Disposed of Properly

• Uniden voluntarily participates in an RBRC® industry program to collect and recycle nickel-cadmium batteries at the end of their useful life, when taken out of service within the United States. The RBRC® program provides a convenient alternative to placing used nickel-cadmium batteries into the trash or municipal waste stream, which is illegal in some areas.
• Through the RBRC® program, Uniden makes it easy for you to drop off the used battery at local retailers of replacement nickel-cadmium batteries. You may also contact your local recycling center for information on where to return the used battery. Please call 1-800-BATTERY for information on Ni-Cd battery recycling in your area. Uniden's involvement in this program is part of its commitment to protecting our environment and conserving natural resources.
• RBRC® is a registered trademark of the Rechargeable Battery Recycling Corporation.

Uniden works to reduce lead content in our PVC coated cords in our product and accessories.

Warning:
The cords on this product and/or accessories contain lead, a chemical known to the State of California to cause birth defects or other reproductive harm. Wash hands after handling.

ADDITIONAL INFORMATION [ 45 ]
Telephone Line Problems

The FCC has granted the telephone company the right to disconnect service in the event that your phone causes problems on the telephone line. Also, the telephone company may make changes in facilities and services which may affect the operation of your unit. However, your telephone company must give adequate notice in writing prior to such actions to allow you time for making necessary arrangements to continue uninterrupted service.

If you are having trouble with your telephone service, you must first disconnect your phone to determine if it is the cause of your problem. If you determine that it is the cause, you must leave it disconnected until the trouble has been corrected.

Radio Interference

Radio interference may occasionally cause buzzing and humming in your cordless handset, or clicking noises in the base. This interference is caused by external sources such as TVs, refrigerators, vacuum cleaners, fluorescent lighting, or electrical storms. Your unit is not defective. If these noises continue and are too distracting, please check around your home to see what appliances may be causing the problem.

In addition, we recommend that the base not be placed in a corner and the antenna not be extended. It is also advisable to check with your equipment supplier. If the problem does occur, move the cordless telephone farther away from the TV or VCR and you will often reduce or eliminate the interference.

More Than One Cordless Telephone

If you want to use more than one cordless telephone in your home, they must operate on different channels. Press the channel key to select a channel that provides the clearest communication.

Cordless Telephone Privacy

Cordless telephones are radio devices. Communications between the handset and base of your cordless telephone are conducted using radio frequencies. Although these communications are encrypted, there is the possibility that third parties may be able to intercept the conversations. Consequently, any communications using your cordless telephone may not be private.

Installation Considerations

Selecting a Location

Before choosing a location for your new phone, there are some important guidelines you should consider:

- The location should be close to both a phone jack and continuous power outlet. (A continuous power outlet is an AC outlet which does not have a switch to interrupt its power.)
- Keep the base and handset away from sources of electrical noise such as motors or fluorescent lighting.
- Use a phone jack on a wall that is not used for security systems or a digital intercom system.
- Never extend the base antenna.
- The base can be placed on a desk or tabletop or mounted on a standard telephone wall plate.
- You should charge your new phone for 15-20 hours before completing the installation or using the handset.

Telephone Line Outlets

There are two types of phone outlets:

Modular Jack

Most phone equipment available now uses modular jacks. Phone cords are fitted with a molded plastic connector which plugs into this type of jack. If you do not have modular phone jacks, contact your local telephone company for information about their installation.

Hardwired Jack

Some equipment is wired directly to a phone jack, and these types of installations require a modular jack converter. This type of installation is not difficult; however, you should contact your Uniden telephone dealer or a telephone supply store for advice about the proper adapter or converter for your particular situation.

Connecting the Telephone Cords

Consider these safety guidelines before connecting the telephone cords:

Caution!

- Never install telephone wiring during a lightning storm.
- Never touch uninsulated telephone wires or terminals unless the telephone line has been disconnected.
- Use caution when installing or modifying telephone lines.

Applying Power to the Base

This phone requires an AC outlet, without a switch to interrupt power, and the included AC adapter. To relieve strain on the DC plug when the phone is placed on a desk or table, wrap the power cord around the strain relief notch on the back of the base.

NOTE:

- Place the power cord so that it does not create a trip hazard, or where it could become chafed and create a fire or other electrical hazards.

One Year Limited Warranty

Important:

- Evidence of original purchase is required for warranty service.

WARRANTOR: UNIDEN AMERICA CORPORATION ("Uniden")

ELEMENTS OF WARRANTY: Uniden warrants, for one year, to the original retail owner, this Uniden Product to be free from defects in materials and craftsmanship with only the limitations or exclusions set out below.

BATTERY DURATION: This warranty to the original user shall terminate and be of no further effect 12 months after the date of original retail sale. The warranty is void if the Product is (A) damaged or not maintained as reasonable or necessary, (B) modified, altered, or used as part of any system not manufactured by Uniden, (C) improperly installed, (D) serviced or repaired by someone other than an authorized Uniden service center for a defect or malfunction covered by this warranty, (E) used in any conjunction with equipment or parts or as part of any system not manufactured by Uniden, or (F) installed or programmed by anyone other than as detailed by the owner’s manual for this product.

STATEMENT OF REMEDY: In the event that the product does not conform to this warranty at any time while this warranty is in effect, warrantor will either, at its option, repair or replace the defective unit and return it to you without charge for parts, service, or any other cost (except shipping and handling) incurred by warrantor or its representatives in connection with the performance of this warranty. Warrantor, at its option, may replace the unit with a new or refurbished unit. THE LIMITED WARRANTY SET FORTH ABOVE IS THE ONLY WARRANTIES APPLICABLE TO THE PRODUCT AND IS IN LIEU OF ANY OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. THIS WARRANTY DOES NOT COVER OR PROVIDE FOR THE REIMBURSEMENT OR PAYMENT OF INCIDENTAL OR CONSEQUENTIAL DAMAGES. SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU.

LEGAL REMEDIES: This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. This warranty is void outside the United States of America and Canada.

PROCEDURE FOR OBTAINING PERFORMANCE OF WARRANTY: If, after following the instructions in the owner’s manual you are certain that the Product is defective, contact Uniden. The Product should be shipped freight prepaid, by traceable means, to the Uniden service center as listed in the warranty information section of the owner’s manual. In the event that the Product is under warranty, warrantor will pay to return the repaired or replacement Product to you.

I.C. Notice

TERMINAL EQUIPMENT
NOTICE: This equipment meets the applicable Industry Canada Terminal Equipment Technical Specifications. This is confirmed by the registration number. The abbreviation, IC, before the registration number signifies that registration was performed based on a Declaration of Conformity indicating that Industry Canada technical specifications were met. It does not imply that Industry Canada approved the equipment.

NOTICE: The Ringer Equivalence Number (REN) for this terminal equipment is marked on the equipment itself. The REN assigned to each terminal equipment provides an indication of the maximum number of terminals allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the Ringer Equivalence Numbers of all the devices does not exceed five.

RADIO EQUIPMENT
The term “IC:” before the radio certification number only signifies that Industry Canada technical specifications were met.

Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device. “Privacy of communications may not be ensured when using this telephone.”
