This product combines 5.8 GHz and 900 MHz which enhances security and clarity.
**Step 1  Checking the Package Contents**

Make sure you have received the following items in the package. If any of these items are missing or damaged, contact the Uniden Parts Department.

- Base unit
- Handset
- AC adapter
- Rechargeable battery
- Telephone cord
- Beltclip
- This owner's manual
- Other printed material

Uniden Parts Department at (800) 554-3988
Hours: M-F 8:00 a.m. to 5:00 p.m. CST.
We can also be reached on the web at www.uniden.com

**Step 2  Install and Charge the Handset Battery**

**TO INSTALL THE HANDSET BATTERY**

A. Remove the cover.

B. Connect the battery pack connector with the correct polarity.

C. Replace the cover.

**Step 3  Connect to Phone Line**

When the handset battery pack is fully charged, after 15-20 hours of charging, plug the telephone cord into the base unit and then into a telephone wall jack.

Your phone is set for tone dialing. If your local network requires pulse dialing, please see “Choosing the dialing mode” on page 16.

**Step 4  Setting Menu Options**

Plug the AC adapter cord into the base unit and then into a 120V AC outlet.

E. Place the handset in the base and charge continuously for 15 - 20 hours before using the phone.

**Note:** There are five setup options available. They are Caller ID options [Auto Talk, CIDCW (Caller ID on Call Waiting), Area Code], Dial Mode and Language.

TO SET CALLER ID, LANGUAGE AND DIALING OPTIONS

A. Press and hold call id/menu.

B. Press vol/△/∧ or vol/△/▽ to move the pointer to an option.

C. Press select to change the option setting.

D. Press end to exit, and return the handset to the base.

OPTIONS INCLUDE

A. Auto Talk  On/Off

B. CIDCW  On/Off
  (Caller ID on call waiting)

C. Area Code  Enter/Remove

D. Dial  Pulse/Tone

E. Language  English/French/Spanish

Welcome

Congratulations on your purchase of the Uniden cordless phone. This cordless phone is designed and engineered to exacting standards for reliability, long life, and outstanding performance.

Note: Some illustrations in this manual may differ from the actual unit for explanation purposes. The color of your cordless telephone may vary.

As an ENERGY STAR® Partner, Uniden has determined that this product or product models meets the ENERGYSTAR® guidelines for energy efficiency. ENERGY STAR® is a U.S. registered mark.

Features

- 5.8 GHz Extended Range Technology
- 3 Line Backlit Display
- Caller ID and Call Waiting Caller ID
- RocketDial
- 10 Number Memory Dialing
- 32 Digit Redial
- Flash and Pause
- English, French or Spanish Display Option
- Tone/Pulse Dialing
- Page/Find handset
- Earpiece Volume Control
- Ringer Volume Control (High-Low-Off)
- Hearing Aid Compatible
- 20 Channel Autoscan

Be sure to visit our web site: www.uniden.com

Controls and Functions

1. Handset antenna
2. Beltclip hole
3. Optional headset jack
4. Handset battery compartment
5. Handset earpiece
6. LCD display
7. call id (Caller ID)/menu key
8. vol/△/▲ (volume & scroll) key
9. vol/△/▼ (volume & scroll) key
10. */tone/< (left cursor) key
11. redial/pause key
12. select key
13. Handset microphone and ringer speaker
14. RocketDial key
15. end key
16. talk/flash key
17. #/ (right cursor) key
18. memory key
19. delete/channel key
20. Handset charging contacts
21. charge/in use and VMWI (voice mail waiting) LED
22. find handset key
23. Base charging contacts
24. Telephone line jack
25. DC IN 9V jack
Setting up the Phone

Do the following steps:
A. Choose the best location C. Connect the base unit
B. Install the rechargeable battery pack into the handset

A. Choose the best location
Before choosing a location for your new phone, read the INSTALLATION CONSIDERATIONS included in the PRECAUTIONS. Here are some important guidelines you should consider:

- Avoid heat sources, such as radiators, air ducts, and sunlight
- Avoid television sets and other electronic equipment
- Choose a central location
- Avoid noise sources such as a window by a street with heavy traffic
- Avoid microwave ovens
- Avoid excessive moisture, extremely low temperatures, dust, mechanical vibration, or shock
- Avoid personal computers
- Avoid other cordless telephones
- The location should be close to both a phone jack and a continuous power outlet which is not switchable.
- Keep the base and handset away from sources of electrical noise such as motors, microwave ovens, and fluorescent lighting.
- The base can be placed on a desk, tabletop, or mounted on a standard wall plate.

If your home has specially wired alarm equipment connected to the telephone line, be sure that installing the system does not disable your alarm equipment.

If you have questions about what will disable your alarm equipment, contact your telephone company or a qualified installer.
B. Install the rechargeable battery pack into the handset

The handset is powered by a rechargeable battery pack. The battery recharges automatically when the handset is placed in the base unit.

**Charge the handset battery pack for at least 15-20 hours before using your new cordless telephone for the first time!** To maximize the charge capacity of your battery pack, DO NOT plug the telephone cord into the base unit and wall jack until the battery is fully charged.

1) Press down on the handset battery case cover (use the finger indention for a better grip) and slide the cover downward to remove.

2) Plug the battery pack connector (red & black wires) into the small jack inside the battery compartment. (The connector notches fit into the grooves of the jack only one-way.) Match the wire colors to the polarity label in the battery compartment, connect the battery, and listen for a click to insure connection.

3) Make sure you have a good connection by slightly pulling on the battery wires. If the connection is secure, the battery jack will remain in place.

For optimum performance use only the Uniden BT-800 rechargeable battery pack supplied with your phone.
4) Place the battery case cover back on the handset by sliding it upwards until it clicks into place.

5) Place the handset in the base unit face forward for 15-20 hours without interruption. The base unit’s LED light (labeled charge/in use) illuminates once the handset is placed in the base. The LED light will illuminate regardless if the battery pack is connected or not.

DO NOT rely on the LED light as an indicator that the battery pack is connected and the handset is charging!

If the base charge/in use LED light does not illuminate:
- Check to see if the AC adapter is plugged into the base unit and the electrical wall outlet properly. (Use only the supplied AC adapter. Do not use any other AC adapter.)
- Check to see if the handset is sitting correctly in the base and making good contact with the base unit’s charging contacts.

Replacement batteries are also available through the Uniden Parts Department at (800) 554-3988, Monday through Friday from 8:00 a.m. to 5:00 p.m. or online at www.uniden.com.

The handset should always sit in charging cradle face forward to make good contact with base unit’s charge contacts.
Low battery alert

When the battery pack is very low and needs to be charged, the phone is programmed to eliminate functions in order to save power. If the phone is not in use, "Low Battery" appears on the LCD and none of the keys will operate. If the phone is in use, "Low Battery" flashes and the handset beeps. Complete your conversation as quickly as possible and return the handset to the base unit for charging.

Note: The last number dialed in the redial memory, the names and the numbers stored in the memory locations or CID list are retained for up to 30 minutes while you replace the battery pack.

Cleaning the charging contacts

To maintain a good charge, it is important to clean the charging contacts on both the handset and base unit once a month. Using water only, dampen a cloth to clean the charging contacts. Then make sure to go back over the charging contacts with a dry cloth before returning the handset to the base to charge.

Caution: Do not use paint thinner, benzene, alcohol, or other chemical products. Doing so may discolor the surface of the telephone and damage the finish.
C. Connect the base unit

1) Connect the AC adapter to the DC IN 9V jack and to a standard 120V AC wall outlet.

2) Set the base on a desk or tabletop, and place the handset on the base unit.

3) Make sure that the charge/in use LED illuminates. If the LED does not illuminate, check to see that the AC adapter is plugged in and that the handset makes good contact with the base charging contacts.

   • Connect the AC adapter to a continuous power supply.
   • Place the base unit close to the AC outlet so that you can unplug the AC adapter easily.
   • After installing the battery pack in the handset, charge your handset at least 15-20 hours before plugging into the phone line. Once the handset battery pack is fully charged, connect the telephone line cord to the base and telephone wall outlet.

4) Connect the telephone line cord to the TEL LINE jack and to a telephone outlet once the handset is fully charged.

   • If your telephone outlet isn’t modular, contact your telephone company for assistance.
Mounting the Base Unit on a Wall

**Standard wall plate mounting**

This phone can be mounted on any standard wall plate.

1) Plug the AC adapter into the **DC IN 9V** jack.

2) Wrap the AC adapter cord inside the molded wiring channel as shown.

3) Plug the AC adapter into a standard 120V AC wall outlet.

4) Plug the telephone line cord into the **TEL LINE** jack. Wrap the cord inside the molded wiring channel as shown.

5) Plug the telephone line cord into the telephone outlet.

6) Align the mounting slots on the base with the mounting posts on the wall. Then push in and down until the phone is firmly seated.

**DO NOT** use an AC outlet controlled by a wall switch.
Direct wall mounting

If you don't have a standard wall plate, you can mount your phone directly to the wall. Before doing this, consider the following:

• Avoid electrical cables, pipes, or other items behind the mounting location that could cause a hazard when inserting screws into the wall.
• Try to mount your phone within 5 feet of a working phone jack to avoid excessive lengths.
• Make sure the wall material is capable of supporting the weight of the base and handset.
• Use #10 screws (minimum length of 1-3/8 inches) with anchoring devices suitable for the wall material where the base unit will be placed.

1) Insert two mounting screws into the wall (with their appropriate anchoring device), 3-15/16 inches apart. Allow about 1/8 of an inch between the wall and screw heads for mounting the phone.

2) Refer to steps 1 through 6 on page 13 to mount the telephone.
Setting Menu Options

There are five setup options available. They are Caller ID options [AutoTalk, CIDCW (Caller ID on Call Waiting), Area Code], Dial Mode and Language.

AutoTalk allows you to answer the phone without pressing the talk/flash button. If the phone rings when AutoTalk is on, simply remove the handset from the base and the phone automatically answers the call. If the phone rings when AutoTalk is off, you must press talk/flash to answer the call.

Caller ID options
To change your AutoTalk and CIDCW:
1) Press and hold call id/menu. The following screen appears.
2) Use vol/△/▽ or vol/△/▽ to move the pointer to the selection that you would like to change. Press select to toggle between “On” and “Off” for AutoTalk and CIDCW.
3) Press end and return the handset to the base unit to complete the setting. The handset returns to standby mode.

To enter your Area Code:
If you enter a 3-digit area code number in the Area Code option, your local area code does not appear in Caller ID messages. Do not program this option if your calling area requires 10-digit dialing. When reviewing Caller ID messages, you will see only the local seven digit number. For calls received from outside your local area code, you will see a full 10-digit number.

www.uniden.com
1) When the phone is in standby mode, press and hold call id/menu. The Caller ID setting screen appears.

2) Press vol/ ▲ / ▼ twice to select “Area Code”.

3) Press select.

4) Use the number keys (0 - 9), or delete/channel to enter the 3-digit area code.

5) Press select. A confirmation tone sounds and the displayed area code is entered.

6) Press end or return the handset to the base unit to complete the setting. The handset returns to standby mode.

When the area code has already been stored in memory, the stored area code will be displayed. To change it, use the delete/channel and number keys to enter the new area code. Then press select. A confirmation tone sounds. To complete the setting, press end or return the handset to the base unit.

Choosing the dialing mode

Most phone systems use tone dialing which sends DTMF tones through the phone lines. However, some phone systems (such as those in rural areas) still use pulse dialing. The default setting is tone dialing. Depending on your dialing system, set the mode as follows:

www.uniden.com
1) When the phone is in standby mode, press and hold call id/menu. The following screen appears.

2) Press vol/△/√ three times to select "Dial".

3) Press select to toggle between "Tone" and "Pulse" for each setting.

4) Press end or return the handset to the base unit to complete the setting.
   - If you are not sure of your dialing system, set for tone dialing and make a trial call. If the call connects, leave the setting as is. Otherwise, set for pulse dialing.
   - If your phone system requires pulse dialing and you need to send the DTMF tones for certain situations during a call, you may "Switch Over" to tone dialing. (Refer to "Tone Dialing Switch Over" on page 20.)

Setting the language

1) When the phone is in standby mode, Press and hold call id/menu. The following screen appears.

2) Press vol/△/√ four times to select "Language".

3) Press select to toggle "Eng" (English), "Fr." (French) or "Esp" (Spanish) for each setting.

4) Press end or return the handset to the base unit to complete the setting. The handset returns to standby mode.

2) Press redial/pause, then press talk/flash. | **OR**  
Press redial/pause, then press talk/flash. |

Refer to page 15 "Setting Menu Options" to turn on the AutoTalk feature if desired.
Adjusting the Handset Ringer and Earpiece Volume

Handset ringer tone and volume
Press the volume up key or volume down key (labeled as \textit{vol/\textup{\textbackslash}A/\textbackslash\textup{\textbackslash}A} or \textit{vol/\textup{\textbackslash}V/\textup{\textbackslash}V}) in standby mode to select one of five ringer tones and volume combinations.

Earpiece volume
Press the volume up key or volume down key (labeled as \textit{vol/\textup{\textbackslash}A/\textup{\textbackslash}A} or \textit{vol/\textup{\textbackslash}V/\textup{\textbackslash}V}) during a call to change the earpiece volume of the handset. This setting will remain in effect after the telephone call has ended.

Temporarily Mute Ringer
If the handset is off the base, simply press \textit{end} to temporarily mute the incoming ring. The ringer will sound with the next incoming call.
Redial

The *redial/pause* key redials the last number dialed. The redialed number can be up to 32 digits long.

**Note**

- The tone feature only applies when the dial mode is set to pulse.
- This special number can be stored in a memory location. This is referred to as Chain Dialing (See page 27).

**Tone Dialing Switch-over**

Some telephone companies use equipment that requires pulse dialing (sometimes referred to as rotary dialing). If you need to enter tone dialing digits, you can switch over to tone dialing during the call. This feature is useful when you need tone dialing to use automated systems, for example, entering your bank account number after you have called your bank.

Initially make your call with the pulse dialing mode. Once your call connects, press the *tone/. Enter the desired number. These digits will be sent as tone dialing. Once the call ends, the tone mode is canceled and pulse dialing mode resumes.

**Traveling Out-of-Range**

During a call, as you begin to move your handset too far from your base unit, noise increases. If you pass the range limits of the base unit, your call will terminate within 1 minute.
Selecting a Different Channel
If you encounter interference while using your phone, you can manually change the phone’s channel for clear operation. This function works only when the phone is in use. Press delete/channel. “Scanning” appears on the display, indicating the phone is changing to another channel. For more information on interference, refer to “Precautions” on page 45.

Flash and Call Waiting
If you have “Call Waiting” service and a call waiting tone sounds while you are on a call, press talk/flash to accept the waiting call. There is a short pause, then you will hear the new caller. To return to the original caller, press talk/flash again.

You must subscribe through your local telephone company to receive Call Waiting service.

Page
To locate the handset (while it's off the base), press find handset on the base. The handset beeps for 60 seconds. Paging is canceled when pressing any key or the handset is returned to the base.

Hints
You can cancel paging by pressing the find handset on the base.
Voice Mail Waiting Indicator

If you subscribe to voice mail service, you can use your cordless telephone to access your voice mailbox. The charge/in use light on the base of your phone flashes whenever you have messages waiting in your voice mailbox. Just program the RocketDial with your access number, and you can get your messages at the touch of a button. (The voice mail service provider will supply you with the access number. This number may be simply a phone number. Refer to the provider’s literature.)

You may need to occasionally reset the indicator if it remains on after you have retrieved your messages. To reset the indicator, press and hold find handset for 5 seconds.

note

You must subscribe to voice mail service from your telephone company in order to use this feature. The voice mail company will provide you with the access number.
Storing Phone Numbers and Names

Memory Dialing allows you to dial a number using just a few key presses. Your cordless telephone stores up to 10 names/numbers in the handset.

1) Press **memory** in standby mode, “Select Memory” is displayed.

2) Press **vol/△/∧** or **vol/▽/∨**, or enter a number (1-0) to select the memory location where you would like to store the number.

3) Press **memory** or **select**.

4) Press **memory** or **select**. The Store Name screen appears and a cursor flashes indicating that the display is ready for the name to be entered.

   If the Edit screen appears, the selected memory location is already stored. Then you must either edit the entry in this location, delete the entry in this location, or select “Go Back” to choose another location.

5) To enter a name (up to 13 characters), use the number keys.
   - See the “Steps for Entering Names and Special Characters” (see page 25).
   - Use **#/»** and ***/tone/«** to move the cursor to the desired location.
   - Use **delete/channel** to delete characters as needed.
   - Press and hold **delete/channel** to delete all the characters.
   - If a name is not required, go to step 6.

www.uniden.com
6) Press **memory** or **select**. "Store Number" is displayed. The cursor flashes indicating that the display is ready for the number to be entered.

7) Use the number keys, *#/tone/* < or #/> to enter the phone number. The phone number cannot exceed 20 digits. Use **redial/pause** to enter a pause in the dialing sequence. The display shows a "P". Each pause counts as one digit and represents a two second delay of time between the digits. Use **delete/channel** to delete digits as needed.

8) Press **memory** or **select**. You will hear a confirmation tone, and the following screen appears. Memory storage is complete. For example, if you store a name and number into memory location number 01, the display shows "Memory01 Stored". After about 2 seconds, the following screen is displayed. Repeat steps 2 - 8 to store more numbers.

9) Press **end** to exit memory setup mode, returning to standby.
Steps for Entering Names and Special Characters

Refer to the letters on the number keys to select the desired characters. With each press of a numeric key, the displayed character appears in the following order: Upper case letters first, lower case letters next and finally the number corresponding to the key.

If you make a mistake while entering a name

Use */tone/* or */#/ to move the cursor to the incorrect character. Press delete/channel to erase the wrong character, then enter the correct character. To delete all characters, press and hold delete/channel.

For example, to enter Movies.
1) Pick up the handset. Press memory.
2) Enter a number or press vol/Δ/∧ or vol/Δ/∨ to select a memory location.
3) Press memory or select.
4) Press memory or select. (When there is information already stored in the selected memory location, "Edit MemoryXX" is displayed. See page 28 for information on "Editing a Stored Name and/or Phone Number").
5) Press 6 then press */#/ to move the cursor to the right.
6) Press 6 six times.
7) Press 8 six times.
8) Press 4 six times.
9) Press 3 five times.
10) Press 7 eight times.
11) When finished, press memory or select.

To continue to store the telephone number, proceed to step 7 on page 24.
Making Calls with Memory Dialing

Memory dialing from Standby Mode

1) Press memory. The handset displays your programmed memory locations.

2) Press vol/ 
   or vol/ 
   or enter the number (1 - 0) to select the memory location you would like to dial.

3) Press talk/flash. "Talk" and the volume setting appear on the display. Then the displayed number is dialed.

• If you press memory or select before talk/flash, you can confirm the name and the number stored in the selected memory location.

• Whenever you are using a memory menu screen, you must press a key within 30 seconds or the phone will return to standby mode.

To exit the memory function without dialing, press end. The handset returns to standby mode.
Memory dialing from Talk Mode

2) Press memory.

3) Press vol/Δ/↑ or vol/Δ/↓, or enter a number (1 - 0) to select the memory location of the desired phone number. If you press select, the number is dialed.

4) The phone number in the memory will be dialed when the select is pressed.

5) To hang up, press end.

Chain Dialing

The memory locations on the handset are not limited to phone numbers. You can also store a group of numbers (up to 20 digits) that you need to enter once your call connects. This is referred to as Chain Dialing.

An example of this is a bank account number. Once you have called your bank and are prompted to enter the account number, press memory and select the location number where the special number has been stored. Then press select.

Store your special number with an identifying name. (Refer to "Storing Phone Numbers and Names" on page 23.)
Editing a Stored Name and/or Phone Number

1) Press **memory**. “Select Memory” is displayed.

2) Press **vol/△/>** or **vol/▽/<**, or enter a number (1-0) to select the memory location you would like to edit, and press **memory** or **select**.

3) Press **memory** or **select**.
   The following screen appears with the memory location number that you have selected.

4) Press **vol/△/>** or **vol/▽/<** to select “Edit MemoryXX”, then press **memory** or **select**. The following screen appears. The cursor flashes indicating that the display is ready for the name to be edited. When a name has not been stored, the cursor appears at the beginning of the second line.

5) Use the number keys, */tone/<, #/>*, or **delete/channel** to edit the name. (See page 25.) To edit only the phone number, skip this step.

6) Press **memory** or **select**. The following screen appears. The cursor flashes indicating that the display is ready for the number to be edited.
7) Use the number key, */tone/ <, #/> , radial/pause or delete/channel to edit the phone number. The phone number cannot exceed 20 digits (see page 24).
   If you don’t want to change the phone number, skip this step.

8) Press memory or select. If you changed either name or phone number, a confirmation display shows up. If it is correct, press vol/.Up/ and press select. You hear a confirmation tone, and the following screen appears. The memory storage is complete.
   For example, if you edit a name and number into memory location number 01, the display shows "Memory 01 Stored". After about 2 seconds, Select Memory is displayed.

9) Press end to return to standby mode.
Erasing a Stored Name and Phone Number

1) Press memory. “Select Memory” is displayed.

2) Press vol/△/↑ or vol/△/↓, or enter a number (1 - 0) to select the memory location you would like to erase.

3) Press memory or select.

4) Press memory or select. The Edit screen appears with the memory location number that you have selected in the display.

5) Press vol/△/↑ to move the pointer down to “Delete MemoryXX”.

6) Press memory or select. The “Delete MemoryXX?” screen appears.

7) Press vol/△/↑ to move the pointer to “Yes”.

8) Press select or delete/channel. You hear a confirmation tone, and the “MemoryXX Deleted” screen appears.

9) After about 2 seconds, the display returns to the Select Memory screen. You may delete the information in another memory location (return to step 2) or press end to return to standby mode.
RocketDial

You can store your most frequently dialed number in the RocketDial location. The RocketDial allows you to dial a number with one key press. (There is no need to press talk/flash. The phone will automatically dial the number stored.) If you subscribe to voice mail service, you can store your access number in this location.

Storing and Editing the RocketDial

1) When the phone is in standby mode, press and hold RocketDial. The following display appears.

If the Edit screen appears, there is a number already stored. Press vol/Δ/ or vol/Δ/ to select "Edit Number", then press select.

2) Store the number by following step 7 under "Storing Phone Numbers and Names" on page 24.

3) Press select.

You hear a confirmation tone, and the "Number Stored" screen appears. Memory storage is complete.

Making Calls with the RocketDial

When the phone is in standby mode, simply press RocketDial. The number stored in the RocketDial memory location is instantly dialed.
Deleting the RocketDial

1) When the phone is in standby mode, press and hold RocketDial. The following display appears.

2) Press vol/△/▼ or vol/△/▼ to select “Delete Number”.

3) Press select. The following display appears.

4) Press vol/△/▼ to move the pointer to “Yes”.

5) Press select or delete/channel. You hear a confirmation tone, and the following display appears. After about 2 seconds, the handset returns to standby mode.
Caller ID and Call Waiting Caller ID

You must subscribe to Caller ID services through your local telephone provider to use these features.

When the telephone rings, the Caller ID feature allows you to view the caller’s name, phone number, date and time of call. With Call Waiting Caller ID, you will hear a Call Waiting tone while you are on a call, and the Caller ID data is displayed. To accept the waiting call, press talk/flash (see page 21). Additionally, you can dial a number stored in the Caller ID list or save data to your Memory dial list.

When the Telephone Rings

1) When the Caller ID message is received, the display shows the caller’s phone number along with the date and time. The incoming call information is stored in the Caller ID record. If the Caller ID service includes the caller’s name, the caller’s name appears on the display (up to 15 letters).

You may receive any one of the following messages:
- When invalid data is received “Incomplete Data”
- When a private name is received “Private Name”
- When a private number is received “Private Number”
- When a unknown name is received “Unknown Name”
- When a unknown number is received “Unknown Number”

www.uniden.com
Viewing the Caller ID Message List

The Caller ID list stores information for up to 30 messages (Caller ID names/numbers) - even unanswered calls.

1) Press **call id/menu**.
   The summary screen appears. The screen shows the number of new messages and total messages.

2) Press **vol/Δ/∇** to display the latest Caller ID message.

3) Press **vol/Δ/∇** to see the next message. Or press **vol/Δ/Δ** key to see the previous message.

4) Press **end** to return to standby mode.

**Note:** Data errors appear as “⊥⊥”.

**Note:** In Caller ID operation, if no key is pressed for more than 30 seconds, an error tone sounds and the handset returns to standby mode.

- Each message can be up to 15 characters for the phone number and the name.
- The number of calls from the same Caller ID appears next to the received time. Once you view the new message, the number will be cleared and disappear.

2) When you pick up the phone, the display changes to “Talk”. (AutoTalk feature is set to on.)
Deleting Information from the Caller ID List

The cordless phone stores up to 30 messages (Caller ID names/numbers). If the phone receives the 31st message, the oldest one in the list is automatically deleted. Caller ID data can also be deleted manually.

Deleting a Caller ID message
1) Press **call id/menu**. Display the message to be deleted from the Caller ID list by pressing **vol/Δ/↑** or **vol/Δ/↓**.

2) Press **delete/channel**.

3) Press **vol/Δ/↑** or **vol/Δ/↓** to select “Yes” or “No”.

4) Press **select** or **delete/channel**.

   **When the pointer is at “Yes”:**
   A tone sounds and the Caller ID message is deleted. The next Caller ID message is then displayed.

   **When the pointer is at “No”:**
   The display returns to the Caller ID message.

Deleting all Caller ID names/numbers
1) Press **call id/menu**.

2) Press **delete/channel**.

www.uniden.com
3) Press \textit{vol/\(\Delta/\uparrow\)} or \textit{vol/\(\triangle/\downarrow\)} to select "Yes" or "No".

4) Press \textit{select} or \textit{delete/channel}.

\textbf{When the pointer is at "Yes":}
A tone sounds and all stored Caller ID messages are deleted.

\textbf{When the pointer is at "No":}
The display returns to the summary screen.
Using the Caller ID List

Calling a party from the Caller ID list
You can place a call from the Caller ID list. The cordless phone stores up to 30 messages (Caller ID names/numbers).

1) Press call id/menu. Select the phone number that you want to dial by pressing vol/Δ/Δ or vol/Δ/∇.

2) Press talk/flash. The displayed phone number dials automatically.

You can place a call from Talk Mode. Press talk/flash, then press call id/menu. Select the phone number that you want to dial by pressing vol/Δ/Δ or vol/Δ/∇, then press select. The displayed phone number will be dialed.

Long Distance calls and Area Code Setting/Cancellation
Pressing 1 while the incoming Caller ID information is displayed (in step 1) will place the prefix “1” in the display to set up for a long distance call. Pressing 3 will set or cancel an area code setting.

note

- You cannot make a call from the Caller ID list if your cordless telephone is connected to a private branch exchange (PBX).
- When a long distance call has been set, “1” appears in the display.
Storing Caller ID messages in Memory dialing

Messages (Caller ID names/numbers) shown in the Caller ID list can be stored in memory dialing.

1) Press call id/menu.
   Select the phone number to be stored from the Caller ID list by pressing vol/ ▲ / ▼ or vol/ ▲ / ▼.

2) Press memory.

3) Press vol/ ▲ / ▼ or vol/ ▲ / ▼ or enter a number (1 - 0) to select the memory location to be stored.

4) Press select.
   You hear a confirmation tone, and the number is stored in memory. The display returns to the Caller ID list.

   If a message has already been stored in the selected memory number location, a confirmation screen is displayed.
   Press vol/ ▲ / ▼ to select "Yes". Press select to overwrite. The display returns to the Caller ID list.

You cannot store a Caller ID message if no phone number appears in the message.
Changing the Digital Security Code

The digital security code is an identification code used to connect the handset and the base unit. Normally, setting the code is not necessary. The first time you charge your handset, the security code is automatically set.

In the rare situation that you suspect another cordless telephone is using the same security code, you can change the code.

1) Remove the handset from the base unit. Press and hold find handset on the base.
2) While holding find handset, place the handset in the base unit, and leave the handset on the base for more than 3 seconds. A new random security code is set.

Installing the Beltclip

To attach the beltclip
Insert the beltclip into the holes on each side of the handset. Press down until it clicks.

To remove the beltclip
Pull both sides of the beltclip to release the tabs from the holes.

Headset Installation

Your phone may be used with an optional headset, the Uniden HS910. To use this feature, insert the headset plug into the headset jack. Your phone is ready for hands-free conversations.

(Headset may be purchased by calling the Uniden Parts Department or visiting the web site, see QUICK REFERENCE GUIDE on page 3.)
Note on Power Sources

Battery replacement and handling
When the operating time becomes short, even after a battery is recharged, please replace the battery. With normal usage, your battery should last about one year. Please contact your place of purchase or the Uniden Parts Department for a replacement battery.

Warning: To avoid the risk of personal injury or property damage from fire or electrical shock, only use the Uniden battery model and Uniden adapter model specifically designated for this product.

Power Failure
During the period that the power is off, you will not be able to make or receive calls with the telephone.

Caution
- Use only the specified Uniden battery pack.
- Do not remove the battery from the handset to charge it.
- Never throw the battery into a fire, disassemble it, or heat it.
- Do not remove or damage the battery casing.

Maintenance
To maintain a good charge, it is important to clean the charging contacts on both the handset and base unit once a month. Using water only, dampen a cloth to clean the charging contacts. Then, make sure to go back over the charging contacts with a dry cloth.

Caution
Do not use paint thinner, benzene, alcohol, or other chemical products. Doing so may discolor the surface of the telephone and damage the finish.
# Troubleshooting

If your phone is not performing to your expectations, please try these simple steps first.

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Suggestion</th>
</tr>
</thead>
</table>
| The charge/in use LED won't illuminate when the handset is placed in the base. | • Make sure the AC adapter is plugged into the base and wall outlet.  
• Make sure the handset is properly seated in the base.  
• Make sure the charging contacts on the handset and base are clean. |
| The audio sounds weak and/or scratchy.       | • Move the handset and/or base to a different location away from metal objects or appliances and try again.  
• Press delete/channel to help eliminate background noise.  
• Make sure that you are not too far from the base. |
| Can't make or receive calls.                 | • Check both ends of the base telephone line cord.  
• Make sure the AC adapter is plugged into the base and wall outlet.  
• Disconnect the AC adapter for a few minutes, then reconnect it.  
• Change the digital security code (see page 39).  
• Make sure that you are not too far from the base. |

## Liquid Damage

Moisture and liquid can damage your cordless phone. In case of accidental submersion, please read the following steps.

<table>
<thead>
<tr>
<th>Case</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>If the handset or base is exposed to moisture or liquid, but liquid only affects the exterior plastic housing.</td>
<td>Wipe off the liquid and, use as normal.</td>
</tr>
</tbody>
</table>
| If moisture or liquid has entered the plastic-housing (i.e. liquid can be heard in the phone or liquid has entered the handset battery compartment or vent openings on the base). | **Handset:**
1. Remove the battery cover and leave it off for ventilation.
2. Remove the battery pack by disconnecting.
3. Leave the battery cover off and the battery pack disconnected for at least 3 days.
4. Once the phone is completely dry, reconnect the battery pack and the battery cover.
5. Recharge the handset's battery pack for 20 hours in the base unit before using the phone.

**Base:**
1. Disconnect the AC adapter from the base unit, cutting off electrical power.
2. Disconnect the telephone cord from the base unit.
3. Let dry for at least 3 days.

**IMPORTANT:** You must **unplug the telephone line while recharging the battery pack** to avoid charge interruption.

**CAUTION:**
DO NOT use a microwave oven to speed up the drying process. This will cause permanent damage to the handset, base and the microwave oven.

After following these steps, if your cordless telephone does not work, please send to:
Uniden America Corporation
Parts and Service Division
4700 Amon Carter Blvd.
Ft. Worth, TX76155
1-800-554-3988. Monday through Friday
8 a.m. to 5 p.m. CST

www.uniden.com
General Information

The phone complies with FCC Parts 15 and 68.
Operating temperature: -10°C to 50°C (+14°F to +122°F)

AC Adapter Information
AC Adapter part number: AD-314
Input Voltage: 120V AC 60Hz
Output Voltage: 9V DC 350 mA

Battery Information
Battery part number: BT-800
Capacity: 800 mAH, 3.6V

Frequency
925.181-927.451 MHz
5739.320-5746.130 MHz

Recharge your phone on a regular basis by returning the handset to the base after each phone call.
When the operating time becomes short, even after the battery is recharged, please replace the battery.
With normal usage, the battery should last about one year.

A replacement Uniden adapter and battery may be purchased at your local Uniden dealer or by contacting the Uniden Parts Department (800) 554-3988. Hours are from 8:00 a.m. to 5:00 p.m. Central Time, Monday through Friday. We can also be reached on the web at www.uniden.com.

Specifications, features, and availability of optional accessories are all subject to change without prior notice.
Precautions!

Before you read anything else, please observe the following:

Warning!

Uniden America Corporation DOES NOT represent this unit to be waterproof. To reduce the risk of fire, electrical shock, or damage to the unit, DO NOT expose this unit to rain or moisture.

Rechargeable Nickel-Cadmium Battery Warning

- This equipment contains a rechargeable nickel-cadmium battery.
- Cadmium is a chemical known to the State of California to cause cancer.
- The rechargeable nickel-cadmium battery contained in this equipment may explode if disposed of in a fire.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

The cords on this product and/or accessories contain lead, a chemical transmitting and receiving according to the highest specifications set forth by the FCC. We have rated this phone to comply with FCC specifications. The Maximum Range rating of this phone is meant to be used as a means of comparison against other range claims.

ADDITIONAL INFORMATION [ 45 ]
Telephone Line Problems

The FCC has granted the telephone company the right to disconnect service in the event that your phone causes problems on the telephone line. Also, the telephone company may make changes in facilities and services which may affect the operation of your unit. However, your telephone company must give adequate notice in writing prior to such actions to allow you time for making necessary arrangements to continue uninterrupted service.

If you are having trouble with your telephone service, you must first disconnect your phone to determine if it is the cause of your problem. If you determine that it is the cause, you must leave it disconnected until the trouble has been corrected.

Radio Interference

Radio interference may occasionally cause hearing and listening in your cordless handset, or clicking noises in the base. This interference is caused by external sources such as TV, refrigerators, vacuum cleaners, fluorescent lighting, and electrical storms. Your unit is NOT DEFECTIVE; if these noises continue and are too distracting, please check around your home to see what appliance may be causing the problem.

In addition, we recommend that the base not be plugged into a circuit that also powers a major appliance such as a refrigerator, vacuum cleaner, fluorescent lighting, or electrical storm. Your unit is NOT DEFECTIVE; if these noises continue and are too distracting, please check around your home to see what appliance may be causing the problem.

If in the unlikely event that you consistently hear other voices or distracting transmissions on your phone, you may be receiving radio signals from another cordless telephone or other source of interference. If you cannot eliminate this type of interference, you need to change to a different channel.

Finally, it should be noted that some cordless telephones operate at frequencies that may cause interference to nearby TVs and VCRs. If you observe this type of interference, try the following:

- Reorient or relocate the receiving TV or VCR.
- If necessary, consult your telephone company or service technician for advice about the proper connection of your TV or VCR.

More Than One Cordless Telephone

If you want to use more than one cordless telephone in your home, they must operate on different channels. Press the channel key to select a channel that provides the clearest communication.

Cordless Telephone Privacy

Cordless telephones are radio devices. Communications between the base and cordless phone are accomplished by means of radio waves which are broadcast over the open airways. Because of the inherent physical properties of radio waves, your communications can be received by radio receiving devices other than your own cordless telephone unit. Consequently, any communications using your cordless telephone may not be private.

Installation Considerations

Selecting a Location

Before choosing a location for your new phone, there are some important guidelines you should consider:

- **The location should be close to both a phone jack and continuous power outlet.** (A continuous power outlet is an AC outlet which does not have a switch to interrupt its power.)
- **Keep the base and handset away from sources of electrical noise such as motors or fluorescent lighting.**
- **Be sure there is sufficient space to fully extend the base antenna.**
- **The base can be placed on a desk or tabletop or mounted on a standard telephone wall plate.**
- **You should charge your new phone for 15-20 hours before completing the installation or using the handset.**

I.C. Notice

TERMINAL EQUIPMENT

NOTICE: This equipment meets the applicable Industry Canada Terminal Equipment Technical Specifications. This is confirmed by the registration number. The abbreviation, IC, before the registration number signifies that registration was performed based on a Declaration of Conformity indicating that Industry Canada technical specifications were met. It does not imply that Industry Canada approved the equipment.

NOTICE: The Ringer Equivalence Number (REN) for this terminal equipment is marked on the equipment itself. The REN assigned to each terminal equipment provides an indication of the maximum number of terminals allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the Ringer Equivalence Numbers of all the devices does not exceed five.

RADIO EQUIPMENT

The term “IC:” before the radio certification number only signifies that Industry Canada technical specifications were met.

Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device. “Privacy of communications may not be ensured when using this telephone”.
