Step 1  Check the Package Contents

Make sure you have received the following items in the package. If any of these items are missing or damaged, contact the Uniden Customer Hotline.

- Base unit
- Handset
- AC adapter
- Rechargeable battery
- Telephone cord
- Beltclip
- This owner’s manual
- Other printed material

Uniden Customer Hotline at 1-800-297-1023. (Mon - Fri 7 am to 7 pm, Sat/Sun 9 am to 5 pm, CST. Phone support is closed on holidays.) We can also be reached on the web at www.uniden.com

Step 2  Install and Charge the Handset Battery

TO INSTALL THE HANDSET BATTERY

A Remove the cover.
B Connect the battery pack connector with the correct polarity.
C Replace the cover.

Step 3  Connect to Phone Line

When the handset battery pack is fully charged, after 15-20 hours of charging, plug the telephone cord into the base unit and then into a telephone wall jack.

Your phone is set for tone dialing. If your local network requires pulse dialing, please see “Choosing the dialing mode” on page 16.

Step 4  Set Menu Options

Note: There are five setup options available. They are Caller ID options [AutoTalk, CIDCW (Caller ID on Call Waiting), Area Code], Dial Mode and Language.

TO SET CALLER ID, LANGUAGE AND DIALING OPTIONS

A Press and hold call id/menu.
B Press ▲ or ▼ to move the pointer to an option.
C Press select to change the option setting.
D Press end to exit, and return the handset to the base.

OPTIONS INCLUDE

A AutoTalk On/Off
B CIDCW On/Off (Caller ID on call waiting)
C Area Code Enter/Remove
D Dial Pulse/Tone
E Language English/French/Spanish
Congratulations on your purchase of the Uniden cordless phone. This cordless phone is designed and engineered to exacting standards for reliability, long life, and outstanding performance.

**Note:** Illustrations in this manual are used for explanation purposes. Some illustrations in this manual may differ from the actual unit. The color of your cordless telephone may vary.

### Features

- 5.8GHz Extended Range Technology
- Caller ID/Caller ID on Call Waiting
- 3-Line Backlit LCD
- Trilingual Menu Displays
- 30 Caller ID Memory
- 10 Number Memory Dialing
- Last Number Redial
- Tone/Pulse Dialing
- Page/Find Handset Key
- Earpiece/Ringer Volume Controls
- Mute or Turn Ringer Off
- Hearing Aid Compatible
- 20 Channel Auto Scan
- Desk or Wall Mountable

If you have any trouble with your phone, call our Customer Hotline at 1- 800-297-1023, Mon-Fri 7 am to 7 pm, Sat/Sun 9 am to 5 pm, CST. (Phone support is closed on holidays.)

Controls and Functions

1. Handset antenna
2. Beltclip hole
3. Optional headset jack
4. Handset ringer speaker
5. Handset battery compartment
6. Handset earpiece
7. LCD display
8. ▼ (volume & scroll down) key
9. Call id (Caller ID)/menu key
10. * /tone/ ← (left cursor) key
11. Redial/pause key
12. Select key
13. ▲ (volume & scroll up) key
14. End key
15. Talk/flash key
16. #/ → (right cursor) key
17. Memory key
18. Delete/chan key
19. Handset microphone
20. Handset charging contacts
Terms Used in this Manual

- Standby Mode - The handset may be sitting in or off the base, but is NOT in use. The talk/flash key has not been pressed and there is no dial tone.
- Talk Mode - The handset is off the base and the talk/flash key has been pressed, enabling a dial tone.
- CID - Caller ID
- CIDCW - Caller ID on Call Waiting

21. Base charging contacts
22. Find hs key
23. Charge/in use and VMWI (voice mail waiting) LED
24. Telephone line jack
25. DC IN 9V jack
Accessibility

Uniden provides a customer service hotline for accessibility questions. If you have a disability and need customer service assistance or if you have any questions about how Uniden's products accommodate persons with disabilities, please call the accessibility voice/TTY line:
1-800-874-9314

A representative is available to talk to you M-F, 8:00 am to 5:00 pm, CST. After hours, you can leave a message, and we will call you back. Information is also available on our web site, www.uniden.com, under the "Accessibility" link.
Installing the Phone

Do the following steps:
- A. Choose the Best Location
- B. Install the Rechargeable Battery Pack into the Handset
- C. Connect the Base Unit and Charge the Handset
- D. Mount the Base Unit on a Wall

A. Choose the best location
Before choosing a location for your new phone, here are some important guidelines you should consider:

- Avoid heat sources, such as radiators, air ducts, and sunlight.
- Avoid television sets and other electronic equipment.
- Avoid noise sources such as a window by a street with heavy traffic.
- Avoid microwave ovens.
- Avoid excessive moisture, extremely low temperatures, dust, mechanical vibration, or shock.
- Avoid personal computers.
- Avoid other cordless telephones.
- Choose a central location.

- The location should be close to both a phone jack and a continuous power outlet (one which is not connected to a switch).
- The base and handset should be kept away from sources of electrical noise such as motors, microwave ovens, and fluorescent lighting.
- The base can be placed on a desk, tabletop, or mounted on a standard wall plate. For better reception, place the base as high as possible.
- The base should be placed in an open area for optimum range and reception.

www.uniden.com

Note
If your home has specially wired alarm equipment connected to the telephone line, be sure that installing the system does not disable your alarm equipment.

If you have questions about what will disable your alarm equipment, contact your telephone company or a qualified installer.
B. Install the rechargeable battery pack into the handset

The handset is powered by a rechargeable battery pack. The battery recharges automatically when the handset is placed in the base unit.

1) Press down on the handset battery case cover (use the finger indentation for a better grip) and slide the cover downward to remove.

2) Plug the battery pack connector (red & black wires) into the small jack inside the battery compartment. (The connector notches fit into the grooves of the jack only one-way.) Match the wire colors to the polarity label in the battery compartment, connect the battery, and listen for a click to insure connection.

3) Make sure you have a good connection by slightly pulling on the battery wires. If the connection is secure, the battery jack will remain in place.

4) Place the battery case cover back on the handset by sliding it upwards until it clicks into place.

Use only the Uniden (BT-905) rechargeable battery pack supplied with your phone.
C. Connect the Base Unit and Charge the Handset

1) Connect the AC adapter to the DC IN 9V jack and to a standard 120V AC wall outlet.

2) Place the handset in the base unit with the keypad facing forward.

3) Make sure that the charge/in use LED illuminates. If the LED does not illuminate, check to see that the AC adapter is plugged in and that the handset makes good contact with the base charging contacts.

4) Charge your handset at least 15-20 hours before plugging the phone line.

5) Once the handset battery pack is fully charged, connect the telephone line cord to the TEL LINE jack and a telephone outlet. If your telephone outlet isn't modular, contact your telephone company for assistance.

- Use only the supplied AD-314 AC adapter. Do not use any other AC adapter.
- Do not place the power cord where it creates a trip hazard or where it could become chafed and create a fire or electrical hazard.

note

- Connect the AC adapter to a continuous power supply.
- Place the base unit close to the AC outlet to avoid long extension cords.
D. Mount the Base Unit on a Wall

Standard wall plate mounting
This phone can be mounted on any standard wall plate.

1) Plug the AC adapter to the **DC IN 9V** jack.

2) Route the AC adapter cord through the molded wiring channel as shown.

3) Plug the AC adapter into a standard 120V AC wall outlet.

4) Plug the telephone line cord into the **TEL LINE** jack.

5) Plug the telephone line cord into the telephone outlet.

6) Align the mounting slots on the base with the mounting posts on the wall. Then push in and down until the phone is firmly seated.
Direct wall mounting
If you don't have a standard wall plate, you can mount your phone directly to the wall. Before doing this, consider the following:
- Avoid electrical cables, pipes, or other items behind the mounting location that could cause a hazard when inserting screws into the wall.
- Try to mount your phone within 5 feet of a working phone jack to avoid excessive lengths.
- Make sure the wall material is capable of supporting the weight of the base and handset.
- Use #10 screws (minimum length of 1-3/8 inches) with anchoring devices suitable for the wall material where the base unit will be placed.

1) Insert two mounting screws into the wall (with their appropriate anchoring device), 3-15/16 inches apart.
   Allow about 1/8 of an inch between the wall and screw heads for mounting the phone.

2) Refer to steps 1 through 6 on page 12 to mount the telephone.

Installing the Beltclip
To attach the beltclip
Insert the beltclip into the holes on each side of the handset. Press down until it clicks.

To remove the beltclip
Pull both sides of the beltclip to release the tabs from the holes.
Headset Installation

Your phone may be used with an optional headset. To use this feature, insert the headset plug into the headset jack. Your phone is ready for hands-free conversations. (Headsets may be purchased by visiting our website at www.uniden.com or by calling our Parts Department. See back cover page.)
Basic Setup

There are five basic options that you will need to set up: AutoTalk, CIDCW (Caller ID on Call Waiting), Area Code, Dial Mode and Language.

Activating AutoTalk

AutoTalk allows you to answer the phone simply by removing the handset from the base. You do not have to press any keys.

1) When the phone is in standby mode, press and hold the \textit{call id/menu} key. The following screen appears.
2) Press the \textit{select} key to turn AutoTalk on.
3) Press the \textit{end} key to complete the setting. The handset returns to standby mode.

Activating Caller ID on Call Waiting

Caller ID allows you to see the name and number of the calling party before you answer the phone. Caller ID on Call Waiting (CIDCW) lets you see the name and number of a call that comes in when you are on the line.

You must subscribe to Caller ID service through your local telephone provider to use this feature.

1) When the phone is in standby mode, press and hold the \textit{call id/menu} key. The following screen appears.
2) Press the \textit{select} key to select CIDCW.
3) Press the \textit{select} key to toggle and turn on Caller ID on Call Waiting.
4) Press the \textit{end} key and return the handset to the base unit to complete the setting. The handset returns to standby mode.
Entering Your Area Code
If you can make a call by dialing only 7 digits (instead of 10), you can program your local area code in your phone. If you get a call from within your area code, you'll only see the 7-digit phone number. If you get a call from outside your area code, you'll see all 10 digits.

1) When the phone is in standby mode, press and hold the call id/menu key. The following screen appears.

2) Press the ▼ key twice to select Area Code.

3) Press the select key. If an area code was already stored, the phone will display it.

4) Use the number keys (0 - 9) to enter the 3-digit area code. If you make an error, use the delete/chan key to backspace.

5) Press the select key. A confirmation tone sounds.

6) Press the end key to complete the setting. The handset returns to standby mode.

Choosing the Dialing Mode
Your phone can communicate with the telephone network in two different ways: tone dialing and pulse dialing. These days, most phone networks use a method called tone dialing, so your phone comes programmed for tone dialing.

If your phone company uses pulse dialing, you'll need to change your phone's dial mode. There's an easy way to tell: try making a call. If your call connects, your phone's setting is fine. If not, follow the steps below:
1) When the phone is in standby mode, press and hold the *call id/menu* key. The following screen appears.

2) Press the ▼ key three times to select **Dial**.

3) Press the select key to set the phone to pulse dialing.

4) Press the end key to complete the setting. The handset returns to standby mode.

### Setting the language

You can change the language the menu display uses. Choose from English, French, or Spanish.

1) When the phone is in standby mode, press and hold the *call id/menu* key. The following screen appears.

2) Press the ▼ key four times to select **Language**.

3) Press the select key to select **Eng**, **Fr.**, or **Esp**.

4) Press the end key to complete the setting. The handset returns to standby mode.

### Selecting the Ring Tone and Volume

Your phone has five different ringer tone/volume combinations you can choose from.

1) With the phone in standy mode, press the ▲ or ▼ key.

2) The phone will sound the different ring tones at different volumes. To turn the ringer off, select **Ringer Off**.

3) When the phone sounds the ring tone and volume you wish to use, press the end key.
Using Your Phone

Making and Receiving Calls

Making a call
1) Remove the handset from the base.
2) Press the talk/flash key.
3) Listen for the dial tone.
4) Dial the number.
OR
1) Remove the handset from the base.
2) Dial the number.
3) Press the talk/flash key.

Receiving a call
1) Remove the handset from the base. (If AutoTalk is on, the phone will automatically answer the call when you pick it up.)
2) Press the talk/flash key.
OR
1) If the handset is off the base, press the talk/flash, */tone/ ←, #/→ or any number key. (AutoTalk is on.)

Hanging up
Press the end key or return the handset to the base.

To turn on the AutoTalk feature, see "Activating Autotalk" on page 15.
Redialing the Last Dialed Number

1) Remove the handset from the base.
2) Press the talk/flash key.
3) Listen for the dial tone.
4) Press the redial/pause key.

OR

1) Remove the handset from the base.
2) Press the redial/pause key.
3) Press the talk/flash key.

Adjust the Earpiece Volume

To change the earpiece volume, press the ▲ or ▼ key during a call.

Temporarily Mute Ringer

If the handset is off the base while an incoming call is ringing, simply press the end key to mute the incoming ring. The ringer will sound with the next incoming call.

You can only mute the handset ringer if the handset is off the base when the phone starts ringing.
**Tone Dialing Switch-over**

If your telephone company requires pulse dialing, you can switch over to tone dialing after the call connects. This feature is useful when you need tone dialing to use automated services such as telephone bank tellers, telephone prescription refills, customer support menus, etc.

If your phone is set to pulse dialing mode, make your call normally. Once your call connects, press the \* /tone/ key. Any digits you enter from then on will be sent as tone digits. When this particular call ends, the phone automatically returns to pulse dialing mode.

**Traveling Out-of-Range**

During a call, as you begin to move your handset too far from your base unit, noise increases. If you pass the range limits of the base, your call will terminate within one minute.

**Selecting a Different Channel**

If you encounter interference while using your phone, you can manually change the phone’s channel for clear operation. While using your phone, press the delete/chan key. Scanning appears on the display, indicating the phone is changing to another channel. For more information on interference, refer to "Precautions" on page 39.

The UltraClear Plus™ true compander circuitry virtually eliminates background noise. This innovative technology, together with 20 different channels, provides you with the best possible reception during all your conversations.
Find Handset
To locate the handset, press the **find hs** key on the base. The handset beeps for 60 seconds.
To cancel paging, press any key on the handset or the **find hs** key on the base, or return the handset to the base.
Paging is also canceled when the phone receives an incoming call.

Using Call Waiting
If you have Call Waiting, you can receive calls while on the line.

1) If a call comes in while you are on the phone, you will hear a call waiting tone. If you have CIDCW activated, you will see the name and number of the incoming caller.

2) Press the **talk/flash** key to accept the waiting call. After a short pause, you will hear the new caller.

3) To return to the original caller, press the **talk/flash** key again.

**note** You must subscribe to Call Waiting through your local telephone company.
Voice Mail Waiting Indicator

If you subscribe to voice mail service, you can use your cordless telephone to access your voice mailbox. The **charge/in use** LED on the base of your phone flashes whenever you have messages waiting in your voice mailbox.

Just dial the access number supplied by your voice mail provider to enter your mailbox.

You can program your voice mail access number to a speed dial number. If the voice mail waiting indicator remains on after you have retrieved your messages, press and hold the *find hs* key for 5 seconds. This will reset the indicator.

You must subscribe to voice mail service from your telephone company in order to use this feature. The voice mail company will provide you with the access number.
Using the Speed Dial Memory

The speed dial memory allows you to store up to 10 names and numbers in the handset. You can dial these numbers with just a few key presses.

The speed dial memory is not limited to phone numbers. You can store any number (up to 20 digits) that you need to enter once your call connects. This is referred to as Chain Dialing. For example, you can save your bank account number to speed dial memory. When you call your bank's telephone teller service and are prompted to enter your account number, simply press the memory key and the speed dial number where you stored your account number. Then press the select key.

Storing Names and Numbers in Speed Dial Memory

1) With the phone in standby mode, press the memory key.

2) Enter 0-9 to select the speed dial number where you would like to store this entry. You can also scroll through the list with the ▲ and ▼ keys. Press the select key twice.

3) Store Name appears and a cursor flashes indicating that the phone is ready for the name to be entered.

If the selected speed dial number is already assigned, the edit screen appears. You can select Edit to edit this entry, select Delete to erase this entry, or select Go Back to choose another speed dial number.
4) Enter a name according to the instructions below, then press the **select** key. If no name is required, go to step 5.

- The name can be up to 13 characters.
- Use the */tone/* and */tone/* key to move the cursor to the desired location.
- Use the **delete/chan** key to delete characters as needed.
- Press and hold the **delete/chan** key to delete all the characters.

Refer to the letters on the number keys to select the desired characters. With each press of a numeric key, the displayed character appears in the following order: upper case letters first, lower case letters next and finally the number corresponding to the key.

**If you make a mistake while entering a name**

Use the */tone/* or */tone/* key to move the cursor to the incorrect character. Press the **delete/chan** key to erase the wrong character. Then enter the correct character. To delete all characters, press and hold the **delete/chan** key.

For example, to enter **Movies**.

1) Press 6. Then press the */key to move the cursor to the right.

2) Press 6 six times.

3) Press 8 six times.

4) Press 4 six times.

5) Press 3 five times.

6) Press 7 eight times.
5) Store Number is displayed. The cursor flashes indicating that the phone is ready for the number to be entered.

6) Use the keypad to enter the phone number; each number can be up to 20 digits. If you need the phone to pause during the dialing sequence, press the redial/pause key to insert a two-second delay between the numbers. You can enter multiple pauses to increase the delay. Each pause counts as a digit. The display shows a P for every pause.

Note: When storing numbers into memory, if the handset is idle (i.e., no key is pressed) for more than 30 seconds, it will beep rapidly, and the phone will return to standby mode.

7) Press the memory key. You will hear a confirmation tone, and the following screen appears. Memory storage is complete. After about 2 seconds, the following screen displays all the speed dial memory entries.

8) Press the end key to exit memory setup mode. The phone returns to standby.
Storing Caller ID messages in Speed Dial Memory

Messages (Caller ID names/numbers) shown in the Caller ID list can be stored in memory dialing. For instructions on viewing the Caller ID Message list, see page 29.

1) Press the call id/menu key. Select the phone number to be stored from the Caller ID list by pressing the ▲ or ▼ key.

2) Press the memory key.

3) Enter a number (0 - 9) or press the ▲ or ▼ key to select the memory location to be stored.

4) Press the select key. You hear a confirmation tone, and the number is stored in memory. The display returns to the Caller ID list.

If a number has already been stored in the selected memory number location, a confirmation screen is displayed. Press the ▲ key to select Yes. Press the select key to overwrite. The display returns to the Caller ID list.
Making Calls from Speed Dial Memory
1) Press the *memory* key. The handset displays your programmed speed dial number.

2) Enter the number (0 - 9), or press the ▲ or ▼ key to select the speed dial number you would like to dial.

3) Press the *talk/flash* key. Talk and the number selected appear on the display. Then the displayed number is dialed.

To cancel speed dialing
Press the *end* key to cancel speed dialing. The handset returns to standby mode. Also, if the handset is idle (e.g., no key is pressed) for 30 seconds, the phone returns to standby mode.
CALLER ID AND CIDCW (CALLER ID ON CALL WAITING)

You must subscribe to Caller ID services through your local telephone provider to use these features. When the telephone rings, the Caller ID feature allows you to view the caller’s name, phone number, date and time of call. The incoming call information is stored in the Caller ID record. If the Caller ID service includes the caller’s name, the caller’s name appears on the display (up to 15 letters).

The data and
time received
5/11 12:30PM
Caller’s name
Jane Smith
Caller’s phone number
214-555-1234

You may receive any one of the following messages:
- When invalid data is received: Incomplete Data
- When a private name is received: Private Name
- When a private number is received: Private Number
- When an unknown name is received: Unknown Name
- When an unknown number is received: Unknown Number

Data errors appear as “¨¨.”
Viewing the Caller ID Message List

The Caller ID list stores information for up to 30 incoming calls - even unanswered calls. You can also view the Caller ID list during a call.

1) Press the *call id/menu* key.
   The summary screen displays the number of new messages and total messages.

2) Use the ▼ key to scroll through the messages from the latest to the earliest, or use the ▲ key to scroll through the messages from the earliest to the latest.

3) Press the *call id/menu* key to return to talk mode, or press the *end* key to return to standby mode.

• In Caller ID operation, if no key is pressed for more than 30 seconds, an error tone sounds and the handset returns to standby mode.
• Each message can be up to 15 characters for the name and 15 digits for the phone number.
• The number of calls from the same Caller ID appears next to the received time. Once you view the new message, the number will be cleared and disappear.
• During a call, don't press the *end* key, or the call will be disconnected.
Deleting Information from the Caller ID List
If the phone receives more Caller ID messages than it can store, the oldest one in the list is automatically deleted. Caller ID data can also be deleted manually.

Deleting a Caller ID message
1) Press the call id/menu key in standby mode. Find the message to be deleted from the Caller ID list by pressing the ▲ or ▼ key.

2) Press the delete/chann key.

3) Press the ▲ or ▼ key to select Yes, and then press the select key.

Deleting all Caller ID names/numbers
1) With the phone in standby mode, press the call id/menu key.

2) Press the delete/chann key.

3) Press the ▲ or ▼ key to select Yes, and then press the select key.
   You hear a confirmation tone and all stored Caller ID messages are deleted.
Making a Call from the Caller ID List

You can place a call from the Caller ID list.

1) Press the call id/menu key in standby mode. Select the phone number that you want to dial by pressing the ▲ or ▼ key.

2) To have the phone dial a 1 before the displayed Caller ID number, press 1. To have the phone dial the stored area code before the displayed Caller ID number, press 3.

3) Press the talk/flash key. The displayed phone number dials automatically.

Caller ID on Call Waiting (CIDCW)

With CIDCW, you will hear a Call Waiting tone while you are on a call, and the Caller ID data is displayed. To accept the waiting call, press the talk/flash key (see page 21).

www.uniden.com
Changing the Digital Security Code

To protect you against misbilled calls which might result from your phone being activated by other equipment, the cordless phone provides AutoSecure™ to electronically locks your phone when the handset is in the base. Also, the Random Code™ digital security which automatically selects one of over 262,000 digital security codes for the handset and base.

If the handset battery pack is completely discharged or the battery pack is removed, the digital security code will be lost. If this happens, a new security code is set automatically the next time the battery pack is charged.

In the rare situation that you suspect another cordless telephone is using the same security code, you can change the code.

1) Remove the handset from the base unit. Press and hold the find hs key on the base.

2) While holding the find hs key, place the handset in the base unit, and leave the handset on the base for more than 3 seconds. A new random security code is set.
Note on Power Sources

**Low battery alert**
When the battery pack is very low and needs to be charged, the phone is programmed to eliminate functions in order to save power. If the phone is not in use, Low Battery appears on the LCD and none of the keys will operate. If the phone is in use, Low Battery flashes and the handset beeps. Complete your conversation as quickly as possible and return the handset to the base unit for charging.

**Note** Information stored in the phone's memory will be retained for 30 minutes after the battery pack is removed. This includes all setup information, last number dialed, speed dial memory, and the CID list.

Even when the battery pack is not being used, it will gradually discharge over a long period of time. For optimum performance, be sure to return the handset to the base unit after a telephone call.

**Battery replacement and handling**
When the operating time becomes short, even after a battery is recharged, please replace the battery. With normal usage, your battery should last about one year. A replacement battery may be purchased by calling Uniden's Parts Department (see back cover page).

**Warning:** To avoid the risk of personal injury or property damage from fire or electrical shock, only use the Uniden battery model and Uniden adapter model specifically designated for this product.

**Caution**
- Use only the specified Uniden battery pack (BT-905).
- Do not remove the battery from the handset to charge it.
- Never throw the battery into a fire, disassemble it, or heat it.
- Do not remove or damage the battery casing.

**Power Failure**
During the period that the power is off, you will not be able to make or receive calls with the telephone.

www.uniden.com
Talk and Standby Times
With average use, your handset battery provides approximately 6 hours of talk time and approximately 10 days of standby time. When your handsets are not being used and are left off of their charging cradles, the battery will gradually discharge. You can achieve optimum battery life and performance by returning the handset to the charging cradle after each use. If the handset is left off of the charging cradle, the actual talk time duration will be reduced respective to the amount of time the handset is off of the charging cradle.

Cleaning the battery charging contacts
To maintain a good charge, it is important to clean the charging contacts on the handset once a month. Using water only, dampen a cloth to clean the charging contacts. Then make sure to go back over the charging contacts with a dry cloth before returning the handset to the base to charge.

Caution
Do not use paint thinner, benzene, alcohol, or other chemical products. Doing so may discolor the surface of the telephone and damage the finish.
General Information

The phone complies with FCC Parts 15 and 68.
Operating temperature: -10°C to 50°C (+14°F to +122°F)

AC Adapter Information
AC Adapter part number: AD-314
Input Voltage: 120V AC 60Hz
Output Voltage: 9V DC 350 mA

Battery Information
Battery part number: BT-905
Capacity: 600 mAH, 3.6V

Frequency
925.181-927.451 MHz
5739.320-5746.130 MHz

Note
• To avoid damage to the phone use only Uniden AD-314 and BT-905 with your phone.
• If the handset is left off the base, the actual Talk Mode duration will be reduced respective to the amount of time the handset is off the base.

Recharge your phone on a regular basis by returning the handset to the base after each phone call. When the operating time becomes short, even after the battery is recharged, please replace the battery. With normal usage, the battery should last about one year.

A replacement Uniden adapter or battery may be purchased by calling Uniden's Parts Department (see back cover page).

Specifications, features, and availability of optional accessories are all subject to change without prior notice.
Troubleshooting

If your phone is not performing to your expectations, please try these simple steps first. If these steps do not solve your problem, please call our Customer Hotline at 1-800-297-1023. (Mon - Fri 7 am to 7 pm, Sat/Sun 9 am to 5 pm, CST. Phone support is closed on holidays.)

<td>• Make sure that the handset is not too far from the base.</td>
</tr>
<tr>
<td>Can't make or receive calls.</td>
<td>• Check both ends of telephone line cord.</td>
</tr>
<tr>
<td></td>
<td>• Make sure the AC adapter is plugged into the base and wall outlet.</td>
</tr>
<tr>
<td></td>
<td>• Disconnect the AC adapter for a few minutes, then reconnect it.</td>
</tr>
<tr>
<td></td>
<td>• Change the digital security code (see page 32).</td>
</tr>
<tr>
<td></td>
<td>• Make sure that the handset is not too far from the base.</td>
</tr>
<tr>
<td></td>
<td>• Check the dialing mode used by your telephone company.</td>
</tr>
<tr>
<td>The handset doesn't ring or receive a page.</td>
<td>• The battery pack may be weak. Charge the battery for 15-20 hours.</td>
</tr>
<tr>
<td></td>
<td>• The handset may be too far away from the base unit.</td>
</tr>
<tr>
<td></td>
<td>• Place the base unit away from appliances or metal objects.</td>
</tr>
<tr>
<td></td>
<td>• Change the digital security code (see page 32).</td>
</tr>
<tr>
<td></td>
<td>• Check the battery pack to ensure there is a secure connection.</td>
</tr>
<tr>
<td></td>
<td>• Make sure ringer volume isn’t set to “off”.</td>

</tbody>
</table>
| Severe noise interference.                | • Keep the handset away from microwave ovens, computers, remote control toys, wireless microphones, alarm systems, intercoms, room monitors, fluorescent lights, and electrical appliances.  
• Move the base to another location or turn off the source of interference. |
| The Caller ID does not display.            | • The call was answered before the second ring.  
• The call was placed through a switchboard.  
• Charge the handset.  
• Your Caller ID service may not be active; contact your local telephone service provider. |
| Voice Message Indication does not work.   | • Contact your local telephone company to make sure that your telephone receives FSK message signaling.  
• Reset the indicator by pressing and holding the `find hs` key for 5 seconds. |
## Liquid Damage
Moisture and liquid can damage your cordless phone. In case of accidental submersion, please read the following steps.

<table>
<thead>
<tr>
<th>Case</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>If the handset or base is exposed to moisture or liquid, but only affects the exterior plastic housing.</td>
<td>Wipe off the liquid, and use as normal.</td>
</tr>
</tbody>
</table>
| If moisture or liquid has entered the plastic housing (i.e. liquid can be heard in the phone or liquid has entered the handset battery compartment or vent openings on the base). | **Handset:**
|                                                                      | 1. Remove the battery cover and leave it off for ventilation.                               |
|                                                                      | 2. Remove the battery pack by disconnecting.                                                |
|                                                                      | 3. Leave the battery cover off and the battery pack disconnected for at least 3 days.        |
|                                                                      | 4. Once the phone is completely dry, reconnect the battery pack and the battery cover.      |
|                                                                      | 5. Recharge the handset’s battery pack for 20 hours in the base unit before using again.    |
| **Base:**                                                            | 1. Disconnect the AC adapter from the base unit, cutting off electrical power.              |
|                                                                      | 2. Disconnect the telephone cord from the base unit.                                       |
|                                                                      | 3. Let dry for at least 3 days.                                                             |
| **IMPORTANT:** You must **unplug the telephone line while recharging the battery pack** to avoid charge interruption. |                                                                                              |
| **CAUTION:**                                                         | DO NOT use a microwave oven to speed up the drying process. This will cause permanent damage to the handset, base and the microwave oven. |
|                                                                     | After following these steps, if your cordless telephone does not work, please call our Customer Service Hotline at 1-800-297-1023. |
Precautions!

Before you read anything else, please observe the following:

Warning!

Uniden America Corporation DOES NOT represent this unit to be waterproof. To reduce the risk of fire, electrical shock, or damage to the unit, DO NOT expose this unit to rain or moisture.

Rechargeable Nickel-Cadmium Battery Warning

• This equipment contains a rechargeable nickel-cadmium battery.
• Cadmium is a chemical known to the State of California to cause cancer.
• The rechargeable nickel-cadmium battery contained in this equipment may explode if disposed of in a fire.
• Do not short-circuit the battery.
• Do not charge the rechargeable nickel-cadmium battery used in this equipment in any charger other than the one designed to charge this battery as specified in the owner's manual. Using another charger may damage the battery or cause the battery to explode.

Rechargeable Nickel-Cadmium Batteries Must Be Recycled or Disposed of Properly

• Uniden voluntarily participates in an RBRC® industry program to collect and recycle nickel-cadmium batteries at the end of their useful life, when taken out of service within the United States. The RBRC® program provides a convenient alternative to placing used nickel-cadmium batteries into the trash or municipal waste stream, which is illegal in some areas.
• Through the RBRC® program, Uniden makes it easy for you to drop off the used battery at local retailers of replacement nickel-cadmium batteries. You may also contact your local recycling center for information on where to return the used battery. Please call 1-800-BATTERY for information on Ni-Cd battery recycling in your area.
• RBRC® is a registered trademark of the Rechargeable Battery Recycling Corporation.
Radio Interference
Radio interference may occasionally cause buzzing and humming in your cordless handset, or clicking noises in the base. This interference is caused by external sources such as TV, refrigerator, vacuum cleaner, fluorescent lighting, or electrical storms. Your unit is NOT DEFECTIVE. If these noises continue and are too distracting, please check around your home to see what appliances may be causing the problem. In addition, we recommend that the base not be plugged into a circuit that also powers a major appliance because the potential for interference is greater. Be certain that the antenna on the unit is fully extended when needed. In the unlikely event that you consistently hear other voices or distracting noises on your phone, you may be receiving radio signals from another cordless telephone or other source of interference. If you cannot eliminate this type of interference, you need to change to a different channel.

Finally, it should be noted that some cordless telephones operate at frequencies that may cause interference to nearby TVs and VCRs. To minimize or prevent such interference, the base of your cordless telephone should not be placed near or on top of a TV or VCR. If interference is experienced, moving the cordless telephone farther away from the TV or VCR will often reduce or eliminate the interference.

Cordless Telephone Privacy
Cordless telephones are radio devices. Communications between the handset and base of your cordless telephone are accomplished by means of radio waves which are broadcast over the open airways. Because of the inherent physical properties of radio waves, your communications can be received by radio receiving devices other than your own cordless telephone unit. Consequently, any communications using your cordless telephone may not be private.

One Year Limited Warranty

Important: Evidence of original purchase is required for warranty service. WARRANTOR: UNIDEN AMERICA CORPORATION ("Uniden")ELEMENTS OF WARRANTY: Uniden warrants, for one year, to the original retail owner, this Uniden Product to be free from defects in materials and craftsmanship with only the limitations or exclusions set out below.

WARRANTY DURATION: This warranty to the original user shall terminate and be of no further effect 12 months after the date of original retail sale. The warranty is invalid if the Product is (A) damaged or not maintained as reasonable or necessary, (B) modified, altered, or used as part of any conversion kits, subassemblies, or any configurations not sold by Uniden, (C) improperly installed, (D) serviced or repaired by someone other than an authorized Uniden service center for a defect or malfunction covered by this warranty, (E) used in any conjunction with equipment or parts or as part of any system not manufactured by Uniden, or (F) installed or programmed by anyone other than as detailed by the owner's manual for this product.

STATEMENT OF REMEDY: In the event that the product does not conform to this warranty at any time while this warranty is in effect, warrantor may either, at its option, repair or replace the defective unit and return it to you without charge for parts, service, or any other cost (except shipping and handling) incurred by warrantor or its representatives in connection with the performance of this warranty. Warrantor, at its option, may replace the unit with a new or refurbished unit. THE LIMITED WARRANTY SET FORTH above IS THE SOLE AND ENTIRE WARRANTY PERTAINING TO THE PRODUCT AND IS IN LIEU OF AND EXCLUDES ALL OTHER WARRANTIES OF ANY NATURE WHATSOEVER, WHETHER EXPRESS, IMPLIED OR ARISING BY OPERATION OF LAW, INCLUDING, BUT NOT LIMITED TO ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. THIS WARRANTY DOES NOT COVER OR PROVIDE FOR THE REIMBURSEMENT OR PAYMENT OF INCIDENTAL OR CONSEQUENTIAL DAMAGES. Some states do not allow this exclusion or limitation of incidental or consequential damages so the above limitation or exclusion may not apply to you.

LEGAL REMEDIES: This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. This warranty is void outside the United States of America and Canada.

PROCEDURE FOR OBTAINING PERFORMANCE OF WARRANTY: If, after following the instructions in the owner's manual you are certain that the Product is defective, pack the Product carefully (preferably in its original packaging). Disconnect the battery from the Product and separately secure the battery in its own separate packaging within the shipping carton. The Product should include all parts and accessories originally packaged with the Product. Include evidence of original purchase and a note describing the defect that has caused you to return it. The Product should be shipped freight prepaid, by traceable means, to warrantor at:

Uniden America Service
4700 Amon Carter Blvd.

Payable in United States of America to Uniden America Corporation
I.C. Notice

TERMINAL EQUIPMENT

NOTICE: This equipment meets the applicable Industry Canada Terminal Equipment Technical Specifications. This is confirmed by the registration number. The abbreviation, IC, before the registration number signifies that registration was performed based on a Declaration of Conformity indicating that Industry Canada technical specifications were met. It does not imply that Industry Canada approved the equipment.

NOTICE: The Ringer Equivalence Number (REN) for this terminal equipment is marked on the equipment itself. The REN assigned to each terminal equipment provides an indication of the maximum number of terminals allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the Ringer Equivalence Numbers of all the devices does not exceed five.

RADIO EQUIPMENT

The term "IC:" before the radio certification number only signifies that Industry Canada technical specifications were met.

Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device. "Privacy of communications may not be ensured when using this telephone".
