Uniden®

EXP370/EXP380 SERIES
OWNER'S MANUAL

900 MHz
EXTENDED RANGE WITH ONE TOUCH ROCKETDIAL™
Introduction

The Uniden EXP370/EXP380 Series 900 MHz cordless phones are designed and engineered to exacting standards for reliability, long life, and outstanding performance.

NOTE: Colors & Model numbers of your cordless phone may vary.

Features

• 900 MHz Extended Range Technology
• Pulse/Tone Dialing
• One Touch RocketDial™ Number
• 7 Hours Talk Time
• 10-Number Memory Dialing
• Handset Volume Control
• 20 Channel Autoscan
• 14 days Standby Time
• 24 Digit Redial
• AutoStandby™
• Hearing Aid Compatible

The EXP370/EXP380 Series features include AutoTalk and AutoStandby. AutoTalk allows you to answer a call by just removing the handset from the base so you don’t have to waste time pushing buttons. AutoStandby allows you to hang up by simply returning the handset to the base.

The UltraClear Plus™ true compander circuitry virtually eliminates background noise. This innovative technology provides you with the best possible reception during all your conversations.

To protect you against misbilled calls which might result from your phone being activated by other equipment, the EXP370/EXP380 Series has Random Code™ digital security which automatically selects one of approx. 260,000 digital security codes for the handset and base. Also, the AutoSecure™ feature electronically locks your phone when the handset is in the base.

RocketDial™ is a one-touch speed dial key that automatically dials your most important or frequently called number. The number dialed, is a preset number stored by the user.

Be sure to visit our web site: www.uniden.com

Controls and Functions

1. Handset earpiece
2. talk/batt low LED - indicates when phone is in use or the battery is low
3. flash - accesses call waiting (if available)
4. talk - answers or places calls
5. */tone - switches to tone dialing in pulse dial mode
6. redial/p - redials the last number / adds a timed pause in a memory dialing sequence.
7. m - enters or recalls numbers in memory
8. RocketDial - one touch priority key
9. end - hangs up a phone call / mutes the ringing tone temporarily
10. v - sets the ringer tone and earpiece volume
11. channel - selects another channel for clearer reception
12. Handset Microphone
13. Battery Charging Contacts
14. Status LED
15. find handset - locates the handset
Included with Your Phone

- Base
- AC Adapter
- Handset
- Rechargeable Battery
- Telephone Cord

Setting up the Phone

Do the following steps:
A. Choose the best location  C. Connect the base unit
B. Install the battery pack  D. Choose the dialing mode

A. Choose the best location
Before choosing a location for your new phone, read the INSTALLATION CONSIDERATIONS included in the PRECAUTIONS AND IMPORTANT SAFETY INSTRUCTIONS. Here are some important guidelines you should consider:

- The location should be close to both a phone jack and a continuous power outlet which is not switchable.
- Keep the base and handset away from sources of electrical noise such as motors and fluorescent lighting.
- The base can be placed on a desk, tabletop, or mounted on a standard wall plate.

B. Install the battery pack
Charge the battery pack for at least 15-20 hours before plugging the phone line into your phone.

1) Press in on the battery cover release and slide the cover down until it comes off.
2) Connect the battery pack connector observing correct polarity (black and red wires) to the jack inside the battery compartment. Do not exert any force on this connection. It could cause damage to the battery or handset. The plastic connector will fit together only one way. Once you are certain that you have made a good connection, then insert the battery pack into the battery compartment. Do not pinch the wires.
3) Securely close the battery compartment cover by sliding it up until it snaps into place.
4) Place the handset in the base with the keypad facing forward.
NOTE: Use only the Uniden Battery (BT-904) supplied with your phone. Replacement batteries are also available through the Uniden Parts Department.

Battery use time (per charge)

From fully charged

• Seven hours continuous use
• Fourteen days when the handset is in the standby mode

Low Battery Alert

When the battery pack is very low and needs to be charged, the phone is programmed to eliminate functions in order to save power. If the phone is not in use, the talk/batt low LED flashes when the battery pack is low.

If the phone is in use, the talk/batt low LED flashes and the handset beeps. Complete your conversation as quickly as possible and return the handset to the base for charging.

Cleaning the Battery Charging Contacts

To maintain a good charge, it is important to clean the battery contacts on the handset and base unit with a dry cloth or a pencil eraser about once a month. Do not use any liquids or solvents.

NOTE: Even when the battery pack is not being used, it will gradually discharge over a long period of time. For optimum performance, be sure to return the handset to the base unit after each telephone call.

C. Connect the base unit

1) Connect the AC adapter to the DC IN 9V jack and a standard 120V AC wall outlet.

2) Wrap the cord inside the molded wiring channel as shown.

3) Set the base unit on a desk or tabletop, and place the handset in the base unit.

4) Make sure the status LED illuminates. If the LED does not illuminate, check to see that the AC adapter is plugged in and the handset makes good contact with the base charging contacts.

NOTICE: Place the power cord so it does not create a trip hazard or where it could become chafed and create a fire or electrical hazard.

NOTES:
• Use only the supplied AD-310 AC adapter. Do not use any other AC adapter.
• Connect the AC adapter to a continuous power supply.
• Place the base unit close to the AC outlet so that you can unplug the AC adapter easily.

After installing the battery pack in the handset, charge your handset at least 15-20 hours before plugging into the phone line. Once the handset battery pack is fully charged, connect the telephone line cord to the base and telephone wall outlet.
5) Connect the telephone line cord to the TEL LINE jack and a telephone outlet once the handset is fully charged.

**TIP:** If your telephone outlet isn’t modular, contact your telephone company for assistance.

D. Choose the dialing mode
Most phone systems use tone dialing which sends DTMF tones through the phone lines. However some phone systems still use pulse dialing such as in rural areas. The default setting is tone dialing. Depending on your dialing system, set the mode as follows:

1) Press and hold flash until you hear a confirmation tone.
2) To set the dial mode for pulse dialing, press #. Or to set the dial mode for tone dialing, press #/tone. A confirmation tone sounds to indicate the setting is complete.
   • If you are not sure of your dialing system, set for tone dialing. Make a trial call. If the call connects, leave the setting as is, otherwise set for pulse dialing.
   • If your phone dialing system requires pulse dialing and you need to send DTMF tones for certain situations during a call, you may “switch-over” to tone dialing. (Refer to “Tone Dialing Switch-over”).

**NOTE:** Make sure your battery pack is fully charged before choosing the dial mode.

Using Your Phone

### Making and Receiving Calls

**NOTES:**
- The redial/p key redials the last number dialed.
- The redialed number can be up to 24 digits long.
Terminology

Throughout this manual, terms such as Standby and Talk Mode are used. Below is the terminology explanation.

- **Standby Mode** - The handset is not in use, off the base, and talk has not been pressed. A dial tone is not present.
- **Talk Mode** - The handset is off the base and talk has been pressed enabling a dial tone.

Adjusting the Ringer and Earpiece Volume

**Ringer tone**
When the phone is in standby mode, pressing the v key on the handset selects the handset ringer tone. There are two ringer tones. Continue pressing the v key to listen to all tones. The phone keeps the last ringer tone setting selected.

**Earpiece volume**
The handset earpiece volume settings (Low, Medium and High) can only be adjusted during a call. Press v repeatedly to select Low, Medium and High. When you hang up, the phone keeps the last volume setting selected.

**Ringer Mute**
The end key can be used to temporarily mute the ringer tone. When the handset is off the base and the phone is ringing, press the end key and the ringer tone will be temporarily silenced. The ringer tone will return to normal starting with the next incoming call.

Tone Dialing Switch-over

Some telephone companies use equipment that requires pulse dialing (sometimes referred to as rotary dialing). If you need to enter tone dialing digits, you can switch-over to tone dialing during the call. For example, entering your bank account number after you have called your bank.

Initially make your call with the pulse dialing mode. Once your call connects, press *tone. Enter the desired number. These digits will be sent as tone dialing. This special number can be stored in a memory location. This is referred to as Chain Dialing. Once the call ends, the tone mode is canceled and pulse dialing mode resumes.

**NOTE**: The tone feature only applies when the dial mode is set to pulse.

Traveling Out-of-Range

During a call, as you begin to move your handset too far from your base unit, noise increases. If you pass the range limits of the base unit, your call will terminate within 5 minutes.

Selecting a Different Channel

If you encounter interference while using your phone, you can manually change the phone's channel for clear operation. This function works only when the phone is in use.

Press channel. The talk/batt low LED flashes, indicating the phone is changing to another channel.
To locate the handset (while it's off the base), press **find handset** on the base. The handset beeps for 60 seconds. Paging is canceled when pressing any key, **find handset** on the base or return the handset to the base.

---

**Flash and Call Waiting**

If you have "call waiting" service and a call waiting tone sounds while you are on a call, press **flash** to accept the waiting call. There is a short pause, then you will hear the new caller. To return to the original caller, press **flash** again.

**NOTE:** You must subscribe through your local telephone company to receive Call Waiting Service.

---

**Storing a Phone Number in Memory**

Your EXP370/EXP380 Series has 10 memory locations for storing important telephone numbers.

1) Remove the handset from the base.
2) Press **m**. The **talk/batt low** LED flashes.
3) Enter the phone number, up to 16 digits. If a pause is needed during the dialing sequence, press **redial/p** to insert a pause. Each pause counts as a digit and represents a two second delay in time between digits as they are sent.
4) Press **m** again.
5) Enter the memory location (0-9) on the keypad. Memory 1 is reserved for **RocketDial**. You can store data in this location by pressing 1. A tone indicates that the number is stored. If you enter a number in a location that has a previously stored number it will overwrite the existing number without warning.

**NOTES:**
- The pause button counts as one digit. Pressing **redial/p** more than once increases the length of pause between numbers.
- You have 30 seconds after pressing **m** to enter the number you wish to store. Otherwise, the handset will beep rapidly.
- You cannot store numbers in **RocketDial**.

---

**Dialing a Stored Number**

Using the memory location features

1) Press **talk**, then press **m**.
2) Enter the memory location (0-9) on the keypad. The stored number automatically dials.

**NOTE:** If you select a memory location that does not have a stored number, the handset will beep rapidly and the phone will not dial.
One-touch RocketDial
Your phone is equipped with “One-touch RocketDial” for instant dialing. It is used to dial the phone number stored in memory location 1. (See “Storing a Phone Number in Memory”.)
To instantly dial the phone number stored in memory location 1, simply press RocketDial. (There is no need to press talk. The phone will automatically dial.) If you press RocketDial, and a phone number is not stored in memory location 1, the phone will beep rapidly and will not dial.

Chain Dialing
The memory locations on the handset are not limited to phone numbers. You can also store a group of numbers (up to 16 digits) that you need to enter once your call connects. This is referred to as Chain Dialing.
An example of this is a bank account number. Once you have called your bank, and are prompted to enter the account number, simply press m and the location number where the special number has been stored.
Store your special number in memory as you would a phone number. (Refer to “Storing a Phone Number in Memory”.)

Erasing a Stored Number from Memory
1) Remove the handset from the base unit.
2) Press m twice.
3) Press the memory location (0-9). A tone indicates that the stored number is erased from memory.
NOTE: You cannot erase the phone numbers by using the RocketDial. This is the number stored in memory location 1.

Changing the Digital Security Code
The digital security code is an identification code used to connect the handset and the base unit. Normally, setting the code is not necessary.
The first time you charge your handset, the security code is automatically set. In the rare situation that you suspect another cordless telephone is using the same security code, you can change the code.
1) Remove the handset from the base unit. Press and hold find handset on the base.
2) The handset begins emitting a paging sound. While holding find handset for at least 3 seconds, place the handset on the base unit. The paging sound stops. Leave the handset on the base for more than 3 seconds. A new random security code is set.
NOTE: If the handset battery pack is completely discharged or the battery pack is removed, the digital security code will be lost. If this happens, a new security code is set automatically next time the battery pack is charged.
Troubleshooting

If your EXP370/EXP380 Series cordless telephone is not performing to your expectations, please try these simple steps.

NOTE: Do not attempt to service this unit yourself. Servicing must be performed by qualified personnel.

Precautions!

Before you read anything else, please observe the following:

Warning! Uniden America Corporation does not represent this unit to be waterproof. To reduce the risk of fire, electrical shock, or damage to the unit, DO NOT expose this unit to rain or moisture.

Rechargeable Nickel-Cadmium Batteries Must Be Recycled or Disposed of Properly.

Uniden voluntarily participates in an RBRC® industry program to collect and recycle nickel-cadmium batteries. At end of their useful life, when Rechargeable Batteries are no longer serviceable and you determine that it is the cause, you must leave it disconnected until you confirm that it is the cause of your problem. If so, unplug the telephone to report a gas leak in the vicinity of the leak.

Additional Battery Safety Precautions

Caution! To reduce the risk of fire or injury to persons by the battery, read and follow these instructions:

1. Use only the Uniden battery pack specified in this owner's manual.
2. Do not dispose of the battery pack in a fire. The cell may explode. Check the nickel-cadmium battery disposal package insert for disposal instructions.
3. Do not open or mutilate the battery pack. Released electrolyte is corrosive and may cause damage to the eyes or skin. It may be toxic if swallowed.
4. Exercise care in handling the battery in order not to short the battery with conducting materials such as rings, bracelets, and keys. The battery or conductor may overheat and cause burns.
5. Charge the battery pack provided with or identified for use with this product only in accordance with the instructions and limitations specified in the owner's manual provided for this product.
6. Observe proper polarity orientation between the battery pack and battery charger.

SAVE THESE INSTRUCTIONS!

Important Electrical Considerations

Unplug all electrical appliances when you know an electrical storm is approaching. Lightning can pass through your household wiring and damage any device connected to it. This phone is no exception.

Warning! Please do not attempt to unplug any appliance during an electrical storm.

The FCC Wants You to Know

Changes or modifications to this product not expressly approved by Uniden, or operation of this product in any way other than as detailed by the owner's manual, could void your authority to operate this product. The equipment cannot be used on public coin phone service provided by the telephone company. Connection to party line service is subject to state tariffs. Contact the state public utility commission, public service commission or corporation commission for information.)

Range

Your new phone is designed to achieve the maximum possible range by transmitting and receiving according to the highest specifications set forth by the FCC. We have rated this phone to operate at a maximum distance with the qualification that the range depends upon the environment in which the telephone is used. Many factors limit range, including but not limited to: geographic location, interior/virtual structure, weather conditions, etc.

The Maximum Range rating of this phone is meant to be used as a means of comparison against other range claims.

Telephone Line Problems

The FCC has granted the telephone company the right to disconnect service in the event that your phone causes problems on the telephone line. Also, the telephone company may make changes in facilities and services which may affect the operation of your unit. However, your telephone company must give adequate notice in writing prior to such actions to allow you time for making necessary arrangements to continue service.

If you are having trouble with your telephone service, you must first disconnect your phone to determine if it is the cause of your problem. If you determine that it is the case, you must leave it disconnected until you have made the necessary arrangements to continue service.
Radio Interference
Radio interference may be caused by motors, fluorescent lighting, or electrical storm. Your unit is NOT DEFECTIVE. If these noises continue and are too distracting, please check around your home to see what appliances may be causing the problem. In addition, we recommend that the base not be plugged into a circuit that also powers a major appliance because of the potential for interference. Be certain that the antenna on the unit is fully extended when needed.

In the unlikely event that you consistently hear other voices or distracting transmissions on your phone, you may be receiving radio signals from another cordless telephone or other source of interference. If you cannot eliminate this type of interference, you need to change to a different channel. Finally, it should be noted that some cordless telephones operate at frequencies that may cause interference to nearby TVs and VCRs. To minimize or prevent such interference, the base of the cordless telephone should not be placed near or on top of a TV or VCR. If interference is experienced, moving the cordless telephone farther away from the TV or VCR will often reduce or eliminate the interference.

More Than One Cordless Telephone
If you want to use more than one cordless telephone in your home, they must operate on different channels. Press the channel key(s) to select a channel that provides the clearest communication.

Cordless Telephone Privacy
Cordless telephones are radio devices. Communications between the handset and base of your cordless telephone are accomplished by means of radio waves which are broadcast over the open airways. Because of the inherent physical properties of radio waves, your communications can be received by radio receiving devices other than your own cordless telephone unit. Consequently, any communications using your cordless telephone may not be private.

Installation Considerations
Selecting a Location
Before selecting a location for your new phone, there are some important guidelines you should consider:

- The location and base of your cordless telephone are accomplished by means of radio waves which are broadcast over the open airways. Because of the inherent physical properties of radio waves, your communications can be received by radio receiving devices other than your own cordless telephone unit. Consequently, any communications using your cordless telephone may not be private.

Connecting the Telephone Cords
Connecting the Telephone Cords

Connecting the telephone cords should be as follows:

- Modular Jack

Modern Jack

Most telephone equipment available now uses modular jacks. Phone cords are fitted with a molded plastic connector which plugs into this type of jack. The base can be placed on a desk or tabletop or mounted on a wall. The location should be close to both a phone jack and continuous current power outlet. The product should be shipped freight prepaid, by traceable means, to:

Uniden America Corporation
Warranty Service Center
4700 Amon Carter Blvd. Fort Worth, TX 76155

Evidence of original purchase is required for warranty service.

WARRANTOR: UNIDEN AMERICA CORPORATION ("Uniden")

ELEMENTS OF WARRANTY: Uniden warrants, for one year, to the original retail owner, this Uniden Product to be free from defects in materials and craftsmanship with only the limitations or exclusions set out below.

WARRANTY DURATION: This warranty to the original user shall terminate and be of no further effect 12 months after the date of original retail sale. The warranty is invalid if the Product is (A) damaged or not maintained as reasonable or necessary, (B) modified, altered, or used as part of any conversion kits, subassemblies, or any configurations not sold by Uniden, (C) improperly installed, (D) serviced or repaired by someone other than an authorized Uniden service center for a defect or malfunction covered by this warranty, (E) used in any conjunction with equipment or parts or as part of any system not manufactured by Uniden, or (F) installed or programmed by someone other than as indicated by the owner's manual for this product.

STATEMENT OF REMEDY: In the event that the product does not conform to this warranty at any time while this warranty is in effect, warrantor will either, at its option, repair or replace the defective unit and return it to you without charge for parts, service, or any other cost (except shipping and handling) incurred by warrantor or its representatives in connection with the performance of this warranty. Warrantor, at its option, may replace the unit with a new or refurbished unit. THE LIMITED WARRANTY SET FORTH ABOVE IS THE SOLE AND ENTIRE WARRANTY (EXCEPT TO THE EXTENT PROHIBITED BY APPLICABLE LAW) OF WARRANTOR IN RESPECT TO THE PRODUCT, AND IS IN LIEU OF AND EXCLUDES ALL OTHER WARRANTIES OF ANY NATURE WHATSOEVER, WHETHER EXPRESS, IMPLIED OR ARISING BY OPERATION OF LAW, INCLUDING, BUT NOT LIMITED TO ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. THIS WARRANTY DOES NOT COVER OR PROVIDE FOR THE REIMBURSEMENT OR PAYMENT OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SOME STATES DO NOT ALLOW THIS EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU.

LEGAL REMEDIES: This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. This warranty is void outside the United States of America.

PROCEDURE FOR OBTAINING PERFORMANCE OF WARRANTY: If, after following the instructions in the owner's manual you are certain that the Product is defective, pack the Product carefully (preferably in its original package). The Product should include all parts and accessories originally packaged with the Product. Include evidence of original purchase and a note describing the defect that has caused you to return it. The Product should be shipped prepaid, by traceable means, to warrantor at:

Uniden America Corporation
Warranty Service Center
4700 Amon Carter Blvd. Fort Worth, TX 76155

(800) 297-1023, 8 a.m. to 5 p.m. Central, Monday through Friday

One Year Limited Warranty
Important: Evidence of original purchase is required for warranty service.
