Fold out the back cover of this owner’s manual to use the handy “Controls and Functions” page for reference.
Welcome

Congratulations on your purchase of the Uniden EXR2460 cordless telephone. This phone is designed for reliability, long life, and outstanding performance utilizing the latest in 2.4 GHz Spread Spectrum technology.

Features

- 2.4 GHz Spread Spectrum Technology
- Caller ID and Call Waiting Caller ID
- 50 Number Caller ID Memory
- Lighted keypad
- 3-Line, 16 Character Backlit LCD Handset Display
- 10 Enhanced Memory Dial Locations
- 32 Digit Redial
- 2nd Battery Capability
- Back-up Power Supply with Optional Battery Pack
- Redial, Flash, and Pause
- Pulse/Tone Dialing
- Page
- 7 Day Standby Battery Time
- 4 Hour Talk Time
- Handset Earpiece and Ringer Volume Control
- Hearing Aid Compatible

Digital Spread Spectrum Technology utilizes a “wider frequency band” vs. a “single narrow band” used in standard digital transmissions. The result is a more secure conversation with the clarity of digital sound, extended range, and minimal interference from other cordless phones.

Random Code digital security automatically selects one of over 65,000 codes for the handset and base.

These features enhance your phone's security and also prevent unauthorized calls as a result of your phone being activated by other equipment.
INCLUDED IN YOUR PACKAGE

- Handset
- Base
- AC Adapter (AD-9500)
- Rechargeable Battery (BT-2499)
- Short Telephone Cord
- Beltclip
- Long Telephone Cord
- Desktop/Wall Mount Adapter
- Wall Mounting Screws

**TIP**
To get the most from your phone, please read this owner’s manual thoroughly. Also be sure to complete and mail the product registration form.

**NOTE**
If any of these items are missing or damaged, contact the Uniden Parts Department at (800)554-3988. Hours are from 8:00 a.m. to 5:00 p.m. Central Time, Monday through Friday. We can also be reached on the web at www.uniden.com.
Installing and Adjusting Your Phone

DESK/TABLETOP INSTALLATION

1) Plug the AC adapter cord into the 10 V DC input jack on the back of the base.
2) Wrap the AC adapter cord around the strain relief notch.
3) Plug the AC adapter into a standard 120 V AC wall outlet.

Place the power cord so that it does not create a trip hazard or where it could become chafed and create a fire or electrical hazard.

4) Charge the battery (refer to “Charging the Battery Pack,” page 11).
5) Plug one end of the long telephone cord into the TEL LINE jack on the back of the base.
6) Plug the other end of the cord into your telephone jack on the wall.

TIP
Before choosing a location for your phone, read the “Installation Considerations” included in the “Precautions and Important Safety Instructions” brochure.

! Place the power cord so that it does not create a trip hazard or where it could become chafed and create a fire or electrical hazard.

! Use only the Uniden AC adapter supplied with this phone and DO NOT use an outlet controlled by a wall switch.
7) Attach the desktop stand to the base.

8) Set the base on a desk or tabletop and place the handset into the base. Then, raise the antenna to a vertical position.

**WALL INSTALLATION**

*Standard wall plate mounting*

This phone can be mounted on any standard telephone wall plate.

1) Remove the mounting adapter from the notches at the top of the base.

2) Rotate the mounting adapter 180° and snap it into place at the bottom of the base.

**HINT**

Before using your phone, fully charge the Nickel-Cadmium battery pack for 12-15 hours.

Place the power cord so that it does not create a trip hazard or where it could become chafed and create a fire or electrical hazard.

Place the power cord so that it does not create a trip hazard or where it could become chafed and create a fire or electrical hazard.
3) Plug the AC adapter cord into the 10 V DC input jack on the back of the base.

4) Put the AC adapter cord inside the molded wiring channel, then wrap it around the strain relief notch. Plug the AC adapter into a standard 120 V AC wall outlet.

5) Plug one end of the short telephone cord into the TEL LINE jack on the back of the base, then plug the other end into a standard telephone jack.

6) Line up the mounting slots on the base with the mounting posts on the wall, then push in and down until the phone is firmly seated.

DO NOT use an outlet controlled by a wall switch.

Before you plug the other end of the telephone cord into the modular jack on the wall, charge the battery (refer to “Charging the Battery Pack,” page 11).
7) On the base unit, pull the handset retainer out of the slot and rotate it clockwise 180°.

8) Flip the retainer from front to back, then slide it back into the slot so that the lip of the retainer faces up and the oval is at the bottom of the retainer. This will hold the handset in place.

If the handset beltclip is attached, you cannot charge the handset with the display showing when the phone is mounted on the wall (See page 14).
**Direct wall mounting**

If you don't have a standard wall plate, you can mount your phone directly to the wall. Before doing this, consider the following:

- Select a location away from electrical cables, pipes, or other items behind the mounting location. Inserting screws into areas such as this can be hazardous.
- Try to mount your phone within 10 - 15 feet of a working phone jack in order to avoid excessive cord lengths. Remember, you are not mounting to a wall plate with a built in phone jack.
- If the selected mounting area has no wooden support beams directly behind it, you will need the appropriate anchoring devices in order for the wall to properly support your phone.

1) Insert two mounting screws into the wall, with their appropriate anchoring device, 3-15/16 inches apart. Allow about 3/16 of an inch between the wall and screw heads for mounting the phone.

2) Remove the mounting adapter from the notches at the top of the base.

Be careful not to insert the mounting screws into possible electrical hazards such as cables, wiring, or pipes.
3) Rotate the mounting adapter 180° and snap it into place at the bottom of the base.

4) Plug the AC adapter cord into the 10 V DC input jack on the back of the base.

5) Put the AC adapter cord inside the molded wiring channel, then wrap it around the strain relief notch. Plug the AC adapter into a standard 120V AC wall outlet.

6) Plug one end of the long telephone cord into the TEL LINE jack on the back of the base, then plug the other end into a standard telephone jack.
7) Line up the mounting slots on the base with the mounting screws on the wall, then push in and down until the phone is firmly seated.

8) On the base unit, pull the handset retainer out of the slot and rotate it clockwise 180°.

9) Flip the retainer from front to back, then slide it into the slot so that the lip of the retainer faces up and the oval is at the bottom of the retainer. This will hold the handset in place.
INSTALLING THE HANDSET BATTERY PACK

1) Press in on the battery cover release and slide the cover down until it comes off.

2) Install the nickel-cadmium battery with the label facing down.

3) Slide the battery cover on until it snaps into place.

Use only Uniden battery model (BT2499) supplied with your phone.
CHARGING THE BATTERY PACK

▼ Initial battery charging
Before plugging the phone line into your new phone for the first time, fully charge the battery pack for 12-15 hours without interruption.

1) Place the handset on the base.

2) Make sure that status LED lights. If the LED doesn’t light, check to see that the AC adapter is plugged in and that the handset makes good contact with the base charging contacts.

▼ Charging optional battery packs
The base unit of your phone is equipped with a compartment for charging an extra battery pack for use in your handset. You can obtain an extra battery pack from your authorized Uniden dealer.

1) Position the battery pack so the inner side with contacts is facing up.

2) Slide the battery pack into the charging compartment until it clicks into place.

3) Charge the battery for 24 hours. When charging is complete, pull up on the latch to remove the battery pack. To install the charged battery into the handset, refer to “Installing the Handset Battery Pack,” page 10.

In the event of a power failure, your spare battery pack can be used as a back-up power supply for the base unit.

NOTE
Please visit your authorized Uniden dealer to obtain an extra battery pack or contact the Uniden parts department at (800)554-3988. Hours are from 8:00 a.m. to 5:00 p.m. Central Time, Monday through Friday.
▼ Low battery indicator

When the battery pack is very low and needs to be charged, the phone is programmed to eliminate functions in order to save power. If the phone is not in use, Low Battery flashes. If the phone is in use, Low Battery flashes and the handset beeps. Complete your conversation as quickly as possible and return the handset to the base for charging.

CLEANING THE BATTERY CONTACTS

To maintain a good charge, clean all charging contacts on the handset and base about once a month with a pencil eraser or other contact cleaner. DO NOT use liquids or solvents; you may damage your phone.

SETTING THE PULSE/TONE SWITCH

Be sure the PULSE/TONE switch is in the TONE position unless your local phone system uses pulse dialing.

TIP

Most phone systems use tone dialing. Check with your local phone company if you’re not sure whether your system is tone or pulse.
ADJUSTING THE HANDSET VOLUME CONTROLS

▼ Handset ringer volume

When the phone is in standby mode, pressing the vol ▲ or ▼ key on the handset selects the handset ringer volume. There are two ringer volume settings; high and low.

To select the high volume setting, press \texttt{vol ▲}. The handset displays \texttt{Ringer High}.

To select the low volume setting, press \texttt{vol ▼}. The handset displays \texttt{Ringer Low}.

▼ Handset earpiece volume

There are four volume settings for the handset earpiece; Loud, High, Medium, Normal. The handset earpiece volume can only be adjusted during a call.

To lower the volume, press \texttt{vol ▼}, and to raise the volume, press \texttt{vol ▲}. The handset will display Loud, High, Medium, Normal, indicating the current volume setting.

This setting will remain in effect after the telephone call has ended. When you press ▲ in Loud mode or press ▼ in Normal mode, error sound beeps.
INSTALLING THE BELTCLIP

**To attach the beltclip**

1) Remove the slot cover.

2) Insert the beltclip into the empty slot and press down until it clicks.

**To remove the beltclip**

1) Pull back on the release tab and pull the beltclip up.

2) Replace the slot cover. You can store either the beltclip or slot cover on the bottom of the base.

If you have wall mounted the base, you must remove the beltclip to charge the handset with display showing.
**HEADSET INSTALLATION**

Your phone may be used with an optional headset, the Uniden HS910. To use this feature, simply insert the headset plug into the headset jack. Your headset is ready for hands-free conversations.

**AUTOMATIC DIGITAL CODE SECURITY**

To prevent other parties from making unauthorized calls on your phone line, a digital code was added to the EXR2460. Your phone's handset and base share this code, which is randomly set each time you place the handset in the charging cradle. If the phone experiences a power failure, you must reset the digital security code.

**To reset the digital security code**

1) Restore power to the base.

2) Place the handset on the base. The **status** LED blinks to indicate that the digital security code is reset.

**IMPORTANT**

Use only the Uniden HS910 headset specifically designed for Spread Spectrum Phones. You will hear a buzz or hum on other headsets.

**IMPORTANT**

Keep headset wire away from base antenna.

**NOTE**

If you are using an optional headset, you must still use the handset keypad for phone operations.

### FLASH AND CALL WAITING

If you have “call waiting” service and a call waiting tone sounds while you are on a call, press `flash` to accept the waiting call. There is a short pause, then you will hear the new caller. To return to the original caller, press `flash` again.
STORING A PHONE NUMBER IN MEMORY

1) Remove the handset from the base.

2) Press and hold memory until the confirmation tone sounds. The following screen appears.

3) Use the ▲ and ▼ keys or number keypad to choose the memory location where you would like to enter a number.

4) Press select. The following screen appears, and a cursor flashes indicating that the display is ready for the name to be entered.

5) Use the ▲ and ▼ keys to scroll through the character menu. Use the ◀ and ► keys to move the cursor to the desired location, and enter the name.

6) Press select. The following screen appears, and a cursor flashes indicating that the display is ready for the number.

7) Enter the phone number with the number keypad (direct entry).

8) Press select. The handset beeps and displays a confirmation screen. For example, if you store a name and number into memory location number one, the display shows Memory 1 Stored.

9) Press memory to exit store mode. Or, wait 20 seconds for the phone to return to standby.

NOTE
Whenever you are using a menu screen, you must press a key within 20 seconds or the phone will return to standby. You may also press memory to exit a memory menu at any time.

HINT
The character menu consists of letters, symbols, and numbers.

NOTE
The pause button counts as one digit. Pressing pause more than once increases the length of pause between numbers.

NOTE
When entering numbers, press pause to enter a pause in the dialing sequence. The display shows a P. The pause feature is useful for long distance calling, credit card dialing, or sequences requiring a pause between digits.
EDITING A PHONE NUMBER IN MEMORY

Follow these steps to edit a phone number that you have already programmed into memory.

1) Remove the handset from the base.

2) Press and hold memory until the confirmation tone sounds. The display shows the Memory Store screen and any saved numbers.

3) Use the ▲ and ▼ keys or number keypad to select the memory location you would like to edit. The ▼ and ▲ keys toggle between the names display and the numbers display.

4) Press select. The following screen appears with the memory location number that you have selected in the display.

5) With ▼ cursor next to Edit Memory, press select. The following screen appears, and a cursor flashes indicating that the display is ready for the name to be edited.

6) Use the ▲ and ▼ keys to scroll through the character menu. Use the ▼ and ▲ keys to move the cursor to the desired location, and enter the name.

7) Press select. The following screen appears, and a cursor flashes indicating that the display is ready for the number to be edited.

8) Enter the phone number with the number keypad (direct entry) or the ▲ and ▼ keys.

NOTE
Whenever you are using a menu screen, you must press a key within 20 seconds or the phone will return to standby. You may also press memory to exit a memory menu at any time.

NOTE
If you select Go Back at any time, no changes are made and the handset shows the Memory Store screen.

NOTE
You may move the ▼ cursor down to Go Back and press select if you would like to exit this menu.
9) Press select. The handset beeps and displays a confirmation screen. For example, if you store a name and number into memory location number one, then the handset shows Memory 1 Stored.

10) The display then returns to the Memory Store screen. You may select another number to edit (return to step 3) or you may press memory to return to standby.

**ERASING A NUMBER FROM MEMORY**

Use these steps to erase a programmed number from memory. Once a number is erased, that memory location may be programmed with a new number.

1) Remove the handset from the base.

2) Press and hold memory until the confirmation tone sounds. The handset shows the Memory Store screen with any saved numbers displayed.

3) Use the ▲ and ▼ keys or number keypad to select the memory location you would like to delete. The ◄ and ► keys toggle between the names display and the numbers display.

4) Press select. The following screen appears with the memory location number that you have selected in the display.

5) Use the ▼ key to move the ► cursor down to the Delete Memory command.

6) Press select. The following confirmation screen appears.

7) Use the ▲ key to move the ► cursor to the Yes command.

**NOTE**

If you select Go Back at any time, no changes are made and the handset shows the Memory Store screen.

If you select No, no changes are made and the handset shows the Memory Store screen.
8) Press select. There is a confirmation tone, and the handset displays Memory 1 Deleted.

9) The display then returns to the Memory Store screen. You may select another number to delete (return to step 3) or you may press memory to return to standby.

**USING MEMORY DIALING**

Follow the steps below to dial a number using a programmed memory location.

1) Press memory. The handset displays your programmed memory locations.

2) Use the ▲ and ▼ keys or the number keypad to select the memory location you would like to dial.

3) Press talk and the number is dialed.

**HINT**

Use the ◄ and ► keys to toggle between the names and the numbers displayed in memory.

**NOTE**

When the handset is removed from the base, press talk then memory on the handset keypad before selecting the memory location.

**TRAVELING OUT-OF-RANGE**

As you begin to move too far from your base unit, you will first hear a clicking sound. As you travel further out-of-range, the voice transmission will begin to break up. If you pass the range limits of the base unit, your call will terminate.
USING CALLER ID

You must subscribe to Caller ID from your phone company in order to use this feature.

▼ Setting up Caller ID options

There are three Caller ID setup options available; they are Autotalk, CIDCW, and Area Code.

**Autotalk** allows you to answer the phone without pressing the talk button. If the phone rings when Autotalk is on, simply remove the handset from the cradle and the phone automatically answers the call. If the phone rings when Autotalk is off, you must press talk to answer the call. This option is useful to help you screen your calls more effectively.

**CIDCW** performs the same as regular Caller ID on a call waiting number. You must subscribe to CIDCW from your phone company in order to use this feature.

If you enter your 3-digit area code number in the **Area Code** option, your local area code does not appear in Caller ID messages. When reviewing Caller ID messages, you will see only the local seven digit number. For calls received from outside your local area code, you will see a full 10-digit number.

To change your Caller ID options:

1) Press setup. The following screen appears.

   ![Screen](image)

2) Use the ▲ and ▼ keys to move the cursor to the selection that you would like to change. Press the select key to toggle between On and Off for Autotalk and CIDCW. To enter or change the area code, then press select again.

3) After you have made your selections, press setup and return the handset to the charging cradle. The statues LED flashes, indicating that your setup changes are now effective.
**Screening your calls**

Caller ID allows you to review caller information before you answer your phone. After the first ring, the display shows the date, time, call count, name, and phone number of the caller. If your Caller ID service is number only, then the name does not appear on the second line.

If a name or number is not available, the display will show a message such as **Incomplete Data**, **Private Number**, **Private Name**, etc. Contact your phone company for more information about any persistent error messages.

**Reviewing Caller ID messages**

To review your Caller ID messages, follow the steps below.

1) Press **call id**, and the Caller ID summary screen appears. The screen shows the number of new messages and total messages.

2) Press ▼ to scan through the messages. The most recent message appears first, with the date, time, call count, name, and phone number. Press ▲ to scan backwards through the list.

3) Once you have reviewed your oldest message, the following screen appears. Press **call id** to return to standby.

**NOTE**

If you have no New Caller ID Messages, then the “New” display is blank. Only the “Total” display appears.

Once a Caller ID message has been viewed, it is no longer considered a new message.

If you have no Caller ID messages, then the total is shown as 00.

**NOTE**

Once you have viewed all of your Caller ID messages and reach the “End” display, the message list does not cycle back to the beginning. You must press ▲ to view your previous messages.
**Calling a Caller ID number**

1) Press **call id**, and the Caller ID summary screen appears. The screen shows the number of new messages and total messages.

2) Select the number that you would like to dial. Press ▼ to scan forward through the messages and ▲ to scan backwards through the list.

3) Press **talk** and the number automatically dials.

**Storing a Caller ID number into a memory location**

1) Press **call id**, and the Caller ID summary screen appears. The screen shows the number of new messages and total messages.

2) Press ▼ or ▲ to find the message that you would like to store, then press **memory** to store the selected message.

3) The select location screen appears. Use the ▲ and ▼ keys to select a blank memory location where you would like to store the number. (If you want to replace an existing number with the Caller ID number, skip to step 5.)

4) Press **select**. A confirmation tone sounds, and the number is programmed. (Do not complete steps 5 and 6.)

5) If you choose to replace an existing number with the Caller ID number, press **select**, and the following screen appears.

6) Use the ▲ key to move the cursor to **Yes** and press **select**. A confirmation tone sounds, and the number is programmed.
**Deleting a Caller ID message**

To delete a single Caller ID message, follow the steps below.

1) Press `call id`, and the Caller ID summary screen appears. The screen shows the number of new messages and total messages.

2) Select the number that you would like to delete. Press ▼ to scan forward through the messages and ▲ to scan backwards through the list.

3) Press `delete`, and the following screen appears.

4) Press `select` or `delete`. A confirmation tone sounds and the Caller ID screen returns with the next message displayed.

5) After you have deleted the oldest Caller ID messages, the display shows `End`. Press `call id` to return to standby.

**Deleting all Caller ID messages**

To delete all of your Caller ID messages, follow the steps below.

1) Press `call id`, and the Caller ID summary screen appears. The screen shows the number of new messages and total messages.

2) Press `delete`, and the following screen appears.

3) Use the ▲ key to move the cursor to `Yes`, then press `select` or `delete`. If you select `No`, then the Caller ID screen returns.
4) A confirmation tone sounds, and the following screen appears.

5) Press call id to return to standby.

**USING REDIAL**

The redial key redials the last number dialed. The redialed number can be up to 32 digits long.

To call the last number dialed from the handset, press talk, then press redial.

or

Press redial, then press talk.

If any key is pressed before redial, the last number will not redial.

**USING THE TONE FEATURE**

If you are dialing in the pulse mode and need to enter tone digits, press tone to enter the digits. Once the call has ended, the tone mode is canceled and pulse dialing resumes.

**NOTE**

The tone feature applies only when the base unit is set to pulse.
USING THE PAGE FEATURE

To locate the handset (while it’s off the base), press page on the base.

To beep the handset for 5 seconds, press page on the base, and the handset displays paging. To beep the handset for 60 seconds, press and hold page.

Press talk on the handset to end paging. Press talk again to return to standby.
# Troubleshooting

If your phone is not performing to your expectations, please try these simple steps before calling Uniden customer service. If you are still unable to resolve the problem, call customer service at (800) 297-1023.

**GENERAL**

The EXR2460 complies with FCC Parts 15 and 68.
Frequency control: PLL
Modulation: Direct Sequence Spread Spectrum; DBPSK
Operating temperature: 0° to 50° C (+32° F to +122° F)

**BASE**

Frequency: 2400 to 2483.5 MHz (20 channels)
Power requirements: 10 V 500 mA (from AC adapter)
Size: 5-1/2 in. (W) x 3-3/4 in. (D) x 10 in. (H)
Weight: Approx. 17.8 oz. (including optional battery)

**HANDSET**

Frequency: 2454.2 to 2475.8 MHz (20 channels)
Power requirements: Rechargeable Nickel Cadmium battery pack
Size (without antenna): 2-1/4 in. (W) x 1-3/4 in. (D) x 7-1/4 in. (H)
Weight: Approx. 9.3 oz. (including battery)
Battery: BT-2499
   - Capacity: 800 mAH, 3.6V
   - Talk mode: 4 hours
   - Standby mode: 7 days
