Congratulations on your purchase of the EXS 2060 cordless telephone. This phone is designed for reliability, long life, and outstanding performance utilizing the latest in 900 MHz Spread Spectrum technology.

Note: Some illustrations in this manual may differ from the actual unit for explanation purposes.

Features

- 900 MHz Spread Spectrum Technology
- Caller ID and Call Waiting Caller ID
- 50 Number Caller ID Memory
- Lighted Keypad
- 3-Line, 16 Character Backlit Handset Display
- 20 Enhanced Memory Dial Locations
- 32 Digit Redial
- 3 Redial Memories
- Flash
- Pause
- Pulse / Tone Dialing
- Page / Find
- 10 Day Standby Battery Life
- 6 Hour Talk Time
- Handset Earpiece and Ringer Volume Control
- Hearing Aid Compatible

Digital Spread Spectrum Technology utilizes a “wider frequency band” vs. a “single narrow band” used in standard digital transmissions. The result is a more secure conversation with the clarity of digital sound, extended range, and minimal interference from other cordless phone.

Random Code™ digital security automatically selects one of over 65,000 codes for the handset and base. These features enhance your phone's security and also prevent unauthorized calls as a result of your phone being activated by other equipment.
Controls and functions

1. Handset antenna
2. Headset jack cover
3. Handset battery compartment

Read this first

This cordless telephone must be set up before use. Follow these steps:

**Step 1** *(page 4)*
Unpack and check the telephone and accessories.

**Step 2** *(page 5 to 9)*
Next, choose the best location to set up the base unit.

**Step 3** *(page 10 to 11)*
Then, insert the battery pack into the handset. You must charge the battery pack for 15-20 hours before using the phone.

About the digital security code
This cordless telephone uses a digital security code to prevent unauthorized access to your base unit. This security code prevents other cordless handsets from making calls through your base unit. A random security code will be assigned automatically between your base unit and handset when you charge the battery pack for the first time.
If you want to reset the security code, see page 35.
Checking the package contents

Make sure you have received the following items in the package.

- Base unit
- Handset
- AC adapter (AD-310)
- Rechargeable battery pack (BT-905)
- Telephone line cord (2)
- Wall mount adapter
- This Owner's Manual
- Precautions and Important Safety Instructions
- Quick Reference Guide
- Registration Card
- Beltclip

Uniden Parts Department
(800) 554-3988
Hours: M-F 8:30 AM to 5:00 PM CST.
We can also be reached on the web at www.uniden.com.
Setting up the base unit

Do the following steps.
• Choose the best location
• Connect the base unit
• Choose the dialing mode

Choose the best location
Before choosing a location for your new phone, read the INSTALLATION CONSIDERATIONS included in the PRECAUTIONS AND IMPORTANT SAFETY INSTRUCTIONS brochure. Here are some important guidelines you should consider:

- You should charge your handset for 15-20 hours before using the phone.
- The location should be close to both a phone jack and a continuous power outlet which is not switchable.
- Keep the base and handset away from sources of electrical noise such as motors and fluorescent lighting.
- Be sure there is sufficient space to raise the base antenna fully vertical.
- The base can be placed on a desk, tabletop or mounted on a standard wall plate.

Avoid heat sources, such as radiators, air ducts, and sunlight
Avoid noise sources such as a window by a street with heavy traffic
Avoid microwave ovens
Avoid excessive moisture, extremely low temperatures, dust, mechanical vibration, or shock
Avoid television sets and other electronic equipment
Avoid personal computers
Avoid other cordless telephones
Choose a central location
Connect the base unit

If you want to install the base unit on the wall, see page 8.

**NOTE**

Place the power cord so it does not create a trip hazard, or where it could become chafed and create a fire or electrical hazard.

1. Connect the telephone line cord to the **TEL LINE** jack and to a telephone outlet.

2. Connect the AC adapter to the **DC IN 9V** jack and to a standard 120V AC wall outlet.

3. Set the base unit on a desk or tabletop and place the handset on the base unit. Then raise the antenna to a vertical position.
Use only the supplied AD-310 AC adapter. Do not use any other AC adapter.

Connect the AC adapter to a continuous power supply.

Place the base unit close to the AC outlet so that you can unplug the AC adapter easily.

If your telephone outlet isn’t modular, contact your telephone company for assistance.

Choose the dialing mode

Depending on your dialing system, set the PULSE-TONE switch as follows:

<table>
<thead>
<tr>
<th>If your dialing system is</th>
<th>Set the switch to</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tone</td>
<td>TONE</td>
</tr>
<tr>
<td>Pulse</td>
<td>PULSE</td>
</tr>
</tbody>
</table>

If you aren’t sure of your dialing system
Make a trial call with the PULSE-TONE switch set to TONE. If the call connects, leave the switch as is; otherwise, set to PULSE.
### Mounting the base unit on a wall

#### Standard wall plate mounting

This phone can be mounted on any standard telephone wall plate.

1. Snap the wall mount adapter into the notches on the base.
2. Plug the telephone line cord to the **TEL LINE** jack and the AC adapter to the **DC IN 9V** jack.
3. Plug the telephone line cord into the telephone outlet.
4. Wrap the AC adapter cord inside the molded wiring channel. Then wrap the cord around the strain relief notch.
5. Plug the AC adapter into a standard 120V AC wall outlet.
6. Raise the antenna to a vertical position.
7. Align the mounting slots on the base with the mounting posts on the wall. Push in and down until the phone is firmly seated.
Direct wall plate mounting

If you don't have a standard wall plate, you can mount your phone directly to the wall. Before doing this, consider the following:

- Avoid electrical cables, pipes, or other items behind the mounting location, that could cause a hazard when inserting screws into the wall.
- Try to mount your phone within 10 - 15 feet of a working phone jack to avoid excessive cord lengths.
- Make sure the wall material is capable of supporting the weight of the base and handset.
- Use #10 screws (minimum length of 1-3/8 inches) with anchoring devices suitable for the wall material where the base unit will be placed.

1. Insert two mounting screws into the wall, (with their appropriate anchoring device), 3-15/16 inches apart. Allow about 3/16 of an inch between the wall and screwheads for mounting the phone.

2. Refer to steps 1 through 9 on page 8 and 9 to mount the telephone.

8. On the base unit, pull the handset retainer out of the slot. Rotate it clockwise 180 degrees.

9. Flip the retainer from front to back. Slide it back into the slot so that the lip of the retainer is up and the oval is down. The retainer holds the handset in place.

If the handset beltclip is attached, you cannot charge the handset facing forward when the phone is mounted on the wall. (See page 36.)
Preparing the battery pack

Charge the battery pack for 15-20 hours before you start using your phone.

1. Press in on the battery cover release and slide the cover down until it comes off.

2. Connect the battery pack connector with the correct polarity (black and red wires), then insert the battery pack into the battery compartment.

3. Securely close the battery compartment cover by sliding it up until it snaps into place.

4. Place the handset on the base.

5. Make sure that the "status" LED lights. If the LED doesn’t light, check to see that the AC adapter is plugged in and that the handset makes good contact with the base charging contacts.

NOTE: Use only Uniden Battery (BT-905) supplied with your phone.
**Battery use time (per charge)**

From fully charged:
- Six hours continuous use.
- Ten days when the handset is in the standby mode.

**When the battery charge becomes low**

When the voltage of battery pack in the handset is very low and needs to be charged, the phone is programmed to eliminate functions in order to save power. If the phone is not in use, “Low Battery” flashes and none of the keys will operate. If the phone is in use, “Low Battery” flashes and the handset beeps. Complete your conversation as quickly as possible and return the handset to the base unit for charging.

**Cleaning the battery contacts**

To maintain a good charge, it is important to clean the battery contacts on the handset and base unit with a dry cloth about once a month. **Do not use any liquids or solvents.**
Dialing from standby

1. Enter the phone number. (Up to 32 digits.)
   **Example:** Enter 8178583300
   ![Example Entry](8178583300.png)

2. Press **(talk)**. “Talk” flashes on the display.
   ![Talk Flash](Talk.png)
   Then the volume setting is displayed. For example, if the volume is set to high, the display shows:
   ![Volume Display](High.png)

3. The number is dialed. After about 5 seconds, the call-time display appears.
   ![Call-Time](515.png)

4. To hang up, press **(talk)** or place the handset on the base. The call-time will be displayed for about 5 seconds.
   ![Hang Up](515.png)

Other Operations

<table>
<thead>
<tr>
<th>To</th>
<th>Do this</th>
</tr>
</thead>
<tbody>
<tr>
<td>To adjust the earpiece volume</td>
<td>Press <strong>( or )</strong>.</td>
</tr>
<tr>
<td>To temporarily switch to tone dial (When the base is set to pulse mode)</td>
<td>Press <strong>(tone)</strong>. The following numbers will be sent as tone dialing.</td>
</tr>
<tr>
<td>To enter a pause within dialing sequence</td>
<td>Press <strong>(redial)</strong>.</td>
</tr>
<tr>
<td>To improve the reception</td>
<td>Press <strong>(select)</strong>. “Scanning” appears on the display. If the operation fails, the error tone sounds.</td>
</tr>
</tbody>
</table>
Dialing from talk mode

   ![Talk](display)

   Then the volume setting is displayed. For example, if the volume is set to high the display shows:

   ![Talk High](display)

2. Dial the phone number.
   **Example:** Enter 8178583300

   ![Call Details](display)

3. To hang up, press (talk) or place the handset on the base. The call-time will be displayed for about 5 seconds.

   ![Call Time](display)
Receiving a call

From the handset

1. Phone rings.

```
Incoming Call
```

2. Press \text{talk}. “Talk” and volume setting appears on the display.

```
Talk 0:00
<Normal>
```

3. Talk with the caller.

```
Talk 0:02
```

4. To hang up, press \text{talk} or place the handset on the base. The call time will be displayed for about 5 seconds.

```
115:35
```

AutoTalk when ringing

When the AutoTalk setting is on and there is an incoming call, simply lift the handset from the base unit to answer the phone. See “Setting Caller ID options” on page 27 for more details.

Any key answer when ringing

When the AutoTalk setting is on, and the handset is off the base, press any handset key (except \text{muting} ) to answer the incoming call.

Call Waiting

Note: You must subscribe to Call Waiting service to use this feature.

When a call is received during a telephone call already in progress, press \text{flash} to switch to the new call. If you also subscribe to Call Waiting on Caller ID, you will see the name and number of the caller in call waiting. (See page 34.)
**Adjusting the ringer and earpiece volume**

**Ringer tone and volume**
The phone has four types of ringer tone and volume combinations. In the standby mode, press (mute/ring) on the handset. Every time you press (mute/ring), the display shows the setting.

**Ringer on/off switch**
This switch turns the handset ringer on or off.

**Earpiece volume**
Pressing (▲) or (▼) will change the earpiece volume of the handset. This setting will remain in effect after the telephone call has ended.

- <Loud> ▼ ▼ ▼ ▼
- <High> ▼ ▼
- <Medium> ▼
- <Normal> ▲

When you press (▲) in Loud mode or press (▼) in Normal mode, the error tone sounds.
Redialing a call

The last three phone numbers dialed can be quickly redialed.

Redial from standby

1. Press \( \text{Redial/Redial} \). The phone number that was last dialed appears on the display.

2. Press \( \text{Redial/Redial} \) again. Each press of \( \text{Redial/Redial} \) will display one of the last three numbers dialed.

3. Press \( \text{Talk} \). “Talk” appears on the display, then the volume setting is displayed.

4. Then the selected number is dialed. After about 5 seconds, the call-time display appears.

5. To hang up, press \( \text{Talk} \) or place the handset on the base. The call-time will be displayed for about 5 seconds.

\begin{align*}
\text{<Redial1> & 8178583300} \\
\text{<Redial2> & 2145551234} \\
\text{<Redial3> & 9725554321} \\
\end{align*}
Redial from talk mode

2. Press (redial/p). The last number dialed will be displayed.

3. To hang up, press (talk) or place the handset on the base. The call-time will be displayed for about 5 seconds.

**NOTE**

Only the last number dialed can be accessed after (talk) has been pressed.

Traveling out-of-range

During a call, as you begin to move your handset too far from your base unit, noise increases. If you pass the range limits of the base unit, your call will terminate within 30 seconds.
In memory dialing operation, you must press a key within 20 seconds or the phone will return to standby. If you return the handset in the cradle the phone will also return to standby.

**Memory Dialing** allows you to dial a number using just a few key strokes. You can store up to 20 phone numbers in the memory.

1. Press and hold (mem) until “Memory Store” is displayed.

2. Press ( ) and ( ) or enter a two-digit number (01 - 20) to select the memory location where you would like to store the number.

3. Press (select). The following screen appears and a cursor flashes indicating that the display is ready for the name to be entered.

   If this screen appears, the selected memory location is already stored. Then, you must either change the entry in this location, clear the location or select “Go Back” to choose another location.

4. Use the ( ), ( ), or (del) keys to enter the name. The name cannot exceed 13 characters.
   - Use the ( ) and ( ) key to scroll through the character menu. It contains upper and lower case letters and various characters.
   - Use ( ) and ( )/tone to move the cursor to the desired location.
   - Use (del) key to delete characters as needed.
5 Press \textit{select}.  
   \textquotedblleft Store Number\textquotedblright is displayed. The cursor flashes indicating that the display is ready for the number to be entered.

6 Use the number keypad to enter the phone number. The phone number cannot exceed 20 digits.
   • Use the \textit{redial} key to enter a pause in the dialing sequence. The display shows a \textquotedblleft P\textquotedblright.  
   \textbf{\textit{NOTE}}  
   The pause feature is useful for long distance calling, credit card dialing, or sequences that require a pause between digits.
   • Use the \textit{del} key to delete digits as needed.

7 Press \textit{select}.  
The handset beeps and displays the confirmation screen. Memory storage is complete.
   For example, if you store a name and number into memory location number 07, the display shows \textquotedblleft Memory07 Stored\textquotedblright.
   After about 2 seconds, \textquotedblleft Memory Store\textquotedblright is displayed.

8 Press \textit{mem} to return to standby mode.
Making calls with memory dialing

Memory dialing from standby

1. Press (mem). The handset displays your programmed memory locations.

2. Press (talk) or enter a two-digit number (01 - 20) to select the memory location you would like to dial.

3. Press (talk). "Talk" flashes and the volume setting appears on the display. Then the displayed number is dialed.

Display a Programmed Number

Use the (up) and (down) keys to toggle between the names display and the numbers display.

<table>
<thead>
<tr>
<th>Program name</th>
<th>Program number</th>
</tr>
</thead>
<tbody>
<tr>
<td>01 UNIDEN CORP</td>
<td>01 8176583300</td>
</tr>
<tr>
<td>02 JOHN DOE</td>
<td>02 5452930</td>
</tr>
<tr>
<td>03 MOM AND DAD</td>
<td>03 8175551212</td>
</tr>
<tr>
<td>04</td>
<td></td>
</tr>
</tbody>
</table>

When the stored phone number has 14 or more digits, "⇒" is displayed next to the 12th digit. Press (#/⇒) to see the extra digits and (tone) to return.
On certain occasions after dialing a number, you may be requested to enter an access code, such as your account number. You can enter this number into a memory location for later use by doing the following.

1) Store the access code into one of the memory locations (01-20) following the steps on page 18.

2) Dial the party or service main number.

3) When you need to enter the special number, press (mem) followed by the memory location (01-20).
Press and hold **mem** until “Memory Store” is displayed.

Press **( )** and **( )** or enter a two-digit number (01 - 20) to select the memory location you would like to edit.

Press **( )**. The following screen appears with the memory location number that you have selected in the display.

Press the **( )** or **( )** key to select “Edit Memory”, then press **( )**. The following screen appears. The cursor flashes indicating that the display is ready for the name to be edited. When a name has not been stored, the cursor appears at the beginning of the second line.

Press **( ), ( ), ( ), ( ), or ( )** to edit the name. (See page 18.) To edit only the phone number, skip this step.

Press **( )**. The following screen appears. The cursor flashes indicating that the display is ready for the number to be edited.
7 Use the dial keypad, (redial/p) or (del) key to edit the phone number.
The phone number cannot exceed 20 digits. (See page 19.)
If you don’t want to change the phone number, skip this step.

8 Press (select). The handset beeps and displays the confirmation screen. The
memory storage is complete.
For example, if you store a name and number into memory location
number 01, the display shows “Memory01 stored”.
After about 2 seconds, “Memory Store” is displayed.

9 Press (mem) to return to standby mode.

Display a Programmed Number
Use the ( and #tone key to toggle between the names display and the numbers display.

<table>
<thead>
<tr>
<th>Program name</th>
<th>Program number</th>
</tr>
</thead>
<tbody>
<tr>
<td>Memory Store 01</td>
<td>8178983300</td>
</tr>
<tr>
<td>UNIDEN CORP 02</td>
<td>JOHN DOE</td>
</tr>
<tr>
<td>01</td>
<td>02</td>
</tr>
</tbody>
</table>

• When the stored phone number has 14 or more digits, “ ” is
displayed next to the 12th digit.
Press ( to see the extra digits and #tone to return.
Erasing a stored name and phone number

1. Press and hold \(\text{mem}\) until "Memory Store" is displayed.

2. Press \(\text{and}\) and \(\text{keys or enter a two-digit number (01 - 20) to select the memory location you would like to edit.}\)

3. Press \(\text{select}\). The following screen appears with the memory location number that you have selected in the display.

4. Press \(\text{to move the cursor down to "Delete Memory" command line.}\)

5. Press \(\text{select}\). The following confirmation screen appears.

6. Press \(\text{to move the cursor to "Yes".}\)

7. Press \(\text{select}\) or \(\text{del}\). There is a confirmation tone and the entry is deleted. The following screen appears.

8. After a few seconds the display returns to the "Memory Store" screen. You may select another number to delete (return to step 2) or press \(\text{mem}\) to return to standby.
To locate the handset

1. Press (page-find) on the base.
2. The handset beeps for 5 seconds. The following screen appears;

   Paging

3. Press any key on the handset to end.

When an incoming call is received during paging, paging is stopped and the telephone is switched to the incoming call.

If you press (talk) during paging, the handset will be placed in off-hook (talk) mode.

Paging cannot be performed while the handset is in use.
You can turn off the handset microphone so that the person whom you are talking with cannot hear you.

**When speaking on the handset**

1. Press \(\text{mute/ring}\) during a call. The microphone is turned off.
2. To resume a call, press \(\text{mute/ring}\) or \(\text{talk}\).

**When phone is ringing**

Press \(\text{mute/ring}\) when the phone rings. The ringer sound is turned off. You may still press \(\text{talk}\) to answer the call.
Setting Caller ID options

There are three Caller ID setup options available; they are AutoTalk, CIDCW (Caller ID on Call Waiting), and Area Code.

**AutoTalk**
allows you to answer the phone without pressing the button. If the phone rings when AutoTalk is on, simply remove the handset from the base and the phone automatically answers the call. Or, if the handset is not on the base, press any key (except ) to answer the call. If the phone rings when AutoTalk is off, you must press  to answer the call.

**Caller ID on Call Waiting (CIDCW)**
performs the same as regular Caller ID on a call waiting number. You must subscribe to CIDCW from your phone company in order to use this feature.

If you enter 3-digit area code number in the Area Code option, your local area code does not appear in Caller ID messages. When reviewing Caller ID messages, you will see only the local seven digit number. For calls received form outside your local area code, you will see a full 10-digit number.

If your calling area requires 10-digit dialing, do not program this option.

**To change your Caller ID options:**

1. Press . The following screen appears.

2. Use the and keys or a number key (1-3) to move the cursor to the selection that you would like to change. Press the key to toggle between On and Off for Auto Talk and CIDCW.

3. When you wish to enter Area Code, press or the number key (3) to move the cursor to select Area Code. Then press , enter the 3 digits area code by using the number keypad (0 - 9), and press . After entering Area Code, press .

4. After you have made your selections, press and return the handset to the charging cradle.
When the Caller ID message is received, the display shows the caller’s phone number, along with the date and time. The incoming call information is stored in Caller ID record. If the Caller ID service includes the caller’s name, the caller’s name appears on the display (up to 15 letters).

Here are some typical displays;

**When the phone number and name data are received**

- **5/11 12:30PM 01**
  - UNIDEN CORP
  - 817-858-3300

**When a private name is received**

- **5/11 12:30PM 01**
  - Private Name
  - 817-858-3300

**When an unknown name is received**

- **5/11 12:30PM 01**
  - Unknown Name
  - 817-858-3300

**When invalid data is received**

- **Incomplete Data**

**When a private number is received**

- **5/11 12:30PM 01**
  - UNIDEN CORP
  - Private Number

**When an unknown number is received**

- **5/11 12:30PM 01**
  - UNIDEN CORP
  - Unknown Number

When you pick up the phone, the display changes to “Talk”. (See page 14.)

- **Data errors appear as “■”**: 5/11 12:30PM 01
  - UNIDEN CORP
  - 81-858-3300
If a call comes in via a telephone system that does not offer Caller ID service, no information is stored.

"End" appears when you have reviewed all messages in the Caller ID list. Press \( \text{A} \) repeatedly to return to the summary screen.

Each message can be up to 15 characters for the phone number and the name.

Viewing the Caller ID Message list

The Caller ID list stores information for up to 50 incoming calls even unanswered calls.

1. Press \( \text{call id} \). The summary screen appears. The screen shows the number of new messages and total messages.

   - New:01
   - Total:02

2. Press \( \downarrow \) to display the latest caller ID message.

   5/17 12:30PM 03
   UNIDEN CORP
   817-858-3300

3. Press \( \uparrow \) to see the next message. Or press \( \text{A} \) to see previous message.

4. Press \( \text{call id} \) to return to standby.
The EXS 2060 stores up to 50 messages. If the phone receives the 51st message, the oldest one in the list is automatically deleted. Caller ID data can also be deleted manually.

Deleting a Caller ID message

1. Press (call id). Display the message to be deleted from the Caller ID list by pressing (▼) or (▲).

2. Press (del). Delete Message?

3. Press (▼) or (▲) to select “Yes” or “No”.

4. Press (select) or (del).

When the pointer is at “Yes”: A tone sounds and the Caller ID message is deleted. The next Caller ID message is then displayed.

When the pointer is at “No”: The display returns to the Caller ID display.

Deleting all Caller ID name/numbers

1. Press ` call id `. 

<table>
<thead>
<tr>
<th>New</th>
<th>Total</th>
</tr>
</thead>
<tbody>
<tr>
<td>:01</td>
<td>:02</td>
</tr>
</tbody>
</table>

2. Press ` del `. 

<table>
<thead>
<tr>
<th>Delete All?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
</tr>
<tr>
<td>No</td>
</tr>
</tbody>
</table>

3. Press ( A ) or ( V ) to select “Yes” or “No”. 

4. Press ( select ) or ( del ). 

When the pointer is at “Yes”: 
A tone sounds and all stored Caller ID messages are deleted. 

<table>
<thead>
<tr>
<th>Total</th>
</tr>
</thead>
<tbody>
<tr>
<td>:00</td>
</tr>
</tbody>
</table>

When the pointer is at “No”: 
The display returns to the summary screen. 

<table>
<thead>
<tr>
<th>New</th>
<th>Total</th>
</tr>
</thead>
<tbody>
<tr>
<td>:01</td>
<td>:02</td>
</tr>
</tbody>
</table>

NOTE
If you get an incoming call, the deleting operation is cancelled and the telephone returns to standby so you can answer the call.
Calling a party from the Caller ID list

You can place a call from the Caller ID list. The EXS 2060 stores up to 50 messages.

1. Press \textit{call id}. Select the phone number that you want to dial by pressing \textit{\#} or \textit{\#}.

2. Press \textit{talk}. The displayed phone number will be dialed automatically.

Long Distance call and Area Code setting

Pressing \textit{\#} while the incoming call information is displayed (in step 1) will set or cancel a Long Distance call. Pressing \textit{\#} will set or cancel Area Code setting.

Dial edit

You can edit the phone number of Caller ID data when you press \textit{select\#} after the step 1.
Storing Caller ID messages in Memory dialing

The phone number of the party on the Caller ID list can be stored in memory dialing.

1. Press (call id).
   Select the phone number to be stored from the Caller ID list by pressing (a) or (b).

2. Press (mem).
   Select Location
   01 UNIDEN CORP
   02 JONE DOE

3. Press (a) and (b) or enter a two-digit number (01 - 20) to select the memory location.

   A confirmation tone will sound. The number is stored in memory, and the display returns to the Caller ID list.

5. Replace Memory?/CR
   Yes/CR
   No

If a message has already been stored in the selected memory number location, a confirmation screen is displayed. Press (a) to select “Yes”. Press (select) to overwrite. The display returns to the Caller ID list.

Long Distance call and Area Code setting

When you need to store Long Distance call prefix “1” and Area Code, edit the number at step 1. Press (a) for Long Distance call and (b) for Area Code setting.

If there is no phone number, you cannot store a Caller ID message. If you have an incoming call or page, the memory storage is cancelled and the telephone is set to receive the incoming call or page.
Using "Caller ID on call waiting" service

“Caller ID” and “Call waiting” are separate services. CIDCW (Caller ID on Call Waiting) performs the same as regular Caller ID on a call waiting number. You must subscribe to the “Caller ID on call waiting (CIDCW) services” before you can use the following features. The “Call waiting” service can also be used independently. Please contact your local telephone company for details.

1 When a new incoming call arrives during your current telephone call, the phone number and the name of the caller is displayed.

```
Talk  10:30
UNIDEN CORP
817-858-3300
```

2 Press (flash). You will be able to talk with the second caller. The first caller will be put on hold.

3 To return to the first caller, press (flash) again.
If the handset battery pack is completely discharged or the battery pack is removed, the digital security code will be lost. If this happens, a new security code is set automatically next time the battery pack is charged.

**NOTE**

If the handset battery pack is completely discharged or the battery pack is removed, the digital security code will be lost. If this happens, a new security code is set automatically next time the battery pack is charged.

---

**Changing the digital security code**

The digital security code is an identification code used to connect the handset and the base unit. Normally, setting the code is not necessary.

The first time you charge your handset, the security code is automatically set. (See page 3.)

In the rare situation that you suspect another cordless telephone is using the same security code, you can change the code.

1. Remove the handset from the base unit. Press and hold the [page/find] button.

2. While the handset is emitting the paging sound, hold the [page/find] button and replace the handset on the base unit. The paging tone stops. Leave the handset on the base for more than 3 seconds. A random, new security code is set.
To attach the beltclip

Insert the beltclip into the holes on each side of the handset. Press down until it clicks.

To remove the beltclip

Pull both sides of the beltclip to release the tabs from the holes.

---

Headset installation

Your phone may be used with an optional headset, the Uniden HS910. To use this feature, simply plug the headset plug into the headset jack. Your phone is ready for hands-free conversation.

---

NOTE

If you have wall mounted the base, you must remove the beltclip to charge the handset facing forward.
Battery replacement and handling

When the operating time becomes short, even after a battery is recharged, please replace the battery.
With normal usage, your battery should last about one year.
Please contact your place of purchase for a replacement battery.

Power Failure
During the period that the power is off, you will not be able to make or receive calls with the telephone.

Caution
- Use the specified battery pack.
- Do not remove the battery from the handset to charge it.
- Never throw the battery into a fire, disassemble it, or heat it.
- Do not remove or damage the battery casing.

Maintenance

When slightly dirty
Wipe with a soft, dry cloth.

When very dirty
Wipe with a soft cloth that has been dampened with diluted, neutral detergent. Dry with a dry cloth.

When the charging terminals become dirty
Wipe with a dry cloth.

Caution
Do not use paint thinner, benzene, alcohol, or other chemical products. Doing so may discolor the surface of the telephone and damage the finish.

Recycling Nickel-Cadmium Batteries

Nickel-cadmium cells are used in the battery pack. Please take your used nickel-cadmium battery packs to a store that recycles nickel-cadmium batteries.
# Troubleshooting

If your phone is not performing to your expectations, please try these simple steps first.

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Suggestion</th>
</tr>
</thead>
<tbody>
<tr>
<td>The <em>power</em> LED does not light.</td>
<td>• Make sure the AC adapter is plugged into the base unit and wall outlet.</td>
</tr>
</tbody>
</table>
| The *status* LED won't come on when the handset is placed in the base unit. | • Make sure the handset is properly seated in the base unit.  
• Make sure the charging contacts on the handset and base unit are clean. |
| The audio sounds weak and/or scratchy. | • Make sure that the base unit antenna is in a vertical position.  
• Move the handset and or base unit to a different location away from metal objects or appliances and try again.  
• Make sure that you are not too far from the base. |
| Can't make or receive calls. | • Check both ends of the base unit telephone line cord.  
• Make sure the AC adapter is plugged into the base unit and wall outlet.  
• Disconnect the AC adapter for a few minutes, then reconnect it.  
• Reset the digital security code (See page 35).  
• Make sure the *talk* is pressed. |
| The handset doesn't ring or receive a page. | • The battery pack may be weak. Charge the battery on the base unit for 15-20 hours.  
• The handset may be too far away from the base unit.  
• Place the base unit away from appliances or metal objects.  
• Reset the digital security code (See page 35).  
• Make sure the ringer switch is set on (See page 15). |
| The Caller ID does not display. | • The handset was picked up before the second ring.  
• The call was placed through a switch board.  
• Call your local telephone company to verify your Caller ID service is current. |
At Uniden, we’ll take care of you!

If you need any assistance with this product, please call our Customer Hotline at

1-800-297-1023
