Digital Spread Spectrum Provides the Longest Range, the Clearest Sound, and the Best Privacy
Introduction

Thank you for choosing the Uniden EXS 9910 cordless telephone. This phone is designed for reliability, long life, and outstanding performance utilizing the latest in 900 MHz Spread Spectrum technology.

Note: Some illustrations in this manual may differ from the actual unit for explanation purposes.

Features

• 900 MHz Digital Spread Spectrum Technology
• 24 Enhanced Memory Dial Location
• 32 Digit Redial
• 2nd Battery Capability
• Backup Power Supply with Optional Battery Pack
• Flash and Pause
• Pulse / Tone Dialing
• Page
• 4 Hour Talk Time
• 7 Day Standby Battery Time
• Handset Earpiece and Ringer Volume Control
• Hearing Aid Compatible
• Lighted Keypad

Digital Spread Spectrum Technology utilizes a “wider frequency band” vs. a “single narrow band” used in standard digital transmissions. The result is a more secure conversation with the clarity of digital sound, extended range, and minimal interference from other cordless phone.

Random Code™ digital security automatically selects one of over 65,000 codes for the handset and base.

These features enhance your phone’s security and also prevent unauthorized calls as a result of your phone being activated by other equipment.

The EXS 9910 features include AutoTalk™ and AutoStandby™. AutoTalk allows you to answer a call by just removing the handset from the base so you don’t have to waste time pushing buttons or flipping switches. AutoStandby allows you hang up by simply returning the handset to the base.
Controls and functions
1. Handset antenna
2. Headset jack cover
3. Handset battery compartment
4. Handset ring switch
5. Handset speaker
6. Talk/Batt LED

Read this first

This cordless telephone must be set up before use. Follow these steps;

**Step 1** (page 4)
Unpack and check the telephone and accessories.

**Step 2** (page 5 to 9)
Next, choose the best location to set up the base unit.

**Step 3** (page 10 to 12)
Then, insert the battery pack into the handset. You must charge the battery pack for more than 16 hours before using the phone.

About the digital security code
This cordless telephone uses a digital security code to prevent unauthorized access to your base unit. This security code prevents other cordless handsets from making calls through your base unit. A random security code will be assigned automatically between your base unit and handset when you charge the battery pack for the first time.
Checking the package contents

Make sure you have received the following items in the package. If any of these items are missing or damaged, contact the Uniden Parts Department (see below).

- Base unit
- Handset
- AC adapter (AD-420)
- Rechargeable battery pack (BT-999)
- Telephone line cord (2)
- Wall mount adapter
- Memo sticker (2)
- Beltclip
- This Owner's Manual
- Precautions and Important Safety Instructions
- Registration Card
- Quick Reference Guide

Uniden Parts Department

(800) 554-3988
Hours: M-F 8:00 AM to 5:00 PM CST.
We can also be reached on the web at www.uniden.com.
Setting up the base unit

Do the following steps.
• Choose the best location
• Connect the base unit
• Choose the dialing mode

Choose the best location
Before choosing a location for your new phone, read the INSTALLATION CONSIDERATIONS included in the PRECAUTIONS AND IMPORTANT SAFETY INSTRUCTIONS brochure. Here are some important guidelines you should consider:

- You should charge your handset for more than 16 hours before using the phone.
- The location should be close to both a phone jack and continuous power outlet which is not switchable.
- Keep the base and handset away from sources of electrical noise such as motors and fluorescent lighting.
- Be sure there is sufficient space to raise the base antenna fully vertical.
- The base can be placed on a desk, tabletop or mounted on a standard wall plate.
Connect the base unit

If you want to install the base unit on the wall, see page 8.

1 Connect the telephone line cord to the TEL LINE jack and to a telephone outlet.

2 Connect the AC adapter to the DC IN 9V jack and to a standard 120V AC wall outlet.

3 Set the base unit on a desk or tabletop and place the handset on the base unit. Then raise the antenna to a vertical position.
Use only the supplied AD-420 AC adapter. Do not use any other AC adapter.

Connect the AC adapter to a continuous power supply.

Place the base unit close to the AC outlet so that you can unplug the AC adapter easily.

If your telephone outlet isn't modular, contact your telephone company for assistance.

**Choose the dialing mode**

Depending on your dialing system, set the **PULSE-TONE** switch as follows:

<table>
<thead>
<tr>
<th>If your dialing system is</th>
<th>Set the switch to</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tone</td>
<td>TONE</td>
</tr>
<tr>
<td>Pulse</td>
<td>PULSE</td>
</tr>
</tbody>
</table>

If you aren't sure of your dialing system
Make a trial call with the **PULSE-TONE** switch set to **TONE**.
If the call connects, leave the switch as is; otherwise, set to **PULSE**.
## Mounting the base unit on a wall

### Standard wall plate mounting

This phone can be mounted on any standard telephone wall plate.

1. Snap the wall mount adapter into the notches on the base.
2. Plug the telephone line cord to the TEL LINE jack and the AC adapter to the DC IN 9V jack.
3. Plug the telephone line cord into the telephone outlet.
4. Wrap the AC adapter cord inside the molded wiring channel. Then wrap the cord around the strain relief notch.
5. Plug the AC adapter into a standard 120V AC wall outlet.
6. Raise the antenna to a vertical position.
7. Align the mounting slots on the base with the mounting posts on the wall. Push in and down until the phone is firmly seated.
Direct wall plate mounting

If you don't have a standard wall plate, you can mount your phone directly to the wall. Before doing this, consider the following:

- Avoid electrical cables, pipes, or other items behind the mounting location, that could cause a hazard when inserting screws into the wall.
- Try to mount your phone within 10 - 15 feet of a working phone jack to avoid excessive cord lengths.
- Make sure the wall material is capable of supporting the weight of the base and handset.

1 Insert two mounting screws into the wall, (with their appropriate anchoring device), 3-15/16 inches apart. Allow about 3/16 of an inch between the wall and screwheads for mounting the phone.

2 Refer to steps 1 through 9 on page 8 - 9 to mount the telephone.

8 On the base unit, pull the handset retainer out of the slot. Rotate it clockwise 180 degrees.

9 Flip the retainer from front to back. Slide it back into the slot so that the lip of the retainer is up and the oval is down. The retainer holds the handset in place.
Installing the handset battery pack

Charge the battery pack for more than 16 hours before you start using your phone.

1. Press in on the battery cover release and slide the cover down until it comes off.

2. Install the nickel-cadmium battery with the label facing down.

3. Slide the battery cover on until it snaps into place.

4. Place the handset on the base.

5. Make sure that the “status” LED lights. If the LED doesn’t light, check to see that the AC adapter is plugged in and that the handset makes good contact with the base charging contacts.

**NOTE**

Use only Uniden Battery (BT-999) supplied with your phone.
Battery use time (per charge)
From fully charged
- Four hours continuous use.
- Seven days when the handset is in the standby mode.

When the battery charge becomes low
When the voltage of battery pack in the handset is very low and needs to be charged, the phone is programmed to eliminate functions in order to save power. If the battery charge becomes talk/batt LED blinks. If the phone is in use, the handset beeps. Complete your conversation as quickly as possible and return the handset to the base unit for charging.

Cleaning the battery contacts
To maintain a good charge, it is important to clean the battery contacts on the handset and base unit about once a month. Use a pencil eraser or other contact cleaner.
Do not use any liquids or solvents.

Charging optional battery packs
The base unit of your phone is equipped with a compartment for charging an extra battery pack for use in your handset. You can obtain an extra battery pack from your authorized Uniden dealer.

1. Pull the cover of battery charger.
2. Put the battery pack in the compartment with contacts facing down.
3. Charge the battery for 21 hours.
To install the charged battery into the handset, refer to “Installing the handset battery pack”, page 10.
**Automatic digital code security**

To prevent other parties from making unauthorized calls on your phone line, a digital code was added to the EXS 9910. Your phone’s handset and base share this code, which is randomly set each time you place the handset on the base.
Making a call

1. Press \textit{talk}. The \textit{talk/batt} LED lights.
2. Dial the phone number.
3. To hang up, press \textit{(talk)} or return the handset to the base.

Other Operations

<table>
<thead>
<tr>
<th>To</th>
<th>Do this</th>
</tr>
</thead>
<tbody>
<tr>
<td>To adjust the ear speaker volume</td>
<td>Press \textit{↑} or \textit{↓} during the call.</td>
</tr>
<tr>
<td>To temporarily switch to tone dial (When the base is set to pulse mode)</td>
<td>Press \textit{*tone}. The following numbers dialed will be sent as tone dialing.</td>
</tr>
</tbody>
</table>

\textbf{NOTE}

If the \textit{talk/batt} LED never stops flashing, place the handset on the base for at least five seconds and make a call again.
Receiving a call

Handset on the base

1 Phone rings. The talk/batt LED flashes.
2 Pick up the handset and begin speaking.
3 To hang up, press (talk) or return the handset to the base.

Handset off the base

1 Phone rings. The talk/batt LED flashes.
2 Press (talk) or any key and begin speaking.
3 To hang up, press (talk) or return the handset to the base.
Flash and Call Waiting

If you have “Call Waiting” service and a call waiting tone sounds while you are on a call, press \( \text{flash} \) to accept the waiting call. There is a short pause, then you will hear the new caller. To return to the original caller, press \( \text{flash} \) again.

Adjusting the ringer and earpiece volume

**Ringer tone**
The phone has four types of ringer tone. In standby mode, press \( \text{flash} \) and 1 - 4 on the keypad.

**Ringer volume**
In standby mode, press \( \uparrow \) for high and \( \downarrow \) for low.

To turn the ringer off, set the ringer on/off switch to off.

**Handset earpiece volume**
The phone has four earpiece volume levels, Normal, Medium, High, and Loud. Pressing \( \uparrow \) or \( \downarrow \) during a telephone call will change the earpiece volume of the handset. This setting will remain in effect after the telephone call has ended.

When you press \( \uparrow \) in Loud mode or press \( \downarrow \) in Normal mode, error sound beeps.
Redialing a call

The last phone number dialed can be quickly redialed.

1. Press \textit{talk}. The talk/batt LED lights.
2. Press \textit{rd/l/p}.
3. Press \textit{talk} or place the handset on the base to hang up.

Mute

You can turn off the handset microphone so that the person you are talking with cannot hear you.

1. Press \textit{mute} during a telephone call. The talk/batt LED blinks. The other party will not be able to hear you although you can hear them.
2. To cancel mute, press \textit{mute} again.
Using page feature

To locate the handset (while it's off the base), press \textit{page/find} on the base. The handset beeps for 15 seconds.

\textbf{NOTE}

If the handset was paged during a call, you can cancel it by pressing \textit{talk}.
**Storing phone numbers**

Your EXS 9910 stores up to 24 numbers in the handset.

1. Press (mem) while in standby mode. The talk/batt LED flashes.
2. Dial the number you wish to store (up to 16 digits).
3. Press (mem) again.
4. Enter a two-digit number (01 - 20) or press one of the One-touch memory keys (m1 - m4) to select the memory location where you wish to store the number.
5. The talk/batt LED goes out. A confirmation beep indicates the number has been stored.

NOTE

You must press a key within 30 seconds or the phone will return to standby. If you return the handset in the cradle, the phone will return to standby too.

Use the supplied memo sticker to write stored numbers.
Making calls with memory dialing

Memory dialing

1. Press \textit{\textcolor{red}{talk}}. The \textit{talk/batt} LED lights.

2. Press \textit{\textcolor{red}{mem}}.

3. Enter a two-digit number (01 - 20) to select the memory location you wish to dial.

4. To hang up, press \textit{(talk)} or return the handset to the base.

One-touch memory dialing

1. Press one of the One-touch memory keys (\textit{\textcolor{#410f41}{m1}} - \textit{\textcolor{#410f41}{m4}}) you wish to dial.

2. To hang up, press \textit{(talk)} or return the handset to the base.
Erasing a stored phone number

1. Press \textit{\( \text{mem} \)} in the standby mode. The \textit{talk/batt} LED flashes.

2. Press \textit{\( \text{mem} \)} again.

3. Enter the memory location number (01 - 20 or \( m_1 \) - \( m_4 \)) you wish to delete. A confirmation beep indicates the number has been erased.
To attach the beltclip
Insert the beltclip into the holes on each side of the handset. Press down until it clicks.

To remove the beltclip
Pull both sides of the beltclip to release the tabs from the holes.

Installing the beltclip

Headset installation
Your phone may be used with an optional headset. To use this feature, simply plug any standard 2.5mm headset plug into the headset jack. Your phone is ready for hands-free conversation.
Battery replacement and handling

When the operating time becomes short, even after a battery is recharged, please replace the battery. With normal usage, your battery should last about one year. Please contact your place of purchase for a replacement battery.

Power Failure

During the period that the power is off, you will not be able to make or receive calls with the telephone.

Caution

- Use the specified battery pack.
- Do not remove the battery from the handset to charge it.
- Never throw the battery into a fire, disassemble it, or heat it.
- Do not remove or damage the battery casing.

Maintenance

When slightly dirty
Wipe with a soft, dry cloth.

When very dirty
Wipe with a soft cloth that has been dampened with diluted, neutral detergent. Dry with a dry cloth.

When the charging terminals become dirty
Wipe with a pencil eraser or other contact cleaner.

Caution

Do not use paint thinner, benzene, alcohol, or other chemical products. Doing so may discolor the surface of the telephone and damage the finish.

RECYCLING NICKEL-Cadmium Batteries

Nickel-cadmium cells are used in the battery pack. Please take your used nickel-cadmium battery packs to a store that recycles nickel-cadmium batteries.

Nickel-Cadmium Batteries Must Be Disposed of Properly.
If your phone is not performing to your expectations, please try these simple steps first.

Specifications

General
The EXS 9910 complies with FCC Parts 15 and 68.
Frequency control: PLL
Modulation: Frequency shift keying
Operating temperature: 0°C to +50°C (+32°F to +122°F)

Base unit
Frequency: 904.2 MHz to 925.8 MHz (20 channel)
Power requirements: 9V 350mA (from AC adapter)
Size: 5-5/32 in. (W) x 2-1/2 in. (D) x 8-57/64 in. (H)
(131 mm (W) x 63.6 mm (D) x 226 mm (H))
Weight: Approx. 15.7 oz. (Approx. 445 g)

Handset
Frequency: 904.2 MHz to 925.8 MHz (20 channel)
Power requirements: Rechargeable Nickel-Cadmium battery pack
Size (without antenna): 2-17/64 in. (W) x 2-1/32 in. (D) x 7-1/64 in. (H)
(57.6 mm (W) x 51.7 mm (D) x 178 mm (H))
Weight: Approx. 9.4 oz. (267 g) (including battery)
Battery: BT-999
Capacity 600 mAH, 3.6V
Talk mode 4 hours TYP
Standby mode 7 days TYP
