Welcome

Congratulations on your purchase of the Uniden EXT176 series cordless telephone. This phone is designed and engineered to exacting standards for reliability, long life, and outstanding performance.

Note: Some illustrations in this manual may differ from the actual unit for explanation purposes. The color of your cordless phone may vary.

As an ENERGY STAR® Partner, Uniden has determined that this product or product models meets the ENERGY STAR® guidelines for energy efficiency.

ENERGY STAR® is a U.S. registered mark.

Features

- 900 MHz Extended Range Technology
- 3 Line Backlit Display
- Caller ID and Call Waiting Caller ID
- Voice Mail
- 10 Number Memory Dialing
- 32 Digit Redial
- Flash and Pause
- English or French Display Option
- Tone/Pulse Dialing
- Page/Find Handset
- 7 Hour Talk Time/14 Day Standby Time
- Handset Earpiece and Ringer Volume Control
- Hearing Aid Compatible
- 20 Channel Autoscan

The EXT176 series features include AutoTalk™ and AutoStandby™. AutoTalk allows you to answer a call by just removing the handset from the base so you don't have to waste time pushing buttons. AutoStandby allows you to hang up by simply returning the handset to the base.

The UltraClear Plus™ true compander circuitry virtually eliminates background noise. This innovative technology, together with 20 different channels, provides you with the best possible reception during all your conversations.

To protect you against misbilled calls which might result from your phone being activated by other equipment, the EXT176 series has Random Code™ digital security which automatically selects one of approx. 262,000 digital security codes for the handset and base. Also, the AutoSecure™ feature electronically locks your phone when the handset is in the base.

Be sure to visit our web site: www.uniden.com

Uniden® is a registered trademark of Uniden America Corporation. AutoTalk, AutoStandby, UltraClear Plus, Random Code, and AutoSecure are trademarks of Uniden America Corporation.
Step 1  Charging the Battery

TO INSTALL THE HANDSET BATTERY

1. Remove the cover.

2. Connect the battery pack connector with the correct polarity.

3. Replace the cover.

TO PLUG INTO AC POWER

1. Plug AC adapter cord into the base unit and then into a 120V AC outlet. (Use only the supplied AD-310 AC adapter.)

2. Place the handset in the base.

Note: You must charge the battery continuously for 15 - 20 hours before using the phone.

Step 2  Connecting

CONNECT TO A PHONE LINE

When the handset battery pack is fully charged, after 15-20 hours of charging, plug the telephone cord into the base unit and then into a telephone wall jack.

Your phone is set for tone dialing. If your local network requires pulse dialing, please see “Choosing the dialing mode” on page 15.

Step 3  Setting Up the Caller ID/Language

TO CHANGE CALLER ID OPTIONS

1. Press and hold cid/menu.

2. Press ▲ or ▼ to move the pointer to an option.

3. Press select to change the option setting.

4. Press end and return the handset to the base.

TO CHOOSE THE LANGUAGE

1. Press and hold cid/menu.

2. Press ▲ or ▼ to move the pointer to Language.

3. Press select to select Eng (English) or Fr. (French).

4. Press end and return the handset to the base.

Note: Three Caller ID options are available: AutoTalk, Caller ID on Call Waiting (CIDCW), and Area Code.

Read this First

This cordless telephone must be set up before use. Follow these steps:

**Step 1 (page 7)**
Unpack the telephone and accessories.

**Step 2 (page 8)**
Next, choose the best location to set up the base unit.

**Step 3 (page 9 to 11)**
Then, insert the battery pack into the handset. Connect the base unit. You must charge the battery pack for **15-20 hours before plugging into the telephone line and using the phone.**

---

**About the digital security code**
This cordless telephone uses a digital security code to prevent unauthorized access to your base unit. This security code prevents other cordless handset from making calls through your base unit.
A random security code will be assigned automatically between your base unit and handset when you charge the battery pack for the first time.
If you want to change the security code, see page 38.
Checking the Package Contents

Make sure you have received the following items in the package. If any of these items are missing or damaged, contact the Uniden Parts Department.

- Base unit
- Handset
- AC adapter (AD-310)
- Rechargeable battery (BT-905)
- Telephone cord
- Beltclip
- This Owner’s Manual
- Other Printed Material
Setting up the Phone

Do the following steps:
A. Choose the best location  C. Connect the base unit
B. Install the battery pack

A. Choose the best location
Before choosing a location for your new phone, read the INSTALLATION CONSIDERATIONS included in the PRECAUTIONS AND IMPORTANT SAFETY INSTRUCTIONS brochure. Here are some important guidelines you should consider:

- The location should be close to both a phone jack and a continuous power outlet which is not switchable.
- Keep the base and handset away from sources of electrical noise such as motors, microwave ovens, and fluorescent lighting.
- The base can be placed on a desk, tabletop, or mounted on a standard wall plate.
B. Install the battery pack

Charge the battery pack for at least 15-20 hours before plugging the phone line into your phone.

1) Press in on the battery cover release and slide the cover down until it comes off.

2) Connect the battery pack connector observing correct polarity (black and red wires) to the jack inside the battery compartment.

Do not exert any force on this connection. It could cause damage to the battery or to the handset. The plastic connectors will fit together in only one way. Once you are certain that you have made a good connection, then insert the battery pack into the battery compartment. Do not pinch the wires.

3) Securely close the battery compartment cover by sliding it up until it snaps into place.

4) Place the handset in the base with the keypad facing forward.

Use only the Uniden battery (BT-905) supplied with your phone. Replacement batteries are also available through the Uniden Parts Department. (See page 7.)
Even when the battery pack is not being used, it will gradually discharge over a long period of time. For optimum performance, be sure to return the handset to the base unit after a telephone call.

Battery use time (per charge)
From fully charged (15-20 hours charge time)
• Seven hours continuous use
• Fourteen days when the handset is in the standby mode

Low Battery Alert
When the battery pack is very low and needs to be charged, the phone is programmed to eliminate functions in order to save power. If the phone is not in use, "Low Battery" appears on the LCD and none of the keys will operate.

If the phone is in use, "Low Battery" flashes and the handset beeps. Complete your conversation as quickly as possible and return the handset to the base unit for charging.

Cleaning the Battery Charging Contacts
To maintain a good charge, it is important to clean the battery contacts on the handset and base unit with a dry cloth or a pencil eraser about once a month. Do not use any liquids or solvents.
C. Connect the base unit

1) Connect the AC adapter to the **DC IN 9V** jack and to a standard 120V AC wall outlet.

2) Set the base on a desk or tabletop, and place the handset in the base unit.

3) Make sure that the **status/Voicemail** LED illuminates. If the LED does not illuminate, check to see that the AC adapter is plugged in and that the handset makes good contact with the base charging contacts.

- Use only the supplied AD-310 AC adapter. Do not use any other AC adapter.
- Connect the AC adapter to a continuous power supply.
- Place the base unit close to the AC outlet so that you can unplug the AC adapter easily.

- After installing the battery pack in the handset, charge your handset at least **15-20 hours before plugging into the phone line**. Once the handset battery pack is fully charged, connect the telephone line cord to the base and telephone wall outlet.

4) Connect the telephone line cord to the **TEL LINE** jack and to a telephone outlet once the handset is fully charged.

- If your telephone outlet isn’t modular, contact your telephone company for assistance.

- If your telephone outlet is not modular, contact your telephone company for assistance.

- Place the power cord so that it does not create a trip hazard or where it could become chafed and create a fire or electrical hazard.
Mounting the Base Unit on a Wall

Standard wall plate mounting
This phone can be mounted on any standard wall plate.

1) Plug the AC adapter into the **DC IN 9V** jack.

2) Wrap the AC adapter cord inside the molded wiring channel as shown.

3) Plug the AC adapter into a standard 120V AC wall outlet.

4) Plug the telephone line cord into the **TEL LINE** jack. Wrap the cord inside the molded wiring channel as shown.

5) Plug the telephone line cord into the telephone outlet.

6) Align the mounting slots on the base with the mounting posts on the wall. Then push in and down until the phone is firmly seated.

**DO NOT** use an AC outlet controlled by a wall switch.
Direct wall mounting
If you don't have a standard wall plate, you can mount your phone directly to the wall. Before doing this, consider the following:

- Avoid electrical cables, pipes, or other items behind the mounting location that could cause a hazard when inserting screws into the wall.
- Try to mount your phone within 5 feet of a working phone jack to avoid excessive lengths.
- Make sure the wall material is capable of supporting the weight of the base and handset.
- Use #10 screws (minimum length of 1-3/8 inches) with anchoring devices suitable for the wall material where the base unit will be placed.

1) Insert two mounting screws into the wall, (with their appropriate anchoring device), 3-15/16 inches apart. Allow about 1/8 of an inch between the wall and screw heads for mounting the phone.

2) Refer to steps 1 through 6 on pages 12 to mount the telephone.

Terminology
Throughout this manual, terms such as Standby and Talk Mode are used. Below is the terminology explanation.

- **Standby Mode** - The handset is not in use, off the base, and *talk/flash* has not been pressed. A dial tone is not present.
- **Talk Mode** - The handset is off the base and *talk/flash* has been pressed enabling a dial tone.
Setting Menu Options

There are five setup options available. They are Caller ID options [AutoTalk, CIDCW (Caller ID on Call Waiting), Area Code], Dial Mode and Language.

AutoTalk allows you to answer the phone without pressing the talk/flash button. If the phone rings when AutoTalk is on, simply remove the handset from the base and the phone automatically answers the call. If the phone rings when AutoTalk is off, you must press talk/flash to answer the call.

Caller ID options
To change your AutoTalk and CIDCW:

1) Press and hold cid/menu. The following screen appears.

2) Use ^ and v or a number key (1 and 2) to move the pointer to the selection that you would like to change. Press select to toggle between "On" and "Off" for AutoTalk and CIDCW.

3) Press end and return the handset to the base unit. The handset returns to the standby mode.

To enter your Area Code
If you enter a 3-digit area code number in the Area Code option, your local area code does not appear in Caller ID messages. Do not program this option, if your calling area requires 10-digit dialing.
When reviewing Caller ID messages, you will see only the local seven digit number. For calls received from outside your local area code, you will see a full 10-digit number.
1) When the phone is in the standby mode, press and hold *cid/menu*. The following screen appears.

2) Press 3 or press △ twice to select "Area Code".

3) Press select.

4) Use the number keys (0 to 9), #/> , */tone/ < or delete/ch to enter the 3-digit area code.

5) Press select. A confirmation tone sounds and the displayed area code is entered.

6) Press end or return the handset to the base unit. The handset returns to the standby mode.

When the area code has already been stored in memory, the stored area code will be displayed. To change it, use the delete/ch and number keys to enter the new area code. Then press select. A confirmation tone sounds.

To complete the setting, press end or return the handset to the base unit.

**Choosing the dialing mode**

Most phone systems use tone dialing which sends DTMF tones through the phone lines. However some phone systems still use pulse dialing such as in rural areas. The default setting is tone dialing. Depending on your dialing system, set the mode as follows:

- Make sure your battery pack is fully charged before choosing the dial mode.
1) When the phone is in the standby mode, press and hold cid/menu. The following screen appears.

2) Press 4 or press ▼ three times to select “Dial”.

3) Press select to toggle between “Tone” and “Pulse” for each setting.

4) Press end or return the handset to the base unit. The handset returns to the standby mode.

- If you are not sure of your dialing system, set for tone dialing. Make a trial call. If the call connects, leave the setting as is, otherwise set for pulse dialing.
- If your phone system requires pulse dialing and you need to send the DTMF tones for certain situations during a call, you may "switch-over" to tone dialing. (Refer to "Tone Dialing Switch-over" on page 19.)

**Setting the Language**

1) When the phone is in the standby mode, press and hold cid/menu. The following screen appears.

2) Press 5 or press ▼ four times to select “Language”.

3) Press select to toggle between “Eng” and “Fr.” for each setting.

4) Press end or return the handset to the base unit. The handset returns to the standby mode.

</tbody>
</table>

Refer to page 14 “Setting Menu Options” to turn on the AutoTalk feature if desired.
Adjusting the Handset Ringer and Earpiece Volume

**Handset ringer tone and volume**
Press ▲ or ▼ in standby mode to select one of five ringer tones and volume combinations.

**Earpiece volume**
Pressing ▲ or ▼ during a call will change the earpiece volume of the handset. This setting will remain in effect after the telephone call has ended.

- **Volume Maximum**
- **Volume High**
- **Volume Medium**
- **Volume Low**
- **Volume Off**

**Note** When you press ▲ in Maximum mode or ▼ in Low mode, an error tone sounds.

**Ringer Mute**
You can temporarily mute the ringer tone. When receiving an incoming call, press end to stop the ringing. The handset will ring beginning with the next incoming call.
Redial

The redial/p key redials the last number dialed. The redialed number can be up to 32 digits long.

Tone Dialing Switch-over

Some telephone companies use equipment that requires pulse dialing (sometimes referred to as rotary dialing). If you need to enter tone dialing digits, you can switch-over to tone dialing during the call. For example, entering your bank account number after you have called your bank.

Initially make your call with the pulse dialing mode. Once your call connects, press */tone/* or */tone/>. Enter the desired number. These digits will be sent as tone dialing. Once the call ends, the tone mode is canceled and pulse dialing mode resumes.

Traveling Out-of-Range

During a call, as you begin to move your handset too far from your base unit, noise increases. If you pass the range limits of the base unit, your call will terminate within 5 minutes.

• The tone feature only applies when the dial mode is set to pulse.
• This special number can be stored in a memory location. This is referred to as Chain Dialing (See page 26.)
Selecting a Different Channel

If you encounter interference while using your phone, you can manually change the phone’s channel for clear operation. This function works only when the phone is in use.

Press delete/ch. “Scanning” appears on the display, indicating the phone is changing to another channel. For more information on interference, refer to “Precautions” on page 44.

Page

To locate the handset (while it’s off the base), press find handset on the base. The handset beeps for 60 seconds.

Paging is canceled when pressing any handset key, find handset on the base or the handset is returned to the base.

Flash and Call Waiting

If you have “Call Waiting” service and a call waiting tone sounds while you are on a call, press talk/flash to accept the waiting call. There is a short pause, then you will hear the new caller. To return to the original caller, press talk/flash again.

You must subscribe through your local telephone company to receive Call Waiting Service.
Storing Phone Numbers and Names

Memory Dialing allows you to dial a number using just a few key presses. Your EXT176 series stores up to 10 names/numbers in the handset.

1) Press and hold `mem` until "Memory Store" is displayed.

2) Press `▲` or `▼`, or enter a number (0 - 9) to select the memory location where you would like to store the number.

3) Press `select`. The following screen appears and a cursor flashes indicating that the display is ready for the name to be entered.

   If this screen appears, the selected memory location is already stored. Then you must either edit the entry in this location, delete the entry in this location, or select "Go Back" to choose another location.

4) To enter a name (up to 14 characters), use the number keys.
   - See the "Steps for entering names and special characters". (See pages 23-24)
   - Use `#/>` and `*/tone/<` to move the cursor to the desired location.
   - Use `delete/ch` to delete characters as needed.
   - Press and hold `delete/ch` to delete all the characters.
   - If a name is not required, go to step 5.
5) Press \textit{select}. "Store Number" is displayed.
The cursor flashes indicating that the display is ready for
the number to be entered.

6) Use the number keys to enter the phone number.
The phone number cannot exceed 20 digits.
Use \textit{redial/p} to enter a pause in the dialing sequence.
The display shows a "P". Each pause counts as one digit and
represents a two second delay of time between the digits.
Use \textit{delete/ch} to delete digits as needed.

7) Press \textit{select}. You will hear a confirmation tone, and the
following screen appears. Memory storage is complete.
For example, if you store a name and number into memory
location number 7, the display shows "Memory 7 Stored".
After about 2 seconds, "Memory Store" is displayed.
Repeat steps 2 - 7 to store more numbers.

8) Press \textit{end} to return to standby mode.
Steps for Entering Names and Special Characters

Refer to the letters on the number keys to select the desired characters.
With each press of a numeric key, the displayed character appears in the following
order: Upper case letters first, lower case letters next and finally the number
Corresponding to the key.

If you make a mistake while entering a name
Use */tone/ or */#/> to move the cursor to the incorrect character.
Press delete/ch to erase the wrong character, then enter the correct character.
To delete all characters, press and hold delete/ch.
For example, to enter **Uniden**:

1) Pick up the handset and press and hold **mem**.
2) Enter a number or press ▲, ▼ to select a memory location number.
3) Press **select**.
4) Press 8 twice.
5) Press 6 five times.
6) Press 4 six times.
7) Press 3 four times, then press #/> to move the cursor to the right.
   
   **Note:** If the next character uses the same number key, you must press #/> to move the cursor over. Otherwise the next time you press the number key, it changes the character that was previously set.
8) Press 3 five times.
9) Press 6 five times.
10) When finished, press **select**.

To continue to store the telephone number, proceed to step 6 on page 22.
Making Calls with Memory Dialing

Memory dialing from Standby Mode
1) Press mem.
   The handset displays your programmed memory locations.

2) Press ▼ or ▲, or enter the number (0 - 9) to select the memory location you would like to dial.

3) Press talk/flash. "Talk" and the volume setting appear on the display. Then the displayed number is dialed.

Display a Programmed Number
Use #/> and */tone/ < to toggle between the names display and the numbers display.

<table>
<thead>
<tr>
<th>Program name</th>
<th>Program number</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 UNIDEN CORP</td>
<td>1 8002971023</td>

<tr>
<td>2 JOHN DOE</td>
<td>2 5482530</td>
</tr>
<tr>
<td>3 MOM AND DAD</td>
<td>3 8175551212</td>
</tr>
</tbody>
</table>

When the stored phone number has 15 or more digits, "\" is displayed next to the 13th digit. Press #/> to see the extra digits and */tone/ < to return.

If you press select before talk/flash, you can confirm the name and the number stored in the selected memory location.

To exit the memory function without dialing, press end. The handset returns to standby.

Whenever you are using a memory menu screen, you must press a key within 30 seconds or the phone will return to standby.
Memory dialing from Talk Mode

2) Press mem.

3) Enter a number (0-9) to select the memory location of the desired phone number. The selected phone number is displayed. Then the number is dialed.

4) To hang up, press end.

Chain Dialing

The memory locations on the handset are not limited to phone numbers. You can also store a group of numbers (up to 20 digits) that you need to enter once your call connects. This is referred to as Chain Dialing.

An example of this is a bank account number. Once you have called your bank, and are prompted to enter the account number, simply press mem and the location number where the special number has been stored.

Store your special number with an identifying name. (Refer to “Storing Phone Numbers and Names” on page 21.)
Editing a Stored Name and/or Phone Number

1) Press and hold mem until "Memory Store" is displayed.

2) Press ▲ or ▼, or enter a number (0 - 9) to select the memory location you would like to edit.

3) Press select. The following screen appears with the memory location number that you have selected in the display.

4) Press ▲ or ▼ to select "Edit Memory", then press select. The following screen appears. The cursor flashes indicating that the display is ready for the name to be edited. When a name has not been stored, the cursor appears at the beginning of the second line.

5) Use the number keys, */tone/<, >/#, or delete/ch to edit the name. (See page 23.) To edit only the phone number, skip this step.

6) Press select. The following screen appears. The cursor flashes indicating that the display is ready for the number to be edited.
7) Use the number key, **redial/p or delete/ch** to edit the phone number. The phone number cannot exceed 20 digits. (See page 22.) If you don’t want to change the phone number, skip this step.

8) Press **select**. You hear a confirmation tone, and the following screen appears. The memory storage is complete. For example, if you store a name and number into memory location number 1, the display shows “Memory 1 Stored”. After about 2 seconds, “Memory Store” is displayed.

9) Press **end** to return to standby mode.
Erasing a Stored Name and Phone Number

1) Press and hold mem until "Memory Store" is displayed.

2) Press ▲ or ▼, or enter a number (0 - 9) to select the memory location you would like to erase.

3) Press select.
The following screen appears with the memory location number that you have selected in the display.

4) Press ▼ to move the pointer down to "Delete Memory".

5) Press select. The following confirmation screen appears.

6) Press ▲ to move the pointer to "Yes".

7) Press select or delete/ch.
You hear a confirmation tone, and the following screen appears.

8) After about 2 seconds, the display returns to the "Memory Store" screen.
You may delete the information in another memory location (return to step 2) or press end to return to standby mode.
Using One Touch Voice Mail Access

If you subscribe to voice mail service, you can use your phone to access your voice mailbox. The status/Voicemail indicator on the base of your phone flashes whenever you have messages waiting in your voice mailbox. Just program the Voicemail key with your access number and you can get your messages at the touch of a button. (The voice mail service provider will supply you with the access number. This number may be simply a phone number. Refer to the provider's literature.)

Programming your Voice Mail Access Number

1) On the handset, press and hold Voicemail for about 2 seconds. The following display appears:

   If you have previously stored a number, the following display appears:
   Press \ or \ to select "Edit Number", then press select.

2) Enter your personal access number.

3) Press select. A confirmation tone sounds and the following display appears:
Deleting your Voice Mail Access Number

1) When the phone is standby mode, press and hold Voicemail. Following display appears.

2) Press ▲ or ▼ to select “Delete Number”.

3) Press select. Following display appears.

4) Press ▲ to move the pointer to “Yes”.

5) Press select or delete/ch.
   A confirmation tone sounds and the following display appears. After about 2 seconds, the handset returns to standby mode.

Dialing your Voice Mail Service

Once you’ve programmed your personal access number, you can dial your mailbox with a touch of a button. When you have messages, simply pick up the handset and press Voicemail. If you have not entered the access number or it has been deleted, when you press Voicemail, an error tone sounds.

Message Waiting Indicator

The status/Voicemail LED indicator on the base is designed to work with voice mail service provided by your local telephone company. The indicator flashes when you have new voice messages in your mailbox.

You may need to occasionally reset the indicator if it remains On after you retrieved your messages. To reset the indicator, charge the handset and press and hold find handset on the base for 2 seconds until the indicator stops flashing.
Caller ID

**You must subscribe to Caller ID service to use this feature.**

When the telephone rings, the Caller ID feature allows you to view the caller’s name and phone number on the display before you answer the phone. The handset displays the phone number of the incoming call, the name, and time. Additionally, you can dial the displayed number and store the information for memory dialing. Make sure you have turned on the Caller ID/Call Waiting feature. (See page 14.)

**When the Telephone Rings**

1) When the Caller ID message is received, the display shows the caller’s phone number along with the date and time. The incoming call information is stored in the Caller ID record. If the Caller ID service includes the caller’s name, the caller’s name appears on the display (up to 15 letters).

Here are some typical displays:

<table>
<thead>
<tr>
<th>When the phone number and name data are received</th>
<th>When invalid data is received</th>
</tr>
</thead>
<tbody>
<tr>
<td>![Typical Display 1](5/11 12:30PM UNIDEN CORP 800-297-1023)</td>
<td>![Incomplete Data]</td>
</tr>
<tr>
<td>![Typical Display 2](5/11 12:30PM Private Name 800-297-1023)</td>
<td>![](5/11 12:30PM UNIDEN CORP Private Number)</td>
</tr>
</tbody>
</table>

- If you answer a call before the Caller ID message is received (Example: before the second ring), the Caller ID message will not appear.
- When the call is received via a telephone company that does not offer Caller ID service, the caller’s phone number and name do not appear. (This includes international calls.)
- When the call is via a private branch exchange (PBX), the caller’s phone number and name may not appear.
When an unknown name is received
When an unknown number is received

2) When you pick up the phone, the display changes to "Talk". (AutoTalk feature is set to on.)

Note: Data errors appear as "Ⅲ".

Viewing the Caller ID Message List

The Caller ID list stores information for up to 30 incoming calls - even unanswered calls.

1) Press cid/menu.

   The summary screen appears.
   The screen shows the number of new messages and total messages.

2) Press ▼ to display the latest Caller ID message.

3) Press ▼ to see the next message. Or press ▲ to see previous message.

4) Press end to return to standby mode.

New: 01
Total: 02

• In Caller ID operation, if no key is pressed for more than 30 seconds, an error tone sounds and the telephone returns to the standby mode.

• If a call comes in via a telephone system that does not offer Caller ID service, no information is stored.

• Each message can be up to 15 characters for the phone number and the name.

• The number of calls from the same Caller ID appears next to the received time. Once you read the new message, the number will disappear.
Deleting Information from the Caller ID List

The EXT176 series stores up to 30 messages. If the phone receives the 31st message, the oldest one in the list is automatically deleted. Caller ID data can also be deleted manually.

Deleting a Caller ID message

1) Press cid/menu. Display the message to be deleted from the Caller ID list by pressing ▲ or ▼.
2) Press delete/ch.
3) Press ▲ or ▼ to select "Yes" or "No".
4) Press select or delete/ch.

When the pointer is at "Yes":
A tone sounds and the Caller ID message is deleted. The next Caller ID message is then displayed.

When the pointer is at "No":
The display returns to the Caller ID message.

Deleting all Caller ID names/numbers

1) Press cid/menu.
2) Press delete/ch.
3) Press ▲ or ▼ to select "Yes" or "No".

4) Press select or delete/ch.

**When the pointer is at "Yes":**
A tone sounds and all stored Caller ID messages are deleted.

**When the pointer is at "No":**
The display returns to the summary screen.
Using the Caller ID List

Calling a party from the Caller ID list
You can place a call from the Caller ID list. The EXT176 series stores up to 30 messages.

1) Press *cid/menu*. Select the phone number that you want to dial by pressing $\wedge$ or $\vee$.

2) Press *talk/flash*. The displayed phone number dials automatically.

Long Distance calls and Area Code Setting/Cancellation
Pressing 1 while the incoming Caller ID information is displayed (in step 1) will place the prefix “1” in the display to set up for a long distance call. Pressing 3 will set or cancel an area code setting.

Dial edit
You can temporarily edit the Caller ID number that is displayed by pressing *select*. A cursor appears in the display. Press *delete/ch* to move the cursor left, make your changes and then press *talk/flash*. This will not change the number in the Caller ID list memory.

• You cannot make a call from the Caller ID list if your EXT176 series is connected to private branch exchange (PBX).

• When a long distance call has been set, “1” appears in the display.
Storing Caller ID messages in Memory dialing

Messages shown in the Caller ID list can be stored in memory dialing. Using the incoming call information (i.e., Caller ID list), the phone number of the party on the Caller ID list can be stored in memory.

1) Press \textit{cid/menu}.
   Select the phone number to be stored from the Caller ID list by pressing \textasciitilde{^}\textasciitilde{v}.

2) Press \textit{mem}.

3) Press \textasciitilde{^}\textasciitilde{v} or enter a number (0 - 9) to select the memory location to be stored.

4) Press \textit{select}.
   You hear a confirmation tone, and the number is stored in memory.
   The display returns to the Caller ID list.

   \begin{itemize}
   \item If a message has already been stored in the selected memory number location, a confirmation screen is displayed. Press \textasciitilde{^}\textasciitilde{v} to select "Yes". Press \textit{select} to overwrite. The display returns to the Caller ID list.
   \end{itemize}

You can not store a Caller ID message if no phone number appears in the message.
Changing the Digital Security Code

The digital security code is an identification code used to connect the handset and the base unit. Normally, setting the code is not necessary. The first time you charge your handset, the security code is automatically set. (See "About the digital security code", page 6.)

In the rare situation that you suspect another cordless telephone is using the same security code, you can change the code.

1) Remove the handset from the base unit. Press and hold find handset on the base.
2) The handset begins emitting a paging sound. While holding find handset, place the handset in the base unit. The paging sound stops.
   Leave the handset in the base for more than 3 seconds. A new random security code is set.

Installing the Beltclip

To attach the beltclip
Insert the beltclip into the holes on each side of the handset. Press down until it clicks.

To remove the beltclip
Pull both sides of the beltclip to release the tabs from the holes.

Headset Installation

Your phone may be used with a genuine Uniden accessory headset (model HS910).
To use this feature, insert headset plug into the headset jack.
Your phone is ready for hands-free conversations.
(Headset may be purchased by calling the Uniden Parts Department or visiting the web site at www.uniden.com)
Note on Power Sources

Battery replacement and handling
When the operating time becomes short, even after a battery is recharged, please replace the battery. With normal usage, your battery should last about one year. Please contact your place of purchase or the Uniden Parts Department for a replacement battery.

Warning: To avoid the risk of personal injury or property damage from fire or electrical shock, only use the Uniden battery model and Uniden adapter model specifically designated for this product.

Power Failure
During the period that the power is off, you will not be able to make or receive calls with the telephone.

Caution
- Use only specified Uniden battery pack (BT-905).
- Do not remove the battery from the handset to charge it.
- Never throw the battery into a fire, disassemble it, or heat it.
- Do not remove or damage the battery casing.

Maintenance

When slightly dirty
Wipe with a soft, dry cloth.

When very dirty
Wipe with a soft cloth that has been dampened with diluted, neutral detergent. Dry with a dry cloth.

When the charging terminals become dirty
Wipe with a dry cloth or a pencil eraser, if necessary. (See page 10 for the location of charging terminals.)

Caution
Do not use paint thinner, benzene, alcohol, or other chemical products. Doing so may discolor the surface of the telephone and damage the finish.
**Troubleshooting**

If your phone is not performing to your expectations, please try these simple steps first.

## Liquid Damage

Moisture and liquid can damage your cordless phone. In case of accidental submersion, please read the following steps.

<table>
<thead>
<tr>
<th>Case</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>If the handset or base is exposed to moisture or liquid, but only affects the exterior plastic housing.</td>
<td>Wipe off the liquid and use as normal.</td>
</tr>
</tbody>
</table>
| If moisture or liquid has entered the plastic-housing (i.e. liquid can be heard in the phone or liquid has entered the battery compartment). | 1. Remove the battery cover of the handset and leave it off for ventilation.  
2. Remove the battery pack by disconnecting.  
3. Leave the battery cover off and the battery pack disconnected for 3 days for maximum drying time.  
4. Once completely dry, reconnect the battery pack and the battery cover.  
5. Recharge the handset’s battery pack for 20 hours in the base unit before using the phone.  
**IMPORTANT:** You must **unplug the telephone line while recharging the battery pack** to avoid charge interruption. |
| If the base unit or the handset is submerged or covered in a sticky substance, such as juice. | **Handset:**  
1. Remove the battery cover of the handset and the battery pack by disconnecting.  
2. Rinse the handset in warm distilled water.  
3. Let dry for at least 3 days.  
4. Once completely dry, reconnect the battery pack and the battery cover.  
5. Recharge the handset’s battery pack for 20 hours in the base unit before using the phone.  
**Base:**  
1. Disconnect the AC adapter from the base unit, ending power supply.  
2. Disconnect the telephone cord from the base unit.  
3. Rinse the base in warm distilled water.  
4. Let dry for at least 3 days.  
**CAUTION:**  
DO NOT use a microwave oven to speed up the drying time. This will cause permanent damage to the handset and the microwave oven. |
General Information
The phone complies with FCC Parts 15 and 68.
Operating temperature: -10° to 50°C (+14° to +122°F)

AC Adapter Information
AC Adapter part number: AD-310
Input Voltage: 120V AC 60Hz
Output Voltage: 9V DC 210mA

Battery Information
Battery part number: BT-905
Capacity: 600mAH, 3.6V

Battery use time (per charge)
From fully charged
Talk mode duration: 7 hours
Standby mode duration: 14 days

- To avoid damage to the phone use only Uniden AD-310 and BT-905 with your phone.
- If the handset is left off of the base, the actual Talk mode duration will be reduced respective to the amount of
time the handset is off the base.

Recharge your phone on a regular basis by returning the handset to the base after each phone call.
When the operating time becomes short, even after the battery is recharged, please replace the battery.
With normal usage, the battery should last about one year.

A replacement Uniden adapter and battery may be purchased at your local Uniden dealer or by contacting
the Uniden Parts Department (800) 554-3988. Hours are from 7:00 a.m. to 5:00 p.m. Central Time, Monday
through Friday. We can also be reached on the web at www.uniden.com

Specifications, features, and availability of optional accessories are all subject to change without prior
notice.
Precautions!

Before you read anything else, please observe the following:

Warning!

Uniden America Corporation DOES NOT represent this unit to be water-proof. To reduce the risk of fire, electrical shock, or damage to the unit, DO NOT expose this unit to rain or moisture.

Rechargeable Nickel-Cadmium Battery Warning

• This equipment contains a rechargeable nickel-cadmium battery.
• Cadmium is a chemical known to the State of California to cause cancer.
• The rechargeable nickel-cadmium battery contained in this equipment may explode if disposed of in a fire.
• Do not short-circuit the battery.
• Do not change the rechargeable nickel-cadmium battery used in this equipment in any charger other than the one designed to charge this battery as specified in the owner's manual. Using another charger may damage the battery or cause the battery to explode.

Rechargeable Nickel-Cadmium Batteries Must Be Recycled or Disposed of Properly

• Uniden voluntarily participates in an RBRC® industry program to collect and recycle nickel-cadmium batteries at the end of their useful life, when taken out of service within the United States. The RBRC® program provides a convenient alternative to placing used nickel-cadmium batteries into the trash or municipal waste stream, which is illegal in some areas.
• Through the RBRC® program, Uniden makes it easy for you to drop off the used battery at local retailers of replacement nickel-cadmium batteries. You may also contact your local recycling center for information on where to return the used battery. Please call 1-800-R-B-R-CYCLE (1-800-727-2945) for information on Ni-Cd battery recycling in your area.

Uniden's involvement in this program is part of its commitment to protecting our environment and conserving natural resources.

RBRC® is a registered trademark of the Rechargeable Battery Recycling Corporation.

The explanation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

Important Safety Instructions

When using your telephone equipment, these basic safety precautions should always be followed to reduce the risk of fire, electrical shock, and injury to persons:

1. Read and understand all instructions.
2. Follow all warnings and instructions marked on the product.
3. Unplug the product from the wall outlets before cleaning. Use a dry cloth for cleaning without liquid or aerosol cleaners.
4. Do not use this product near water, for example, near a bathtub, washbowl, kitchen sink or laundry tub, in a wet basement, or near a swimming pool.
5. Do not place this product on an unstable cart, stand, or table. The telephone may fall, creating serious damage to the unit.
6. Never place this product near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
7. Never block the ventilation openings. These openings are provided for ventilation. To protect the product from overheating, these openings must not be blocked or covered. This product should never be placed near or over a radiator or heat register.
8. Never operate this product in an installation unless proper ventilation is provided.
9. Do not put any object into the product, for example, pins, paper clips, or keys.
10. Do not allow any object to rest on the power cord. Do not locate this product where the cord will be damaged by persons walking on it.

SAVE THESE INSTRUCTIONS!

Important Electrical Considerations

Unplug all electrical appliances when you know of an electrical storm is approaching. Lightning can pass through your household wiring and damage any device connected to it. This phone is no exception.

Warning!

Please do not attempt to unplug any appliance during an electrical storm.

The FCC Wants You To Know

Changes or modifications to this product not expressly approved by Uniden, or operation of this product in any way other than as detailed by the owner’s manual, could void your authority to operate this product.

The equipment cannot be used on public coin phone service provided by the telephone company. Connection to party line service is subject to state rules. Contact the state public utility commission, public service commission or corporation commission for information.

Range

Your new phone is designed to achieve the maximum possible range by transmitting and receiving according to the highest standards of the FCC. The Maximum Range rating of this phone is meant to be used as a means of comparison against other range claims.

Additional Battery Safety Precautions

Safety Precaution: To reduce the risk of fire or injury to persons by the battery, read and follow these instructions:

1. The only Uniden battery pack specified in the owner's manual.
2. Do not dispose of the battery pack in a fire. The cell may explode.
3. Check the nickel-cadmium battery disposal package insert for disposal instructions.
4. Do not open or mutilate the battery pack. Released electrolyte is corrosive and may cause damage to the eyes or skin. It may be toxic if swallowed.

SAVE THESE INSTRUCTIONS!
Some equipment is wired directly to a phone jack, and these types of installations require a modular jack converter. This ... you should contact your Uniden telephone dealer or a telephone supply store for advice about the proper adapter or con-

Hardwired Jack

Most phone equipment available now uses modular jacks. Phone cords are fitted with a molded plastic connector which plugs into the telephone jack. If you do not have modular phone jacks, contact your local telephone company for information about the proper installation.

Modular Jack

Installing Cordless Telephones

Cordless telephones are radio devices. Communications between the phone and base of your cordless telephone are accomplished by means of radio waves which are broadcast over the open airways. Because of the inherent physical properties of radio waves, your communications can be received by radio-receiving devices other than your own cordless telephone unit. Consequently, any communications using your cordless telephones may not be private.

Installation Considerations

Selecting a Location

Before choosing a location for your new phone, there are some important guidelines you should consider:

• The location should be close to both a phone jack and continuous telephone service.

• Be sure there is sufficient space to fully extend the base antenna.

• The base can be placed on a desk or tabletop or mounted on a standard telephone wall plate.

• You should charge your new phone for 15-20 hours before completing the installation or using the handset.

Connecting the Telephone Cords

Connect the telephone cord as follows:

• Route the cord so that it does not create a tripping hazard, or where it could become chafed and create a fire or other electrical hazards.

• Do not use an outlet controlled by a wall switch.

• Plug the AC Adapter into a standard 120 VAC wall outlet.

• Never touch ungrounded telephone wires or terminals unless the telephone line has been disconnected.

• Use caution when installing or modifying telephone lines.

Applying Power to the Base

This phone requires an AC power outlet, without a switch to interrupt power, and the included AC adapter. To relieve strain on the AC plug when the phone is placed on a desk or table, wrap the power cord around the strain relief notch on the bottom of the base.

NOTE: Place the power cord so that it does not create a trip hazard, or where it could become chafed and create a fire or other electrical hazards.

Adapter Safety Features

If the AC adapter furnished with this phone has a polarized line plug (a plug having one blade wider than the other), this plug will fit into the power outlet only one way. If you are unable to insert the plug fully into the outlet, try reversing the plug.

Do not alter the shape of the blades of the polarized plug!

NOTE: If you cannot plug the AC adapter into the outlet, contact someone about replacing the outlet.

Plug the AC Adapter into a standard 120 VAC wall outlet.

Do not use an outlet controlled by a wall switch.

Use only the Uniden AC Adapter supplied with this phone.

One Year Limited Warranty

Importance of original purchase is required for warranty service.

WARRANTY: UNIDEN AMERICA CORPORATION ("Uniden")

ELEMENTS OF WARRANTY: Uniden warrants, for one year, to the original retail owner, this Uniden Product to be free from defects in materials and craftsmanship with only the limitations or exclusions set out below. WARRANTY DURATION: This warranty to the original retail owner shall terminate and be of no further effect 12 months after the date of original retail sale. The warranty is void outside the United States of America. PROCEDURE FOR OBTAINING PERFORMANCE OF WARRANTY: If, after following the instructions in the owner’s manual you are certain that the product is defective, pack the product carefully (preferably in its original packaging), and include evidence of original purchase and a note describing the defect that has caused you to return it. The product should be shipped freight prepaid, by traceable means, to Uniden America Corporation. (See address below). UNIDEN AMERICA CORPORATION Parts and Service Division 4700 Amon Carter Blvd. Fort Worth, TX 76126 (800) 297-1023, 8 a.m. to 5 p.m. Central, Monday through Friday
I.C. Notice

TERMINAL EQUIPMENT

NOTICE: This equipment meets the applicable Industry Canada Terminal Equipment Technical Specifications. This is confirmed by the registration number. The abbreviation, IC, before the registration number signifies that registration was performed based on a Declaration of Conformity indicating that Industry Canada technical specifications were met. It does not imply that Industry Canada approved the equipment.

NOTICE: The Ringer Equivalence Number (REN) for this terminal equipment is marked on the equipment itself. The REN assigned to each terminal equipment provides an indication of the maximum number of terminals allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the Ringer Equivalence Numbers of all the devices does not exceed five.

RADIO EQUIPMENT

The term “IC:” before the radio certification number only signifies that Industry Canada technical specifications were met.

Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device. “Privacy of communications may not be ensured when using this telephone”.
