To change the call tone rapidly cycles through the channels.
Changes or modifications to this unit not expressly approved by Uniden could void your warranty and authority to operate the product. 

To clean the radio, use a soft key. The icon indicates the radio is receiving a Weather Alert.

Choosing an Emergency/Weather Channel
You can receive and monitor the weather channel of your choice. Your GMR1088-2CK radio can receive weather information from multiple channels. These frequencies are also marked with their respective icons.

Channel 1: 162.550 MHz
Channel 2: 162.400 MHz
Channel 6: 162.500 MHz
Channel 5: 162.450 MHz

Channel 15: GMRS/FRS
Channel 13: GMRS/FRS
Channel 11: GMRS/FRS
Channel 10: GMRS/FRS
Channel 9: GMRS/FRS

Channels 15-22 are available in Canada. You will need to know what NOAA channel frequency is being transmitted in your location.

To turn OFF Weather Alert, press and hold the wx/alert key on the display. Weather Alert is activated even if key beep is deactivated.

When Weather Alert is activated, the highest priority signal is given to this function. It checks the weather alert signals every 7 seconds and switches to the warning tone if any of the broadcast stations are detected.
