Your radio emits a beep each time one of the keys (except for the PTT/VOX key) is pressed. To turn this sound off, press and hold CALL/LOCK while turning the radio OFF. Repeat to turn the sound back ON.

Choosing an Emergency/Weather Channel

While using the Weather Radio, you are not able to receive FRS communications.

To change Emergency/Weather Channel:

1. Press CH while turning the radio on and off. If Roger Beep is turned off, it will be turned on. LED Flashlight with SOS

The radio is equipped with an LED flash that can also flash an SOS signal during emergencies. Press the Flashlight button to cycle through the options.

- Press - turn on flash. (Quick press - turn off flashlight)

- Press and hold - turn on SOS signal

- Press - turn on sound, turn off and return to flash

- From flashight - Press to turn of flashlight.

Note: The flashlight will blink when the radio is off.

Choosing an Emergency/Weather Channel

There are 7 NOAA channel frequencies available and these frequencies are common between the US and Canada. You need to know what frequency is being transmitted in your location.

Press MENU repeatedly until the GMR icon and the current location is displayed.

To turn on Weather Alert:

1. Press CH to display on.
2. To exit the Menu, press the CH key to advance you through the Menu until exiting to “Normal” mode.
3. When you receive a warning signal, it beeps for 5 seconds.

To turn OFF Weather Alert:

1. Press CH to display off.
2. To exit the Menu, press the CH key away from you through the Menu until exiting to “Normal” mode.

Weather Alert is activated even if Beep is turned off.

Your radio can receive weather broadcasts from the NOAA National Weather Service. When in the Weather Radio Alert mode, your Black Box system operates in a standard mode but also monitors the selected weather channel for alerts when not communicating. While using the Weather Radio, you are not able to receive FRS communications.
