CUSTOMER CARE

At Uniden®, we care about you!

If you need assistance, please do NOT return this product to your place of purchase. Our customer care specialists are available to serve you.

Quickly find answers to your questions by:

1. Reading your owner’s manual.
3. Calling our customer care specialists at 1-800-658-8068.

Images in this manual may differ slightly from your actual product.

Save your receipt/proof of purchase for warranty.

Features, specifications, and availability of optional accessories are all subject to change without notice.
DESCRIPTION

Your Uniden PC78LTD is a high-quality communications device designed for use in the Citizens Band Radio Service. It will operate on any of the 40 AM frequencies authorized by the Federal Communications Commission (FCC).

The Citizens Band Radio Service is under the jurisdiction of the Federal Communications Commission (FCC). Any adjustments or alterations which would alter the performance of the transceiver’s original FCC type acceptance, or which would change the frequency determining method, are strictly prohibited. Replacement or substitution of crystal, transistors, ICs, regulator diodes, or any other part of a unique nature, with parts other than those recommend by Uniden, may cause violations of the technical regulations in Part 95 of the FCC Rules or in violation of type acceptance requirements in Part 2 of the rules.

EMERGENCY OPERATIONS

1. Set the switch to CH9 or turn Channel Selector knob to Channel 9.
2. Press the microphone PTT switch and speak clearly.
3. If there is no response, select an active channel and ask that party to relay your emergency broadcast on Channel 9.

All channels except Channel 9 may be used for normal communication. Channel 9 is reserved by the FCC for emergency communication involving the immediate safety of individuals or protection of property. Channel 9 may also be used to render assistance to others.

This is an FCC rule and applies to all operators of CB radios.

WHAT’S IN THE BOX

Carefully unpack your PC78LTD and check the contents against this list:

- PC78LTD CB 2-way mobile radio
- Microphone
- Mounting Bracket Kit
- DC Power Cord
- Owner’s Manual
- Part 95 Subpart D (FCC Rules)
If any items are missing or damaged, contact our Customer Care Line immediately at 1-800-658-8068.

Never use damaged products!

**ANT**

**PA SP.**

**EXT. SP.**

**POWER**

---

18  Antenna socket: Connects antenna cable to transceiver.

19  **PA SP.** jack: Connects external 8-ohm, 4-watt speaker. To prevent acoustic feedback, separate the microphone from the speaker when operating the PA at high output levels.

20  **EXT. SP.** jack: Connects optional 8-ohm 4-watt speaker to remotely monitor the receiver. When the external speaker is plugged in, the internal speaker is off.

21  **POWER** connector: Connects DC power to transceiver

---

**INSTALLATION**

**MOBILE INSTALLATION**

*Plan the location of the transceiver and microphone bracket before beginning installation.*

1. Select a location that is convenient for operating the radio, but does not interfere with the driver or passenger.
2. Install bracket with self-tapping screws provided.
3. Connect power cords (see page 8).
4. Attach the microphone bracket to the side of the radio.
5. Attach radio to bracket.

**Mobile Antenna**

*WARNING! The antenna used for this radio must be installed at least 17.4 inches (44 cm) away from all persons. The antenna must not be collocated or used with any other antenna or transmitter.*

*CAUTION: Never operate your radio with no antenna or with a damaged antenna cable. This can damage the radio.*

You must purchase an antenna to operate this radio. Because the maximum power output of the transmitter is limited by the FCC, the quality of your antenna is very important. To achieve the maximum transmission distance, Uniden strongly recommends that you install only a high quality antenna. You have just purchased a superior transceiver - don’t diminish its performance by installing an inferior antenna.

Only a properly matched antenna system will allow maximum power transfer from the 50 ohm transmission line to the radiating element. Your Uniden dealer is qualified to help you select the proper antenna for your requirements. A whip style antenna may be used for automobile installation.

A short ‘loaded’ whip antenna is easier to install on an automobile, but its efficiency is less than that of a full quarter-wave whip antenna.

**Connecting the Power Cords**

Uniden recommends connecting the power lead to the Ignition Switch Accessory Terminal. This way, the transceiver is automatically turned off when the ignition switch is turned off.

As an alternative, the power cord may be connected to an available terminal on the fuse block or to a point in the wiring harness. However, take care to prevent a short circuit. If in doubt, contact your vehicle dealer for information.
This transceiver may be installed and used in any 12-volt DC negative ground system vehicle.

**Ground Information**

Most newer U.S. and foreign made cars and small trucks use a negative ground system. Some older cars, and some new large trucks, use a positive ground system.

With a negative ground system, the negative (−) battery terminal is usually connected to the vehicle motor block. If you cannot determine the polarity system of your vehicle, contact your vehicle dealer for information.

**Negative Ground System**

For negative ground systems, connect the red DC power cord from the transceiver to the positive (+) battery terminal or other convenient point.

Then connect the black power cord to the vehicle chassis or negative (−) battery terminal.
USING YOUR PC78LTD

TURN PC78LTD ON/OFF

Turn the **VOLUME** knob clockwise until the unit turns on and the display backlight turns on.

Turn the **VOLUME** knob counter-clockwise to turn the unit off.

CB MODE

*Be sure that the power source, antenna, and microphone are properly connected before proceeding.*

1. Turn the unit on. Set the volume to a comfortable level.
2. Set switch to **CB**.
3. Turn the **CH** knob to select a CB channel.
4. Set noise limitations switch to **NB/ANL**.
5. Adjust squelch.
   - Adjust **SQUELCH** knob fully clockwise so only strong signals can get through.
   - Adjust **SQUELCH** knob fully counter-clockwise until you hear a hiss. Everything gets through - noise, weak signals, and strong signals.
   - Slowly adjust **SQUELCH** knob back clockwise until the hiss stops. Only clearer signals get through.
   *Set SQUELCH only when the radio is not receiving a strong signal.*
6. Press and hold **PTT** and check the multifunction meter. It will show the RF output power.
7. Adjust **RF GAIN** knob set RF Gain sensitivity. Normally, the knob is turned clockwise to maximum.
8. Set the brightness (**BRT** or **DIM**).
9. Set meter switch to S/RF.

PA MODE

*Using the PA mode requires an optional speaker.*

1. Switch to **PA**.
2. Press and hold **PTT** to speak.
3. Release when finished.

To prevent acoustic feedback, separate the microphone from the speaker when operating the PA at high output levels.

If you are in PA mode but not pressing PTT, the radio receives CB transmissions and transmits them through the PA speaker. You cannot respond to the transmission.

**HI CUT/OFF**

The Hi Cut function reduces high frequencies. Switch to HI CUT to turn off higher frequencies.

**TO TRANSMIT/RECEIVE**

*Perform a voltage Standing Wave Ratio (SWR) measurement prior to using the transmitter. An SWR ratio in excess of 2:1 may damage the transmitter.*

*Be sure to read and understand Part 95, FCC Rules and Regulations before operating your transmitter.*

1. Select a channel.
2. Adjust MIC GAIN.
3. When the channel is clear, press the microphone PTT and speak.
4. Release PTT when you are finished speaking to listen for the response.

**MULTI-FUNCTION METER**

*SWR Meter:* Measures the standing wave ratio (SWR) of the antenna. Use this meter to check the antenna system or to adjust your antenna to the proper length.

To Measure SWR:

1. Set the meter switch to CAL.
2. Press and hold microphone PTT switch (Transmit).
3. Calibrate meter with SWR CAL knob by adjusting the needle to the ▼ mark.
4. Move the meter switch to the SWR position while pressing the microphone PTT switch.
5. Release the PTT switch.
A reading less than two is acceptable. Higher readings indicate a problem in the antenna system. Problems may be caused by humidity, vibration, a mistuned antenna, or corrosion. Check both ends of the coaxial cable connector. Also check for damage to the cable or antenna. Tune the antenna according to the instructions that came with the antenna.

**RF Meter:** Measures RF Output Power for transmitter. To use, set the meter switch at *S/RF*. Press microphone *PTT* switch to read transmitting power.

**S-Meter:** Measures incoming signal strength. To use, set the meter switch at *S/RF*. The meter swings to indicate signal strength.

i.e. S 3, S 5, S 7 . . .

### PREVENTIVE MAINTENANCE

Every six months:

1. Check the Standing Wave Ratio (SWR). See page 11.
2. Be sure all electrical connections are tight.
3. Inspect antenna coaxial cable for wear or breaks in shielding.
4. Be sure all screws and mounting hardware are tight.

### MAINTENANCE

The PC78LTD is designed to give you years of trouble-free service. There are no user-serviceable parts inside. Except for the fuse in the DC power cord, no maintenance is required.

To replace a blown fuse:

1. Press ends of the fuse holder together. Twist to open.
2. Carefully separate the two pieces.
3. Remove the fuse and inspect. If blown, replace with the same type fuse. Use only the fuse specified for your PC78LTD. Failure to do so may void your warranty.
# TROUBLESHOOTING

In the event of system malfunction, perform the following procedures:

<table>
<thead>
<tr>
<th>Problem</th>
<th>Suggestion</th>
</tr>
</thead>
<tbody>
<tr>
<td>Unit does not power up</td>

<td>13.8VDC</td>
</tr>
</tbody>
</table>
### Current Drain:
- **TX:** AM Full Modulation: 2.2A (max)
- **RX:** Squelched, 0.4 A; with maximum audio output, 1.2A (nominal)

### Size (W x D x H):
7-9/32 in. x 7-51/64 in. x 2-13/64 in. (without knobs and jacks)

### Weight:
3 lb with microphone

### Antenna Connector:
UHF, SO-239

### TRANSMITTER
- **Power Output:** 4 watts
- **Modulation:** High- and Low-Level, Class B amplitude modulation
- **Frequency Tolerance:** ± 0.002%
- **Frequency Response:** 300 - 3000 Hz
- **Spurious Rejection:** -70dB
- **Output Impedance:** 50 ohm, unbalanced

### RECEIVER
- **Sensitivity at 10 dB (S+N)/N:** <1 µV for 10 dB, (S+N)/N
- **Selectivity:** 6 dB @ 7 kHz; 60 dB @ 10 kHz
- **Image Rejection:** 80 dB typical
- **Adjacent-CH Rejection:** 60 dB typical
- **IF Frequencies: Double Conversion:**
  - 1st: 10,695 MHz
  - 2nd: 455 kHz
- **Automatic Gain Control:** Less than 10 dB change in audio output for inputs from 10 to 50,000 µV.
- **RF Gain Control:** Adjustable for optimum signal reception
- **Noise Blanker:** RF type
- **Squelch:** Adjustable; threshold <1 µV
- **Audio Output Power:** 4 Watts
- **Frequency Response:** 300 to 3000 Hz
- **Distortion:** Less than 7% at 3 Watts, 1000 Hz
- **Internal Speaker:** 16 oms, round
- **External Speaker (not supplied):** 8 ohms; disables internal speaker when connected
- **Antenna Impedence:** 50 ohms
- **Squelch Tight:** 1000 µV
- **Signal Meter S-9:** 100 µV
**PA SYSTEM**

Power Output: 4 Watts into external speaker

External Speaker for PA Speaker (not supplied): 8 ohms when **CB/PA** switch in in PA. The PA also monitors the receiver; separate jack provided.

*Specifications shown are typical and subject to change without notice.*

If you do not get satisfactory results after performing the above checks, call the Uniden Customer Service Center at 1-800-297-1023, 8:00 a.m. to 4:30 p.m. CST, Monday through Friday.

**SAFETY NOTICE**

The antenna used for this radio must be properly installed and maintained and must provide a separation distance of at least 44 cm (17.4 inches) from all persons and must not be collocated or operated in conjunction with any other antenna or transmitter. Never transmit if any person is closer than the specified distance to the antenna.

Note that Uniden does not specify or supply any antenna with this transceiver. While a 0 dBi gain antenna is normal for a typical installation, the above limit applies to any antenna with up to 3 dBi gain.
This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Cet appareil est conforme la norme d’Industrie Canada exempt de licence RSS (s). Son fonctionnement est soumis aux deux conditions suivantes : (1) cet appareil ne peut pas provoquer d’interférences, et (2) cet appareil doit accepter toute interférence, y compris les interférences qui peuvent causer un mauvais fonctionnement de l’appareil.

Tous les changements apportés à cet appareil, s’ils ne sont pas expressément approuvés par Uniden ou toute utilisation de celui-ci d’une autre manière que celle décrite dans ce guide peut annuler votre autorisation de le faire fonctionner.

Un guide d’utilisation en français peut être téléchargé à l’adresse suivante :

ONE-YEAR EXTENDED WARRANTY

Important: Evidence of original purchase is required for warranty service.

WARRANTOR: UNIDEN AMERICA CORPORATION ("Uniden")

ELEMENTS OF WARRANTY: Uniden warrants, for one year, to the original retail owner, this Uniden Product to be free from defects in materials and craftsmanship with only the limitations or exclusions set out below.

WARRANTY DURATION: This warranty to the original user shall terminate and be of no further effect one year after the date of original retail sale. The warranty is invalid if the Product is (A) damaged or not maintained as reasonable or necessary, (B) modified, altered, or used as part of any conversion kits, subassemblies, or any configurations not sold by Uniden, (C) improperly installed, (D) serviced or repaired by someone other than an authorized Uniden service center for a defect or malfunction covered by this warranty, (E) used in any conjunction with equipment or parts
or as part of any system not manufactured by Uniden, or (F) installed or programmed by anyone other than as detailed by the owner’s manual for this product.

STATEMENT OF REMEDY: In the event that the product does not conform to this warranty at any time while this warranty is in effect, warrantor will either, at its option, repair or replace the defective unit and return it to you without charge for parts, service, or any other cost (except shipping and handling) incurred by warrantor or its representatives in connection with the performance of this warranty. Warrantor, at its option, may replace the unit with a new or refurbished unit. THE LIMITED WARRANTY SET FORTH ABOVE IS THE SOLE AND ENTIRE WARRANTY PERTAINING TO THE PRODUCT AND IS IN LIEU OF AND EXCLUDES ALL OTHER WARRANTIES OF ANY NATURE WHATSOEVER, WHETHER EXPRESS, IMPLIED OR ARISING BY OPERATION OF LAW, INCLUDING, BUT NOT LIMITED TO ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. THIS WARRANTY DOES NOT COVER OR PROVIDE FOR THE REIMBURSEMENT OR PAYMENT OF INCIDENTAL OR CONSEQUENTIAL DAMAGES. Some states do not allow this exclusion or limitation of incidental or consequential damages so the above limitation or exclusion may not apply to you.

LEGAL REMEDIES: This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. This warranty is void outside the United States of America.

PROCEDURE FOR OBTAINING PERFORMANCE OF WARRANTY: If, after following the instructions in the owner’s manual you are certain that the Product is defective, pack the Product carefully (preferably in its original packaging). The Product should include all parts and accessories originally packaged with the Product. Include evidence of original purchase and a note describing the defect that has caused you to return it. The Product should be shipped freight prepaid, by traceable means, to warrantor at:

Uniden America Corporation
C/O Saddle Creek
743 Henrietta Creek Road, Suite 100
Roanoke, TX  76262
