Welcome

Congratulations on your purchase of the Uniden Digital Expandable Cordless Telephone System! This is a "Corded/Cordless" Telephone unit. The corded handset (on base) can make/receive calls during power failure. When the base unit is connected to AC power and a telephone line, it can support up to ten cordless handsets. You can now place a fully-featured cordless handset anywhere in your home or office where AC power is available to connect the handset chargers. Extra handsets also allow you to establish a 4-way conference call among two handsets, the base speakerphone, and an outside line.

Note: Illustrations in this manual are used for explanation purposes. Some illustrations in this manual may differ from the actual unit.

As an Energy Star® Partner, Uniden has determined that this product or product models meets the Energy Star® guidelines for energy efficiency.

Energy Star® is a U.S. registered mark.

Features

- 5.8GHz Digital Expandable
- Corded/Cordless Telephone System
- Make and Receive Calls During a Power Failure
- Integrated Answering Device
- Dual Keypad and LCD Screen at Base
- Ten Multi-Handset Expandability
- Hands-Free Duplex Speakerphone in the Handset and Base
- Caller ID/Call Waiting Deluxe (Subscribe through Local Telephone Company)
- 100 Programmable Memory Locations in the Base and Each Cordless Handset
- Trilingual Display Options and Voice Prompts (English, French and Spanish)
- Intercom/Call Transfer Between Handsets or Handset and Base
- 20 Distinctive Ring Options (Ten Ringer Tones and Ten Melody Ringers)
- Mute and Hold Features
- Do Not Disturb (DND) Feature
- DirectLink™ Mode
- Room/Baby Monitoring
- Battery Level Indicator
- Clock Display
- Animation Displays
This series features AutoTalk™ and AutoStandby™. AutoTalk allows you to answer a call by just removing the handset from the cradle so you don't have to waste time pushing buttons. AutoStandby allows you to hang up by simply returning the handset to the cradle.

To protect you against mis-billed calls that might result from your phone being activated by other equipment, this series has Random Code™ digital security, which automatically selects one of more than 10,000,000 digital security codes for the handset and base.

Digital Spread Spectrum Technology uses a wider frequency band than standard digital transmissions. The result is a more secure conversation with the clarity of digital sound, extended range, and minimal interference from other cordless phones.

IntegriSound™ Built in sound quality which provides life-like conversations.

With DirectLink™ mode, you can use two or more handsets as radio transceivers (walkie-talkies).

Be sure to visit our web site: www.uniden.com

Uniden® is a registered trademark of Uniden America Corporation.

AutoTalk, AutoStandby, DirectLink, IntegriSound and Random Code are trademarks of Uniden America.

Terminology

- **Standby Mode** - The handset maybe sitting or off the cradle, but is NOT in use. talk/flash or speaker has not been pressed. The corded base handset is on the base and speaker on the base has not been pressed. No dial tone is present.

- **Talk Mode** - The handset is off the cradle and talk/flash or speaker has been pressed, or pick up the corded base handset and speaker on the base is pressed and enabling a dial tone.

Display and Icons

Example of the standby mode display

**Handset**

- **Battery** icons indicate the handset battery status. This icon changes depending on the battery status (empty, low, medium and full) (handset only).
- **Standby/Talk**
  - **Ringer off icon** (when the ringer is off) / day of the week and time / battery icon
  - **Handset ID and Banner**
  - **Number of new Caller ID calls received** (If there are no new Caller ID messages, the Handset ID appears here.)

**Base**

- **Status of your Answering machine**
  - **New message**
  - **Day of the week and time**
  - **Number of new Caller ID calls received**

- **appears if you have a new message.**
- **appears if you turn your answering system off.**
- **appears when the message storage is full.**
- **appears if you set your answering system to announce only.**

Soft Key Function

“Soft” keys are keys that change function during the operation of the phone. There are three soft keys on the base and three on each handset. Soft keys allow you to:

- Access the main menu
- Redial one of the last three numbers dialed

The function of each soft key is determined by the icon that appears directly above it. For example, when the base is in standby mode, pressing soft key 1 will redial the last number. When the base is in talk mode, pressing soft key 1 will mute the microphone.

Complete information on the features controlled by the soft keys can be found under each feature.
Setting up the Phone

A. Choose the best location

When choosing a location for your new phone, here are some important guidelines you should consider:

- The location should be close to both a phone jack and a continuous power outlet (one which is not connected to a switch).
- The base and handset should be kept away from sources of electrical noise such as motors, microwave ovens, and fluorescent lighting.
- For better reception, place the base as high as possible.
- The base should be placed in an open area for optimum range and reception.
- If your home has specially wired alarm equipment connected to phone line, be sure that installing the system does not disable your alarm equipment. If you have questions about what will disable alarm equipment, contact your telephone company or a qualified installer.

For maximum range:
• Keep the antenna free of obstruction.
• When the handset is not in use place it in an upright position.
• Do not hold the handset where you would block the signal.

www.uniden.com
B. Connect the base unit

1) Connect to the handset cord to the left side of the phone and the corded base handset.

2) Connect AC adapter to the DC IN 9V jack and to a standard 120V AC wall outlet. Connect the AC adapter to a continuous power supply (i.e., an outlet that is not controlled by a switch).

Place the base unit close to the AC outlet so that you can unplug the AC adapter easily.

3) Connect the telephone line cord to the TEL LINE jack.

4) Set the base on a desk or tabletop. Place the corded base handset on the base.

\[\text{tip}\]

If your telephone outlet isn’t modular, contact your telephone company for assistance.

\[\text{note}\]

- Use only the supplied [AD-800] AC adapter. Do not use any other AC adapter.
- Do not place the power cord where it creates a trip hazard or where it could become chafed and create a fire or electrical hazard.
C. Install the rechargeable battery pack into the handset

1) Press down on the handset battery case cover (use the finger indentation for a better grip) and slide the cover downward to remove.

2) Plug the battery pack connector (red & black wires) into the jack inside the battery compartment. (The connector notches fit into the grooves of the jack only one way.) Match the wire colors to the polarity label in the battery compartment, connect the battery and listen for a click to ensure connection.

3) Make sure you have a good connection by slightly pulling on the battery wires. If the connection is secure, the battery jack will remain in place.

4) Place the battery case cover back on the handset and slide it upwards until it clicks into place.

note

*Use only the Uniden (BT-446) rechargeable battery pack supplied with your cordless telephone.
*The battery may be purchased by calling Uniden’s Parts Department (see back cover page).
D. Connect the charger

The handset is powered by a rechargeable battery pack. The battery recharges automatically when the handset is placed in the charger.

1) Connect the AC adapter to the DC IN 9V jack and to a standard 120V AC wall outlet.

2) Set the charger on a desk or tabletop, and place the handset in the charger with the keypad facing forward.

3) Make sure that the charge LED illuminates. If the LED does not illuminate, check to see that the AC adapter is plugged in and the handset makes good contact with the base charging contacts.

4) Charge the handset battery pack for at least 15-20 hours before using your new cordless handset for the first time.
Expanding Your Phone

Ten Handset Expandability

Your phone supports up to ten handsets, including any handsets supplied with your phone. You can now place a fully-featured cordless handset anywhere AC power is available to connect the handset charger.

Handsets can be used in DirectLink Mode or on an intercom call without interfering with incoming calls. It is possible to have a 4-way conference among the base, two handsets, and one outside line.

All the handsets ring when a call is received.

Backwards/Forwards Compatibility

Your phone is compatible with other Uniden 5.8GHz Digital Expandable Handsets. Compatible models include the TCX860, TCX400, TCX440, and ELX500. (Please check www.uniden.com for an updated list of expansion handsets compatible with this series.)

note

If you have any trouble with your phone, visit our web site at www.uniden.com or call our Customer Hotline at 1-800-297-1023 (Mon-Fri 7 am to 7pm, Sat/Sun 9 am to 5pm, CST). (The Customer Service Hotline is closed on holidays.)

*If you change a global setting in one handset, you change that particular setting for all registered handsets. All other settings (not included under Global Setup) must be set separately through each handset.
Register the Handset

If you purchase an expansion handset, you need to register the handset before use. Only one handset can be registered at a time.

Handsets supplied with the phone are registered to the base by the factory. When charged, pre-registered handsets display a handset ID number. Handsets that have not been registered display Models vary! Charge handset on the base for registration or refer to Owner’s Manual. When you register an extra handset to the base, the handset ID will be assigned.

The ELX500, TCX400, TCX440, and TCX805 all use the same registration steps. Follow the steps below to register your expansion handset.

1) Before registering the extra handset, the battery pack MUST be charged for 15-20 hours.
2) With the main base in standby mode, press the MENU soft key on the base.
3) Press \text{\textasciitilde} / vol/ or \text{\textasciitilde} / vol/ on the base to select HS Registration, and then press the OK soft key.
4) On the handset, press and hold \# for two seconds. To cancel registration, press the CANCEL soft key on the base.
5) While the handset is registering, Handset Registering will appear in the Handset LCD. When Registration Complete is displayed, the handset has been registered to the base. If Registration Failed appears, please try these steps again.

\textit{note}

- An extra handset can be registered when the main base is in standby mode.
- If a handset has ever been registered to a different base, you must de-register the handset before you can register it to the new base (see page 14).
De-register the Handset

You can deregister the handset's ID from the main base unit or the base ID from the handset. You will usually only deregister the handset if you are going to use it with a different base, if you are having a problem with your phone or if you need to change the digital security code. The digital security code is an identification code used to connect the handset and the base unit. Normally, setting the code is not necessary. In the rare situation that you suspect another cordless telephone is using the same security code, you can change the code by de-registering and re-registering all handsets.

1) Press the MENU soft key. Select the Deregister HS in the menu and press the OK soft key. Deregister HS? appears.

2) Press volume up/down to select Yes and then the OK soft key. When de-registration is complete you will hear a confirmation tone, and Deregistration Complete appears.

3) After de-registering the handset, you must re-register the handset before you can use it.
Installing the Beltclip

**To attach the beltclip**
Insert the beltclip into the holes on each side of the handset. Press down until it clicks.

**To remove the beltclip**
Pull either side of the beltclip to release the tabs from the holes.

Headset Installation

Your phone may be used with an optional headset. To use this feature, insert the headset plug into the headset jack. Your phone is ready for hands-free conversations. (Headset may be purchased by calling the Uniden Parts Department or visiting the web site. See back page.)
Main Menu Options

Your phone has eight main menu options: DirectLink Mode, Room/Baby Monitor, Handset Setup, Base Setup, Answ. Setup, Global Setup, Deregister HS and HS Registration. You can change Room/Baby Monitor, Answ. Setup, and Global Setup settings from the base or from any handset. DirectLink Mode, Handset Setup, and Deregister HS are only available from a handset. Base Setup and HS Registration are only available from the base.

Handset and Base Setup Default Settings

The default settings set from the factory match the features that most people use. You may not need to change them. However, there are a number of options you must set and entries you must make in memory to take full advantage of all the phone features. The table below lists the default settings.

For Global Setup, Answ. Setup, and Deregister HS menu options, when setting options from the handset, make sure the line is not in use and the handsets are within range of the base.

Main menu flow chart is provided on page 88.
Setting Menu Options

Using the interface

Below are some tips for using the software interface on your phone.

- Press the **MENU** soft key to access the main menu.
- Use **volume up/down** to scroll through options.
- Press the **OK** soft key to make a selection.
- Press the **BACK** soft key to return to the previous screen.
- Press **end** on the handset or **caller id/exit** on the base to exit the menu.
- If you do not press a key within 30 seconds, the phone will time out and exit the menu mode. When setting Day and Time, the time-out period is extended to two minutes.
Handset Setup / Base Setup

The following submenu options must be set separately for each handset and the base.

Selecting a Ringer Volume

Ringer volume lets you choose from one of three ringer volumes.

From the handset
1) Press the MENU soft key. Select the Handset Setup menu, and then the Ringer Volume submenu.
2) Press cid/vol/ or redial/p/vol/ to select High, Low, or Off.
3) Press the OK soft key. You will hear a confirmation tone.

From the base
In standby mode, press △/vol/ or △/vol/ to select one of three ringer volumes (Off, Low, or High).

If you set the ringer to off, no ringer or melody will sounds.
Selecting a Ringer Tone (Handset only)

Ringer tone lets you choose from ten ringer tones or ten melodies:
- Ringers (Flicker, Clatter, Soft Alert, Wake Up, Light Bug, Beep Boop, Tone Board, Chip Chop, Party Clap, Reminder)
- Melodies (Beethoven’s Symphony #9 [Beethoven9], For Elise [Elise], We Wish You A Merry Christmas [Merry-Xmas], Home Sweet Home [Hm Swt Hm], Lorri Song #6 [Lorri Song], When the Irish Eyes Are Smiling [Irish Eyes], Aura Lee, Let Me Call You Sweet Heart [Sweetheart], Star Spangled Banner [Star Spngl], Old MacDonald [Old MacDld])

You must set a separate ringer tone on the base and each handset.

1) Press the **MENU** soft key. Select the Handset Setup menu, and then the Ringer Tones submenu.

2) Press **cid/vol/\(\uparrow\)** or **redial/p/vol/\(\downarrow\)** to move the pointer. You will hear the ringer or melody as you scroll through the options.

3) Press the **OK** soft key. You will hear a confirmation tone.
Distinctive Ringer Setup (Handset only)

Distinctive Ringer allows you to assign a designated ring tone to a stored phonebook number. When a call is received and the Caller ID information matches the information in one of the phonebook memory locations, the phone uses the distinctive ring assigned to that particular caller. You can assign distinctive rings to multiple phonebook memory locations. Switching the setting to Distinctive Off disables distinctive ringing: all incoming calls will have a normal ring tone. Switching to Distinctive On activates all programmed distinctive ring memory locations.

1) Press the MENU soft key. Select the Handset Setup menu, and then the Distinctive Ring submenu.
2) Press cid/vol/\ or redial/p/vol/\ to select On or Off.
3) Press the OK soft key. You will hear a confirmation tone.

Setting AutoTalk (Handset Only)

AutoTalk allows you to answer the phone simply by removing the handset from the cradle. You do not have to press any buttons to answer the call.

1) Press the MENU soft key. Select the Handset Setup menu, and then the AutoTalk submenu.
2) Press cid/vol/\ or redial/p/vol/\ to select On or Off.
3) Press the OK soft key. You will hear a confirmation tone.
Setting Anykey Answer (Handset only)

Anykey Answer allows you to answer the phone by pressing any number key, */tone/<, or #/> on the handset.

1) Press the MENU soft key. Select the Handset Setup menu, and then the Anykey Answer submenu.
2) Press cid/vol/∧ or redial/p/vol/∨ to select On or Off.
3) Press the OK soft key. You will hear a confirmation tone.

Setting the True Banner (Handset only)

True Banner lets you customize the name your handset displays. The name will be displayed on the LCD screen during Standby Mode, Intercom, Intercom Hold, Room Monitor and Copy Phonebook operation. The banner name will be displayed on the receiving handset as well.

1) Press the MENU soft key. Select the Handset Setup menu, and then the Banner submenu.
2) Use the number keypad (0-9), */tone/<, #/> or the DELETE soft key to enter or edit the name.
3) Press the OK soft key. You will hear a confirmation tone.
Selecting a Language

You can change the language the menu display will use. Choose from English, French, or Spanish.

1) Press the **MENU** soft key. Select the Handset Setup menu or the Base Setup menu, and then the Language submenu.
2) Press **volume up/down** to choose "English," "Français" (French), or "Español" (Spanish).
3) Press the **OK** soft key. You will hear a confirmation tone.

Adjusting the LCD Contrast

Contrast adjusts the handset LCD brightness. Choose one of the ten levels for optimum viewing.

1) Press the **MENU** soft key. Select the Handset Setup menu or the Base Setup menu, and then the Contrast submenu.
2) Press **volume up/down** to adjust the contrast of the LCD (ten levels.)
3) Press the **OK** soft key. You will hear a confirmation tone.
**Setting the Key Touch Tone (Handset only)**

Key Touch Tone is the tone your keypad makes when keys are pressed. You can turn this tone on or off.

1) Press the **MENU** soft key. Select the Handset Setup menu, and then the Key Touch Tone submenu.

2) Press **cid/vol/\^** or **redial/p/vol/\_** to select **On** or **Off**.

3) Press the **OK** soft key. You will hear a confirmation tone.

**Setting the Animation Screen (Handset Only)**

The Animation Screen displays animation on the handset LCD. The animations will be displayed on the LCD screen during a call, ringer volume setting, paging operation, when you hang up and so on.

1) Press the **MENU** soft key. Select the Handset Setup menu, and then the Animation Screen submenu.

2) Press **cid/vol/\^** or **redial/p/vol/\_** to select **On** or **Off**.

3) Press the **OK** soft key. You will hear a confirmation tone.
The handsets have a variety of animation displays. Below are examples of the animation screens and what they mean:

- **Turning on the phone**: Welcome! Please Wait...
- **Hanging up the phone**: End 1:53
- **Confirmation (Done!)**: Done!
- **Making a Call**: Talk
- **Find / Paging Handset**: Paging
- **Deleting (Deleted!)**: Deleted!

Also, the animation display changes depending on the ringer volume setting:

- **Ringer Volume**: Back, OK
- **Out of Range**: Out Of Range
- **Unavailable**: Unavailable
- **Low Battery**: Low Battery

If no key is pressed for two minutes, the phone will exit the menu mode.
Global Setup

If you change one of the global settings, you change that setting for all registered handsets and the base. Only one handset or the base can change global settings at a time.

Setting Day and Time

Day & Time sets the day and time of your display.

1) Press the MENU soft key. Select the Global Setup menu, and then the Day & Time submenu option (image is for the handset).
2) Press volume up/down to select the day of the week, and then the → soft key.
3) Press volume up/down to set hour, and then press the → soft key.
4) Press volume up/down to set minute, and then press the → soft key.
5) Press volume up/down to choose AM or PM, and then press the SAVE soft key. You will hear a confirmation tone.
Setting CIDCW (Caller ID on Call Waiting)

Caller ID on Call Waiting (CIDCW) displays the name and number of an incoming call while you are on the line. Call Waiting Deluxe (CWDX) allows you to handle call waiting calls in seven different ways.

1) Press the MENU soft key. Select the Global Setup menu, and then the CIDCW submenu.
2) Press volume up/down to select CW On/CWDX On, CW On/CWDX Off, or CW Off/CWDX Off, and then press the OK soft key. You will hear a confirmation tone.

Setting the Area Code

If you enter a 3-digit area code number in the "Area Code" option, your local area code does not appear in the Caller ID message. For calls received from outside your local area code, you will see a full 10-digit number.

1) Press the MENU soft key. Select the Global Setup menu, and then the Area Code submenu.
2) Press the number keypad (0-9) to enter a 3-digit area code.
3) Press the OK soft key. You will hear a confirmation tone.

note

If the area code has already been stored in memory, the stored area code will be displayed. To change it, use the DELETE soft key and number keys to enter the new area code.
Setting the Dial Mode

Dial Mode sets the dial mode to tone or pulse. Most phone systems use tone dialing; the default setting is tone dialing. Set the dialing mode to match the dialing system used by your local phone service.

- If you are not sure of your dialing system make a trial call. If the call connects, leave the setting as is; otherwise set the unit to pulse dialing.
- If your phone system requires pulse dialing and you need to send DTMF tones in certain situations during a call, you may switch over to tone dialing (refer to "Tone Dialing Switch-over" on page 34).

1) Press the \textit{MENU} soft key. Select the Global Setup menu, and then the Dial Mode submenu.
2) Press \textit{volume up/down} to select \textit{Tone} or \textit{Pulse} (the initial setting is Tone).
3) Press the \textit{OK} soft key. You will hear a confirmation tone.
Using Your Phone

Power Failure Operation
Because the TRU8888 is a corded/cordless combination phone, it can still perform several of its functions during a power failure. The following features will function even during a power failure.

--Making and receiving calls with the corded base handset
--Adjusting the volume on the main base
--Call waiting/flash feature on the main base
--DirectLink mode
All other features are disabled during a power failure.

Making and Receiving Calls

Making a call

From the handset
1) Remove the handset from the cradle.
2) Press talk/flash.
3) Listen for the dial tone.
4) Dial the number.

OR

www.uniden.com
1) Remove the handset from the cradle.
2) Dial the number.
   If pause is required, press redial/p/vol. P appears in the display, which represents a pause.
3) Press talk/flash.

From the Handset Speakerphone
1) Remove the handset from the cradle.
2) Press speaker.
3) Listen for the dial tone.
4) Dial the number.
5) When the other party answers, talk into the microphone.

From the base
1) Pick up the corded handset, or press speaker.
2) Listen for the dial tone.
3) Dial the number.

OR

1) Dial the number.
If pause is required, press the PAUSE soft key.
2) Pick up the corded handset, or press speaker.

To set "AutoTalk", see page 20 or to set "Anykey Answer" see page 21.

The handset microphone is located at the bottom of the handset. Position yourself as near to the handset as possible and speak clearly.

The base microphone is located under the base. Position yourself as near to the base as possible.
Receiving a call

From the handset
1) Remove the handset from the cradle. (If AutoTalk is on, the phone will automatically answer the call when you pick it up.)
2) Press talk/flash.

OR
If the handset is off the cradle, press talk/flash or number keypad, */tone/, or #/>. (Anykey answer is on.)

From the base
Press speaker or pick up the corded handset.

Hanging Up
From the handset or handset speakerphone, press end or return the handset to the cradle (AutoStandby).
From the base, press speaker or return the corded handset to the base.

Switching to the Handset Speakerphone During a Call
To switch a normal call to the speakerphone, press speaker on the handset. To switch from a speakerphone call to a normal call, press speaker again.
Call Waiting

If you have Call Waiting service and a call waiting tone sounds while you are on a call, press talk/flash on the handset or flash/find handset on the base to accept the waiting call. There is a short pause, and then you will hear the new caller. To return to the original caller, press talk/flash on the handset or flash/find handset on the base again.

Placing a Call on Hold

1) During a call, press intercom/hold on the handset or intercom/hold on the base. The call will be put on hold.

   If you leave a call on hold for more than ten seconds, the base display screen will read, Line On Hold and handset display screen will read "Hold."

2) To return to the call, pick up the corded handset or press talk/flash on a handset. To talk to the caller on a speakerphone, press speaker on the base or on a handset.
Redialing a Call
The last three phone numbers dialed can be quickly redialed from the handset or base.

1) With the phone in standby mode, press redial/p/vol on the handset or press the REDIAL soft key on the base.
2) Press volume up/down. Each press of volume up/down will display one of the last three number redialed.
3) Press talk/flash or speaker on the handset (or pick up the corded base handset, or press speaker on the base). The selected number is dialed.
4) To hang up, press end (or return the corded base handset to the base, or press speaker on the base).

From the handset, you can dial the last number dialed. During a call, press the MENU soft key. Use volume up/down to select Redial and then press the OK soft key. Press the DIAL soft key. The number will be dialed.

Adjusting the Earpiece and Speaker Volume

**Earpiece and Speaker Volume**
You can select earpiece volume from among six volume levels on the handset and the base. For speaker volume, select from among six volume levels on the handset and ten volume levels on the base. Pressing volume up/down on the handset or base during a call will change the earpiece or speaker volume. This setting will remain in effect after the telephone call has ended.

www.uniden.com
If you press volume up when the earpiece is at the maximum volume level, an error tone sounds. The error tone also sounds if you press volume down at the lowest volume.

Muting the Ringer

Do Not Disturb (DND)
The do not disturb feature (DND) allows you to mute the ringer, the base, and any registered handsets at the same time. The phone must be in standby mode. Press and hold do not disturb on the base. You will hear a confirmation tone, and the DND LED illuminates. To cancel the DND feature, press do not disturb again. You can also mute the ringer tone while the phone is ringing by pressing do not disturb on the base.

Temporarily Muting the Ringer
To mute the ringer tone temporarily for each handset or the base, when the phone is ringing, press end or the MUTE soft key on the handset you want to mute or the base. The mute will last for the current incoming call only. The ringer tone will return to the previous setting starting with the next incoming call.
Mute Microphone

With the handset
You can temporarily mute the microphone so that the caller cannot hear you. Press the MUTE soft key during talk mode (while the phone is in use) to mute the microphone. Mute On and M are displayed. To cancel muting, press the MUTE soft key again. Mute Off appears.

With the base
During a call, press the MUTE soft key on the base to mute the microphone. Mute On and M appear in the display. To cancel muting, press the MUTE soft key again or press speaker. Mute Off appears.

Tone Dialing Switch-over
If your telephone company requires pulse dialing, you can switchover to tone dialing after the call connects. This feature is useful when you need tone dialing to use any automated menu systems, such as telephone bank tellers, telephone prescription refills, customer support menus, etc.
If your phone is set to pulse dialing mode, make your call normally. Once your call connects, press */tone/<. Any digits you enter from then on will be sent as tone digits. When this particular call ends, the phone automatically returns to pulse dialing mode.

Traveling Out of Range

During a call, as you begin to move your handset too far from your base unit, noise may increase. If you pass the range limits of the base unit, you will hear a beep and see Out of Range on the display, and then the handset returns to standby mode.

Privacy Mode

Privacy Mode prevents interruption from other registered handsets or the base. This works only when the phone is in use.

1) Press the MENU soft key on the handset or base during talk mode.
2) Press volume up/down to move the pointer to Privacy Mode and then press the OK soft key.

Privacy Mode On and appear in the display. To exit the Privacy Mode, repeat above step again. Privacy Mode Off appears.

note

The tone feature only applies when the dial mode is set to pulse.
Conferencing

If you have more than one handset, up to four people can participate in a conference call.

3-Way Conferencing
• Outside line + Handset + Base (or Handset)

4-Way Conferencing
• Outside line + Handset + Handset + Base

Joining a Conference Call
You can easily join a call already in progress.

From the base
1) Press speaker on the base or pick up the corded handset to join the conference call.
2) To hang up, press speaker or return the corded handset to the base. The handset(s) will still be connected to the call.

From a second handset
1) Press talk/flash or speaker on the handset to join the call.
2) To hang up, return the handset to the cradle or press end on the handset. The base or other handset will still be connected to the call.
Find Handset

To locate the handset, press *flash/find handset* on the base when the phone is in standby mode. All registered handsets beep for 60 seconds, and *Paging* appears on the handset display. To cancel paging, press any key on the handset or *flash/find handset* on the base.

*note* If the battery pack is completely drained, the handset will not beep when paging.
Setting up the Phonebook

You can store names and numbers in your phone’s phonebook, search for names alphabetically, and dial phonebook entries with just a few key presses. Phonebook memory is stored independently in the base and handsets. You can store up to 100 numbers in the base and up to 100 numbers in each handset.

The phone uses the same memory to store phonebook entries and Caller ID messages. If the shared memory is already full, the phone will not store any more phonebook entries. You will have to delete some of the Caller ID messages before you can store a new phonebook entry.

The phonebook entries in the handset are not limited to phone numbers. You can also store a group of numbers (up to 20 digits) that you need to enter once your call connects. This is referred to as Chain Dialing.

Storing and Editing Phone Numbers, Names, Distinctive Rings and Speed Dial

1) When the phone is in standby mode, press phonebook.
2) Press the STORE soft key. Store/Edit Name appears.
3) Enter the name (up to 16 characters) by using the number keypad. If a name is not required, go to step 4. <No Name> will be used as the name.

www.uniden.com
Refer to the letters on the number keys to select the desired characters. With each press of a number key (0-9), the displayed character appears in the following order: upper case letters first, lower case letters next and finally the number corresponding to the key.

For example, to enter Movies:
1) Press 6 once, and then press #/> to move the cursor to the right.
2) Press 6 six times.
3) Press 8 six times.
4) Press 4 six times.
5) Press 3 five times.
6) Press 7 eight times.

If you make a mistake while entering a name
Use */tone/< or #/> to move the cursor to the incorrect character.
Press the DELETE soft key to erase the wrong character, and then enter the correct character. To delete all characters press and hold the DELETE soft key.
4) Press the OK soft key to store the name;
Store/Edit No. appears.
5) Use the number keypad, */tone/<, or #/> to enter the phone number (up to 20 digits).
If you make an error, use the DELETE soft key to erase the incorrect digits. When you are finished, press the OK soft key to store the number.
6) If you store the phonebook entry in the handset, Distinctive Ring appears. Press volume up/down to move the pointer to one of the Distinctive Ring options and then press the OK soft key. If you choose not to store a Distinctive Ring, simply select the "No Selectn" option.

7) Speed Dial appears. Press volume up/down to move the pointer to select the Speed dial location (10 locations: SPD1-SPD0). If you choose not to store the name/number as a Speed Dial, simply choose the "No Selectn" option.

8) Press the OK soft key. You will hear a confirmation tone, and Done! appears in the display.

Storing Caller ID messages in the Phonebook
Messages shown in the Caller ID list can be stored in the phonebook. The phone number and name of the party on the Caller ID list can be stored in memory.
1) When the phone is in standby mode, select the Caller ID message to be stored (see "Viewing the Caller ID List" on page 48). Then press the EDIT soft key.
2) Press volume up/down to select Store into PB?, then the OK soft key. Store/ Edit Name appears. If the Caller ID message is already stored in memory, you will hear a beep and This data is already stored !! appears. The number will not be stored.
3) To complete the setting, follow the steps 3-8 in "Storing and Editing Phone Numbers, Names, Distinctive Rings and Speed Dial" on pages 38-40.
Storing a Redial Record (Handset only)
1) With the phone in standby mode, press \texttt{redial/p/vol} \texttt{\textasciitilde}.
2) \texttt{redial/p/vol} \texttt{\textasciitilde} repeatedly to display the number to be stored. Then press the \texttt{EDIT} soft key.
3) Press \texttt{cid/vol/\textasciitilde} or \texttt{redial/p/vol/\textasciitilde} to select \texttt{Store into PB?}, then the \texttt{OK} soft key. \texttt{Store/Edit Name} appears.
4) To complete the setting, follow the steps 3-8 in “Storing and Editing Phone Numbers, Names, Distinctive Rings and Speed Dial” on pages 38-40.

Deleting a Redial Record (Handset only)
1) With the phone in standby mode, press \texttt{redial/p/vol} \texttt{\textasciitilde}.
2) Press \texttt{cid/vol/\textasciitilde} or \texttt{redial/p/vol/\textasciitilde} repeatedly to display the number to be deleted. Then press the \texttt{EDIT} soft key.
3) Press \texttt{cid/vol/\textasciitilde} or \texttt{redial/p/vol/\textasciitilde} to select \texttt{Delete?}, then the \texttt{OK} soft key.
4) Press \texttt{cid/vol/\textasciitilde} or \texttt{redial/p/vol/\textasciitilde} to choose \texttt{Yes}.
5) Press the \texttt{OK} soft key. The redialed number is deleted.

\textbf{note}

* If the Caller ID message was received as a private/unknown number, or the message does not have the number, you cannot store the message in the phonebook. If it was received as private/unknown name, the message will be stored as \texttt{<No Name>}.
* If all 100 memory entries are full, the Caller ID message will be erased from Caller ID list when you store it in the phonebook.
Viewing the Phonebook

1) Press **phonebook**. If you open the phonebook during a call, the **COPY** and **STORE** soft key will not appear.

2) Press **volume up/down** to scroll through the phonebook entries. Phonebook entries appear in alphabetical order (from first to last when you press **volume down**, from last to first when you press **volume up**).

You can also use the letters on the number keys to select the first letter of the desired name. Press a number key (2-9 and 0) once for the first letter, twice for the second letter, and so on. The first entry that begins with the letter you entered appears.

For example, to search for an entry starting with "M," press 6 once. Press **volume up/down** until the phonebook entry is displayed.

3) To finish the viewing operation:

From the Handset-press **end** (or the **BACK** soft key or **talk/flash** during a call).
From the Base-press **caller id/exit** key or the **BACK** soft key.
Making Calls Using the Phonebook

From Standby Mode
1) When the phone is in standby mode, select the phonebook entry you want to dial (see "Viewing the Phonebook" on page 42).
2) Press talk/flash or speaker on the handset (or press speaker on the base or pick up the corded handset).
3) To hang up press end on the handset (or press speaker on the base or return the corded handset to the base).

From Talk Mode
1) Press talk/flash or speaker on the handset (or press speaker or pick up the corded handset from the base).
2) Select the phonebook entry you want to dial (see “Viewing the Phonebook” on page 42).
3) Press the DIAL soft key. The number in the displayed phonebook entry is dialed.
4) To hang up press end on the handset (or press speaker on the base or return the corded handset to the base).

Speed Dialing
You can program up to ten speed dial numbers in the base and up to ten speed dial numbers in each handset. You must program a speed dial number before you can use the speed dialing feature. When the phone is in standby mode, press and hold a number key (0-9) associated with the speed dial until the phone number appears, and then press talk/flash or speaker on the handset or speaker on the base. The number stored in the speed dial (SPD1 - SPD0) is dialed.
Editing or Erasing a Phonebook Entry

1) When the phone is in standby mode, press phonebook.
2) Use volume up/down or the number keypad to select the desired phonebook entry (see "Viewing the Phonebook" on page 42). Then press the EDIT soft key.
3) To edit entry, select Edit. To delete the entry, select Delete?.
4) If you are deleting the entry, press volume up/down to select Yes, and then press the OK soft key. You will hear a confirmation tone, and Deleted! appears in the display.

If you are editing the entry, follow the steps 3 to 8 under “Storing and Editing Phone Numbers, Names, Distinctive Rings and Speed Dial” on pages 38-40 to complete the editing operation.
Copying Phonebook Entries

Copy Phonebook allows you to transfer stored phonebook entries from handset to handset or from base to handset (or from handset to base) without having to manually re-enter names and numbers. You can transfer one memory (phonebook entry) at a time, or all memory entries at once.

1) When the phone is in standby mode, press *phonebook*.
2) Press the COPY soft key.
3) Press volume up/down to select the handset or base to which you want transfer the phonebook entries and then press the OK soft key.

4) Press volume up/down to select One Memory or All Memories: and then press the OK soft key.

   If you select All Memory, Are you sure? appears on the display screen. Press volume up/down to select Yes, and then press the OK soft key.

   If you select One Memory, press volume up/down, or the number key (2-9 and 0) to select the phonebook entry you want to export and then press the COPY soft key.

5) The phonebook entries will be transferred to the handset or the base. Copying and the receiving handset name or base appear. When the transfer is completed Done! appears on the handset or the base.

*If you stored 100 phonebook entries, you can not store the phonebook entries and you will hear beep.*

*If the selected handset is out of range or data transfer is canceled, unavailable appears in the display. Phonebook entries will not be transferred.*
Caller ID and CIDCW (Caller ID on Call Waiting)

You must subscribe to Caller ID services through your local telephone provider to use these features.

When the telephone rings, the Caller ID feature allows you to view the caller's name, phone number, date and time of call. With CIDCW (Caller ID on Call Waiting), you will hear a call waiting tone while you are on a call, and the Caller ID data is displayed. To accept the waiting call, press talk/flash on the handset or flash/find handset on the base. Additionally, you can dial a number stored in the Caller ID list or save data to your phonebook entries.

Important:
Memory locations for Caller ID messages and Phonebook entries (including Speed Dials) are common, you can store up to all 100 entries for each handset and the base. Caller ID messages are not stored when you have 100 phonebook entries. When you have stored a total of 100 phonebook entries and Caller ID messages, the oldest Caller ID message is overwritten.

The date and time received — 12/21 12:30PM
Caller's name — Jane Smith
Caller's phone number — 214-555-1234

The date and time received — 12/21 12:30P
* Uniden Corp
817-858-3300

When the call is received via a telephone company that does not offer Caller ID service, the caller's phone number and name does not appear. (This includes some international calls.)

When the call is via a private branch exchange (PBX), the caller's phone number and name may not appear.

When the Caller ID message is received, the display shows the caller's phone number along with the date and time. The incoming call information is stored in the Caller ID record. If the Caller ID service includes the caller's name, the name will appear in the display (up to 15 characters).
You may receive any one of the following messages:
When a private name is received; Private Name
When a private number is received; Private Number
When a unknown name is received; Unknown Name
When a unknown number is received; Unknown Number
When invalid data is received; Incomplete Data

Data errors appear as "●.

Call Waiting Deluxe Features
Your phone gives you new options for call waiting. At the touch of a button, you can place the caller on hold, send them to your voice mail service, or conference them into your current call. You must subscribe to Call Waiting and Call Waiting Deluxe to use these features. Not all features are available in all areas. Check with your local telephone company for details.

From the base
1) When you receive a Call Waiting call, press the CWDX soft key for a list of options.

From the handset
1) When you receive a Call Waiting call, press the MENU soft key. Press cid/vol/ or redial/p/vol/ to select CallWaitDeluxe, then press the OK soft key for a list of option.
2) Press **volume up/down** or the number keypad (1-7) to select an option.
   - **Ask to Hold** - A prerecorded message states that user will be available shortly, and the call is placed on hold.
   - **Tell Busy** - A prerecorded message tells the caller you are busy, and the waiting call is disconnected.
   - **Forward Call** - The caller is sent to your voice mail box, if available.
   - **Answer/Drop 1** - Disconnects the first call and connects the new caller.
   - **Conference** - Allows you to have a conference call with your first and second callers.
   - **Drop First/Drop Last** - During a conference call, allows you to choose to drop the first or drop the last caller.

3) Press the **OK** soft key. A confirmation screen will appear, and the phone returns to the call.

**Viewing the Caller ID List**

The Caller ID list stores information for incoming calls - even unanswered calls. You can store up to 100 Caller ID messages and phonebook entries (including Speed Dials) for each handset and the base. You can view the Caller ID list through the handset or base during a call or when the phone is in standby mode.

1) With the phone in standby mode, press **cid/vol** (or **caller id/exit**). Or with the handset in talk mode, press the **MENU** soft key. Use **volume up/down** to select **Caller ID**, then press the **OK** soft key.

The summary screen appears. The screen shows the number of new messages and total messages.
2) To view the Caller ID messages in historical order (newest to oldest or from oldest to newest), use, volume down to scroll through the messages from the latest to the earliest, or volume up to scroll back through the messages.
To view the Caller ID messages with alphabetical search, press the number key pad (2-9 and 0) with the letter associated with the first letter of the desired message.

Once you view the Caller ID list with alphabetical search, you cannot switch back to historical order unless you exit and re-enter the operation.

3) To finish the viewing operation:

From Handset - press the BACK soft key.
From Base - press caller id/exit or the BACK soft key.

Deleting Information from the Caller ID List

1) When the phone is in standby mode, view the Caller ID information to be deleted (see "Viewing the Caller ID List" on page 48). Then press the EDIT soft key.

2) Use volume up/down to select Delete?. Press the OK soft key. Delete Caller ID ? appears.

3) Press volume up/down to select Yes. and then press the OK soft key.

4) You will hear a confirmation tone.
Deleting all Caller ID names/numbers

1) When the phone is in standby mode, press cid/vol \( \wedge \) (caller id/exit on the base).
2) Press the DELETE soft key. Delete All? appears.
3) Press volume up/down to choose Yes.
4) Press the OK soft key. You will hear a confirmation tone.

Calling a Party from the Caller ID List

Standby mode

1) When the phone is in standby mode, select the Caller ID message (see "Viewing the Caller ID List" on page 48).
2) To have the phone dial a "1" before the displayed Caller ID number, press */tone/<. To have the phone dial the stored area code before the displayed Caller ID number, press #/>.
3) Press talk/flash or speaker on the handset or speaker on the base or pick up the corded handset. The displayed phone number dials automatically.

*When a long distance call has been set, "1" appears in the display.
*You cannot make a call from the Caller ID list if your phone is connected to a private branch exchange (PBX).
Talk mode

1) Press talk/flash or speaker on the handset or speaker on the base or pick up the corded handset.
2) Select the Caller ID message you want to dial (see "Viewing the Caller ID List" on page 48).
3) Press the DIAL soft key. The displayed phone number will be dialed.
The Integrated Telephone Answering Device

The phone has a built-in answering system that answers and records incoming calls. You can also use your answering system to record a conversation, leave a voice memo message, or announce a special outgoing message to callers when you’re away from your phone.

Features
- Digital Tapeless Recording
- Up-to 12 minutes of Recording Time
- Call Screening
- Personal or Prerecorded Outgoing Messages
- Voice Prompts for TAD (English, Spanish, or French)
- Time and Day Announcement
- Remote Message Retrieval
- Toll Saver
- Conversation Recording
- Voice Memo
- Message Alert On/Off
- Retrieve TAD Messages using Handset
Answering System Setup
This main menu option allows you to set up the built in answering device.

Record a Personal Outgoing Message (Base Only)
Record Greeting allows you to record a personal outgoing message (greeting) which the answering system automatically plays when you receive a call.

1) Press the MENU soft key. Select the Answ. Setup menu, and then the Record Greeting submenu. To record greeting press [START] appears.
2) Press the START soft key. You will hear “Record Greeting.” The message counter displays 30 and then begins to count down.
3) Position yourself near the base microphone and record your greeting.
4) When you are finished recording, press the STOP soft key. Your greeting will playback for confirmation.

Selecting Your Greeting (Base only)
Select Greeting allows you to choose between the two outgoing messages, a pre-recorded message or your own greeting.

1) Press the MENU soft key. Select the Answ. Setup menu, and then the Select Greeting. Play back greeting appears, and the current outgoing message is played. LCD is an example if you recorded your greeting.

note
• The greeting must be more than two seconds long, or it will not be recorded.
• To delete the personal outgoing message, press the DELETE soft key while the message is playing. The system announces “Greeting has been deleted.”

The greeting must be more than two seconds long, or it will not be recorded. To delete the personal outgoing message, press the DELETE soft key while the message is playing. The system announces “Greeting has been deleted.”
2) Once you have recorded a personal greeting, press the **CHANGE** soft key to choose the greeting. The selected outgoing message is played. Each time you press the **CHANGE** soft key, the phone switches the outgoing message between the prerecorded and the personal outgoing message.

To delete the personal greeting, press the **DELETE** soft key.

**Setting a PIN Code**

Security code selects a two-digit Personal Identification Number (PIN) code. A PIN code is required to play your messages from a remote location.

1) Press the **MENU** soft key. Select the Answ. Setup menu, and then the Security Code submenu.
2) Enter a two-digit PIN code (01-99) using the number keypad (0-9).
3) Press the **OK** soft key. You will hear a confirmation tone.

**Setting the Ring Time**

Ring Time allows you to set the number of rings the caller hears before your answering system plays the outgoing message. You can set the ring time to answer after two, four, or six rings. If you enable the Toll Saver (TS), the answering system picks up after two rings if you have new messages and after four rings if there are none.

1) Press the **MENU** soft key. Select the Answ. Setup menu, and then the Ring Time submenu.
2) Press **volume up/down** to select a Ring Time (Toll Saver, 2 Times, 4 Times, or 6 Times).
3) Press the **OK** soft key. You will hear a confirmation tone.
Setting the Record Time
Record Time sets the duration for recording the incoming messages. You have three record time options. The options "one minute" or "four minutes" set the duration for recording the incoming messages. "Announce only" answers the call but prevents the caller from leaving a message.

1) Press the MENU soft key. Select the Answ. Setup menu, and then the Record Time submenu.
2) Press volume up/down to select Record Time (1 Minute, 4 Minutes, or Announce Only).
3) Press the OK soft key. You will hear a confirmation tone.

Setting the Message Alert On or Off
Message Alert sounds an alert tone when you have an unheard message. If you set the Message Alert on, whenever a new message is received, the soft alert tone will sound every 15 seconds. When all messages have been played back, the alert tone automatically deactivates.

1) Press the MENU soft key. Select the Answ. Setup menu, and then the Message Alert submenu.
2) Press volume up/down to select On or Off.
3) Press the OK soft key. You will hear a confirmation tone.

Turning the message alert tone off by pressing any key
To quickly turn off the Message Alert tone, press any key on the base unit; the tone will automatically deactivate.
Setting the Language of your Answering System

Language allows you to set the language of your answering system announcements to English, French, or Spanish.

1) Press the MENU soft key. Select the Answ. Setup menu option, and then the Language submenu.
2) Press volume up/down to choose “English”, “Français” (French), or “Español” (Spanish).
3) Press the OK soft key. You will hear a confirmation tone.

Setting the Call Screen

Call Screen allows you to listen (from the base) to the incoming message being left by the caller before you answer the call.

1) Press the MENU soft key. Select the Answ. Setup menu and then the Call Screen submenu.
2) Press volume up/down to select On or Off.
3) Press the OK soft key. You will hear a confirmation tone.
Turning the Answering System On/Off

1) To turn the answering system on, press \( \text{answer on/off} \) on the base when the phone is in standby mode. The message and the number of messages stored in memory appears on the LCD. If the LCD flashes, then there are new messages waiting for you.

2) To turn the answering system off, press \( \text{answer on/off} \) on the base. \( \text{ medications } \) appears on the LCD.

Setting Your Outgoing Message (Greeting)

When you receive a call, the answering system automatically plays either the pre-recorded message or your own greeting. To record your own greeting, or choose between the two outgoing messages, refer to “Answering System Setup” on page 53. The following message is pre-recorded: “Hello, no one is available to take your call. Please leave a message after the tone.”

Announce only feature

The announce only feature plays a pre-recorded outgoing message or your own personal outgoing message, but it will not allow the caller to leave a message. To set announce only, follow the steps on “Setting the Record Time” page 55. If you want to use your own greeting and you want to change your greeting to omit the prompt to leave a message, refer to “Selecting Your Greeting (Base only)” on page 53. The following message is pre-recorded: "Hello, no one is available to take your call. Please call again."
New Message LED

The new message LED on the handset flashes when you have new messages in your answering system. The LED stops flashing when all new messages are played back.

Using Your Answering System

The message counter displays the number of messages stored in memory. If the display flashes, then there are new messages waiting for you. The answering system is designed to play your new messages first. After you play all your new messages, you can then play your old messages.

Playing your messages

1) When the base is in standby mode, press ‡/☐ play/stop.
   The system announces the number of new and old messages while the message counter displays only the number of new messages. The time and day that each message was received is announced after the message is played. The message counter will then display the number of current stored messages.
2) When all new messages have been played, you hear a confirmation tone, and the system announces “End of messages.” The system returns to standby. After you have reviewed your new messages, you can play your old messages by pressing ‡/☐ play/stop again. Once you have listened to a new message, it then becomes an old message. The old messages will be played in the order in which they were received.

www.uniden.com
Repeating a message

1) Press `play/stop` to review your messages. The number of stored messages is announced.
2) To repeat the current message, press the `<<` soft key after a few seconds of beginning the message. To quickly scroll backwards through a message, press and hold the `<<` soft key. To repeat the previous message, press the `<<` soft key within a few seconds (about four seconds during remote operation) after a message begins playing. If you have several messages, press the `<<` soft key repeatedly until you return to the message you want to replay. If the current message is the first new message, the system plays back from the beginning of the current message (it does not go back into the old message group).
3) Press `play/stop` at any time to stop reviewing messages and return to standby. The message counter shows the number of messages stored in memory.

Skipping a message

1) Press `play/stop` to review your messages. The number of stored messages is announced.
2) Press the `>>` soft key at anytime to skip to the next message. Each time the `>>` soft key is pressed, the system scans forward one message. If you have several messages, press the `>>` soft key repeatedly to find the message you want to play. To quickly scroll through a message, press and hold the `>>` soft key. The system advances through the playback at double speed.
3) Press `play/stop` at anytime to stop reviewing your messages and return to standby. The message counter shows the number of messages stored in memory.
Deleting a message

To maintain maximum record time, delete the old messages. When you press \textit{\textbf{\textcopyright delete message}}, you are permanently deleting the message. Once deleted, the message cannot be replayed or retrieved.

1) Press \textit{\textbf{\textcopyright play/stop}} to review your messages.
2) Press the \textit{\textbf{DELETETE}} soft key or \textit{\textbf{\textcopyright delete message}} at anytime during the message to delete the message. You hear a confirmation tone and the message is deleted.
3) To delete all messages, press \textit{\textbf{\textcopyright delete message}} when the phone is in standby mode. After the announcement "To delete all messages, press delete again," press \textit{\textbf{\textcopyright delete message}} again.

When you try to delete all messages without first listening to your new messages, you hear several short beeps followed by an announcement "Please playback all messages." This protects you from accidentally erasing messages you have not yet reviewed.

Voice memo

The voice memo function allows the user to record messages (more than two seconds and less than four minutes).

1) In stand by mode, press the \textit{\textbf{RECORD}} soft key on the base.
2) Press the \textit{\textbf{START}} soft key. You will hear the announcement "Record Memo Message" and a confirmation tone.
3) Start your recording.
4) When you have finished, press the \textit{\textbf{STOP}} soft key to stop recording. The system returns to standby.
Recording a conversation
You can record a conversation from the handset or the base (more than two seconds and less than ten minutes).
1) During a conversation, press the MENU soft key.
2) Press volume up/down to select Call Record, and then press the OK soft key.
   Recording a Call appears on the display.
   A confirmation tone that can be heard by both parties sounds during recording.
3) To stop recording:
   From the Handset - press the MENU soft key and cid/vol/ or redial/p/vol/ to select Call Record. You will hear a confirmation tone.
   From the Base - press play/stop. Or press the MENU soft key and Δ/vol/ or Δ/vol/ to select Call Record. You will hear a confirmation tone.

Screening a call

From the base
To screen an incoming call, use the following steps:
1) After the answering system answers, the base speaker will let you hear the calls as the machine records the message. To adjust the volume, press Δ/vol/ or Δ/vol/. If you set the answering system to off, you cannot screen a call.
2) To answer the call, pick up the corded handset or press * speaker on the base.

To mute the Call Screen, press the MUTE soft key or play/stop. To cancel muting, press the SCREEN soft key.

From the handset
Press the SCREEN soft key when the system is answering. To mute the Call Screen, press the MUTE soft key. To answer the call, press talk/flash, speaker or any number key, *tone/<, or #/> (when AutoTalk is set to on). The answering system will disconnect automatically.

Remote Operation
You can check, play, or delete messages, even record a new greeting message from a remote location (when you are away from home, or from another room using a handset). Additionally, you can turn on or off your answering system remotely.

Remote access with the handset
You can operate your answering system from another room using a handset.

1) When the phone is in standby mode, press the MENU key on the handset. Remote AnsweringMachine operation appears on the handset display. The answering system announces the current time and the number of messages stored in the memory.

2) You hear the announcement, "To play incoming messages, press two. For help, press zero," followed by a beep.
3) Enter a command within 30 seconds. Select a command from the following chart:

<table>
<thead>
<tr>
<th>Remote Key Function</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>&lt;&lt;/1</td>
<td>Repeat a Message*</td>
</tr>
<tr>
<td>&gt;/2</td>
<td>Play incoming Messages**</td>
</tr>
<tr>

</tr>
<tr>
<td>8</td>
<td>Greeting Message Record/Stop***</td>
</tr>
<tr>
<td>9</td>
<td>Answering System Off</td>
</tr>
<tr>
<td>0</td>
<td>Help</td>
</tr>
</tbody>
</table>

* If you press end before the answering system answers, the phone will return to standby.
* When the answering system does not answer within 6 seconds, you hear a beep and the phone will return to standby.
* When you receive a call, the remote operation is canceled.
* You can change the handset volume during a remote operation.
* During the remote operation Remote AnsweringMachine operation appears on the base.
* If you have new messages and old messages, after you have reviewed your new messages, you can play your old messages by pressing 2 again.
* To switch to normal conversation, press speaker on the handset.

3) Enter a command within 30 seconds. Select a command from the following chart:

Remote Key Function

<table>
<thead>
<tr>
<th>Remote Key Function</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>&lt;&lt;/1</td>
<td>Repeat a Message*</td>

</tr>
<tr>
<td>9</td>
<td>Answering System Off</td>
</tr>
<tr>
<td>0</td>
<td>Help</td>
</tr>
</tbody>
</table>

* For the Repeat a Message function, press 1 within about four seconds to repeat the previous message, or press 1 after about four seconds to repeat the current message.
** Messages will be played in the order in which they were received. The time and day that each message was received is announced after the message is played.
*** For the Memo Record and Greeting Message Record function, the first time you enter the corresponding command, it starts the Recording function. If you want to stop the recording, enter the command again.
4) After the command has finished, you will hear intermittent beeps indicating that
the system is waiting for a command. You may enter another command at this
time from the chart above.
5) When you are finished, press end to exit the system.

Remote access away from home
You can operate your answering system from a remote location using any touch-
tone telephone.
1) Call your telephone number and wait for the system to answer. If the answering
system is off, it will answer after about ten rings and sound a series of beeps.
2) During the greeting message (or a series of beeps when the answering system is
off), press 0 and enter your PIN code within two seconds (see “Setting a PIN
Code” on page 54).
3) The answering system announces the current time and the number of messages
stored in memory. You hear “To play incoming messages, press zero-two. For
help, press one-zero.” You will hear a beep.
4) Enter a command within 15 seconds, each command there after must be entered
within two seconds. You may select a command from the following chart:
**The Integrated Answering Device**

For your convenience a remote operation card is provided for you to use while away from home (refer to page 86).

<table>

</tbody>
</table>

* For the Repeat a Message function, press 0 then 1 within about four seconds to repeat the previous message, or press 0 then 1 after about four seconds to repeat the current message.

** For Memo Record and Greeting Message Record functions, the first time you enter the corresponding command, the phone starts recording. If you want to stop the recording, enter the command again.

5) After the command has finished, you hear intermittent beeps indicating that the system is in the command waiting mode. You may enter another command at this time from the chart above.

6) When you are finished, hang up to exit the system. The answering system automatically returns to standby.
Multi-Handset Features

The features in this section require a minimum of two handsets to operate. To add additional handsets to your system, see “Expanding Your Phone” on page 12.

Using DirectLink Mode

In DirectLink Mode, a pair of handsets can function as two-way radios. You can have up to five pairs of handsets in DirectLink Mode at a time. DirectLink Mode does not interfere with the main base’s ability to make or receive telephone calls. Use them at sporting events or while shopping to stay in contact with family members or friends. You must set both handsets to DirectLink Mode to activate this feature.

To use this feature, you must enter the handsets into DirectLink mode first.

1) Press the MENU soft key and select DirectLink Mode menu. To enter DirectLink mode press [ENTER] appears.
2) Press the ENTER soft key to enter DirectLink mode. You will hear a confirmation tone, and DirectLink Mode Complete appears.
3) To return back to the normal mode, press the CANCEL soft key and then press the OK soft key, or return the handset to the cradle.
**DirectLink call**

1) When the phone is in DirectLink standby mode, press the DirectLink soft key (example of DirectLink from handset #1).

2) Select the handset to which you wish to DirectLink with by pressing the number keys (0-9). Your handset will then page the other handset.

3) On the receiving handset, press talk/flash or the ANSWER soft key, or if Any Key Answer is on, press any number key, */tone/*, or */#. 

4) When you finish your conversation, press end or the END soft key on either handset. To cancel DirectLink mode (and return to normal standby mode), return the handset to the cradle, or press the CANCEL soft key and then press the OK soft key.
Intercom

The intercom feature lets you communicate with another handset or the base without using the phone line.

**Making an Intercom Page**

**From a handset**
1) With the phone in standby mode, press *intcom/hold*.
2) Use *cid/vol/* or *redial/p/vol/* to select the base or the handset you want to talk with, and then press the OK soft key. If you select All, all other handsets and the base will be paged. An intercom tone sounds. To cancel intercom, press the CANCEL soft key.

**From the base**
1) With the phone in standby mode, press *intcom/hold* on the base.
2) Use */vol/* or */vol/* to select the handset you want to talk with, and then press the OK soft key. If you select All, all other handsets will be paged. An intercom tone sounds.
   To cancel intercom, press *intcom/hold* or the CANCEL soft key.

**Answering an Intercom Page**

When the intercom page tone sounds, the display will show the ID of the handset or base that is paging.
MULTI-HANDSET FEATURES

From a handset
1) Pick up the handset from the cradle. (If AutoTalk is enabled, the handset will automatically answer when you pick it up.)
2) Press talk/flash, intercom/hold, or the ANSWER soft key.

From the base
Pick up the corded base handset. To answer with the base speakerphone, press intercom/hold, speaker, or the ANSWER soft key.

To hang up an intercom page from:
-- Handset: press the END soft key or return the handset to the cradle.
-- Base: press the END soft key or return the corded handset to the base.

Call Transfer Feature
The call transfer feature allows you to transfer a call between the base and a handset or between two handsets.

From a handset
1) During a call, press intercom/hold on the handset. The Call will be put on hold.
2) Use press cid/vol/ or redial/p/vol/ to select the base or the handset you want to transfer the call to, and then press the OK soft key. If you select All, all other handsets and the base will be paged.
   The call will automatically be placed on hold, and paging tone sounds.
   To cancel the transfer, press talk/flash, the CANCEL soft key or speaker on the initiating handset.
From the base
1) During a call, press **intercom/hold** on the base. The Call will be put on hold.
2) Use ▲/vol/▼ or ▲/vol/✓ to select the handset you want to transfer the call to, and then press the **OK** soft key. If you select ▲/vol/▼, all handsets will be paged. A paging tone sounds. To cancel the transfer, press **intercom/hold, speaker** or the **CANCEL** soft key on the base.

Answering a Call Transfer Page
When the page tone sounds, the display will show the ID of the handset or base that is transferring the call.

To answer a page from a handset
1) Pick up the handset from the cradle. (If AutoTalk is enabled, the handset will automatically answers when you pick it up. Or If Any Key Answer is enabled, pressing a number key, *tone/#, or */tone/> will answer the page.)
2) Press **talk/flash, intcom/hold**, or the **ANSWER** soft key.

To answer a page from the base
Pick up the corded base handset. To answer with the base speakerphone, press **intercom/hold, speaker**, or the **ANSWER** soft key.

Accepting the call transfer
After answering the page, if you want to accept the call and speak to the outside caller, press **talk/flash** on the receiving handset or **speaker** on the base.
Room/Baby Monitor

This feature allows you to monitor sounds in another room. Place the base or a handset in the room you wish to monitor; it will function as a microphone. A second handset can be set to function as a remote speaker, allowing you to monitor sounds in the room.

Using Room/Baby Monitor

1) Press the MENU soft key and select Room Monitor menu.
2) Select the handset or base you want to monitor by using volume up/down.
3) Press the OK soft key.
   You hear sounds in the room where the handset or the base is installed.
4) To turn off the Room Monitor, press the END soft key, or end.

   If you want to prevent other handsets or the base from monitoring this handset, press the MENU soft key. Select the Handset Setup menu, and then the Room Monitor submenu. Select Off and press the OK soft key.

note

• This feature only works when the handset(s) is within the range of the base.
• If the party is out of range, Unavailable appears in the display, and the operation will be canceled.

This feature only works when the handset(s) is within the range of the base.

If the party is out of range, Unavailable appears in the display, and the operation will be canceled.
Note on Power Sources

**Power Failure**
During the period that the power is off, you can make or receive calls with the base. You can not use the base speaker phone and the cordless handset.

**Battery replacement and handling**
When the operating time becomes short, even after a battery is recharged, please replace the battery. With normal usage, your battery should last about one year. Please contact your place of purchase or the Uniden Parts Department for a replacement battery.

**Warning**
To avoid the risk of personal injury or property damage from fire or electrical shock, only use the Uniden battery model and Uniden adapter model specifically designated for this product.

---

**Caution**
- Use only the specified Uniden battery pack (BT-446).
- Do not remove the batteries from the handset to charge them.
- Never throw the battery into a fire, disassemble them, or heat them.
- Do not remove or damage the battery casing.
Low battery alert
When the battery pack is very low, the phone is programmed to eliminate functions in order to save power.

The battery pack needs to be charged when:
- The empty battery icon appears.
- Low Battery appears in the display.
If the phone is in standby mode, none of keys will operate. If you are on a call, complete your conversation as quickly as possible, and return the handset to the cradle.

Cleaning the battery charging contacts
To maintain a good charge, clean the charging contacts on the handset once a month. Dampen a cloth with plain water. Gently rub the damp cloth over the charging contacts until all visible dirt is removed. Dry the contacts thoroughly before returning the handset to the base.

Caution: Do not use paint thinner, benzene, alcohol, or other chemical products. Doing so may discolor the surface of the telephone and damage the finish.
General Information

The phone complies with FCC Parts 15 and 68. Operating temperature:
0 °C to +50 °C (+32 °F to +122 °F)

AC Adapter Information
AC Adapter part number: AD-800 for the base AD-0005 for the charger
Input Voltage: 120 AC 60Hz 120V AC 60Hz
Output Voltage: 9V DC 350mA 9V DC 210mA

Battery Information
Battery part number: BT-446
Capacity: 800mAh, 3.6V

To avoid damage to the phone use only Uniden AD-800 and BT-446, and AD-0005 with your phone.
*If the handset is left off of the base, the actual Talk mode duration will be reduced respective to the amount of time the handset is off the base.

Recharge your phone on a regular basis by returning the handset to the base after each phone call. When the operating time becomes short even after the battery is recharged, please replace the battery. With normal usage, the battery should last about one year.

A replacement Uniden adapter or battery may be purchased by contacting the Uniden Parts Department (see back page).

Specifications, features, and availability of optional accessories are all subject to change without prior notice.
Troubleshooting

If your phone is not performing to your expectations, please try these simple steps first.

Precautions!

Before you read anything else, please observe the following:

Warning:

Uniden America Corporation DOES NOT represent this unit to be waterproof. To reduce the risk of fire, electrical shock, or damage to the unit, DO NOT expose this unit to rain or moisture.

Radio Interference

Radio interference may occasionally cause buzzing and humming in your cordless handset, or clicking noises in the base. This interference is caused by external sources such as TV, refrigerator, vacuum cleaner, fluorescent lighting, or electrical storms. Your unit is NOT DEFECTIVE. If this occurs, move the telephone farther away from the source that is causing the interference.

Important Safety Instructions

When using your telephone equipment, basic safety precautions should always be followed to reduce the risk of fire, electrical shock, or injury to persons, including the following:

1. Do not use this product near water, for example, near a bath tub, wash bowl, kitchen sink or laundry tub, in a wet basement or near a swimming pool.
2. Avoid using a telephone (other than a cordless type) during an electrical storm. There may be a remote risk of electric shock from lightning.
3. Do not use the telephone to report a gas leak in the vicinity of the leak.
4. Use only the power cord and batteries indicated in this manual. Do not dispose of batteries in a fire. They may explode. Check with local codes for possible battery disposal instructions.
5. Do not disassemble any component of this product.

SAVE THESE INSTRUCTIONS

The FCC Wants You To Know

This equipment complies with Part 68 of the FCC rules and the requirements adopted by the ACTA. On the bottom of this equipment is a label that contains, among other information, a product identifier in the format US:AAAEQ##TXXXX. If requested, this number must be provided to the telephone company.

Precautions & Warranty

Connection to party line service is subject to state tariffs. Contact the state public utility commission, public service commission or corporation commission for information. This equipment is hearing aid compatible.

SAVE THESE INSTRUCTIONS

The REN is used to determine the number of devices that may be connected to a compatible modular jack that is also compliant. See installation instructions for details.

Preparing the AC Adapter

This equipment complies with Part 68 of the FCC rules and the requirements adopted by the ACTA. The AC adapter used to power this equipment is a universal power supply that is rated to operate within the range of 100-240 volts AC, 50-60 Hz. It is recommended that the AC adapter be used within the range of 120-240 volts AC, 50-60 Hz. When used within this range, the AC adapter will provide a more consistent power output that will ensure optimal performance.

SAVE THESE INSTRUCTIONS

The Uniden accessories supplied or designed for this product. Use of other accessories may not ensure compliance with FCC RF exposure guidelines and should be avoided.

Warranty!

The Uniden accessories supplied or designed for this product. Use of other accessories may not ensure compliance with FCC RF exposure guidelines and should be avoided.
Cordless Telephone Privacy

Cordless telephones are radio devices. Communications between the handset and base of your cordless telephone are accomplished by means of radio waves which are broadcast over the open airways. Because of the inherent physical properties of radio waves, your communications can be received by radio receiving devices other than your own cordless telephone unit. Consequently, any communications using your cordless telephone may not be private.

One Year Limited Warranty

Important: Evidence of original purchase is required for warranty service.

WARRANTOR: UNIDEN AMERICA CORPORATION (“Uniden”) ELEMENTS OF WARRANTY: Uniden warrants, for one year, to the original retail owner, this Uniden Product to be free from defects in materials and craftsmanship with only the limitations or exclusions set out below.

WARRANTY DURATION: This warranty to the original user shall terminate and be of no further effect 12 months after the date of original retail sale. The warranty is invalid if the Product is (A) damaged or not maintained as reasonable or necessary, (B) modified, altered, or used as part of any conversion kits, subassemblies, or any configurations not sold by Uniden, (C) improperly installed, (D) serviced or repaired by someone other than an authorized Uniden service center for a defect or malfunction not covered by this warranty, (E) used in any conjunction with equipment or parts or as part of any system not manufactured by Uniden, or (F) installed or programmed by anyone other than as detailed in the owner’s manual for this product.

STATEMENT OF REMEDY: In the event that the product does not conform to this warranty at any time while this warranty is in effect, warrantor will either, at its option, repair or replace the defective unit and return it to you without charge for parts, service, or any other cost (except shipping and handling) incurred by warrantor or its representatives in connection with the performance of this warranty. Warrantor, at its option, may replace the unit with a new or refurbished unit. THE LIMITED WARRANTY SET FORTH ABOVE IS THE SOLE AND ENTIRE WARRANTY PERTAINING TO THE PRODUCT AND IS IN LIEU OF AND EXCLUDES ALL OTHER WARRANTIES OF ANY NATURE WHATSOEVER, WHETHER EXPRESS, IMPLIED OR ARISING BY OPERATION OF LAW, INCLUDING, BUT NOT LIMITED TO ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. THIS WARRANTY DOES NOT COVER OR PROVIDE FOR THE REIMBURSEMENT OR PAYMENT OF INCIDENTAL OR CONSEQUENTIAL DAMAGES. Some states do not allow this exclusion or limitation of incidental or consequential damages so the above limitation or exclusion may not apply to you.
I.C. Notice

TERMINAL EQUIPMENT

NOTICE: This equipment meets the applicable Industry Canada Terminal Equipment Technical Specifications. This is confirmed by the registration number. The abbreviation, IC, before the registration number signifies that registration was performed based on a Declaration of Conformity indicating that Industry Canada technical specifications were met. It does not imply that Industry Canada approved the equipment.

NOTICE: The Ringer Equivalence Number (REN) for this terminal equipment is marked on the equipment itself. The REN assigned to each terminal equipment provides an indication of the maximum number of terminals allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the Ringer Equivalence Numbers of all the devices does not exceed five.

RADIO EQUIPMENT

The term "IC:" before the radio certification number only signifies that Industry Canada technical specifications were met.

Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device. "Privacy of communications may not be ensured when using this telephone".

Remote Operation Card

### Remote Operation Card

**Remote access away from home**
1. Call your phone number from a touch-tone phone.
2. During the outgoing message, press 0 and enter your PIN code. The answering system announces the number of messages stored in memory and the voice prompts.
3. To quit, hang up the phone.

**Turn on the answering system remotely**
1. Call your phone number and let it ring 10 times until you hear a beep.
2. Press 0 and then enter your PIN code.
3. Press 0 then 5 to stop the announcement.
4. Press 0 then 6 to turn the answering system on.

**Remote access away from home**
