At Uniden, we’ll take care of you! ............................ 58
Welcome
Thank you for purchasing a Uniden Multi-Handset phone.

Note: Illustrations in this manual are used for explanation purposes. Some illustrations in this manual may differ from the actual unit.

Uniden is a registered trademark of Uniden America Corporation. AutoStandby, DirectLink, IntegriSound and Random Code are trademarks of Uniden America.

Accessibility
Uniden provides a customer service hotline for accessibility questions. If you have a disability and need customer service assistance or if you have any questions about how Uniden’s products can accommodate persons with disabilities, please call the accessibility voice/TTY line: 1-800-874-9314

Our customer care hours as well as accessibility information can be found on our website, www.uniden.com, under the “Accessibility” link. If your call is received outside of our business hours, you can leave us a message and we will call you back.
## Terminology Used in this Manual

<table>
<thead>
<tr>
<th>Term</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Standby</td>
<td>The handset is not in use. If the handset is on the cradle or [flash] or [Mute] on the handset is not pressed, no line has been activated. No dial tone is present.</td>
</tr>
<tr>
<td>CID</td>
<td>Caller ID is available from your Telephone provider and is offered to users on a subscription basis. With this service and a display on your cordless phone, you will be able to see the incoming caller information such as name and phone number.</td>
</tr>
<tr>
<td>CID/CW or CIDCW</td>
<td>Caller ID with Call Waiting is available by subscription from your Telephone provider. With this service, you will be able to view incoming caller information while on a call with another user. This will allow you the ability to select to talk to this user and put your existing party on hold or make the decision to ring them back.</td>
</tr>
<tr>
<td>Base</td>
<td>The main part of the phone that connects to your phone line and lets you make and receive calls.</td>
</tr>
<tr>
<td>Charger</td>
<td>A cradle that comes with an accessory handset and charges the handset battery. It connects to power but does not connect to a phone line.</td>
</tr>
<tr>
<td>Accessory Handsets</td>
<td>This phone system is expandable and will support a total of ten (10) handsets to one base. The TCX930 accessory handset is compatible with this model.</td>
</tr>
<tr>
<td>Global settings</td>
<td>Global Settings apply to all registered handsets. If you change something under the global menu, you change it for all handsets. Only one handset can change global settings at a time, and you have to make sure the phone is not currently being used.</td>
</tr>
<tr>
<td>Talk</td>
<td>A telephone line has been activated on the handset or base, enabling a dial tone.</td>
</tr>
</tbody>
</table>

## Manual Conventions

This manual uses several different type styles to help you distinguish between different parts of the phone:

- **lower case bold** text with “[ ]” indicates a key or button on the phone
- ALL CAPITALS indicates text on the display, such as menu options, prompts, and confirmation messages
- **lower case bold** text indicates a status light on the phone base
Product Overview

Features:

• 5.8GHz FHSS Expandable System
• Expands up to 10 Handsets
• Caller ID/Call Waiting
• Store 30 Caller ID Numbers

Advanced Phonebook Features:

• Store 70 Phonebook Entries
• Alphabetical Search
• Personalized Ring by Party
• Transfer Single Listing or Entire Phonebook

• Speakerphone on Handset
• 7 Ringer Options on Handset (3 Tones/4 Melodies)
• Last 5 Number Redial
• Bilingual Menu Displays
  (for USA models: English and Spanish,
  for Canadian models: English and French)
• Call Transfer
• Conferencing
• Intercom
Parts of the Phone
The following illustrations show you all of the different parts of your phone.

Handset

1. Headset Jack Cover
2. Beltclip Hole
3. Speakerphone Speaker and Ringer
4. Handset Battery Compartment
5. New Message LED
6. Handset Earpiece
7. LCD Display
8. [menu/clear] key
9. [▲] key (up)
10. [[/flash]] key (talk/flash)
11. [匠] key (phonebook/left)
12. [*/tone] key
13. [hold/int’com/xfer] key
14. [redial/pause] key
15. [select/_erase] key (select/messages)
16. [ID] key (caller ID/right)
17. [■] key (end call)
18. [▼] key (down)
19. [#] key
20. [] key (speaker)
21. Handset Microphone
22. Handset Charging Contacts
23. Base charging contacts
24. in use LED
25. [find hs] key (find handset)
26. charge LED

27. TEL LINE Jack
28. DC IN 9V Jack
Using the Interface

Reading the Display
The handset display uses icons to tell you the status of your phone. The table below lists the icons and what they mean.

<table>
<thead>
<tr>
<th>Icon</th>
<th>Status</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Battery" /></td>
<td>Standby/Talk</td>
<td>The <strong>battery</strong> icon indicates the handset battery status: full, medium, low, and empty.</td>
</tr>
<tr>
<td><img src="image" alt="Off" /></td>
<td>Standby</td>
<td>The <strong>ringer off</strong> icon indicates that the ringer is turned off.</td>
</tr>
<tr>
<td><img src="image" alt="Mute" /></td>
<td>Talk</td>
<td>The <strong>mute</strong> icon appears while the handset microphone is muted.</td>
</tr>
<tr>
<td><img src="image" alt="Boost" /></td>
<td>Talk</td>
<td>The <strong>boost</strong> icon appears when the Clarity Boost feature is activated.</td>
</tr>
<tr>
<td><img src="image" alt="Speaker" /></td>
<td>Talk</td>
<td>The <strong>speaker</strong> icon appears when the handset speaker phone is in use.</td>
</tr>
<tr>
<td><img src="image" alt="Privacy" /></td>
<td>Talk</td>
<td>The <strong>privacy</strong> icon appears when the Privacy Mode is turned on.</td>
</tr>
</tbody>
</table>
The Standby Screen
When the phone is in standby, the handset display shows the following items:

- Handset #1
- New CID: 5
- Ringer off icon (when the ringer is off) / battery icon
- Handset ID
- Number of new Caller ID calls received

Using the Four-way Function Key
Your handset has a four-way function key that allows you to move the cursor or pointer on the display and access the most commonly used features at the touch of a button. By moving this key to the left, you open the phonebook. Move the key to the right to access Caller ID information. To use this four-way key, place your thumb over the key on the handset and move to the four positions to get the feel of how it moves and operates.

Using the Handset Menus
To open the menu, press [menu/clear]. Select the option you want by pressing the four-way function key. This will move the cursor; the option currently selected has a triangle beside it. Activate the selected option by pressing [select/•]. To exit the menu and return to standby, press [Exit].

If you do not press a key within 30 seconds, the phone will time out and exit the menu.
Entering Text from Your Handset

You can use the number keypad on your handset to enter text by referring to the letters printed on each number key. When you press the number key in a text entry field, the phone displays the first letter printed on the number key. Press the number key twice to display the second letter and three times to display the third. Capital letters are displayed first, then lower case letters, then the number on the key.

If two letters in a row use the same number key, enter the first letter, then use [right] or [left] on the four-way function key to move the cursor to the next position to enter the second letter. For example, to enter the word “Movies”:

1) Press [6] once to enter M.
2) Use [right] on the four-way function key to move the cursor to the right.
4) Press [8] six times to enter v.
6) Press [3] five times to enter e.
7) Press [7] eight times to enter s.
8) Press [select/☐] to end your text entry.

<table>
<thead>
<tr>
<th>Number of times key is pressed</th>
</tr>
</thead>
<tbody>
<tr>
<td>keys</td>
</tr>
<tr>
<td>1</td>
</tr>
<tr>
<td>2 abc</td>
</tr>
<tr>
<td>3 def</td>
</tr>
<tr>
<td>4 ghi</td>
</tr>
<tr>
<td>5 jkl</td>
</tr>
<tr>
<td>6 mno</td>
</tr>
<tr>
<td>7 pqrks</td>
</tr>
<tr>
<td>8 tuv</td>
</tr>
<tr>
<td>9 wxyz</td>
</tr>
</tbody>
</table>

If you make a mistake while entering a name, use [right] or [left] on the four-way function key to move the cursor to the incorrect character. Press [menu/clear] to erase the wrong character, and then enter the correct character. To delete all characters, press and hold [menu/clear].
Installing the Phone

Choosing the Best Location
When choosing a location for your new phone, here are some important guidelines you should consider:

• The location should be close to both a phone jack and a continuous power outlet (one which is not connected to a switch).
• The base and handset should be kept away from sources of electrical noise such as motors, microwave ovens, and fluorescent lighting.
• For better reception, place the base as high as possible.
• The base should be placed in an open area for optimum range and reception.
• If your home has wired alarm equipment connected to a phone line, be sure that installing the system does not disable your alarm equipment. If you have questions about what will disable alarm equipment, contact your telephone company or a qualified installer.

Note: For maximum range:

• Keep the antenna free of obstruction.
• When the handset is not in use, place the handset in an upright position.
• Do not hold the handset where you would block the signal.
• Metal and reinforced concrete may affect cordless telephone performance.
Wall Mounting the Base

This phone can be mounted on any standard wall plate.

1) Snap the wall mount adapter into the notches on the base top.
2) Plug the AC adapter into the DC IN 9V jack.
3) Wrap the AC adapter cord inside the molded wiring channel as shown.
4) Plug the AC adapter into a standard 120V AC wall outlet.
5) Plug the telephone cord into the TEL LINE jack.
6) Plug the telephone cord into the telephone outlet.
7) Align the mounting slots on the base with the mounting posts on the wall. Then push in and down until the phone is firmly seated.

Note: DO NOT use an AC outlet controlled by a wall switch.
Direct Wall Mounting

If you don’t have a standard wall plate, you can mount your phone directly to the wall. Before doing this, consider the following:

- Avoid electrical cables, pipes, or other items behind the mounting location that could cause a hazard when inserting screws into the wall.
- Try to mount your phone within 5-feet of a working phone jack to avoid excessive wire lengths.
- Make sure the wall material is capable of supporting the weight of the base and handset.
- Use #10 screws with a minimum length of 1-3/8 inches, with anchoring devices suitable for the wall material where the base unit will be placed.

1) Insert two mounting screws into the wall, using the appropriate anchoring device, 3-15/16 inches apart. Allow about 1/8 inch between the wall and screw heads for mounting the phone.

2) Refer to the steps on page 13 to complete the mounting process.
Installing the Battery
Use only the Uniden BT-1004 or BT-909 rechargeable battery pack supplied with your cordless telephone.
Follow the steps below to install the handset battery.

1) Press in on the handset battery case cover (use the finger indention for a better grip) and slide the cover downward to remove.
2) Plug the battery cable into the battery jack. Be sure to match the red and black wires to the label near the jack. The cable should snap into place. Gently pull on the battery cable. If the battery connector comes lose, try connecting again until the battery snaps into place.
3) Place the battery case cover back on the handset and slide it upwards until it clicks into place.
Connecting the Base and Charging the Handset

1) Connect the AC adapter to the DC IN 9V jack.

   CAUTION: To avoid risk of fire and shock, only use the Uniden AD-800 AC adapter.

2) Connect the AC adapter to a standard 120V AC wall outlet.
   DO NOT use an AC outlet controlled by a wall switch.

3) Place the handset in the base with the LCD screen facing forward.

4) Make sure that the charge LED illuminates. If the LED does not illuminate, check to see that the AC adapter is plugged in and the handset makes good contact with the charging contacts.

5) Charge your handset at least 15 to 20 hours before plugging into the phone line.

Installing the Belt Clip

Line up the holes on each side of the handset. To attach the belt clip, insert into the holes on each side of the handset. Press down until it clicks.

To remove the belt clip, pull either side of the belt clip to release the tabs from the holes.
Connecting to the Phone Line

Once the battery pack is fully charged, connect the telephone cord to the TEL LINE jack and to a telephone jack.

Testing the Connection

Try making a call. If your call does not connect or you cannot get a dial tone, try the following steps:

1) Make sure the AC adapter cord is securely connected to the DC IN 9V jack and a standard power outlet.

2) Check to make sure the battery is fully charged. (If you don’t see the “battery full” icon, check to make sure the battery is properly connected).

3) Change the dial mode (instructions on page 18).
Changing the Dial Mode
Your phone can communicate with the telephone network in two different ways: tone dialing or pulse dialing. These days, most phone networks use a method called tone dialing, so your phone comes programmed for tone dialing. If your phone company uses pulse dialing, you will need to change your phone’s dial mode. If you don’t get a dial tone or can’t connect to the telephone network, please follow the steps below to modify your phone’s settings:

1) Press [menu/clear]. Select the GLOBAL SETUP menu, and then the DIAL MODE submenu.
2) Scroll [▼] to select PULSE.
3) Press [select/确定]. You will hear a confirmation tone.

If you ever need to change the dial mode back to tone dialing, follow the same procedure, but select TONE in step 2.
Basic Setup

Selecting a Language
Your phone supports two languages: English and Spanish for USA models or English and French for Canadian models. Once you select a language, the menus on the phone will display in that language. The default language is English.

1) Press [menu/clear]. Select the HANDSET SETUP menu, and then the HANDSET LANGUAGE submenu.
2) Move the cursor to choose a language.
   - for USA models: Choose ENGLISH or ESPAÑOL (Spanish).
   - for Canadian models: Choose ENGLISH or FRANÇAIS (French).
3) Press [select/☑]. You will hear a confirmation tone.

Activating Personal Ring
You can assign special ringer tones to anyone in your phonebook. When your phone gets a call, it looks up the Caller ID information in your phonebook. If you’ve assigned a personal ringer to that number, the phone uses it so you know who is calling. To turn on personal ringing, follow these steps:

1) Press [menu/clear]. Select the HANDSET SETUP menu, and then the PERSONAL RING submenu.
2) Move the cursor to select ON or OFF.
3) Press [select/☑]. You will hear a confirmation tone.
Activating the Key Touch Tone

Key Touch Tone is the tone your keypad makes when keys are pressed. You can turn this tone on or off.

1) Press [menu/clear]. Select the HANDSET SETUP menu, and then the KEY TOUCH TONE submenu.
2) Move the cursor to select ON or OFF.
3) Press [select/✔]. You will hear a confirmation tone.
Setting up Voice Mail
If you subscribe to a voice mail service, you can use your phone to access your voice mailbox. The new message LED flashes whenever you have messages waiting in your voice mailbox. If you have programmed your access number into your phone, you can simply press [select/ curly] to access your voice mail. When you subscribe to the service, your voice mail provider provides you with the access number and the required voice mail signaling tone.

Setting the Voice Mail Signaling Tone
Your telephone service provider should provide you with the specifics of your voice mail service upon your enrollment.

If you are having trouble with your message waiting indicator on your phone not illuminating when you have waiting messages, you will need to contact your service provider and inquire as to which type of message notification signal-either Frequency Shift Keying (FSK) or Stutter Dial Tone (SDT)--their service uses.

If your voice mail service uses an FSK message signal to alert you of a new voice mail message, you must turn off the Voice Mail Tone. If your voice mail service uses an SDT message signal to alert you of new voice mail messages, you can leave the Voice Mail Tone on.

Follow the instructions below to set up your cordless phone settings:

1) Press [menu/clear]. Select the GLOBAL SETUP menu, then the VOICE MAIL TONE submenu.
2) Move the cursor to set the voice message indication (SDT message signal) to ON or OFF.
Programming One-Touch Voice Mail Access

You can program your voice mail access number to the Voice Mail key on each handset so you can get your messages at the touch of a button. Your voice mail service provider will supply you with the access number. This number may be simply a phone number.

To edit the voice mail number, follow the steps below:

1) Press [menu/clear].
2) Move the cursor to HANDSET SETUP menu and press [select/✔].
3) Move the cursor to EDIT VOICE MAIL and press [select/✔].
4) Enter your personal access number (up to 20 digits).
5) If you need to have the phone wait before sending the next digits, press [redial/pause] to insert a two-second pause in the dialing sequence. For a longer pause, press [redial/pause] multiple times. A ℝ appears in the display each time you press [redial/pause] and each pause counts as one digit.
6) Press [select/✔] when you are finished.

Resetting the Voice Message Waiting Indicator

When you receive a new voice mail message, the LED on the top of the handset flashes. In the event your message alert tone gets out of sync with your phone company’s voice messaging system, you can reset back to its original “no messages waiting” state. To reset, press and hold [find hs] on the base for 5 seconds. A beep sounds and the message alert tone is reset.
Adding Accessory Handsets

Your phone supports up to ten (10) handsets, including any handsets supplied with your phone. Accessory handsets do not need to be connected to a phone jack. You can now place a fully-featured cordless handset anywhere AC power is available to connect the handset charger. All the handsets ring when a call is received.

Compatible Handsets

Your phone is compatible with the **TCX930**. If you purchase an accessory handset, you must register the handset to the base before use. Accessory handsets will not operate until they are registered.

Charging Accessory Handsets

The handset is powered by a rechargeable battery pack. The battery recharges automatically when the handset is placed in the charger.

1) Connect the AC adapter to the DC IN 9V jack and to a 120V AC outlet that is not controlled by a wall switch.

   Caution: Use only the Uniden AD-0005 adapter.

2) Set the charger on a desk or tabletop, and place the handset in the charger with the keypad facing forward.

3) Make sure that the charge LED illuminates. If the LED does not illuminate, check to see that the AC adapter is plugged in and the handset makes good contact with the charging contacts.

4) Charge the handset battery pack for at least 15-20 hours before using your new cordless telephone for the first time.
Registering TCX930 Accessory Handsets

Your phone supports a total of ten (10) cordless handsets. Handset(s) supplied in the box with the phone base are pre-registered at the factory. If you purchase an accessory handset, you need to register the handset before use. Only one handset can be registered at a time. When charged, pre-registered handsets display a handset ID number. Handsets that have not been registered display.

Handset not registered—place handset on base to register. See your Owner’s Manual for help.

1) Before registering the **TCX930** accessory handset, the battery pack MUST be charged for 15-20 hours.

2) To register the **TCX930** handset:
   - Place the handset in the telephone base charging cradle to begin registration.

3) During the registration process, HANDSET REGISTERING will appear in the LCD. When REGISTRATION COMPLETE is displayed, the handset has been registered to the base. If REGISTRATION FAILED appears, please try these steps again. A handset ID will be automatically assigned when registration is complete.

Note: If an accessory handset has ever been registered to a base, you must reset the handset before you can register it to a new base. See Resetting Handsets on page 25.
Resetting Handsets

If you want to register the handset to a different base or replace a handset with another one, you must first clear the registration information from the base and the handset.

To clear the registration information, please follow these steps:

1) Press and hold [1] and [#] for at least 5 seconds, until the SYSTEM RESET menu appears.

2) Select the DEREGISTER HS submenu. WHICH HANDSET? appears in the display.

3) Use [▲] and [▼] to select the handset which you are operating, and then press [select/☐]. DEREGISTER HS appears.

4) When the phone asks you to confirm, move the cursor to select YES, and then press [select/☐]. You will hear a confirmation tone.

Note: The handset first clears its registration information from the base and then deletes the link to the base from its own memory. The handset will now display HANDSET NOT REGISTERED-PLACE HANDSET ON BASE TO REGISTER. SEE YOUR OWNER'S MANUAL FOR HELP. If the handset cannot contact the base, it will display UNAVAILABLE. If this happens, see Resetting the Handset Without the Base on page 47. For instructions on registering the handset, see page 24.
Setting Up the Phonebook

Your handset can store up to 70 names and numbers in your phonebook. When all the phonebook entries are full, you will hear a beep and MEMORY FULL appears. You cannot store any additional names and numbers unless you delete some of the existing ones.

You can also use the phonebook entries to store a group of numbers (up to 20 digits) that you may need to enter once your call connects. This is referred to as chain dialing. See Chain Dialing from the Phonebook on page 33.

Creating Phonebook Entries

To store names and numbers in your phonebook, please follow these steps:

1) When the phone is in standby mode, press [ ].

2) To create a new phonebook entry, move the cursor to select CREATE NEW, and press [select/ ]. EDIT NAME appears.

3) **Enter the name for this entry (EDIT NAME).**

   Use the keypad to enter a name for this entry; the name can contain up to 16 characters. (See Entering Text from Your Handset on page 11 for instructions on entering text.) If you do not want to enter a name for this entry, your phone will store this entry as <NO NAME>. Press [select/ ] when you are finished.

4) **Enter the number for this entry (EDIT NUMBER).**

   Once you have stored a name, EDIT NUMBER appears next. Use the number keypad to enter the phone number; the phone number can contain up to 20 digits. If you need the phone to pause between digits when it’s dialing (for example, to enter an extension or an access code), press [redial/ pause] to insert a two-second pause. You will see a P in the display. You can also use more than one pause together if two seconds is not long enough. Each pause counts as one digit. Press [select/ ] when you are finished.
5) **Assign a personal ring tone for this entry (PERSONAL RING).**

You can attach a special ring tone to each phonebook entry; the phone will use this ring tone when this person calls. Use [▲] and [▼] to select one of the 7 different ring tone options (see Selecting a Ring Tone on page 30 for a complete list of ring tones). As you scroll through the tones, you will hear a sample of each tone. When you hear the ring tone you want to use, press [select/✔]. If you do not want to use a personal ring tone for this phonebook entry, choose NO SELECTION; the phone will use your standard ring tone setting.

6) You will hear a tone confirming that the new entry has been stored, and DONE! appears in the display.

**Finding a Phonebook Entry**

Press [ miệng] to open the phonebook, and then select DIAL/EDIT or press [わかって] again. Phonebook entries are stored in alphabetical order. To scroll through the phonebook from A to Z, press [▼]. To scroll through the phonebook from Z to A press [▲].

You can also use the letters on the number keys to jump to a name that starts with that letter. Press a number key (2 through 0) once for the first letter, twice for the second letter, and so on. The phonebook jumps to the first entry that begins with the letter you entered; you can then use [▲] and [▼] to scroll to other entries. For example, to search for an entry beginning with the letter M, press 6 once.

To close the phonebook, press [刿]. During a call, press [わかって] again instead of [刿] to close the phonebook.

**Editing an Existing Phonebook Entry**

1) With the phone in standby, press [わかって] to open the phonebook.
2) Select DIAL/EDIT or press [わかって] again.
3) Find the entry you want to edit and press [select/✔].
4) Follow the steps for Creating Phonebook Entries on page 26. If you do not wish to change the information at any step, simply press [select/✔] to go to the next step.
Storing Caller ID or Redial Numbers in the Phonebook

You can store Caller ID records or redial numbers in the phonebook so you can use them later. Go to the Caller ID or redial list and select the number you want to store. (If the Caller ID information did not include the number, then you will not be able to store it.)

1) When the phone is in standby, press [ID] to open the Caller ID list or [redial/pause] to open the redial list.
2) Use [▲] and [▼] to scroll through the Caller ID records or redial numbers. When you come to the information you want to store, press [select/•]. EDIT NAME appears.
3) If the phone number is already stored in memory, you will hear a beep, and THIS DATA IS ALREADY SAVED! appears in the display. The number will not be stored.

Continue by following the steps for Creating Phonebook Entries on page 26.

Deleting Phonebook Entries

You can delete individual phonebook entries or delete all the phonebook entries at once.

1) When the phone is in standby, press [〇].
2) To delete a single phonebook entry, move the cursor to select DIAL/EDIT, and then press [select/•] or press [〇] again.
3) Find the phonebook entry you want to delete and press [menu/clear].
4) DELETE ENTRY? appears in the display. Select YES, and then press [select/•].
5) You will hear a confirmation tone, and DELETED! appears in the display.

Deleting all the phonebook entries at once

1) When the phone is in standby, press [〇].
2) Move the cursor to select DELETE ALL, and press [select/•].
3) DELETE ALL? appears in the display. Select YES and then press [select/•]. You will hear a confirmation tone, and DELETED! appears in the display.
Copying Phonebook Entries to Another Handset

If you have more than one handset, you can transfer phonebook entries from one handset to another without having to re-enter names and numbers. You can transfer one phonebook entry at a time or all phonebook entries at once.

1) When the phone is in standby, press [ ].

2) Move the cursor to select COPY, and then press [select/ ].

3) Move the cursor to select the handset which you want to transfer the entries to and then press [select/ ].

4) Move the cursor to select ONE MEMORY or ALL MEMORY, and then press [select/ ].

5) If you select ALL MEMORY, ARE YOU SURE? appears on the display screen. Move the cursor to select YES, and then press [select/ ].

6) If you select ONE MEMORY, find the phonebook entry you want to transfer and then press [select/ ].

7) The phonebook entries will be transferred to the designated handset. During the copy process, the receiving handset shows RECEIVING and the Handset ID of the sending handset.

8) When the transfer is completed, DONE! appears on the handset.

Note: If your phonebook contains 70 entries, you cannot store any new phonebook entries. You will hear a beep, and MEMORY FULL appears on the display. If the selected handset is out of range or data transfer is cancelled, UNAVAILABLE appears in the display. Phonebook listings will not be transferred.
Customizing Your Phone

Selecting a Ring Tone (Handset only)

You may choose from 4 melodies or 3 tones for your phone’s primary ring tone. Each handset can use a different ringer tone or melody. The available ring tones are listed below:

<table>
<thead>
<tr>
<th>Melodies</th>
<th>Tones</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fur Elise (ELISE)</td>
<td>Flicker</td>
</tr>
<tr>
<td>We Wish You A Merry Christmas (MERRY-XMAS)</td>
<td>Clatter</td>
</tr>
<tr>
<td>Aura Lee (AURA LEE)</td>
<td>Wake Up</td>
</tr>
<tr>
<td>Star Spangled Banner (STAR SPNGL)</td>
<td></td>
</tr>
</tbody>
</table>

1) Press [menu/clear]. Select the HANDSET SETUP menu, and then the RINGER TONES submenu.

2) Move the cursor to select a ring tone. As each ring tone is selected, you will hear a sample of the ring tone.

3) When you hear the tone you want to use, press [select/✓]. You will hear a confirmation tone.
Activating AutoTalk (Handset only)
AutoTalk allows you to answer the phone simply by removing the handset from the cradle. You do not have to press a button to answer the call.

1) Press [menu/clear].
2) Select the HANDSET SETUP menu, and then the AUTOTALK submenu.
3) Select ON or OFF, and press [select/✓]. You will hear a confirmation tone.

Activating Any Key Answer (Handset only)
Any Key Answer allows you to answer the phone by pressing any key on the dial pad.

1) Press [menu/clear].
2) Select the HANDSET SETUP menu, and then the ANY KEY ANSWER submenu.
3) Select ON or OFF, and then press [select/✓]. You will hear a confirmation tone.

Making a Call from the Phonebook

1) When the phone is in standby, press [ ] to open the phonebook.

2) Move the cursor to select DIAL/EDIT, and then press [select/ ].

3) Find the phonebook entry you want to call (see Finding a Phonebook Entry on page 27).

4) Press [ flash] or [ ] to dial the number.

Note: You can also press [ flash] or [ ] before you open the phonebook. When you come to the phone number you want to dial, press [select/ ].

Chain Dialing from the Phonebook
You can use the phonebook entries to store a group of numbers (up to 20 digits) that you may need to enter once your call connects. Once the call has connected you will then do the following:

1) Press [ ].

2) Use [ ] or [ ] to select the phonebook entry you want to call.

3) Press [select/ ]

Switching to the Handset Speakerphone During a Call
To switch a normal call to the speakerphone, press [ ] on the handset. To switch from a speakerphone call to a normal call, press [ ].
Using Caller ID, Call Waiting, and Redial Lists

If you subscribe to Caller ID from your phone company, your phone will show you the caller’s phone number and name (if available) whenever a call comes in. If you subscribe to both Call Waiting and Caller ID, the phone also shows you the name and the number of any call that comes in while you’re on the line.

If your telephone provider supports seven-digit dialing, you can save your local area code so it does not display in the Caller ID list. See Seven-Digit Dialing on page 41 for more information.

Using the Caller ID List

You can store up to 30 Caller ID numbers in each handset. Caller ID records are stored from newest to oldest. Once your Caller ID list is full and you receive an incoming call, the oldest record will be automatically deleted to make room for the new record.

To open the Caller ID list, press [ID] (on the right side of the four-way key). The phone will show the number of new Caller ID records and the total number of stored records. Use [▲] and [▼] to scroll through the list, or enter a letter on the keypad to jump to the first Caller ID name that starts with that letter.

Making a Call from a Caller ID Record

1) When the phone is in standby, press [ID] to open the Caller ID list.
2) Use [▲] and [▼] to find the Caller ID record you want to dial.
3) To add (or delete) a “1” to the beginning of the displayed phone number, press [*/tone].
4) Press [/flash] or [ ] to dial the number.

Note: You can also press [/flash] or [ ] before you open the caller ID list. When you come to the phone number you want to dial, press [select/ ].
Deleting Caller ID Numbers

To delete only one Caller ID number, go to the Caller ID list and select the number you want to delete. Press [menu/clear]. When the phone asks you to confirm, select YES.

To delete all the Caller ID numbers, go to the Caller ID list and press [menu/clear]. Select YES when asked if you want to DELETE ALL.

Note: When you delete a Caller ID number, you delete it permanently.

Using Call Waiting

If you have Call Waiting service and a second call comes in when you are on the phone, a call waiting tone will sound. Press [/flash] to accept the waiting call. There is a short pause, and then you will hear the new caller.

To return to the original caller, press [/flash].

Note: You must subscribe through your telephone provider to receive Call Waiting services. Not all features are available in all areas.
Redialing a Number
You can quickly redial the last 5 numbers dialed on each handset.

1) With the phone in standby, press the [redial/pause] to open the redial list.
2) Use [▲] and [▼] or [redial/pause] to scroll through the redial list.
3) When you find the number you want to dial, press [(//flash] or [●●]) on the handset to dial the number.

Note: • If the number exceeds 32 digits, only the first 32 digits are retained in redial memory.
  • If the redial memory is empty, EMPTY appears in the display and you will hear a beep.
  • You can also redial the last number dialed on the handset by pressing [(//flash] or [●●]) , and then [redial/pause].

Deleting a Redial Record
If you want to delete a phone number from the handset’s redial list, follow the steps below:

1) With the phone in standby, press [redial/pause].
2) Use [▲] and [▼] to scroll through the redial list.
3) When you find the redial number you want to delete, press [menu/clear].
4) Select YES, and press [select/ froze]. The redial number is deleted.
Adjusting the Ringer, Earpiece and Speaker Volume

Adjusting the Ringer Volume
You can choose from four ringer volume settings on the handset (off, low, medium, and high). With the phone in standby, use [▲] or [▼] on the handset to adjust the ringer volume.

Adjusting the Earpiece Volume
You can choose from six volume levels for the earpiece. To adjust the earpiece volume while on a call, press [▲] (to make it louder) or [▼] (to make it softer).

Adjusting the Speaker Volume
You can choose from six volume levels for the handset speakerphone. To adjust the speaker volume while on a call, press [▲] (to make it louder) or [▼] (to make it softer).
Adjusting the Audio Tone
If you aren’t satisfied with the audio quality of your phone, you can adjust the Audio Tone of the earpiece while on a call. Your phone gives you three audio tone options: low, natural and high; the default setting, Natural Tone, is recommended for hearing aid users. Audio tone adjustments only apply to the earpiece, not the speakerphone.
To adjust the audio tone:

1) With the phone in talk mode, press [select/•] to cycle through the three audio tone options.
2) When the desired option appears on the display, stop.
3) After two seconds, the displayed audio tone is set, and the display returns to normal.

Using the Clarity Boost Feature
If you encounter interference while using your phone, you can manually improve the sound by setting the clarity booster to on. This works only when the phone is in use, so while you are on a call:

1) Press [menu/clear].
2) Move the cursor to CLARITY BOOST, and then press [select/•]. BOOST ON and B appear in the display. Use the same procedure to turn off clarity booster. BOOST OFF appears.

Finding a Lost Handset
To locate a misplaced handset, press [find hs] on the base when the phone is in standby. All registered handsets will beep for one minute, and PAGING appears on the handset display. To cancel paging, press [find hs] again or any key on the found handset.
Using Conference and Transfer

Conferencing
If you have more than one handset, up to three people can participate in a conference call. A three-way conference call consists of an outside line and two handsets. You can easily join a call already in progress.

1) Press [/flash] or [●●] to join the call.
2) To hang up, return the handset to the cradle or press [●]. The other party will still be connected to the call.

Transferring a Call
You can transfer a call from one handset to another.

From the handset:
1) During a call, press [hold/int’com/xfer].
2) Use [▲] or [▼] to select the handset you want to transfer the call to, then press [select/●]. The call will automatically be placed on hold, and a paging tone sounds. To cancel the transfer, press [/flash] or [●].
3) When another handset accepts the transferred call, you will be disconnected. If you want to rejoin the call, press [/flash] again or [●].

Answering a Transferred Call
When a handset receives a call transfer, it sounds a paging tone; handsets also show the ID of the handset that is paging. To accept the call transfer:

1) To answer the page and speak to the transferring handset, press [/flash] or [hold/int’com/xfer] on the handset.
2) To accept the call and speak to the caller, press [/flash].
3) When you accept the transferred call, the transferring handset will be disconnected.

Only the first handset to answer the transfer page will be connected to the call. If the transfer page is not picked up within one minute, the operation will be canceled.
Using Special Features

Muting the Ringer (One call only)
While the phone is ringing, press [1] to mute the ringer for this call. The phone will ring again on the next call.

Muting the Microphone
Mute turns off the microphone so the caller can’t hear you. This only works while you are on a call.

From the handset:
1) Press [menu/clear].
2) Move the cursor to select MUTE and then press [select/permit]. MUTE ON and \(\text{MUTE ON}\) appear in the display; \(\text{MUTE ON}\) remains while muting is on.
3) To cancel muting, repeat the procedure, MUTE OFF appears.

Privacy Mode
If you don’t want other handsets to interrupt you while on a call, turn on privacy mode. As long as your handset is in privacy mode, other handsets can’t join your call or make any calls of their own: their displays will show UNAVAILABLE.

1) While on a call, press [menu/clear].
2) Move the cursor to CALL PRIVACY, and then press [select/permit]. PRIVACY MODE ON appears in the display for 2 seconds; \(\text{P}\) appears and remains in the display until the feature is turned off.

To turn privacy mode off, repeat the procedure listed above.
Seven-Digit Dialing
In some areas, the telephone company may allow you to place a local call by dialing only 7 digits (instead of 10). If this is the case in your area, you can program your local area code in your phone. Programming your area code will allow you to see the caller’s 7-digit phone number which will allow you to easily return the local call without modifying the number before dialing. If you get a call from outside your area code, you will see all 10 digits.

To program your local area code:
1) Press [menu/clear]. Select the GLOBAL SETUP menu, and then the AREA CODE submenu.
2) Use the number keypad ([0] through [9]) to enter a 3-digit area code. If an area code has already been stored, it appears in the display. Press [menu/clear] to delete the stored code, and then enter a new one.
3) Press [select/YES]. You will hear a confirmation tone.

Using the Intercom
You can use the intercom to talk to another handset without using the phone line.

Making an Intercom Page
From the handset:
1) With the phone in standby, press [hold/int’com/xfer].
2) Use [▲] or [▼] to select the handset you want to talk with, then press [select/YES]. Select ALL to page all other handsets.
3) To cancel the intercom page, press [•].

Note: Intercom paging will be canceled if any of the following things occur:
• You receive an outside call or an intercom page while selecting the other handset.
• You do not select a handset within 30 seconds.
• The party does not answer the page within one minute.
• The party is busy.
• The party is out of range (UNAVAILABLE appears in the display).
Answering an Intercom Page
When the intercom page tone sounds, the display will show the ID of the handset that is paging.

1) Press [flash] or [hold/int’com/xfer]. If AutoTalk is on, the handset will automatically answer the page when you remove the handset from the cradle.

2) To hang up an intercom page from the handset, press [i].

Tone Dialing Switch Over
If your phone is set to pulse dialing, you can temporarily switch to tone dialing after the call connects. This feature is useful when you need tone dialing to use automated menu systems, such as telephone bank tellers, telephone prescription refills, customer support menus, etc. Make your call normally. Once your call connects, press [*/tone] on the handset. Any digits you enter from then on will be sent with tone dialing. When this particular call ends, the phone automatically returns to pulse dialing.

See Changing the Dial Mode on page 18 for instructions on setting your phone for pulse or tone dialing.

Installing the Optional Headset
Your phone may be used with an optional headset. To use this feature, insert the headset plug into the headset jack. Your phone is ready for hands-free conversations. (Headsets may be purchased by calling the Uniden Parts Department. See back cover page for contact information.)

**Notes:**
- Use only the supplied AD-800 and AD-0005 AC adapters.
- Do not use any other AC adapter.
- Do not place the power cord where it creates a trip hazard or where it could become chafed and create a fire or electrical hazard.
- Do not place the base in direct sunlight or subject it to high temperatures.
Battery Replacement and Handling
With average use, your phone’s battery should last approximately one year. To order replacement batteries, please contact Uniden’s Parts Department. The contact information is listed on the back cover page.

Cleaning the Battery Contacts
To maintain a good charge, clean the charging contacts on the handset once a month. Dampen a cloth with plain water. Gently rub the damp cloth over the charging contacts until all visible dirt is removed. Dry the contacts thoroughly before returning the handset to the charging cradle.

Caution: Do not use paint thinner, alcohol, or other chemical products. Doing so may discolor the surface of the telephone and damage the finish.

Warning
To avoid the risk of personal injury or property damage from fire or electrical shock, use only Uniden AD-800 (9V 350mA) and AD-0005 AC adapters and Uniden BT-1004 or BT-909 battery pack with your phone.

Caution:
• Use only the specified Uniden battery pack BT-1004 or BT-909.
• Do not remove the batteries from the handset to charge them.
• Never throw the battery into a fire, disassemble, or heat them.
• Do not remove or damage the battery casing.
• A replacement Uniden adapter or battery may be purchased by calling Uniden’s Parts department. See back cover page for contact information.
Low Battery Alert
When the battery pack is very low, the phone is programmed to eliminate functions in order to save power. When LOW BATTERY appears in the display and the phone is in standby, none of the keys will operate. If you are on a call, complete your conversation as quickly as possible, and return the handset to the charging cradle.
The battery pack needs to be charged when the empty battery icon appears.

Talk and Standby Times
With average use, your handset battery provides approximately 5 hours of talk time and approximately 7 days of standby time. When your handsets are not being used and are left off of their charging cradles, the battery will gradually discharge. You can achieve optimum battery life and performance by returning the handset to the charging cradle after each use. If the handset is left off of the charging cradle, the actual talk time duration will be reduced respective to the amount of time the handset is off of the charging cradle.
Troubleshooting

Resetting the Handset
You may need to reset your handset in the following instances:

- When you want to change the digital security code.
- You lose a handset and purchase a new one.
- You get the message Registration Failed when you try to register the handset.
- You are unable to register any handsets to the base.
- When you register new handsets to the base, the handset IDs do not match. (For example, the handset registers as “Handset #4” but you only have two handsets.)
- When you are instructed to by one of Uniden’s call center representatives.

1) Press and hold [1] and [#] for more than 5 seconds. Select DEREGISTER HS.
2) Select the handset which you are operating, then press [select/✓].
3) The phone will ask you to confirm the deregistration. Select YES. The selected handset will clear its registration information from the base, and then delete the link to the base from its own memory.
4) When the base information is deleted, the handset displays HANDSET NOT REGISTERED-PLACE HANDSET ON BASE TO REGISTER. SEE YOUR OWNER’S MANUAL FOR HELP.
5) Re-register the handset to the base (see Registering Accessory Handsets on page 24).

If the handset cannot contact the base, it will display OUT OF RANGE. Make sure the handset is in range of the base and the base is connected to power.
Reseting the Handset Without the Base
If your original base is not available for some reason (for example, it is lost or somehow incapacitated), you can still reset the handset and use it with another base.

1) Press and hold [1] and [#] for at least 5 seconds.
2) Move the cursor to select BASEUNAVAILABLE and then press [select/✓]. BASE UNAVAILABLLE appears.
3) Move the cursor to select YES, and then press [select/✓]. You hear a confirmation tone, and the handset deletes its own base information without contacting the base. The handset displays HANDSET NOT REGISTERED-PLACE HANDSET ON BASE TO REGISTER. SEE YOUR OWNER'S MANUAL FOR HELP.
4) Register the handset to the new base (see Registering Accessory Handsets on page 24).

Changing the Digital Security Code
The digital security code is an identification code used to connect the handset and the base. Your unit ships from the manufacturer with a preset security code. Resetting this code is not normally necessary. In the rare situation that you suspect another cordless telephone is using the same security code or if you are instructed to change this code by a manufacturer's Call Center Representative, you can change the code. To change the digital security code:

1) Reset all of your handsets (see Resetting the Handset on page 46).
2) Re-register each handset (see Registering Accessory Handsets on page 24).

Traveling Out of Range
During a call, if you move your handset too far from your base, noise may increase. If you pass the range limit of the base, the handset will beep, display OUT OF RANGE, and then go to standby. The base will maintain the connection for 30 seconds after the handset goes out of range. If you move the handset back within range of the base within 30 seconds, press [flash] or [••] to pick up the call again.
## Common Issues

If your phone is not performing to your expectations, please try these simple steps first. If these steps do not solve your problem, please call our Customer Hotline (see At Uniden, we’ll take care of you! on page 58).

<table>
<thead>
<tr>
<th>Symptom</th>

Liquid Damage

Moisture and liquid can damage your cordless phone.

- If the handset or base is exposed to moisture or liquid, but only the exterior plastic housing is affected, wipe off the liquid, and use as normal.
- If moisture or liquid has entered the plastic housing (i.e., liquid can be heard in the phone or liquid has entered the handset battery compartment or vent openings on the base), follow the steps below:

<table>
<thead>
<tr>
<th>Handset</th>
<th>Base</th>
</tr>

<tr>
<td>1) Remove the battery cover and leave it off for ventilation.</td>
<td>1) Disconnect the AC adapter from the base, cutting off electrical power.</td>
</tr>
<tr>
<td>2) Disconnect the battery pack. Leave the battery cover off and the battery pack disconnected for at least 3 days.</td>
<td>2) Disconnect the telephone cord from the base.</td>
</tr>
<tr>
<td>3) Once the handset is completely dry, reconnect the battery pack and the battery cover.</td>
<td>3) Let dry for at least 3 days.</td>
</tr>
<tr>
<td>4) Recharge the handset’s battery pack for 15 to 20 hours before using.</td>
<td></td>
</tr>
</tbody>
</table>

**IMPORTANT**: You must unplug the telephone line while recharging the battery packs to avoid charge interruption.

**CAUTION**: **DO NOT** use a microwave oven to speed up the drying process. This will cause permanent damage to the handset, base, and the microwave oven. After following these steps, if your cordless telephone does not work, please call our Customer Service Hotline (see back cover page).
Precautions!
Before you read anything else, please observe the following:

Warning!
Uniden America Corporation DOES NOT represent this unit to be waterproof. To reduce the risk of fire, electrical shock, or damage to the unit, DO NOT expose this unit to rain or moisture.

Rechargeable Nickel-Metal-Hydride Battery Warning
• This equipment contains a rechargeable Nickel-Metal-Hydride battery.
• The rechargeable batteries contained in this equipment may explode if disposed of in a fire.
• Nickel is a chemical known to state of California to cause cancer.
• Do not short-circuit the battery.
• Do not charge the rechargeable battery used in this equipment in any charger other than the one designed to charge this battery as specified in the owner's manual. Using another charger may damage the battery or cause the battery to explode.

Rechargeable Batteries Must Be Recycled or Disposed of Properly.

Uniden works to reduce lead content in our PVC coated cords in our products and accessories.

Warning!
The cords on this product and/or accessories contain lead, a chemical known to the State of California to cause birth defects or other reproductive harm. Wash hands after handling.

Important Safety Instructions
When using your telephone equipment, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury to persons, including the following:

1. Do not use this product near water, for example, near a bath tub, wash bowl, kitchen sink or laundry tub, in a wet basement or near a swimming pool.
2. Avoid using a telephone (other than a cordless type) during an electrical storm. There may be a remote risk of electric shock from lightning.
3. Do not use the telephone to report a gas leak in the vicinity of the leak.
4. Use only the power cord and batteries indicated in this manual. Do not dispose of batteries in a fire. They may explode. Check with local authorities for possible battery disposal instructions.
5. Do not disassemble any component of this product.

SAVE THESE INSTRUCTIONS

CAUTION
Risk of explosion if battery is replaced by an incorrect type. Dispose of used batteries according to the instructions. Do not open or mutilate the battery, and disconnect the battery before shipping this product.
The FCC Wants You To Know

This equipment complies with Part 68 of the FCC rules and the requirements adopted by the ACTA. On the bottom of this equipment is a label that contains, among other information, a product identifier in the format US:AAAEQ##TXXXX. If requested, this number must be provided to the telephone company.

An applicable Universal Service Order Codes (USOC) certification for the jacks used in this equipment is provided (i.e., RJ11C) in the packaging with each piece of approved terminal equipment. A plug and jack used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. A compliant telephone cord and modular plug is provided with this product. It is designed to be connected to a compatible modular jack that is also compliant. See installation instructions for details.

The REN is used to determine the number of devices that may be connected to a telephone line. Excessive RENs on a telephone line may result in the devices not ringing in response to an incoming call. In most but not all areas, the sum of RENs should not exceed five (5.0).

To be certain of the number of devices that may be connected to a line, as determined by the total RENs, contact the telephone provider. For products approved after July 23, 2001, the REN for this product is part of the product identifier that has the format US:AAAEQ##TXXXX. The digits represented by ## are the REN without a decimal point (e.g., 03 is a REN of 0.3). For earlier products, the REN is separately shown on the label.

If this equipment causes harm to the telephone network, the telephone company will notify you in advance that temporary discontinuance of service may be required. But if advance notice isn’t practical, the telephone company will notify the customer as soon as possible. Also, you will be advised of your right to file a complaint with the FCC if you believe it is necessary. The telephone company may make changes in its facilities, equipment, operations or procedures that could affect the operation of the equipment. If this happens the telephone company will provide advance notice in order for you to make necessary modifications to maintain uninterrupted service.

Please follow instructions for repairing, if any (e.g. battery replacement section); otherwise do not substitute or repair any parts of the device except as specified in this manual. Connection to party line service is subject to state tariffs. Contact the state public utility commission, public service commission or corporation commission for information. This equipment is hearing aid compatible.

Should you experience trouble with this equipment, please contact Uniden customer service at 800-297-023. If the equipment is causing harm to the telephone network, the telephone company may request that you disconnect the equipment until the problem is resolved.

NOTICE: According to telephone company reports, AC electrical surges, typically resulting from lightning strikes, are very destructive to telephone equipment connected to AC power sources. To minimize damage from these types of surges, a surge arrestor is recommended.

Changes or modifications to this product not expressly approved by Uniden, or operation of this product in any way other than as detailed by the owner’s manual, could void your authority to operate this product.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation. Privacy of communications may not be ensured when using this phone.

To insure the safety of users, the FCC has established criteria for the amount of radio frequency energy various products may produce depending on their intended usage. This product has been tested and found to comply with the FCC’s exposure criteria. For body worn operation, the FCC RF exposure guidelines were also met when used with the Uniden accessories supplied or designed for this product. Use of other accessories may not ensure compliance with FCC RF exposure guidelines and should be avoided.

The antenna(s) used for the base-unit must be installed to provide a separation distance of at least 20 cm from all persons and must not be collocated or operated in conjunction with any other antenna or transmitter.
Radio Interference
Radio interference may occasionally cause buzzing and humming in your cordless handset, or clicking noises in the base. This interference is caused by external sources such as TV, refrigerator, vacuum cleaner, fluorescent lighting, or electrical storm. Your unit is NOT DEFECTIVE. If these noises continue and are too distracting, please check around your home to see what appliances may be causing the problem. In addition, we recommend that the base not be plugged into a circuit that also powers a major appliance because of the potential for interference. Be certain that the antenna on the unit is fully extended when needed. In the unlikely event that you consistently hear other voices or distracting transmissions on your phone, you may be receiving radio signals from another cordless telephone or other source of interference. If you cannot eliminate this type of interference, you need to change to a different channel.
Finally, it should be noted that some cordless telephones operate at frequencies that may cause interference to nearby TVs and VCRs. To minimize or prevent such interference, the base of the cordless telephone should not be placed near or on top of a TV or VCR. If interference is experienced, moving the cordless telephone farther away from the TV or VCR will often reduce or eliminate the interference.

Cordless Telephone Privacy
Cordless telephones are radio devices. Communications between the handset and base of your cordless telephone are accomplished by means of radio waves which are broadcast over the open airways. Because of the inherent physical properties of radio waves, your communications can be received by radio receiving devices other than your own cordless telephone unit. Consequently, any communications using your cordless telephone may not be private.

I.C. Notice

Terminal Equipment

NOTICE: This equipment meets the applicable Industry Canada Terminal Equipment Technical Specifications. This is confirmed by the registration number. The abbreviation, IC, before the registration number signifies that registration was performed based on a Declaration of Conformity indicating that Industry Canada technical specifications were met. It does not imply that Industry Canada approved the equipment.

NOTICE: The Ringer Equivalence Number (REN) for this terminal equipment is marked on the equipment itself. The REN assigned to each terminal equipment provides an indication of the maximum number of terminals allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the Ringer Equivalence Numbers of all the devices does not exceed five.

Radio Equipment

The term “IC:” before the radio certification number only signifies that Industry Canada technical specifications were met. Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device. “Privacy of communications may not be ensured when using this telephone.”
One Year Limited Warranty

Important: Evidence of original purchase is required for warranty service. WARRANTOR: UNIDEN AMERICA CORPORATION ("Uniden") ELEMENTS OF WARRANTY: Uniden warrants, for one year, to the original retail owner, this Uniden Product to be free from defects in materials and craftsmanship with only the limitations or exclusions set out below. WARRANTY DURATION: This warranty to the original user shall terminate and be of no further effect 24 months after the date of original retail sale. The warranty is invalid if the Product is (A) damaged or not maintained as reasonable or necessary, (B) modified, altered, or used as part of any conversion kits, subassemblies, or any configurations not sold by Uniden, (C) improperly installed, (D) serviced or repaired by someone other than an authorized Uniden service center for a defect or malfunction covered by this warranty, (E) used in any conjunction with equipment or parts or as part of any system not manufactured by Uniden, or (F) installed or programmed by anyone other than as detailed by the owner’s manual for this product. STATEMENT OF REMEDY: In the event that the product does not conform to this warranty at any time while this warranty is in effect, warrantor will either, at its option, repair or replace the defective unit and return it to you without charge for parts, service, or any other cost (except shipping and handling) incurred by warrantor or its representatives in connection with the performance of this warranty. Warrantor, at its option, may replace the unit with a new or refurbished unit. THE LIMITED WARRANTY SET FORTH ABOVE IS THE SOLE AND ENTIRE WARRANTY PERTAINING TO THE PRODUCT AND IS IN LIEU OF AND EXCLUDES ALL OTHER WARRANTIES OF ANY NATURE WHATSOEVER, WHETHER EXPRESS, IMPLIED OR ARISING BY OPERATION OF LAW, INCLUDING, BUT NOT LIMITED TO ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR

A PARTICULAR PURPOSE. THIS WARRANTY DOES NOT COVER OR PROVIDE FOR THE REIMBURSEMENT OR PAYMENT OF INCIDENTAL OR CONSEQUENTIAL DAMAGES.

Some states do not allow this exclusion or limitation of incidental or consequential damages so the above limitation or exclusion may not apply to you.

LEGAL REMEDIES: This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. This warranty is void outside the United States of America and Canada. PROCEDURE FOR OBTAINING PERFORMANCE OF WARRANTY: If, after following the instructions in the owner’s manual you are certain that the Product is defective, pack the Product carefully (preferably in its original packaging). Disconnect the battery from the Product and separately secure the battery in its own separate packaging within the shipping carton. The Product should include all parts and accessories originally packaged with the Product. Include evidence of original purchase and a note describing the defect that has caused you to return it. The Product should be shipped freight prepaid, by traceable means, to warrantor at:

Uniden America Service
