OWNER'S MANUAL

EASILY REGISTER THIS PRODUCT ONLINE AT WWW.UNIDEN.COM
Step 2  Activate the Handset Before Charging the Battery

When the handset battery pack is fully charged, after 15-20 hours of charging, plug the telephone cord into the base unit and then into a telephone wall jack.

Your phone is set for tone dialing. If your local network requires pulse dialing, please see "Choosing the dialing mode" on page 17.

Before charging the battery, push the pin located on the bottom of the handset to activate (see label with instructions).

Peel off the label.

Step 3  Connect to Phone Line

When the handset battery pack is fully charged, after 15-20 hours of charging, plug the telephone cord into the base unit and then into a telephone wall jack.

Your phone is set for tone dialing. If your local network requires pulse dialing, please see "Choosing the dialing mode" on page 17.

Place the handset in the base and charge continuously for 15 - 20 hours before using the phone.

Step 4  Setting Display Options

Note: Three Caller ID options are available: AutoTalk, Caller ID on Call Waiting (CIDCW), and Area Code.

To set Caller ID, Language and Dialing Options

A  Press and hold the cid/menu key.

B  Press the vol/+ or vol/- key to move the pointer to an option.

C  Press select to change the option setting.

D  Press end to exit, and return the handset to the base.

Options include:

A  Auto Talk  On/Off

B  CIDCW  On/Off  (Caller id/call waiting)

C  Area Code  Enter/Remove

D  Dial  Pulse/Tone

E  Language  Eng (English)/Fr. (French)

Welcome

Congratulations on your purchase of the Uniden WXI377. This cordless phone is designed and engineered to exacting standards for reliability, long life, and outstanding performance.

Note: • Some illustrations in this manual may differ from the actual unit for explanation purposes. The color of your cordless telephone may vary.

• JIS7 Specs is a water submersion standard. The cordless handset was designed to be submerged in water to a depth of 3 feet and for up to 30 minutes.

Features

• Water Resistant/JIS7 Specs Compliant (handset)
• 900MHz Extended Range Technology
• 3 Line Backlit Display
• Caller ID and Call Waiting Caller ID Capability
• RocketDial
• 10 Number Memory Dialing
• 32 Digit Redial
• Flash and Pause
• English or French Display Option
• Tone/Pulse Dialing
• Page/Find handset
• Up to 7 Hour Talk Time/
• Up to 14 Day Standby Time
• Handset Earpiece and
• Ringer Volume Control
• Hearing Aid Compatible
• 20 Channel Autoscan

24. DC IN 9V jack
Setting up the Phone

Do the following steps:
A. Choose the best location  C. Connect the base unit
B. Activate the handset before charging the battery

A. Choose the best location
Before choosing a location for your new phone, read “Installation Considerations” on page 44. Here are some important guidelines you should consider:

- The location should be close to both a phone jack and a continuous power outlet which is not switchable.
- Keep the base and handset away from sources of electrical noise such as motors, microwave ovens, and fluorescent lighting.
- The base can be placed on a desk, tabletop, or mounted on a standard wall plate.

If your home has specially wired alarm equipment connected to the telephone line, be sure that installing the system does not disable your alarm equipment.

If you have questions about what will disable your alarm equipment, contact your telephone company or a qualified installer.

UC393BH (W31377) OM  5/2/03  4:18 PM  Page 8
B. Activate the handset before charging the battery

The handset is powered by a rechargeable battery pack already installed in the handset’s battery compartment. Before charging the battery for the first time, push the pin for activation, located on the bottom of the handset (see label with instructions). Once activated, remove the label and then place the handset in the base unit to charge.

Make sure to charge for 15-20 hours without interruption (do not plug the telephone cord into the unit and wall jack during charge time). The base unit’s LED light labeled (charge/in use) illuminates once the handset is placed in the base. The LED light will illuminate regardless if the battery pack is connected or not.

If the base charge/in use LED light does not illuminate:
• Check to see if the AC adapter is plugged into the base unit and the electrical wall outlet properly. (Use only the supplied AC adapter. Do not use any other AC adapter.)
• Check to see if the handset is sitting correctly in the base.

• Use only the Uniden (BT-909) rechargeable battery pack supplied with your cordless telephone.

• Replacement batteries and/or rubber seals are also available through the Uniden Parts Department at (800) 554-3988, Monday thru Friday from 8:00 a.m. to 5:00 p.m. or online at www.uniden.com
Replace the rechargeable handset battery pack

1) Remove the 3 screws holding the battery compartment with a screwdriver and take off the battery cover. Remove the old battery pack in the battery compartment.

2) Plug the replacement battery connector (red & black wires) into the small, black jack inside the battery compartment. (The connector notches fit into the grooves of the jack only one-way.) Match the wire colors to the polarity label in the battery compartment, connect the battery and listen for a click to insure connection.

3) Make certain you have made a good connection by slightly pulling on the battery wires. If the battery connector is not securely connected, the handset will not charge properly.

4) Before placing the battery cover back on the handset, make sure there is no foreign matter under the rubber seal located on the under side. By inserting bottom first, place the battery cover back on the handset and tighten the 3 screws.

- If there is any foreign matter on the rubber seal located on the under side of the battery cover, the handset may not be water resistant.
- The rubber seal should be kept clean and replaced every 2 years to ensure the handset is water resistant even if the seal does not look worn. Do not place a wet or dirty handset in the base.

[ 10 ] GETTING STARTED
If the rubber seal appears worn, nicked, or dried out, replacement seals are available through the Uniden Parts Department. If you have questions regarding installation of battery pack and/or rubber seal, please call our Customer Hotline at 1-800-297-1023.

Battery use time (per charge)
From fully charged (15-20 hours charge time)
• Up to seven hours continuous use during talk mode
• Up to fourteen days when the handset is in the standby mode

Low battery alert
When the battery pack is very low and needs to be charged, the phone is programmed to eliminate functions in order to save power. If the phone is not in use, “Low Battery” appears on the LCD and none of the keys will operate. If the phone is in use, “Low Battery” flashes and the handset beeps. Complete your conversation as quickly as possible and return the handset to the base unit for charging.

The last number dialed in the redial memory, as well as, the names and the numbers stored in the memory locations are retained for up to 30 minutes while you replace the battery pack.
C. Connect the base unit

1) Connect the AC adapter to the DC IN 9V jack and to a standard 120V AC wall outlet.

2) Set the base on a desk or tabletop, and place the handset in the base unit.

3) Make sure that the charge/in use LED illuminates. If the LED does not illuminate, check to see that the AC adapter is plugged in and that the handset is sitting correctly in the base.

- Connect the AC adapter to a continuous power supply.
- Place the base unit close to the AC outlet so that you can unplug the AC adapter easily.
- After activating the handset, charge your handset at least 15-20 hours before plugging into the phone line.

4) Once the handset battery pack is fully charged, connect the telephone line cord to the TEL LINE jack and to a telephone outlet.

- If your telephone outlet isn’t modular, contact your telephone company for assistance.
Mounting the Base Unit on a Wall

**Standard wall plate mounting**

This phone can be mounted on any standard wall plate.

1) Plug the AC adapter into the **DC IN 9V** jack.

2) Wrap the AC adapter cord inside the molded wiring channel as shown.

3) Plug the AC adapter into a standard 120V AC wall outlet.

4) Plug the telephone line cord into the **TEL LINE** jack. Wrap the cord inside the molded wiring channel as shown.

5) Plug the telephone line cord into the telephone outlet.

6) Align the mounting slots on the base with the mounting posts on the wall. Then push in and down until the phone is firmly seated.
Direct wall mounting
If you don't have a standard wall plate, you can mount your phone directly to the wall. Before doing this, consider the following:
• Avoid electrical cables, pipes, or other items behind the mounting location that could cause a hazard when inserting screws into the wall.
• Try to mount your phone within 5 feet of a working phone jack to avoid excessive lengths.
• Make sure the wall material is capable of supporting the weight of the base and handset.
• Use #10 screws (minimum length of 1-3/8 inches) with anchoring devices suitable for the wall material where the base unit will be placed.

1) Insert two mounting screws into the wall, (with their appropriate anchoring device), 3-15/16 inches apart. Allow about 1/8 of an inch between the wall and screw heads for mounting the phone.

2) Refer to steps 1 through 6 on page 13 to mount the telephone.

[14] GETTING STARTED

www.uniden.com
The cordless phone features include AutoTalk™ and AutoStandby™. AutoStandby allows you to hang up by simply returning the handset to the base.

Setting Menu Options

There are five setup options available. They are Caller ID options [AutoTalk, CIDCW (Caller ID on Call Waiting), Area Code], Dial Mode and Language.

You must subscribe to Caller ID/Call Waiting services through your telephone company.

AutoTalk allows you to answer the phone without pressing talk/flash.
If the phone rings when AutoTalk is On, simply remove the handset from the base and the phone automatically answers the call. If the phone rings when AutoTalk is Off, you must press talk/flash to answer the call.

Caller ID options
To change your AutoTalk and CIDCW:
1) Press and hold cid/menu. The following screen appears.
2) Use the vol/+ or vol/- key or a number key (1 or 2) to move the pointer to the selection that you would like to change.
   Press select to toggle between “On” and “Off” for AutoTalk and CIDCW.
3) Press end and return the handset to the base unit to complete the setting.
   The handset returns to the standby mode.
Entering Your Area Code
If you enter a 3-digit area code number in the Area Code option, your local area code does not appear in Caller ID messages. Do not program this option if your calling area requires 10-digit dialing. When reviewing Caller ID messages, you will see only the local seven digit number. For calls received from outside your local area code, you will see a full 10-digit number.

1) When the phone is in the standby mode, press and hold cid/menu. The Caller ID setting screen appears.

2) Press 3 or the vol/- key twice to select “Area Code”.

3) Press select.

4) Use the number keys (0 - 9), #/t, */tone/ or delete/ch to enter the 3-digit area code.

5) Press select. A confirmation tone sounds and the displayed area code is entered.

6) Press end or return the handset to the base unit to complete the setting.

When the area code has already been stored in memory, the stored area code will be displayed. To change it, use the delete/ch and number keys to enter the new area code. Then press select. A confirmation tone sounds. To complete the setting, press end or return the handset to the base unit.
Choosing the dialing mode

Most phone systems use tone dialing which sends DTMF tones through the phone lines. However some phone systems such as in rural areas still use pulse dialing. The default setting is tone dialing. Depending on your dialing system, set the mode as follows:

1) When the phone is in the standby mode, press and hold cid/menu. The following screen appears.

2) Press 4 or the vol/- key three times to select “Dial”.

3) Press select to toggle between “Tone” and “Pulse” for each setting.

4) Press end or return the handset to the base unit to complete the setting.

   The handset returns to the standby mode.

   • If you are not sure of your dialing system, set for tone dialing. Make a trial call.
     If the call connects, leave the setting as is, otherwise set for pulse dialing.

   • If your phone system requires pulse dialing and you need to send the DTMF tones for certain situations during a call, you may “switch-over” to tone dialing. (Refer to “Tone Dialing Switch-over” on page 21.)
Setting the language

1) When the phone is in the standby mode, press and hold cid/menu. The following screen appears.

2) Press 5 or the vol/- key four times to select “Language”.

3) Press select to toggle between “Eng” (English) and “Fr.” (French) for each setting.

4) Press end or return the handset to the base unit to complete the setting.
   The handset returns to the standby mode.

</tbody>
</table>

*Note:* Refer to page 15 “Setting Menu Options” to turn on the AutoTalk feature if desired.
Adjusting the Handset Ringer and Earpiece Volume

Handset ringer tone and volume
Press vol/+ or vol/- in standby mode to select one of five ringer tones and volume combinations.

Earpiece volume
Pressing vol/+ or vol/- during a call will change the earpiece volume of the handset. This setting will remain in effect after the telephone call has ended.

Temporarily Mute Ringer
If the handset is off the base, simply press end to temporarily mute the incoming ring. The ringer will sound with the next incoming call.

Redial
The redial/p key redials the last number dialed. The redialed number can be up to 32 digits long.
Tone Dialing Switch-over

Some telephone companies use equipment that requires pulse dialing (sometimes referred to as rotary dialing). If you need to enter tone dialing digits, you can switch-over to tone dialing during the call. For example, entering your bank account number after you have called your bank.

Initially make your call with the pulse dialing mode. Once your call connects, press the * key. Enter the desired number. These digits will be sent as tone dialing. Once the call ends, the tone mode is canceled and pulse dialing mode resumes.

Traveling Out-of-Range

During a call, as you begin to move your handset too far from your base unit, noise increases. If you pass the range limits of the base unit, your call will terminate within 5 minutes.
Selecting a Different Channel

If you encounter interference while using your phone, you can manually change the phone’s channel for clear operation. This function works only when the phone is in use. Press delete/ch. “Scanning” appears on the display, indicating the phone is changing to another channel. For more information on interference, refer to page 44.

Page

To locate the handset (while it's off the base), press find handset on the base. The handset beeps for 60 seconds. Paging is canceled when pressing any handset key, find handset on the base or the handset is returned to the base.

Flash and Call Waiting

If you have “Call Waiting” service and a call waiting tone sounds while you are on a call, press talk/flash to accept the waiting call. There is a short pause, then you will hear the new caller. To return to the original caller, press talk/flash again.

Note You must subscribe through your local telephone company to receive Call Waiting Service.
Storing Phone Numbers and Names

Memory Dialing allows you to dial a number using just a few key presses. Your cordless telephone stores up to 10 names/numbers in the handset.

1) Press and hold mem, “Memory Store” is displayed.

2) Press the vol/+ or vol/- key, or enter a number (0 - 9) to select the memory location where you would like to store the number.

3) Press select. The following screen appears and a cursor flashes indicating that the display is ready for the name to be entered.

If this screen appears, the selected memory location is already stored. Then you must either edit the entry in this location, delete the entry in this location, or select “Go Back” to choose another location.

4) To enter a name (up to 14 characters), use the number keys.
   • See the “Steps for Entering Names and Special Characters”. (See page 25.)
   • Use the #/> or */tone/↓ key to move the cursor to the desired location.
   • Use delete/ch to delete characters as needed.
   • Press and hold delete/ch to delete all the characters.
   • If a name is not required, go to step 5.

Memory Store 12 Edit Memory 1 Delete Memory 1 Go Back

Note

- In memory dialing operation, you must press a key within 30 seconds or the phone will return to the standby mode. If you return the handset to the base, the phone will return to the standby mode also.

- You have 30 seconds after pressing mem to enter the number you wish to store. Otherwise, an error tone will sound.
5) Press **select**. “Store Number” is displayed. The cursor flashes indicating that the display is ready for the number to be entered.

6) Use the number keys, */tone/ or #/s to enter the phone number. The phone number cannot exceed 20 digits. Use **redial/p** to enter a pause in the dialing sequence. The display shows a “P”. Each pause counts as one digit and represents a two second delay of time between the digits. Use **delete/ch** to delete digits as needed.

7) Press **select**. You will hear a confirmation tone, and the following screen appears. Memory storage is complete. For example, if you store a name and number into memory location number 1, the display shows “Memory 1 Stored”. After about 2 seconds, the display returns to the select memory screen. Repeat steps 2 - 7 to store more numbers.

8) Press **end** to return to the standby mode.
Steps for Entering Names and Special Characters

Refer to the letters on the number keys to select the desired characters. With each press of a numeric key, the displayed character appears in the following order: Upper case letters first, lower case letters next and finally the number corresponding to the key.

If you make a mistake while entering a name

Use the */tone/ or #/s key to move the cursor to the incorrect character. Press delete/ch to erase the wrong character, then enter the correct character. To delete all characters, press and hold delete/ch.

For example, to enter *Movies*

1) Pick up the handset. Press and hold mem.
2) Enter a number or press the vol/+ or vol/- key to select a memory location.
3) Press select. (When there is information already stored in the selected memory location, "Edit Memory X" is displayed. See page 27 for information on "Editing a Stored Name and/or Phone Number".)
4) Press 6 then press #/s to move the cursor to the right.
5) Press 6 six times.
6) Press 8 six times.
7) Press 4 six times.
8) Press 3 five times.
9) Press 7 eight times.
10) When finished, press select.

To continue to store the telephone number, proceed to step 6 on page 24.

www.uniden.com
Making Calls with Memory Dialing

Memory dialing from Standby Mode
1) Press `mem`. The handset displays your programmed memory locations.
2) Press the `vol/+` or `vol/-` key, or enter the number (0 - 9) to select the memory location you would like to dial.
3) Press `talk/flash`. “Talk” and the volume setting appear on the display. Then the displayed number is dialed.

To exit the memory function without dialing, press `end`. The handset returns to the standby mode.

Memory dialing from Talk Mode
2) Press `mem`.
3) Enter a number (0 - 9) to select the memory location of the desired phone number. Then the number is dialed.
4) To hang up, press `end`.

• If you press `select` before `talk/flash`, you can confirm the name and the number stored in the selected memory location.
• Whenever you are using a memory menu screen, you must press a key within 30 seconds.
Chain Dialing

The memory locations on the handset are not limited to phone numbers. You can also store a group of numbers (up to 20 digits) that you need to enter once your call connects. This is referred to as Chain Dialing.

An example of this is a bank account number. Once you have called your bank, and are prompted to enter the account number, simply press `mem` and the location number where the special number has been stored.

Store your special number with an identifying name. (Refer to “Storing Phone Numbers and Names” on page 23.)

Editing a Stored Name and/or Phone Number

1) Press and hold `mem` until “Memory Store” is displayed.
2) Press vol/+ or vol/-, or enter a number (0 - 9) to select the memory location you would like to edit.
3) Press `select`. The following screen appears with the memory location number that you have selected in the display.
4) Press vol/+ or vol/- to select “Edit Memory X”, then press `select`. The following screen appears. The cursor flashes indicating that the display is ready for the name to be edited. When a name has not been stored, the cursor appears at the beginning of the second line.
5) Use the number keys, */tone/ ▲, #/▼, or delete/ch to edit the name.
   (See page 23.)
   To edit only the phone number, skip this step.

6) Press select. The following screen appears.
   The cursor flashes indicating that the display is ready for the number to be edited.

7) Use the number key, redial/p, */tone/ ▲, #/▼, or delete/ch to edit the phone number. The phone number cannot exceed 20 digits.
   (See page 24.)
   If you don’t want to change the phone number, skip this step.

8) Press select. You hear a confirmation tone, and the following screen appears. The memory storage is complete.
   For example, if you store a name and number into memory location number 1, the display shows “Memory 1 Stored”.
   After about 2 seconds, the display returns to the select memory screen.

9) Press end to return to the standby mode.
Erasing a Stored Name and Phone Number

1) Press and hold `mem` until “Memory Store” is displayed.

2) Press `vol/+` or `vol/-`, or enter a number (0 - 9) to select the memory location you would like to erase.

3) Press `select`. The following screen appears with the memory location number that you have selected in the display.

4) Press `vol/-` to move the pointer down to “Delete Memory X”.

5) Press `select`. The following confirmation screen appears.

6) Press `vol/+` to move the pointer to “Yes”.

7) Press `select` or `delete/ch`. You hear a confirmation tone, and the following screen appears.

8) After about 2 seconds, the display returns to the “Memory Store” screen. You may delete the information in another memory location (return to step 2) or press `end` to return to standby mode.
RocketDial
You can store your most frequently dialed number in the RocketDial location. The RocketDial allows you to dial a number with one key press. (There is no need to press talk/flash. The phone will automatically dial the number stored.)

Storing and Editing the RocketDial
1) When the phone is in the standby mode, press and hold **RocketDial**. Following display appears.
   If this screen appears, there is a number already stored. Press vol/+ or vol/- to select “Edit Number”, then press select.

2) Store the number by following step 6 under “Storing Phone Numbers and Names” on page 24.

3) Press select. You hear a confirmation tone, and the following screen appears. Memory storage is complete.

Making Calls with the RocketDial
When the phone is in the standby mode, simply press **RocketDial**. The number stored in the RocketDial memory location is instantly dialed.
Deleting the RocketDial

1) When the phone is in the standby mode, press and hold RocketDial. Following display appears.

2) Press vol/- to move the pointer down to “Delete Number”.

3) Press select. Following display appears.

4) Press vol/+ to move the pointer to “Yes”.

5) Press select or delete/ch.

You hear a confirmation tone, and the following display appears. After about 2 seconds, the handset returns to standby mode.
**Caller ID**

You must subscribe to Caller ID service to use this feature. When the telephone rings, the Caller ID feature allows you to view the caller’s name and phone number on the display before you answer the phone. The handset displays the phone number of the incoming call, the name, and time. Additionally, you can dial the displayed number and store the information for memory dialing. Make sure you have turned on the Caller ID/Call Waiting feature. (See page 15.)

**When the Telephone Rings**

1) When the Caller ID message is received, the display shows the caller’s phone number along with the date and time. The incoming call information is stored in the Caller ID record. If the Caller ID service includes the caller’s name, the caller’s name appears on the display (up to 15 letters).

<table>

You may receive any one of the following messages:
- When invalid data is received: “Incomplete Data”
- When a private name is received: “Private Name”
- When a private number is received: “Private Number”
- When an unknown name is received: “Unknown Name”
- When an unknown number is received: “Unknown Number”
2) When you pick up the phone, the display changes to "Talk". (AutoTalk feature is set to On.)

**Note** Data errors appear as "-".

## Viewing the Caller ID Message List

The Caller ID list stores up to 30 messages (Caller ID names/numbers) - even unanswered calls.

1) Press **cid/menu**. The summary screen appears. The screen shows the number of new messages and total messages.

2) Press the **vol/+** or **vol/-** key to display the latest or oldest Caller ID message.

3) Press the **vol/-** key to see the next message. Or press the **vol/+** key to see the previous message.

4) Press **end** to return to the standby mode.

www.uniden.com
Deleting Information from the Caller ID List

The cordless phone stores up to 30 messages (Caller ID names/numbers). If the phone receives the 31st message, the oldest one in the list is automatically deleted. Caller ID data can also be deleted manually.

Deleting a Caller ID message

1) Press \textit{cid/menu}. Display the message to be deleted from the Caller ID list by pressing the \textit{vol/+} or \textit{vol/-} key.

2) Press \textit{delete/ch}.

3) Press the \textit{vol/+} or \textit{vol/-} key to select “Yes” or “No”.

4) Press \textit{select} or \textit{delete/ch}.
   
   \textbf{When the pointer is at “Yes”:}
   A tone sounds and the Caller ID message is deleted. The next Caller ID message is then displayed.

   \textbf{When the pointer is at “No”:}
   The display returns to the Caller ID message.

Deleting all Caller ID names/numbers

1) Press \textit{cid/menu}.

2) Press \textit{delete/ch}. 

\textbf{note}

- While using the “Delete All?” or “Delete Message?” screen if no key is pressed for more than 30 seconds, an error tone sounds and the telephone returns to the standby mode.

- If you get an incoming call or page, the deleting operation is canceled and you can answer the call or page.
3) Press the vol/+ or vol/- key to select “Yes” or “No”.

4) Press select or delete/ch.

When the pointer is at “Yes”:
A tone sounds and all stored Caller ID messages are deleted.

When the pointer is at “No”:
The display returns to the summary screen.

Using the Caller ID List

Calling a party from the Caller ID list
You can place a call from the Caller ID list. The cordless phone stores up to 30 messages (Caller ID names/numbers).

1) Press cid/menu. Select the phone number that you want to dial by pressing the vol/+ or vol/- key.

2) Press talk/flash.
The displayed phone number dials automatically.

Long Distance calls and Area Code Setting/Cancellation
Pressing 1 while the incoming Caller ID information is displayed (in step 1) will place the prefix “1” in the display to set up for a long distance call. Pressing 3 will set or cancel an area code setting.

www.uniden.com
Storing Caller ID messages in Memory dialing

Messages (Caller ID names/numbers) shown in the Caller ID list can be stored in memory dialing. Using the incoming call information (i.e., Caller ID list), the phone number of the party on the Caller ID list can be stored in memory.

1) Press cid/menu.
   Select the phone number to be stored from the Caller ID list by pressing the vol/+ or vol/- key.

2) Press mem.

3) Press the vol/+ or vol/- key or enter a number (0 - 9) to select the memory location to be stored.

4) Press select.
   You hear a confirmation tone, and the number is stored in memory. The display returns to the Caller ID list.

If a message has already been stored in the selected memory number location, a confirmation screen is displayed. Press the vol/+ key to select "Yes". Press select to overwrite. The display returns to the Caller ID list.
Changing the Digital Security Code

The digital security code is an identification code used to connect the handset and the base unit. Normally, setting the code is not necessary. The first time you charge your handset, the security code is automatically set.

In the rare situation that you suspect another cordless telephone is using the same security code, you can change the code.

1) Remove the handset from the base unit. Press and hold find handset on the base.
2) While holding find handset, place the handset in the base unit, and leave the handset in the base for more than 3 seconds. A new random security code is set.

Installing the Beltclip

To attach the beltclip
Insert the beltclip into the holes on each side of the handset. Press down until it clicks.

To remove the beltclip
Pull both sides of the beltclip to release the tabs from the holes.
Note on Power Sources

Battery replacement and handling
When the operating time becomes short, even after a battery is recharged, please replace the battery. With normal usage, your battery should last about one year. Please contact your place of purchase or the Uniden Parts Department for a replacement battery.

Warning: To avoid the risk of personal injury or property damage from fire or electrical shock, only use the Uniden battery model and Uniden adapter model specifically designated for this product.

Caution
• Use only the specified Uniden battery pack (BT-909).
• Do not remove the battery from the handset to charge it.
• Never throw the battery into a fire, disassemble it, or heat it.
• Do not remove or damage the battery casing.

Power Failure
During the period that the power is off, you will not be able to make or receive calls with the telephone.

Maintenance
When the handset or base unit becomes slightly dirty
Wipe with a soft, dry cloth.

When the handset or base unit becomes very dirty
Wipe with a soft cloth that has been dampened with diluted, neutral detergent. Dry with a dry cloth.

Caution
Do not use paint thinner, benzene, alcohol, or other chemical products. Doing so may discolor the surface of the telephone and damage the finish.
# Troubleshooting

If your phone is not performing to your expectations, please try these simple steps first.

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Suggestion</th>
</tr>
</thead>
</table>
| The **charge/in use** LED won’t illuminate when the handset is placed in the base. | • Make sure the AC adapter is plugged into the base and wall outlet.  
• Make sure the handset is properly seated in the base.  
• Make sure that the handset and base are clean. |
| The audio sounds weak and/or scratchy.                                  | • If your handset was submerged in water, water remaining in and around the speaker and microphone may distort sound. Shake any water off of the handset, then wipe the handset dry.  
• Move the handset and/or base to a different location away from metal objects or appliances and try again.  
• Press `delete/ch` to help eliminate background noise.  
• Make sure that you are not too far from the base. |
| Can’t make or receive calls.                                            | • Check both ends of the base telephone line cord.  
• Make sure the AC adapter is plugged into the base and wall outlet.  
• Disconnect the AC adapter for a few minutes, then reconnect it.  
• Change the digital security code (see page 37).  
• Make sure that you are not too far from the base. |
<table>
<thead>
<tr>
<th>Symptom</th>
<th>Suggestion</th>
</tr>
</thead>
</table>
| The handset doesn't ring or receive a page  | • The battery pack may be weak. Charge the battery for 15-20 hours.  
• The handset may be too far away from the base unit.  
• Place the base unit away from appliances or metal objects.  
• Change the digital security code (see page 37).  
• If the handset is under water, the ringer will not be heard. The phone can still receive calls. |
| Severe noise interference.                   | • Keep the handset away from microwave ovens, computers, remote control toys, wireless microphones, alarm systems, intercoms, room monitors, fluorescent lights, and electrical appliances.  
• Move to another location or turn off the source of interference. |
| The Caller ID does not display.              | • The handset was picked up before the second ring.  
• The call was placed through a switchboard.  
• Call your local telephone company to verify your Caller ID service is current.  
• Charge the handset.                                                                                                                                     |
| If you still have a problem.                 | • Call our customer hotline at 1-800-297-1023.                                                                                                                                                           |
### Liquid Damage

Moisture and liquid can damage your cordless phone. In case of accidental submersion, please read the following steps.

<table>
<thead>
<tr>
<th>Case</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>If the base is exposed to moisture or liquid, but only affects the exterior plastic housing.</td>
<td>Wipe off the liquid and use as normal.</td>
</tr>
</tbody>
</table>
| If moisture or liquid has entered the plastic-housing (i.e. liquid can be heard in the phone or liquid has entered the handset battery compartment or vent openings on the base). | Handset:  
1. Remove the battery cover and leave it off for ventilation.  
2. Remove the battery pack by disconnecting.  
3. Leave the battery cover off and the battery pack disconnected for at least 3 days.  
4. Once completely dry, reconnect the battery pack and the battery cover.  
5. Recharge the handset’s battery pack for 20 hours in the base unit before using the phone.  
Base:  
1. Disconnect the AC adapter from the base unit, cutting off electrical power.  
2. Disconnect the telephone cord from the base unit.  
3. Let dry for at least 3 days. | IMPORTANT: You must **unplug the telephone line while recharging the battery pack** to avoid charge interruption.  
CAUTION:  
DO NOT use a microwave oven to speed up the drying process. This will cause permanent damage to the handset, base and the microwave oven.  
After following these steps, if your cordless telephone does not work, please send to:  
Uniden America Corporation  
Parts and Service Division  
4700 Amon Carter Blvd.  
Ft. Worth, TX 76155  
1-800-554-3988, Monday through Friday  
8 a.m. to 5 p.m. CST

www.uniden.com
General Information
The phone complies with FCC Parts 15 and 68.
Operating temperature: -10° to 50°C (+14° to +122°F)

AC Adapter Information
AC Adapter part number: AD-0002
Input Voltage: 120V AC 60Hz
Output Voltage: 9V DC 350 mA

Battery Information
Battery part number: BT-909
Capacity: 600 mAH, 3.6V
Battery use time (per charge)
From fully charged
Talk mode duration: Up to 7 hours
Standby mode duration: Up to 14 days

Note:
• To avoid damage to the phone use only Uniden AD-0002 and BT-909 with your phone.
• If the handset is left off of the base, the actual Talk mode duration will be reduced respective to the amount of time the handset
  is off the base.

Recharge your phone on a regular basis by returning the handset to the base after each phone call.
When the operating time becomes short, even after the battery is recharged, please replace the battery.
With normal usage, the battery should last about one year.
A replacement Uniden adapter and battery may be purchased at your local Uniden dealer or by contacting
the Uniden Parts Department (800) 554-3988. Hours are from 8:00 a.m. to 5:00 p.m. Central Time, Monday
through Friday. We can also be reached on the web at www.uniden.com.
Specifications, features, and availability of optional accessories are all subject to change without
prior notice.
Precautions!

Before you read anything else, please observe the following:

Warning! Uniden America Corporation represents this handset to be water
submersible to JIS7 Specs. The product may be submerged for up to 30 minutes.

Rechargeable Nickel-Metal-Hydride Battery Warning

- This equipment contains a rechargeable Nickel-Metal-Hydride battery.
- Nickel is a chemical known to state of California to cause cancer.
- The rechargeable Nickel-Metal-Hydride battery contained in this
equipment may explode if disposed of in a fire.
- Do not short-circuit the battery.
- Do not charge the rechargeable Ni-MH battery used in this product unless the slot was designed to charge this
battery as specified in the owner’s manual. Using another charger
may damage the battery or cause the battery to explode.

Rechargeable Nickel-Metal-Hydride Batteries

Must Be Recycled or Disposed of Properly

Uniden needs to reduce lead content in our PVC coated cords in our
product and accessories.

WARNING! The cords on this product and/or accessories contain lead, a chemical known to the
State of California to cause birth defects or other reproductive harm. Wash hands after handling.

The exclamation point within an equilateral triangle is
intended to alert the user to the presence of important
operating and maintenance (servicing) instructions in
the literature accompanying the appliance.

The warning symbol is intended to alert the user to the
presence of important operating and maintenance
(servicing) instructions in the literature accompanying the
appliance.

Additional Battery Safety Precautions

Caution: To reduce the risk of fire or injury to persons by the
battery, read and follow these instructions:

1. Use only the Uniden battery pack specified in the owner’s manual.
2. Do not dispose of the battery pack in a fire. The cell may explode. Check the Nickel-Metal-Hydride battery
disposable package insert for disposal instructions.
3. Do not open or mutilate the battery pack. Released electrolyte is corrosive and may cause damage to the eyes or skin. It may be toxic
if swallowed.
4. Exercise care in handling the battery in order not to short the
battery with conducting materials such as rings, bracelets, and keys.
- The battery or conductor may overheat and cause burns.

SAVE THESE INSTRUCTIONS!

Important Electrical Considerations

Unplug all electrical appliances when you know an electrical storm is
approaching. Lightning can pass through your household wiring and
damage any device connected to it. This phone is no exception.

Additional Information
Telephone Line Problems

The FCC has granted the telephone company the right to disconnect service in the event that your phone causes problems on the telephone line. Also, the telephone company may make changes in facilities and services which may affect the operation of your unit. However, your telephone company must give adequate notice in writing prior to such actions to allow you time for making necessary arrangements to continue uninterrupted service.

If you are having trouble with your telephone service, you must first disconnect your phone to determine if it is the cause of your problem. If you determine that it is the cause, you must leave it disconnected until the trouble has been corrected.

Radio Interference

Radio interference may occasionally cause buzzing and humming in your cordless handset, or clicking noises in the base. This interference is caused by external sources such as TV, refrigerators, vacuum cleaners, fluorescent lighting, or electrical motors. Your unit is NOT DEFECTIVE. If these noises continue and are too distracting, please check around your home to see what appliances may be causing the problem. In addition, we recommend that the base unit be plugged into a circuit that does not have a switch to interrupt its power.

If interference persists, move the cordless telephone farther away from the TV or VCR, or try unplugging these appliances to see if the interference stops. Moving the cordless telephone farther away from the TV or VCR will often reduce or eliminate the interference.

More Than One Cordless Telephone

If you want to use more than one cordless telephone in your home, they must operate on different channels. Press the channel key to select a channel that provides the clearest communication.

Cordless Telephone Privacy

Cordless telephones are radio devices. Communications between the handset and base of your cordless telephone are accomplished by means of radio signals. These radio signals can be received by radio receiving devices other than your own cordless telephones unit. Consequently, any communications using your cordless telephone may not be private.

Installation Considerations

Selecting a Location

Before choosing a location for your new phone, there are some important guidelines you should consider:

- The location should be close to both a phone jack and continuous power outlet. (A continuous power outlet is an AC outlet which does not have a switch to interrupt its power.)
- Keep the base and handset away from sources of electrical noise such as motors or fluorescent lighting.
- The base can be placed on a desk or tabletop or mounted on a standard telephone wall plate.
- You should charge your new phone for 15-20 hours before completing the installation or using the handset.

Telephone Line Outlets

There are two types of phone outlets:

Modular Jack

Most phone equipment available now uses modular jacks. Phone cords are fitted with a molded plastic connector which plugs into this type of jack. If you do not have modular phone jacks, contact your local telephone company for information about their installation.

Hardwired Jack

Some equipment is wired directly to a phone jack, and these types of installations require a modular jack converter. This type of installation is not difficult; however, you should contact your Uniden Telephone dealer or telephone supply store for advice about the proper adapter or converter for your particular situation.

Connecting the Telephone Cords

Consider these safety guidelines before connecting the telephone cords:

Caution!

- Never install telephone wiring during a lightning storm.
- Never touch uninsulated telephone wires or terminals unless the telephone line has been disconnected.
- Use caution when installing or modifying telephone lines.

Applying Power to the Base

This phone requires an AC outlet, without a switch to interrupt power, and the included AC adapter. To relieve strain on the DC plug when the phone is placed on a desk or table, wrap the power cord around the strain relief notch on the back of the base.

NOTE: Place the power cord so that it does not create a trip hazard, or where it could become chafed and create a fire or other electrical hazard.

One Year Limited Warranty

WARRANTOR: UNIDEN AMERICA CORPORATION ("Uniden")

ELEMENTS OF WARRANTY: Uniden warrants, for one year, to the original retail owner, this Uniden Product to be free from defects in materials and craftsmanship with only the limitations or exclusions set out below.

WARRANTY DURATION: This warranty to the original user shall terminate and be of no further effect 12 months after the date of original retail sale. The warranty is invalid if the Product is (A) damaged or not maintained as reasonable or necessary, (B) modified, altered, or used as part of any conversion kits, subassemblies, or any configurations not sold by Uniden, (C) improperly installed, (D) serviced or repaired by anyone other than an authorized Uniden service center for a defect or malfunction covered by this warranty, (E) used in any conjunction with equipment or parts or as part of any system not manufactured by Uniden, or (F) installed or programmed by anyone other than as detailed by the owner’s manual for this product.

STATEMENT OF REMEDY: In the event that the product does not conform to this warranty at any time while this warranty is in effect, warrantor will either, at its option, repair or replace the defective unit and return it to you without charge for parts, service, or any other cost (except shipping and handling) incurred by warrantor or its representatives in connection with the performance of this warranty. Warranty, at its option, will replace the defective unit with a new or refurbished one. If it is necessary to remove the Product from your premises, you will be required to pay for the cost of removal.

THE LIMITED WARRANTY SET FORTH ABOVE IS THE ONLY WARRANTY APPLICABLE TO THIS PRODUCT AND IS IN LIEU OF AND EXCLUDES ALL OTHER WARRANTIES OF ANY NATURE WHATSOEVER, WHETHER EXPRESS, IMPLIED OR ARISING BY OPERATION OF LAW, INCLUDING, BUT NOT LIMITED TO ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. THIS WARRANTY DOES NOT COVER OR PROVIDE FOR THE REIMBURSEMENT OR PAYMENT OF INCIDENTAL OR CONSEQUENTIAL DAMAGES. SOME STATES DO NOT ALLOW THIS EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU. LEGAL REMEDIES: This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. This warranty is void outside the United States of America and Canada.

PROCEDURE FOR OBTAINING PERFORMANCE OF WARRANTY: If, after following the instructions in the owner’s manual you are certain that the Product is defective, pack the Product carefully (preferably in its original packaging). The Product should include all parts and accessories originally packaged with the Product. Include evidence of original purchase and a note describing the defect that has caused you to return it. The Product should be shipped freight prepaid, by traceable means, to warrantor at:

Uniden America Corporation
Parts and Service Division

I.C. Notice

TERMINAL EQUIPMENT

NOTICE: This equipment meets the applicable Industry Canada Terminal Equipment Technical Specifications. This is confirmed by the registration number. The abbreviation, IC, before the registration number signifies that registration was performed based on a Declaration of Conformity indicating that Industry Canada technical specifications were met. It does not imply that Industry Canada approved the equipment.

NOTICE: The Ringer Equivalence Number (REN) for this terminal equipment is marked on the equipment itself. The REN assigned to each terminal equipment provides an indication of the maximum number of terminals allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the Ringer Equivalence Numbers of all the devices does not exceed five.

RADIO EQUIPMENT

The term “IC:” before the radio certification number only signifies that Industry Canada technical specifications were met.

Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device. “Privacy of communications may not be ensured when using this telephone.”
