

GMR4055-2CK, GMR4055-2CKHS GMR4060-2CK, GMR4060-2CKHS

- 15 GMRS / 7 FRS Channels
- 7 Weather Channels
- 121 Privacy Codes
- Internal VOX Circuitry
- Up to 40 Mile Range*
- Backlit LCD Display
- Headset Jack
- 10 Selectable Call Tone Alerts
- 2 VOX earbuds (GMR4055-2CKHS and GMR4060-2CKHS)
- Power Boost PTT
- Roger Beep
- 2 Belt Clips
- Battery Charging Cradle
- Battery Level Meter
- 3 AA NiMH batteries per radio (GMR4055)
- Lithium Ion battery pack (GMR4060)
- 10 Hours Battery Life
- MicroUSB Charging Port
- Channel Monitor
- Channel Scan
- Vibrate
- NOAA Emergency / Weather Channels with ALERT
- Emergency Strobe
- Weather Resistant (JIS4)

* Range may vary depending on environmental and/or topographical conditions.

1	Antenna	16	tx - Transmitting
2	MicroUSB port and earbud jack	17	Vibe - Silent mode on
3	Push to Talk (PTT)	18	🔒 - Key Lock
4	Boost	19	call - Transmitting
5	Microphone	20	boost - Change transmission power from 1.0W to 2.5W.
6	Channel Up/Down	21	vol / - Volume level selected.
7	Weather/Monitor	22	vox - VOX is on.
8	Speaker	23	scan - channel scan feature on.
9	9A - Flashlight LED 9B - Flashlight button	24	Channel Number

15	🔋 - Battery Status	30	Charging LEDs

PACKAGE CONTENTS

Your package contains two radios, 6 AA rechargeable NiMH batteries (GMR4055 models) or 2 Li-Ion battery packs (GMR4060 models), one charging cradle, one AC adapter with single miniUSB connector cable, two belt clips, and this

reference guide. The GMR4055-2CKHS and GMR4060-2CKHS also include two VOX earbuds. To order Uniden accessories, visit our web site at www.uniden.com or call 1-800-554-3988 during regular business hours. Use only Uniden accessories (AC adapter with microUSB plug).

GMRS LICENSE

The radio operates on the General Mobile Radio Service (GMRS) frequencies when using Channels 1-7 and channels 15-22. You must have a GMRS license issued by the Federal Communications Commission to legally use these channels. For licensing information and application forms, visit the FCC online at www.fcc.gov/wtb/uls or call the FCC hotline at 1-800-418-3676. If you have any questions, you can contact the FCC direct at 1-888-225-5322. No license is required for operation on channels 8-14 or operation on any channel in Canada.

INSTALL THE BATTERY

GMR4055 models use NiMH AA rechargeable batteries (included) or 3 AA alkaline non-rechargeable batteries (not included). GMR4060 models use Lithium Ion battery packs.

To install the batteries/battery pack:

- Unscrew and remove the battery compartment cover.
- Install the batteries/battery pack into the battery compartment. Be certain to follow the instructions written on the label on the battery pack. Installing the batteries/battery pack incorrectly will prevent the unit from operating.
- Replace and screw in the battery compartment cover.

BATTERY LEVEL AND LOW BATTERY ALERT

This unit has a battery level meter on the display to indicate the status of the batteries. When the battery in the unit is low, the battery level meter icon  flashes. Recharge the batteries/battery pack immediately. If you are using alkaline batteries (GMR4055 models only), you must replace the alkaline batteries in order to continue using the radio.

CHARGING THE RADIO

If using rechargeable batteries/battery packs, two radios can be charged directly by using the supplied charging cradle. A single radio can charge using the miniUSB port to connect to a USB power source. For fastest charging, turn off the radio before charging.

Warning! To avoid the risk of personal injury or property damage from fire or electrical shock, only use the Uniden accessories specifically designated for this product.

Warning! Do not attempt to recharge Alkaline batteries (GMR4055 models only).

Using the miniUSB Port

- Connect the included AC adapter with miniUSB connector cable to the radio's miniUSB port. Connect the other end to an outlet that provides USB charging power (NOT to a USB hub).
- Charge the batteries/battery pack for 16 hours until the battery indicator stops flashing.

Using the Charging Cradle

- Connect the included AC adapter with USB connector cable to the charging cradle's miniUSB port. Connect the other end to a standard 120V AC wall outlet.
- Set the charging cradle on the desk or tabletop, and place the radio in the charging cradle with the keypad facing forward.
- Make sure that the LED illuminates. Charge the battery pack for 16 hours and remove the radio from the charging cradle after the charging cradle LEDs turn off.

Note:

- Use only the supplied battery and AC adapter or approved accessories from Uniden.
- Charge time may vary depending on the battery life remaining.
- Do not attempt to recharge alkaline batteries (GMR4055 models only). Doing so can create a safety hazard or damage the radio.
- The battery must be installed for the unit to operate, even if the unit is also connected to external power.
- If battery power is low, you cannot operate the radio even using external power. Allow the batteries to charge before using. If you try to transmit while power is low, the radio will automatically turn off.

USING EARBUDS

GMR4055-2CKHS and GMR4060-2CKHS come with VOX earbuds. You can use earbuds for more private communications. To use the earbud, lift the rubber cover from over the headset jack, then plug in the earbud.

Important: Your radio is not weather resistant when using earbuds. After removing an earbud, be sure to fully press the jack

cover into place to restore its weather resistant capability

USING THE RADIO

Turning the Radio On and Adjusting the Volume

- Press and hold **MENU/** repeatedly until the **scan...** icon and **oF** blink.
- Press **CH ▲ / CH ▼** to select Scan mode and press **MENU/** to start it.

To turn ON channel scan:

- Press **MENU/** repeatedly until the **scan...** icon and **oF** blink.
- Press **CH ▲ / CH ▼** to select Scan mode and press **MENU/** to start it.

To turn OFF channel scan:

- Press **MENU/** with the scan setting of **oF**.
- Press any key other than **CH ▲ / CH ▼**, **VOL ▲/VOL ▼**, or **Flashlight** to turn channel scan off in 10 seconds.

Voice Operated Transmission

Your radio is equipped with a user selectable Voice Operated Transmitter (VOX) that can be used for automatic voice transmissions. The VOX feature is designed to be used with a headset with a microphone. Transmission is initiated by speaking into the microphone instead of pressing **PTT**.

To select VOX level:

- Press **MENU/** repeatedly until the **vox** icon and the VOX sensitivity level (**oF**, 1-5) blink.
- Press **CH ▲ / CH ▼** to change the VOX sensitivity levels. Use level 1 to increase sensitivity to voice in normally quiet environments, and use a higher level to reduce undesired activation in very noisy environments.

Call Tone

Your radio is equipped with 10 selectable call tones that are transmitted when **CALL/LOCK** is pressed.

To select a call tone:

- Press **MENU/** repeatedly until the **CALL** icon and Call Tone start to blink on the display.
- Press **CH ▲ / CH ▼** to move through the available call tones. Each tone will be heard through the speaker but will not be transmitted. Cycle through these tones and stay on the tone you want to select.
- Exit Call Tone to set the selected tone.

Setting Silent Mode

When you turn on Silent mode, all incoming calls are muted; if you receive a call, the unit vibrates and the backlight flashes. If you do not respond to the call within 15 seconds, the backlight turns off. The radio will also vibrate to remind you that you missed a call. Silent mode is disabled for 15 seconds when you transmit, receive, or press any other button.

Press **MENU/** repeatedly until **vibe** and the current setting start to blink on the display.

To turn ON Silent mode:

- Press **CH ▲** to turn Silent mode on; **on** displays.
- To exit the Menu, press the **MENU/** key to advance through the Menu until exiting to "Normal" mode. **vibe** appears.

To turn OFF Silent mode:

- Press **CH ▼** to display **oF**.
- To exit the Menu, press the **MENU/** key to advance through the Menu until exiting to "Normal" mode. **vibe** disappears.

Note: To prevent unwanted silent alerts, be sure to use a Privacy code whenever you use the Silent mode feature. You can hear the received voice when you turn on channel scan and an active channel is detected even during Silent mode.

Missed Call Alerts

If you receive an incoming call while Silent mode is on and do not respond, the radio will turn on the Missed Call icon.

The radio will additionally remind you of a missed call by vibrating every minute after the call for 3 minutes.

Key Lock

To lock the keypad:

Press and hold **CALL/LOCK**;  displays.

These functions are not affected by Key Lock:

- Volume Adjust
- Call Tone Transmission
- PTT Transmission
- Boost
- Power Off
- Enter Monitor Mode
- Flashlight

To unlock the keypad:

Press and hold **CALL/LOCK** again;  disappears.

Automatic Power Save

Your radio has a circuit designed to dramatically extend the life of the batteries. If there is no transmission or an incoming call within 3 seconds, your radio switches to Power Save mode. The radio is still able to receive transmissions in this mode.

LCD Backlight

The LCD Backlight automatically turns ON when any key (except the **PTT** button) is pressed. It stays lit for 10 seconds before turning OFF.

Roger Beep

Roger Beep is a beep sound that is sent to indicate the end of transmission (both PTT and VOX transmission). Roger Beep can be heard through the speaker when both Roger Beep and Key Beep are set to ON. When Roger Beep is set to ON and Key Beep is set to OFF, Roger Beep will not be heard from the speaker but it will be transmitted to your party. When Roger Beep is set to OFF, Roger Beep will neither be heard nor transmitted.

To change Roger Beep setting:

Press and hold **VOL ▲** while turning the radio on and off. If Roger Beep is ON, it will be turned off; if it is OFF, it will be turned on.

LED Flashlight with SOS

The radio is equipped with an LED flashlight that can also flash an SOS signal during emergencies. Press the Flashlight button to cycle through the options.

- Press - turn on flashlight. (Quick press - turn off flashlight)
- Press and hold - turn on SOS signal.
- From SOS - Press to turn off SOS signal and return to flashlight.
- From flashlight - Press to turn off flashlight.

Note: The flashlight will also work when the radio is off.

USING THE WEATHER RADIO

Your radio can receive weather broadcasts from the NOAA National Weather Service. When in the Weather Radio Alert mode, the system functions as it does in standard mode but also monitors the selected weather channel for alerts when not communicating. While using the Weather Radio, you are not able to receive GMRS communications.

Your radio can receive weather broadcasts from the NOAA National Weather Service. When in the Weather Radio Alert mode, the system functions as it does in standard mode but also monitors the selected weather channel for alerts when not communicating. While using the Weather Radio, you are not able to receive GMRS communications.

- To turn on the Weather Radio Broadcast mode, press **WX/MON**. The  icon appears.
- Press **CH ▲/CH ▼** to increase or decrease the number to the desired Weather Channel.
- To exit the Weather Radio Broadcast mode, press **WX/MON**. The  icon disappears.

Choosing an Emergency/Weather Channel

There are 7 NOAA channel frequencies available and these frequencies are common between the US and Canada. You need to know what frequency is being transmitted in your location.

Press **MENU/** repeatedly until the **alert** icon and the current setting start to blink on the display.

To turn ON Weather Alert:

- Press **CH ▲** to display **on**.
- To exit the Menu, press the **MENU/** key to advance you through the Menu until exiting to "Normal" mode. **alert** icon appears.
- When the unit receives a warning signal, it beeps for 5 seconds. **alert** and channel indicator flash.

To turn OFF Weather Alert:

- Press **CH ▼** to display **oF**.
- To exit the Menu, press the **MENU/** key advance you through the Menu until exiting to "Normal" mode. **alert** icon disappears.
 - When Weather Alert is activated, the highest priority is given to this function. It checks the weather alert signals every 5 seconds. When the unit finds a warning signal, it switches to the warning receive mode automatically.
 - Weather Alert is activated even if Beep Tone is turned off.

RBRC INFORMATION

As part of our commitment to protect the environment and conserve natural resources, Uniden voluntarily participates in an RBRC® industry program to collect and recycle used Ni-MH and Li-Ion batteries within the US.

Please call 1-800-8-BATTERY for information on Ni-MH and Li-Ion battery recycling in your area. (RBRC® is a registered trademark of the Rechargeable Battery Recycling Corporation.)

Care and Safety: To clean the radio, use a soft cloth dampened with water. Do not use cleaners or solvents because they can harm the body of the unit and leak inside, causing permanent damage. Use a dry, lint-free cloth to clean the battery contacts. Do not submerge the unit in water. If the unit gets wet, turn it off and remove the batteries immediately.

Dry the battery compartment with a soft cloth to minimize potential water damage. Leave the battery compartment cover off overnight to ensure complete drying. Do not use the radio until the unit is completely dry.

REGULATORY INFORMATION

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

Important: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this device. Your radio is set up to transmit a regulated signal on an assigned frequency. It is against the law to alter or adjust the settings inside the radio to exceed those limitations. Any adjustments to your radio must be made by qualified technicians.

To be safe and sure:

- Never open your radio's case.
- Never change or replace anything in your radio except the batteries.

Your radio might cause TV or radio interference even when it is operating properly. To determine whether your radio is causing the interference, turn it off. If the interference goes away, your radio is causing it. Try to eliminate the interference by moving your radio away from the receiver. If you cannot eliminate the interference, the FCC requires that you stop using the radio.

Hazardous Environments: Do not operate the radio in hazardous environments. Explosion or fire may result. Do not operate the radio near unshielded electrical blasting caps.

Under certain conditions, radios can interfere with blasting operations and may cause an explosion. Turn your radio OFF to prevent accidental transmission when in a blasting area or in areas posted: "Turn off two-way radio." Construction crews often use remote control RF devices to set off explosives.

Care and Safety: To clean the radio, use a soft cloth dampened with water. Do not use cleaners or solvents because they can harm the body of the unit and leak inside, causing permanent damage. Use a dry, lint-free cloth to clean the battery contacts. Do not submerge the unit in water. If the unit gets wet, turn it off and remove the batteries immediately.

Dry the battery compartment with a soft cloth to minimize potential water damage. Leave the battery compartment cover off overnight to ensure complete drying. Do not use the radio until the unit is completely dry.

WARNING! Read this information before using the radio. In August 1996 the Federal Communications Commission (FCC) of the United States with its action in Report and Order FCC 96-326 adopted an updated safety standard for human exposure to radio frequency electromagnetic energy emitted by FCC regulated transmitters.

Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies. The design of the radio complies with the FCC guidelines and these international standards.

Never allow children to operate the radio without adult supervision and the knowledge of the following guidelines.

WARNING! It is up to the user to properly operate this radio transmitter to insure safe operation. Please adhere to the following:

Do not use the radio with a damaged antenna. If a damaged antenna comes into contact with the skin, a minor burn may result. Please contact your local dealer for a replacement antenna.

IC INFORMATION

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Unauthorized changes or modifications to this equipment may void compliance with I.C. Rules. Any change or modification must be approved in writing by Uniden. Changes or modifications not approved by Uniden could void the user's authority to operate the equipment.

L'appareil est conforme aux normes d'Industrie Canada. Son fonctionnement est soumis aux deux conditions suivantes : (1) Ce dispositif ne doit pas causer d'interférences et (2), il doit pouvoir accepter les interférences, incluant celles pouvant nuire à son fonctionnement normal.

Tous les changements apportés à cet appareil, s'ils ne sont pas expressément approuvés par Uniden ou toute utilisation de celui-ci d'une autre manière que celle décrite dans ce guide peut annuler votre autorisation de le faire fonctionner.

Hand-Held Operation (Held-to-Face)

This device was evaluated for typical hand-held (held-to-face) operations with a 1 inch spacing from the front of the radio. For hand-held operation, the radio should be held 1 inch from the user's face in order to comply with FCC RF exposure requirements.

Body-Worn Operation

This device was evaluated for body-worn operations with the supplied belt-clip accessory. (All necessary accessories are included in the package; any additional or optional accessories are not required for compliance with the guidelines.) Third party accessories (unless approved by the manufacturer) should be avoided as these might not comply with FCC RF exposure guidelines.

For body worn operation, this device has been tested and meets the Industry Canada RF exposure guidelines when used with Uniden accessories supplied or designated for this product. Use of other accessories may not ensure compliance with Industry Canada RF exposure guidelines.

Fonctionnement de l'appareil, lorsque porté sur le corps. Cet appareil a été testé et s'est avéré conforme aux normes d'Industrie Canada et approuvé pour le port sur le corps à l'aide des accessoires Uniden inclus et conçus pour cet appareil. L'utilisation d'accessoires ne respectant pas les exigences d'exposition RF d'Industrie Canada doit être évitée.

ONE-YEAR WARRANTY

IMPORTANT: *SAVE YOUR RECEIPT! Evidence of original purchase is required for warranty service.*

WARRANTOR: UNIDEN AMERICA CORPORATION ("Uniden")

ELEMENTS OF WARRANTY: Uniden warrants, for one year, to the original retail owner, this Uniden Product to be free from defects in materials and craftsmanship with only the limitations or exclusions set out below.

WARRANTY DURATION: This warranty to the original user shall terminate and be of no further effect 12 months after the date of original retail sale. The warranty is invalid if the Product is: (A) damaged or not maintained as reasonable or necessary, (B) modified, altered, or used as part of any conversion kits, sub-

assemblies, or any configurations not sold by Uniden, (C) improperly installed, (D) serviced or repaired by someone other than an authorized Uniden service center for a defect or malfunction covered by this warranty, (E) used in any conjunction with equipment or parts or as part of any system not manufactured by Uniden, or (F) installed or programmed by anyone other than as detailed by the owner's manual for this product.

STATEMENT OF REMEDY: In the event that the product does not conform to this warranty at any time while this warranty is in effect, warrantor will either, at its option, repair or replace the defective unit and return it to you without charge for parts, service, or any other cost (except shipping and handling) incurred by warrantor or its representatives in connection with the performance of this warranty. Warrantor, at its option, may replace the unit with a new or refurbished unit.

THE LIMITED WARRANTY SET FORTH ABOVE IS THE SOLE AND ENTIRE WARRANTY PERTAINING TO THE PRODUCT AND IS IN LIEU OF AND EXCLUDES ALL OTHER WARRANTIES OF ANY NATURE WHATSOEVER, WHETHER EXPRESS, IMPLIED OR ARISING BY OPERATION OF LAW, INCLUDING, BUT NOT LIMITED TO ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. THIS WARRANTY DOES NOT COVER OR PROVIDE FOR THE REIMBURSEMENT OVERPAYMENT OF INCIDENTAL OR CONSEQUENTIAL DAMAGES. Some states do not allow this exclusion or limitation of incidental or consequential damages so the above limitation or exclusion may not apply to you.

LEGAL REMEDIES: This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. This warranty is void outside the United States of America and Canada.

PROCEDURE FOR OBTAINING PERFORMANCE OF WARRANTY:

If, after following the instructions in the owner's manual you are certain that the Product is defective, pack the Product carefully (preferably in its original packaging). Disconnect the battery from the Product and separately secure the battery in its own separate packaging within the shipping carton. The Product should include all parts and accessories originally packaged with the Product. Include evidence of original purchase and a note describing the defect that has caused you to return it. The Product should be shipped freight prepaid, by traceable means, to warrantor at:

Uniden America Corporation
